For the fiscal year ended December 31, 2014

OR

☐ **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from ________ to ______.

OR

☐ **SHELL COMPANY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

Date of event requiring this shell company report________.

Commission file number 000-53445

KB Financial Group Inc.

(Exact name of Registrant as specified in its charter)

KB Financial Group Inc.

(Translation of Registrant's name into English)

The Republic of Korea

(Jurisdiction of incorporation or organization)

84, Namdaemoon-ro, Jung-gu, Seoul 100-703, Korea

(Address of principal executive offices)

Kyu Sul Choi

84, Namdaemoon-ro, Jung-gu, Seoul 100-703, Korea

Telephone No.: +82-2-2073-2844

Facsimile No.: +82-2-2073-2848

(Name, telephone, e-mail and/or facsimile number and address of company contact person)

Securities registered or to be registered pursuant to Section 12(b) of the Act.

Title of each class	Name of each exchange on which registered
American Depositary Shares, each representing one share of Common Stock	New York Stock Exchange
Common Stock, par value ₩5,000 per share	New York Stock Exchange*

Securities registered or to be registered pursuant to Section 12(g) of the Act.

None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act.

None

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report.

386,351,693 shares of Common Stock, par value ₩5,000 per share

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. ☒ Yes ☐ No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. ☐ Yes ☒ No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. ☒ Yes ☐ No

Indicate by check mark whether the registrant has submitted electronically and posted on its Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). ☐ Yes ☐ No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

☒ Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

☐ U.S. GAAP ☒ International Financial Reporting Standards as issued by the International Accounting Standards Board ☐ Other

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow. ☐ Item 17 ☐ Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). ☐ Yes ☒ No

(APPLICABLE ONLY TO ISSUERS INVOLVED IN BANKRUPTCY PROCEEDINGS DURING THE PAST FIVE YEARS)

Indicate by check mark whether the registrant has filed all documents and reports required to be filed by Sections 12, 13 or 15(d) of the Securities Exchange Act of 1934 subsequent to the distribution of securities under a plan confirmed by a court. ☐ Yes ☐ No

* Not for trading, but only in connection with the registration of the American Depositary Shares.

TABLE OF CONTENTS

PRESENTATION OF FINANCIAL AND OTHER INFORMATION

The financial statements included in this annual report are prepared in accordance with International Financial Reporting Standards, or IFRS, as issued by the International Accounting Standards Board, or IASB. As such, we make an explicit and unreserved statement of compliance with IFRS as issued by the IASB with respect to our consolidated financial statements as of January 1, 2013, December 31, 2013 and 2014 and for the years ended December 31, 2012, 2013 and 2014 included in this annual report. Unless indicated otherwise, the financial information in this annual report as of and for the years ended December 31, 2010, 2011, 2012, 2013 and 2014 has been prepared in accordance with IFRS as issued by the IASB, which is not comparable to information prepared in accordance with generally accepted accounting principles in the United States, or U.S. GAAP.

In accordance with rule amendments adopted by the U.S. Securities and Exchange Commission which became effective on March 4, 2008, we are not required to provide a reconciliation to U.S. GAAP.

Unless expressly stated otherwise, all financial data included in this annual report are presented on a consolidated basis.

In this annual report:

- references to “we,” “us” or “KB Financial Group” are to KB Financial Group Inc. and, unless the context otherwise requires, its subsidiaries;
- references to “Korea” are to the Republic of Korea;
- references to the “government” are to the government of the Republic of Korea;
- references to “Won” or “₩” are to the currency of Korea; and
- references to “U.S. dollars,” “$” or “US$” are to United States dollars.

Discrepancies between totals and the sums of the amounts contained in any table may be a result of rounding.

For your convenience, this annual report contains translations of Won amounts into U.S. dollars at the noon buying rate of the Federal Reserve Bank of New York for Won in effect on December 31, 2014, which was ₩1,090.9 = US$1.00.

FORWARD-LOOKING STATEMENTS

The U.S. Securities and Exchange Commission encourages companies to disclose forward-looking information so that investors can better understand a company's future prospects and make informed investment decisions. This annual report contains forward-looking statements.

Words and phrases such as "aim," "anticipate," "assume," "believe," "contemplate," "continue," "estimate," "expect," "future," "goal," "intend," "may," "objective," "plan," "positioned," "predict," "project," "risk," "seek to," "shall," "should," "will likely result," "will pursue," "plan" and words and terms of similar substance used in connection with any discussion of future operating or financial performance or our expectations, plans, projections or business prospects identify forward-looking statements. In particular, the statements under the headings "Item 3.D. Risk Factors," "Item 5. Operating and Financial Review and Prospects" and "Item 4.B. Business Overview" regarding our financial condition and other future events or prospects are forward-looking statements. All forward-looking statements are management's present expectations of future events and are subject to a number of factors and uncertainties that could cause actual results to differ materially from those described in the forward-looking statements.

In addition to the risks related to our business discussed under "Item 3.D. Risk Factors," other factors could cause actual results to differ materially from those described in the forward-looking statements. These factors include, but are not limited to:

- our ability to successfully implement our strategy;
- future levels of non-performing loans;
- our growth and expansion;
- the adequacy of allowances for credit and investment losses;
- technological changes;
- interest rates;
- investment income;
- availability of funding and liquidity;
- cash flow projections;
- our exposure to market risks; and
- adverse market and regulatory conditions.

By their nature, certain disclosures relating to these and other risks are only estimates and could be materially different from what actually occurs in the future. As a result, actual future gains, losses or impact on our income or results of operations could materially differ from those that have been estimated. For example, revenues could decrease, costs could increase, capital costs could increase, capital investment could be delayed and anticipated improvements in performance might not be fully realized.

In addition, other factors that could cause actual results to differ materially from those estimated by the forward-looking statements contained in this annual report could include, but are not limited to:

- general economic and political conditions in Korea or other countries that have an impact on our business activities or investments;
- the monetary and interest rate policies of Korea;
- inflation or deflation;
- unanticipated volatility in interest rates;

- foreign exchange rates;
- prices and yields of equity and debt securities;
- the performance of the financial markets in Korea and globally;
- changes in domestic and foreign laws, regulations and taxes;
- changes in competition and the pricing environments in Korea; and
- regional or general changes in asset valuations.

For further discussion of the factors that could cause actual results to differ, see the discussion under "Item 3.D. Risk Factors" contained in this annual report. We caution you not to place undue reliance on the forward-looking statements, which speak only as of the date of this annual report. Except as required by law, we are not under any obligation, and expressly disclaim any obligation, to update or alter any forward-looking statements, whether as a result of new information, future events or otherwise.

All subsequent forward-looking statements attributable to us or any person acting on our behalf are expressly qualified in their entirety by the cautionary statements contained or referred to in this annual report.

Item 1. IDENTITY OF DIRECTORS, SENIOR MANAGEMENT AND ADVISERS

Not applicable.

Item 2. OFFER STATISTICS AND EXPECTED TIMETABLE

Not applicable.

Item 3. KEY INFORMATION

Item 3.A. *Selected Financial Data*

The selected consolidated financial and operating data set forth below as of and for the years ended December 31, 2010, 2011, 2012, 2013 and 2014 have been derived from our audited consolidated financial statements, which have been prepared in accordance with IFRS as issued by the IASB. Our consolidated financial statements as of and for the years ended December 31, 2010, 2011, 2012, 2013 and 2014 have been audited by independent registered public accounting firm Samil PricewaterhouseCoopers.

You should read the following data together with the more detailed information contained in "Item 5. Operating and Financial Review and Prospects" and our consolidated financial statements included elsewhere in this annual report. Historical results do not necessarily predict future results.

Consolidated statements of comprehensive income data

	Year Ended December 31,					
	2010[1]	2011[1]	2012[1][2]	2013[1][2]	2014[1][2]	2014[3]
	(in billions of Won, except common share data)					(in millions of US$, except common share data)
Interest income	₩ 13,052	₩ 13,956	₩ 14,210	₩ 12,357	₩ 11,635	US$ 10,666
Interest expense	(6,878)	(6,852)	(7,172)	(5,834)	(5,219)	(4,785)
Net interest income	6,174	7,104	7,038	6,523	6,416	5,881
Fee and commission income	2,482	2,830	2,754	2,657	2,666	2,444
Fee and commission expense	(777)	(1,035)	(1,187)	(1,178)	(1,283)	(1,176)
Net fee and commission income	1,705	1,795	1,567	1,479	1,383	1,268

	₩ (10)	₩ 2,473	₩ 1,924	₩ 1,302	₩ 1,539	US$ 1,411
Earnings per share[4]						
Basic earnings per share	₩ (558)	₩ 7,310	₩ 4,580	₩ 3,291	₩ 3,626	US$ 3.32
Diluted earnings per share	(558)	7,293	4,567	3,277	3,611	3.31

(1) Pursuant to amendments to International Accounting Standards 19, or IAS 19, *Employee Benefits*, which are effective beginning in 2013, our consolidated financial statements as of and for the years ended December 31, 2013 and 2014 reflect changes in the methodology for recognition and measurement of actuarial gains and losses and expected returns and service costs relating to our employee pension plans. Our consolidated financial statements as of and for the year ended December 31, 2012 have been restated to retroactively apply such changes. Amounts for 2012 reflect such restatement, and amounts for 2010 and 2011 have been correspondingly restated.

(2) Pursuant to the adoption of IFRS 10, *Consolidated Financial Statements*, which is effective beginning in 2013, our consolidated financial statements as of and for the years ended December 31, 2013 and 2014 include trust accounts for which we guarantee only the repayment of principal, as well as certain other entities, which were not previously subject to consolidation, while excluding certain other entities that were previously consolidated. Our consolidated financial statements as of and for the year ended December 31, 2012 have been restated to retroactively apply this change. Amounts for 2012 reflect such restatement, while amounts for 2010 and 2011 have not been correspondingly restated.

(3) Won amounts are expressed in U.S. dollars at the rate of ₩1,090.9 to US$1.00, the noon buying rate in effect on December 31, 2014 as quoted by the Federal Reserve Bank of New York in the United States.

(4) The amounts for 2014 reflect a change in our accounting policy with respect to uncertain tax positions in 2014, based on the guidance in International Accounting Standards 12, or IAS 12, *Income Taxes*, which allows recognition of tax payments as current income tax assets to the extent it is probable that they will be recovered from the tax authorities. Corresponding amounts for 2010, 2011, 2012 and 2013 have been restated to retroactively apply this change. See "Item 5.A. Operating Results—Overview—Changes in Accounting Policies" and Note 2.1 of the notes to our consolidated financial statements included elsewhere in this annual report.

(1) Pursuant to amendments to IAS19, *Employee Benefits*, which are effective beginning in 2013, our consolidated financial statements as of and for the years ended December 31, 2013 and 2014 reflect changes in the methodology for recognition and measurement of actuarial gains and losses and expected returns and service costs relating to our employee pension plans. Our consolidated financial statements as of and for the year ended December 31, 2012 have been restated to retroactively apply such changes. Amounts as of December 31, 2012 reflect such restatement, and amounts as of December 31, 2010 and 2011 have been correspondingly restated.

(2) Pursuant to the adoption of IFRS 10, *Consolidated Financial Statements*, which is effective beginning in 2013, our consolidated financial statements as of and for the years ended December 31, 2013 and 2014 include trust accounts for which we guarantee only the repayment of principal, as well as certain other entities, which were not previously subject to consolidation, while excluding certain other entities that were previously consolidated. Our consolidated financial statements as of and for the year ended December 31, 2012 have been restated to retroactively apply this change. Amounts as of December 31, 2012 reflect such restatement, while amounts as of December 31, 2010 and 2011 have not been correspondingly restated.

(3) Won amounts are expressed in U.S. dollars at the rate of ₩1,090.9 to US$1.00, the noon buying rate in effect on December 31, 2014 as quoted by the Federal Reserve Bank of New York in the United States.

(4) The amounts as of December 31, 2014 reflect a change in our accounting policy with respect to uncertain tax positions in 2014, based on the guidance in IAS 12, *Income Taxes*, which allows recognition of tax payments as current income tax assets to the extent it is probable that they will be recovered from the tax authorities. Corresponding amounts as of December 31, 2010, 2011, 2012 and 2013 have been restated to retroactively apply this change. See "Item 5.A. Operating Results—Overview—Changes in Accounting Policies" and Note 2.1 of the notes to our consolidated financial statements included elsewhere in this annual report.

(5) Prepaid income tax expenses amounting to ₩135 billion, ₩12 billion, ₩15 billion and ₩18 billion as of December 31, 2010, 2011, 2012 and 2013, respectively, have been reclassified from other assets into current income tax assets. See Note 33 of the notes to our consolidated financial statements included elsewhere in this annual report.

Profitability ratios and other data

	As of or for the year Ended December 31,				
	2010	2011	2012	2013	2014
			(Percentages)		
Profit (loss) attributable to stockholders as a percentage of:					
Average total assets(1)	(0.07)%	0.99%	0.60%	0.44%	0.47%
Average stockholders' equity(1)	(0.98)	11.47	7.13	5.00	5.30
Dividend payout ratio(2)	(21.47)	10.23	13.40	15.01	21.48
Net interest spread(3)	2.37	2.64	2.48	2.31	2.22
Net interest margin(4)	2.58	2.88	2.71	2.51	2.39
Efficiency ratio(5)	57.44	43.96	48.78	53.45	55.72
Cost-to-average assets ratio(6)	1.64	1.41	1.33	1.37	1.34
Won loans (gross) as a percentage of Won deposits	107.56	107.97	106.37	107.12	107.73
Total loans (gross) as a percentage of total deposits	111.96	113.25	109.92	110.44	110.57

(1) Average balances are based on daily balances for our banking, credit card and investment and securities operations and monthly or quarterly balances for our other operations.
(2) Represents the ratio of total dividends declared on common stock as a percentage of profit attributable to stockholders.
(3) Represents the difference between the yield on average interest earning assets and cost of average interest bearing liabilities.
(4) Represents the ratio of net interest income to average interest earning assets.
(5) Represents the ratio of general and administrative expenses to the sum of net interest income, net fee and commission income, net gain on financial assets and liabilities at fair value through profit or loss and net other operating income.
(6) Represents the ratio of general and administrative expenses to average total assets.

Capital ratios

	As of or for the year Ended December 31,		
	2012[1]	2013	2014
		(Percentages)	
Consolidated capital adequacy ratio of KB Financial Group[2]	13.90%	15.38%	15.53%
Capital adequacy ratios of Kookmin Bank			
Tier I capital adequacy ratio[3]	10.87	12.61	13.38
Common equity Tier I capital adequacy ratio[3]	—	12.61	13.38
Tier II capital adequacy ratio[3]	3.53	2.81	2.59
Average stockholders' equity as a percentage of average total assets	8.47	8.87	8.83

(1) With effect from December 1, 2013, the Financial Services Commission adopted amended guidelines that implemented capital adequacy requirements in Korea based on Basel III. Capital adequacy ratios as of December 31, 2012 were computed in accordance with previously applicable guidelines based on Basel I (for KB Financial Group) and Basel II (for Kookmin Bank) and therefore are not directly comparable to corresponding ratios as of December 31, 2013 and 2014.
(2) Under applicable guidelines of the Financial Services Commission, we, as a bank holding company, are required to maintain a minimum consolidated capital adequacy ratio of 8%. See "Item 4.B. Business Overview—Supervision and Regulation—Principal Regulations Applicable to Financial Holding Companies—Capital Adequacy."
(3) Kookmin Bank's capital adequacy ratios are computed in accordance with the guidelines issued by the Financial Services Commission. See "Item 4.B. Business Overview—Supervision and Regulation—Principal Regulations Applicable to Banks—Capital Adequacy."

Credit portfolio ratios and other data

	As of December 31,				
	2010	2011	2012	2013	2014
	(in billions of Won, except percentages)				
Total loans[1]	₩201,377	₩215,555	₩216,914	₩221,862	₩233,902
Total non-performing loans[2]	1,612	1,180	1,606	1,421	1,068
Other impaired loans not included in non-performing loans	2,204	2,285	2,086	2,669	1,996
Total of non-performing loans and other impaired loans	3,816	3,465	3,692	4,090	3,064
Total allowances for loan losses	3,756	3,448	3,269	2,861	2,452

(1) Average balances are based on daily balances for our banking, credit card and investment and securities operations and monthly or quarterly balances for our other operations.

(2) We do not invest in any tax-exempt securities.

(3) Excludes interest income from debt securities at fair value through profit or loss.

(4) Information related to investment securities classified as available-for-sale has been computed using amortized cost, and therefore does not give effect to changes in fair value that are reflected as a component of total equity.

(5) Interest income from credit cards includes principally cash advance fees of ₩447 billion, ₩353 billion and ₩276 billion and interest on credit card loans of ₩457 billion, ₩435 billion and ₩408 billion for the years ended December 31, 2012, 2013 and 2014, respectively, but does not include interchange fees.

The following table presents our net interest spread, net interest margin, and asset liability ratio for the past three years:

	Year Ended December 31,		
	2012	2013	2014
	(percentages)		
Net interest spread (1)	2.48%	2.31%	2.22%
Net interest margin (2)	2.71	2.51	2.39
Average asset liability ratio (3)	108.01	108.89	108.77

(1) The difference between the average rate of interest earned on interest earning assets and the average rate of interest paid on interest bearing liabilities.

(2) The ratio of net interest income to average interest earning assets.

(3) The ratio of average interest earning assets to average interest bearing liabilities.

Analysis of Changes in Net Interest Income—Volume and Rate Analysis

The following table provides an analysis of changes in interest income, interest expense and net interest income based on changes in volume and changes in rate for 2012 compared to 2013 and 2013 compared to 2014. Information is provided with respect to: (1) effects attributable to changes in volume (changes in volume multiplied by prior rate) and (2) effects attributable to changes in rate (changes in rate multiplied by prior volume). Changes attributable to the combined impact of changes in rate and volume have been allocated proportionately to the changes due to volume changes and changes due to rate changes.

	2013 vs. 2012 Increase/(Decrease) Due to Change in			2014 vs. 2013 Increase/(Decrease) Due to Change in

Exchange Rates

The table below sets forth, for the periods and dates indicated, information concerning the noon buying rate for Won, expressed in Won per one U.S. dollar. The "noon buying rate" is the rate in New York City for cable transfers in foreign currencies as certified for customs purposes by the Federal Reserve Bank of New York. Unless otherwise stated, translations of Won amounts into U.S. dollars in this annual report were made at the noon buying rate in effect on December 31, 2014, which was ₩1,090.9 to US$1.00. We do not intend to imply that the Won or U.S. dollar amounts referred to herein could have been or could be converted into U.S. dollars or Won, as the case may be, at any particular rate, or at all. On April 24, 2015, the noon buying rate was ₩1,075.9 = US$1.00.

	Won per U.S. dollar (noon buying rate)			
	Low	High	Average (1)	Period-End
2010	1,104.0	1,253.2	1,155.7	1,130.6
2011	1,049.2	1,197.5	1,106.9	1,158.5
2012	1,063.2	1,185.0	1,126.2	1,063.2
2013	1,050.1	1,161.3	1,094.7	1,055.3
2014	1,008.9	1,117.7	1,052.3	1,090.9
October	1,043.9	1,074.4	1,060.3	1,073.1

Item 3.C. *Reasons for the Offer and Use of Proceeds*

Not applicable.

Item 3.D. *Risk Factors*

Risks relating to our retail credit portfolio

Future changes in market conditions as well as other factors may lead to increases in delinquency levels of our retail loan portfolio.

In recent years, consumer debt has increased significantly in Korea. Our portfolio of retail loans, including mortgage and home equity loans, decreased slightly from ₩103,855 billion as of December 31, 2011 to ₩103,432 billion as of December 31, 2012 but increased to ₩107,644 billion as of December 31, 2013 and ₩119,249 billion as of December 31, 2014. As of December 31, 2014, our retail loans represented 51.0% of our total lending. Within our retail loan portfolio, the outstanding balance of other consumer loans, which unlike mortgage or home equity loans are often unsecured and therefore tend to carry a higher credit risk, has increased from ₩28,275 billion as of December 31, 2011 to ₩32,255 billion as of December 31, 2014; as a percentage of total outstanding retail loans, such balance has remained relatively stable at 27.2% as of December 31, 2011 and

27.0% as of December 31, 2014. The growth of our retail lending business, which generally offers higher margins than other lending activities, contributed significantly to our interest income and profitability in recent years.

The growth of our retail loan portfolio, together with adverse economic conditions in Korea and globally in recent years, may lead to further increases in delinquency levels and a deterioration in asset quality. The amount of our non-performing retail loans (defined as those that are past due by 90 days or more) increased from ₩642 billion as of December 31, 2011 to ₩762 billion as of December 31, 2012 but decreased to ₩546 billion as of December 31, 2013 and ₩395 billion as of December 31, 2014. However, higher delinquencies in our retail loan portfolio in the future will require us to increase our loan loss provisions and charge-offs, which in turn will adversely affect our financial condition and results of operations.

Our large exposure to consumer debt means that we are exposed to changes in economic conditions affecting Korean consumers. Accordingly, a rise in unemployment, an increase in interest rates, a deterioration of the real estate market or difficulties in the Korean economy may have an adverse effect on Korean consumers, which could result in reduced growth and further deterioration in the credit quality of our retail loan portfolio. See “Risks relating to Korea—Unfavorable financial and economic developments in Korea may have an adverse effect on us.” In order to minimize our risk as a result of such exposure, we are continuing to strengthen our risk management processes, including further improving the retail lending process, upgrading our retail credit rating system, as well as strengthening the overall management of our portfolio. Despite our efforts, however, there is no assurance that we will be able to prevent significant credit quality deterioration in our retail loan portfolio.

In light of adverse conditions in the Korean economy affecting consumers, in March 2009, the Financial Services Commission requested Korean banks, including us, to establish a “pre-workout program,” including a credit counseling and recovery service, for retail borrowers with outstanding short-term debt. Under the pre-workout program, which has been in operation since April 2009, maturity extensions and/or interest reductions are provided for retail borrowers with total loans of ₩1.5 billion or less (consisting of no more than ₩500 million of unsecured loans and ₩1 billion of secured loans) who are in arrears on their payments for more than 30 days but less than 90 days or for retail borrowers with an annual income of ₩40 million or less who have been in arrears on their payments for more than 30 days on an aggregate basis for the 12 months prior to their application. In addition, in March 2015, in response to increasing levels of consumer debt and amid concerns over the debt-servicing capacity of retail borrowers if interest rates were to rise, the Korean government launched, and requested Korean banks to participate in, a mortgage loan refinancing program aimed at reducing the payment burden on and improving the asset quality of outstanding mortgage loans. Under such refinancing program, over 340,000 qualified retail borrowers converted their outstanding non-amortizing floating-rate mortgage loans from Korean commercial banks (including us) into amortizing fixed-rate mortgage loans with lower interest rates, amounting to an aggregate principal amount of ₩34 trillion for all commercial banks in 2015. Our participation in such refinancing program may lead to a decrease in our interest income on our outstanding mortgage loans, as well as in our overall net interest margin. More generally, our participation in such government-led initiatives to provide financial support to retail borrowers may lead us to offer credit terms for such borrowers that we would not otherwise offer, in the absence of such initiatives, which may have an adverse effect on our results of operations and financial condition.

Our credit card operations may generate losses in the future, which could hurt our financial condition and results of operations.

With respect to our credit card portfolio, our delinquency ratio (which represents the ratio of amounts that are overdue by 30 days or more to total outstanding balances) decreased from 1.5% as of December 31, 2011 to 1.3% as of December 31, 2012, increased to 1.7% as of December 31, 2013 and decreased to 1.5% as of December 31, 2014. In line with industry practice, we have restructured a portion of delinquent credit card account balances (defined as balances overdue by 30 days or more) as loans. As of December 31, 2014, these restructured loans outstanding amounted to ₩45 billion. Because these loans are not treated as being delinquent at the time of conversion or for a period of time thereafter, our delinquency ratios may not fully reflect all delinquent amounts relating to our outstanding loans. Including all restructured loans, outstanding balances overdue by 30 days or more accounted for 1.9% of our credit card receivables (including credit card loans) as of December 31, 2014. Delinquencies may increase further in 2015 and in the future as a result of, among other things, adverse economic conditions in Korea and the inability of Korean consumers to manage increased household debt.

Despite our continuing efforts to sustain and improve our credit card asset quality and performance, we may experience increased delinquencies or deterioration of the asset quality of our credit card portfolio, which would require us to increase our loan loss provisions and charge-offs and adversely affect our overall financial condition and results of operations.

In addition, in February 2014, the Financial Services Commission suspended the new credit card issuance and other related activities of our credit card subsidiary, KB Kookmin Card Co., Ltd., for three months from February to May 2014, in response to an incident involving the misappropriation of the personal information of a large number of its customers by an employee of an external credit information company in the first half of 2013. Specifically, during such suspension period, KB Kookmin Card was prohibited from engaging in the following activities:

- adding new subscribers for credit cards, prepaid cards and debit cards or issuing such types of cards (except as permitted by the chairman of the Financial Services Commission for public policy purposes);
- providing new or additional credit lines to credit card customers; and
- providing new services through mail order or telemarketing channels or related to travel or insurance products.

Furthermore, in connection with the misappropriation incident, a number of customers have filed lawsuits against KB Kookmin Card seeking damages, and it could become subject to additional litigation and regulatory sanctions. See “Item 8A. Consolidated Statements and Other Financial Information—Legal Proceedings.” KB Kookmin Card has also incurred and may continue to incur significant costs relating to the issuance of replacement cards for customers and the compensation of customers for losses incurred as a result of the fraudulent use of the misappropriated personal information. Accordingly, the misappropriation incident and the resulting regulatory sanctions (including the three-month suspension of KB Kookmin Card’s new business activities), customer claims and costs could have a material adverse effect on our business, reputation, results of operations and financial condition.

Risks relating to our small- and medium-sized enterprise loan portfolio

We have significant exposure to small- and medium-sized enterprises, and any financial difficulties experienced by these customers may result in a deterioration of our asset quality and have an adverse impact on us.

One of our core businesses is lending to small- and medium-sized enterprises (as defined under “Item 4.B. Business Overview—Corporate Banking—Small- and Medium-sized Enterprise Banking”). Our loans to small- and medium-sized enterprises increased from ₩68,730 billion as of December 31, 2011 to ₩71,960 billion as of December 31, 2014. During that period, non-performing loans (defined as those loans that are past due by 90 days or more) to small- and medium-sized enterprises increased from ₩373 billion as of December 31, 2011 to ₩680 billion as of December 31, 2012 but decreased to ₩373 billion as of December 31, 2014, and the non-performing loan ratio for such loans increased from 0.5% as of December 31, 2011 to 0.8% as of December 31, 2013 but decreased to 0.5% as of December 31, 2014. However, our non-performing loans and non-performing loan ratio may increase in 2015. According to data compiled by the Financial Supervisory Service, the delinquency ratio for Won-currency loans by Korean commercial banks to small- and medium-sized enterprises was 0.8% as of December 31, 2014. The delinquency ratio for loans to small- and medium-sized enterprise is calculated as the ratio of (1) the outstanding balance of such loans in respect of which either principal or interest payments are overdue by one month or more to (2) the aggregate outstanding balance of such loans. Our delinquency ratio for such Won currency loans remained relatively stable at 1.0% as of December 31, 2011, 1.1% as of December 31, 2012 and 0.9% as of December 31, 2013, but decreased to 0.6% as of December 31, 2014. However, our delinquency ratio for such Won currency loans may increase in 2015. In recent years, we have taken measures which sought to stem rising delinquencies in our loans to small- and medium-sized enterprises, including through strengthening the review of loan applications and closer monitoring of the post-loan performance of small- and medium-sized enterprise borrowers in industry sectors that are relatively more sensitive to downturns in the economy and have shown higher delinquency ratios, such as construction, lodging, retail and wholesale, restaurants and real estate. Despite such efforts, however, there is no assurance that delinquency levels for our loans to small- and medium-sized enterprises will not rise in the future. In particular, financial difficulties experienced by small- and medium-sized enterprises as a result of, among other things, adverse economic conditions in Korea and globally in recent years may lead to a deterioration in the asset quality of our loans to this segment. Any such deterioration would result in increased charge-offs and higher provisioning and reduced interest and fee income from this segment, which could have a material adverse impact on our financial condition and results of operations.

In addition, many small- and medium-sized enterprises have close business relationships with the largest Korean commercial conglomerates, known as "*chaebols*," primarily as suppliers. Any difficulties encountered by those *chaebols* would likely hurt the liquidity and financial condition of related small- and medium-sized enterprises, including those to which we have exposure, also resulting in an impairment of their ability to repay loans.

A substantial part of our small- and medium-sized enterprise lending comprises loans to "small office/home office" customers, or SOHOs. SOHOs, which we currently define to include sole proprietorships and individual business interests, are usually dependent on a limited number of suppliers or customers. SOHOs tend to be affected to a greater extent than larger corporate borrowers by fluctuations in the Korean economy. In addition, SOHOs often maintain less sophisticated financial records than other corporate borrowers. Although we continue to make efforts to improve our internally developed credit rating systems to rate potential borrowers, particularly with respect to SOHOs, and intend to manage our exposure to these borrowers closely in order to prevent any deterioration in the asset quality of our loans to this segment, we may not be able to do so as intended.

In light of the deteriorating financial condition and liquidity position of small- and medium-sized enterprises in Korea since the global financial crisis commencing in the second half of 2008, the Korean government introduced policies and initiatives intended to encourage Korean banks to provide financial support to small- and medium-sized enterprises. For example, in November 2008, we entered into a memorandum of understanding with the Financial Supervisory Service under which we were required to improve the liquidity position of small- and medium-sized enterprises and exporters by providing them with adequate financing and to endeavor to alleviate burdens on low-income debtors by extending maturity dates or by delaying interest payments on loans owed to us. In addition, in October 2008, the Financial Supervisory Service requested Korean banks, including us, to establish a "fast track" program to provide liquidity assistance to small- and medium-sized enterprises on an expedited basis. Under the fast track program we established, which has been extended until December 31, 2015, we provide liquidity assistance to qualified small- and medium-sized enterprise borrowers applying for such assistance, in the form of new loans or maturity extensions or interest rate adjustments with respect to existing loans, after expedited credit review and approval by us. The overall prospects for the Korean economy in 2015 and beyond remain uncertain, and the Korean government may extend or renew existing or past policies and initiatives or introduce new policies or initiatives to encourage Korean banks to provide financial support to small- and medium-sized enterprises. Our participation in such government-led initiatives may lead us to extend credit to small- and medium-sized enterprise borrowers that we would not otherwise extend, or offer terms for such credit that we would not otherwise offer, in the absence of such initiatives. Furthermore, there is no guarantee that the financial condition and liquidity position of our small- and medium-sized enterprise borrowers benefiting from such initiatives will improve sufficiently for them to service their debt on a timely basis, or at all. Accordingly, increases in our exposure to small- and medium-sized enterprise borrowers resulting from such government-led initiatives may have a material adverse effect on our financial condition and results of operations.

***We have exposure to Korean construction and shipbuilding companies, and financial difficulties of these companies may have an adverse impact on us*.**

As of December 31, 2014, we had loans outstanding to construction companies and shipbuilding companies (many of which are small- and medium-sized enterprises) in the amount of ₩3,778 billion and ₩820 billion, or 1.6% and 0.4% of our total loans, respectively. We also have other exposures to Korean construction and shipbuilding companies, including in the form of guarantees extended on behalf of such companies (which included ₩710 billion of confirmed guarantees for construction companies and ₩1,179 billion of confirmed guarantees for shipbuilding companies as of December 31, 2014) and debt and equity securities of such companies held by us. In the case of construction companies, such exposures include guarantees provided to us by general contractors with respect to financing extended by us for residential and commercial real estate development projects. In the case of shipbuilding companies, such exposures include refund guarantees extended by us on behalf of shipbuilding companies to cover their obligation to return a portion of the ship order contract amount to customers in the event of performance delays or defaults under shipbuilding contracts.

The construction industry in Korea has experienced a downturn in recent years, due to excessive investment in residential property development projects, stagnation of real property prices and reduced demand for residential property, especially in areas outside of Seoul, including as a result of the deterioration of the Korean economy. The shipbuilding industry in Korea has also experienced a severe downturn in recent years due to a significant decrease in ship orders, primarily due to adverse conditions in the global economy and the resulting slowdown in global trade. In response to the deteriorating financial condition and liquidity position of borrowers in the construction and shipbuilding industries, which were disproportionately impacted by adverse economic developments in Korea and globally, the Korean government implemented a program in 2009 to promote expedited restructuring of such borrowers by their Korean creditor financial institutions, under the supervision of major commercial banks. In accordance with such program, 24 construction companies and five shipbuilding companies became subject to workout in 2009, following review by their creditor financial institutions (including us) and the Korean government. In addition, in June 2010, the Financial Services Commission and the Financial Supervisory Service announced that, following credit risk evaluations conducted by creditor financial institutions (including us) of companies in Korea with outstanding debt of ₩50 billion or more, 65 companies had been selected by such financial institutions for restructuring in the form of workout, liquidation or court receivership. Of such 65 companies, 16 were construction companies and three were shipbuilding and shipping companies. Each year since June 2010, the Financial Services Commission and the Financial Supervisory Service has announced the results of subsequent credit risk evaluations conducted by creditor financial institutions (including us) of companies in Korea with outstanding debt of ₩50 billion or more and selected companies for restructuring in the form of workout, liquidation or court receivership. Most recently, in July 2014, 34 companies with outstanding debt of ₩50 billion or more (21 of which were construction companies and three of which were shipbuilding and shipping companies) were selected by such financial institutions for restructuring. However, there is no assurance that these measures will be successful in stabilizing the Korean construction and shipbuilding industries.

The allowances that we have established against our credit exposures to Korean construction and shipbuilding companies may not be sufficient to cover all future losses arising from these and other exposures. If the credit quality of our exposures to Korean construction and shipbuilding companies declines further, we may be required to take substantial additional provisions (including in connection with restructurings of such companies), which could adversely impact our results of operations and financial condition. Furthermore, although a portion of our credit exposures to construction and shipbuilding companies are secured by collateral, such collateral may not be sufficient to cover uncollectible amounts in respect of such credit exposures. See

"—Other risks relating to our business—A decline in the value of the collateral securing our loans and our inability to realize full collateral value may adversely affect our credit portfolio."

We also have construction-related credit exposures under our project financing loans for real estate development projects in Korea. In light of the general deterioration in the asset quality of real estate project financing loans in Korea in recent years, Korean banks, including Kookmin Bank, implemented a uniform set of guidelines to apply more stringent criteria in evaluating the asset quality of real estate project financing loans. As a result, we may be required to establish additional allowances with respect to our outstanding real estate project financing loans, which could adversely affect our financial condition and results of operations.

Risks relating to our financial holding company structure and strategy

We may not succeed in implementing our strategy to take advantage of, or fail to realize the anticipated benefits of, our financial holding company structure.

We were established as a new financial holding company in September 2008 pursuant to a "comprehensive stock transfer" under Korean law, following the completion of which Kookmin Bank, KB Investment & Securities Co., Ltd., KB Asset Management Co., Ltd., KB Real Estate Trust Co., Ltd., KB Investment Co., Ltd., KB Futures Co., Ltd., KB Credit Information Co., Ltd., and KB Data Systems Co., Ltd. became our wholly-owned subsidiaries. See "Item 4.A. History and Development of the Company—The Establishment of KB Financial Group." In addition, as a part of our strategy to promote the growth of our credit card operations and enhance its synergies with our other businesses, we effected a horizontal spin-off of Kookmin Bank's credit card business in March 2011. As a result, our credit card business is operated by a separate wholly-owned subsidiary, KB Kookmin Card Co., Ltd.

One of our principal strategies is to take advantage of our financial holding company structure to become a comprehensive financial services provider capable of offering a full range of products and services to our large existing base of retail and corporate banking customers. The continued implementation of these plans may require additional investments of capital, infrastructure, human resources and management attention. This strategy entails certain risks, including the possibility that we may face significant competition from other financial holding companies and more specialized financial institutions in particular segments. If our strategy does not succeed, we may incur losses on our investments and our results of operations and financial condition may suffer.

Furthermore, our success under a financial holding company structure depends on our ability to realize the anticipated synergies, growth opportunities and cost savings from coordinating the businesses of our various subsidiaries. Although we have been integrating certain aspects of our subsidiaries' operations into our financial holding company structure, our subsidiaries will generally continue to operate as independent entities with separate management and staff and our ability to direct our subsidiaries' day-to-day operations may be limited.

In addition, one of the intended benefits of our financial holding company structure is that it enhances our ability to engage in mergers and acquisitions which we decide to pursue in the future as part of our strategy. For example, in March 2014, we acquired 52.02% of the outstanding shares of KB Capital Co., Ltd. (formerly named Woori Financial Co., Ltd.), a publicly listed Korean consumer finance company, from Woori Finance Holdings Co., Ltd. for ₩280 billion. Furthermore, in June 2014, we entered into a share purchase agreement, which was amended in March 2015, to acquire 19.47% of the outstanding shares of LIG Insurance Co., Ltd., a publicly listed Korean property and casualty insurance company, from a group of individual shareholders for ₩645 billion, and will be required under applicable Korean law to increase our shareholding in LIG Insurance to at least 30% within one year from the date of such acquisition. We may consider acquiring or merging with other financial institutions to achieve balanced growth and diversify our revenue base. The integration of our subsidiaries' separate businesses and operations, as well as those of any companies we may acquire or merge with in the future, under our financial holding company structure could require a significant amount of time, financial resources and management attention. Moreover, that process could disrupt our operations (including our risk management operations) or information technology systems, reduce employee morale, produce unintended inconsistencies in our standards, controls, procedures or policies, and affect our relationships with customers and our ability to retain key personnel. The realization of the anticipated benefits of our financial holding company structure and any mergers or acquisitions we decide to pursue may be blocked, delayed or reduced as a result of many factors, some of which may be outside our control. These factors include:

- difficulties in integrating the diverse activities and operations of our subsidiaries or any companies we may merge with or acquire, including risk management operations and information technology systems, personnel, policies and procedures;
- difficulties in reorganizing or reducing overlapping personnel, branches, networks and administrative functions;
- restrictions under the Financial Holding Company Act and other regulations on transactions between a financial holding company and, or among, its subsidiaries;
- unforeseen contingent risks, including lack of required capital resources, increased tax liabilities or restrictions in our overseas operations, relating to our financial holding company structure;
- unexpected business disruptions;
- failure to attract, develop and retain personnel with necessary expertise;
- loss of customers; and
- labor unrest.

Accordingly, we may not be able to realize the anticipated benefits of our financial holding company structure, and our business, results of operations and financial condition may suffer as a result.

We depend on limited forms of funding to fund our operations at the holding company level.

We are a financial holding company with no significant assets other than the shares of our subsidiaries. Our primary sources of funding and liquidity are dividends from our subsidiaries, direct borrowings and issuances of equity or debt securities at the holding company level. In addition, as a financial holding company, we are required to meet certain minimum financial ratios under Korean law, including with respect to liquidity, leverage and capital adequacy. Our ability to meet our obligations to our direct creditors and employees and our other liquidity needs and regulatory requirements at the holding company level depends on timely and adequate distributions from our subsidiaries and our ability to sell our securities or obtain credit from our lenders.

The ability of our subsidiaries to pay dividends to us depends on their financial condition and operating results. In the future, our subsidiaries may enter into agreements, such as credit agreements with lenders or indentures relating to high-yield or subordinated debt instruments, that impose restrictions on their ability to make distributions to us, and the terms of future obligations and the operation of Korean law could prevent our subsidiaries from making sufficient distributions to us to allow us to make payments on our outstanding obligations. See "—As a financial holding company, we depend on receiving dividends from our subsidiaries to pay dividends on our common stock." Any delay in receipt of or shortfall in payments to us from our subsidiaries could result in our inability to meet our liquidity needs and regulatory requirements, including minimum liquidity and capital adequacy ratios, and may disrupt our operations at the holding company level.

In addition, creditors of our subsidiaries will generally have claims that are prior to any claims of our creditors with respect to their assets. Furthermore, our inability to sell our securities or obtain funds from our lenders on favorable terms, or at all, could also result in our inability to meet our liquidity needs and regulatory requirements and may disrupt our operations at the holding company level.

As a financial holding company, we depend on receiving dividends from our subsidiaries to pay dividends on our common stock.

Since our principal assets at the holding company level are the shares of our subsidiaries, our ability to pay dividends on our common stock largely depends on dividend payments from those subsidiaries. Those dividend payments are subject to the Korean Commercial Code, the Bank Act and regulatory limitations, generally based on capital levels and retained earnings, imposed by the various regulatory agencies with authority over those entities. For example:

- under the Korean Commercial Code, dividends may only be paid out of distributable income, an amount which is calculated by subtracting the aggregate amount of a company's paid-in capital and certain mandatory legal reserves as well as certain unrealized profits from its net assets, in each case as of the end of the prior fiscal period;
- under the Bank Act, a bank also must credit at least 10% of its net profit to a legal reserve each time it pays dividends on distributable income until that reserve equals the amount of its total paid-in capital; and
- under the Bank Act and the requirements of the Financial Services Commission, if a bank fails to meet its required capital adequacy ratio or otherwise becomes subject to management improvement measures imposed by the Financial Services Commission, then the Financial Services Commission may restrict the declaration and payment of dividends by that bank.

Our subsidiaries may not continue to meet the applicable legal and regulatory requirements for the payment of dividends in the future. If they fail to do so, they may stop paying or reduce the amount of the dividends they pay to us, which would have an adverse effect on our ability to pay dividends on our common stock.

Although increasing our fee income is an important part of our strategy, we may not be able to do so.

We have historically relied on interest income as our primary revenue source. While we have developed new sources of fee income as part of our business strategy, our ability to increase our fee income and thereby reduce our dependence on interest income will be affected by the extent to which our customers generally accept the concept of fee-based services. Historically, customers in Korea have generally been reluctant to pay fees in return for value-added financial services, and their continued reluctance to do so will adversely affect the implementation of our strategy to increase our fee income. Furthermore, the fees that we charge to customers are subject to regulation by Korean financial regulatory authorities, which may seek to implement regulations or measures that may also have an adverse impact on our ability to achieve this aspect of our strategy.

We may suffer customer attrition or our net interest margin may decrease as a result of our competition strategy.

We have been pursuing, and intend to continue to pursue, a strategy of maintaining or enhancing our margins where possible and avoid, to the extent possible, entering into price competition. In order to execute this strategy, we will need to maintain relatively low interest rates on our deposit products while charging relatively higher rates on loans. If other banks and financial institutions adopt a strategy of expanding market share through interest rate competition, we may suffer customer attrition due to rate sensitivity. In addition, we may in the future decide to compete to a greater extent based on interest rates, which could lead to a decrease in our net interest margins. Any future decline in our customer base or our net interest margins as a result of our future competition strategy could have an adverse effect on our results of operations and financial condition.

Risks relating to competition

Competition in the Korean financial industry is intense, and we may lose market share and experience declining margins as a result.

Competition in the Korean financial industry has been and is likely to remain intense. Some of the financial institutions that we compete with have longer operating histories as financial holding companies, greater financial resources or more specialized capabilities than us and our subsidiaries. In the retail and small- and medium-sized enterprise lending business, which has been our traditional core business, competition has increased significantly and is expected to increase further. Most Korean banks have been focusing on retail customers and small- and medium-sized enterprises in recent years, although they have begun to generally increase their exposure to large corporate borrowers. In addition, the profitability of our retail and credit card operations may decline as a result of growing market saturation in the retail lending and credit card segments, increased interest rate competition, pressure to lower the fee rates applicable to our credit cards (particularly merchant fee rates) and higher marketing expenses. Intense and increasing competition has made and continues to make it more difficult for us to secure retail, credit card and small- and medium-sized customers with the credit quality and on credit terms necessary to achieve our business objectives in a commercially acceptable manner.

In addition, we believe that regulatory reforms and the general modernization of business practices in Korea will lead to increased competition among financial institutions in Korea. We also believe that foreign financial institutions, many of which have greater experience and resources than we do, will seek to compete with us in providing financial products and services either by themselves or in partnership with existing Korean financial institutions. Furthermore, a number of significant mergers and acquisitions in the industry have taken place in Korea over the past decade, including the acquisition of Koram Bank by an affiliate of Citibank in 2004, Standard Chartered Bank's acquisition of Korea First Bank in 2005, Chohung Bank's merger with Shinhan Bank in April 2006, Hana Financial Group's acquisition of a controlling interest in Korea Exchange Bank in February 2012 and the proposed merger of Hana Bank into Korea Exchange Bank in the second half of 2015. Moreover, as part of the Korean government's plans to privatize Woori Finance Holdings Co., Ltd. (the former financial holding company of Woori Bank), certain subsidiaries of Woori Finance Holdings were sold to other financial institutions and Woori Finance Holdings itself was merged into Woori Bank in 2014. We expect that consolidation in the financial industry will continue. The financial institutions resulting from such consolidation may, by virtue of their increased size and business scope, provide significantly greater competition for us. Increased competition and continuing consolidation may lead to decreased margins, resulting in a material adverse impact on our future profitability. Accordingly our results of operations and financial condition may suffer as a result of increasing competition in the Korean financial industry.

Risks relating to our large corporate loan portfolio

We have exposure to chaebols, and, as a result, financial difficulties of chaebols may have an adverse impact on us.

Of our 20 largest corporate exposures (including loans, debt and equity securities and guarantees and acceptances) as of December 31, 2014, 12 were to companies that were members of the 42 largest *chaebols* in Korea designated as such by the Financial Supervisory Service based on their outstanding exposures. As of that date, the total amount of our exposures to such 42 *chaebols* was ₩21,587 billion, or 7.5% of our total exposures. If the credit quality of our exposures to *chaebols* declines, we could require substantial additional loan loss provisions, which would hurt our results of operations and financial condition. See "Item 4.B. Business Overview—Assets and Liabilities—Loan Portfolio—Exposure to Chaebols."

We cannot assure you that the allowances we have established against these exposures will be sufficient to cover all future losses arising from these exposures. In addition, with respect to those companies that are in or in the future enter into workout or liquidation proceedings, we may not be able to make any recoveries against such companies. We may, therefore, experience future losses with respect to those loans.

We have exposure to companies that are currently or may in the future be put in restructuring, and we may suffer losses as a result of additional loan loss provisions required and/or the adoption of restructuring plans with which we do not agree.

As of December 31, 2014, our loans and guarantees to companies that were in workout, restructuring or rehabilitation amounted to ₩773 billion or 0.3% of our total loans and guarantees, most of which was classified as impaired. As of the same date, our allowances for credit losses on these loans and guarantees amounted to ₩443 billion, or 57.4% of these loans and guarantees. These allowances may not be sufficient to cover all future losses arising from our exposure to these companies. Furthermore, we have other exposure to such companies, in the form of debt and equity securities of such companies held by us (including equity securities we acquired as a result of debt-to-equity conversions). Our exposures as of December 31, 2014 with respect to such securities of companies in workout, restructuring or rehabilitation amounted to ₩83 billion, or less than 0.2% of our total debt securities and equity securities, but may increase in the future. In addition, in the case of borrowers that are or become subject to workout, we may be forced to restructure our credits pursuant to restructuring plans approved by other creditor financial institutions of the borrower, or to dispose of our credits to other creditors on unfavorable terms.

A large portion of our credit exposure is concentrated in a relatively small number of large corporate borrowers which increases the risk of our corporate credit portfolio.

As of December 31, 2014, our loans and guarantees to our 20 largest borrowers totaled ₩7,180 billion and accounted for 2.9% of our total loans and guarantees. As of that date, our single largest corporate credit exposure was to Daewoo Shipbuilding & Marine Engineering Co., Ltd., to which we had outstanding credit exposures (most of which was in the form of guarantees and acceptances) of ₩1,165 billion, representing 0.5% of our total loans and guarantees. Any further deterioration in the financial condition of our large corporate borrowers may require us to record substantial additional provisions and may have a material adverse impact on our results of operations and financial condition.

Other risks relating to our business

Difficult conditions in the global financial markets could adversely affect our results of operations and financial condition.

While the rate of deterioration of the global economy since the commencement of the global financial crisis in 2008 has slowed, with some signs of stabilization and improvement, the overall prospects for the Korean and global economy in 2015 and beyond remain uncertain. Starting in the second half of 2011, the global financial markets have experienced significant volatility as a result of, among other things:

- the financial difficulties affecting many governments worldwide, in particular in southern Europe and Latin America;
- the slowdown of economic growth in China and other major emerging market economies;
- interest rate fluctuations amid speculation that the U.S. Federal Reserve would raise interest rates, as well as reductions in policy rates by an increasing number of central banks, including the Bank of Korea; and
- political and social instability in various countries in the Middle East and Northern Africa, including Iraq, Syria and Yemen, as well as in the Ukraine and Russia.

In light of the high level of interdependence of the global economy, any of the foregoing developments could have a material adverse effect on the Korean economy and financial markets, and in turn on our business, financial condition and results of operations.

We are also exposed to adverse changes and volatility in global and Korean financial markets as a result of our liabilities and assets denominated in foreign currencies and our holdings of trading and investment securities, including structured products. The value of the Won relative to major foreign currencies in general and the U.S. dollar in particular has fluctuated widely in recent years. See "Item 3.A. Selected Financial Data—Exchange Rates." A depreciation of the Won will increase our cost in Won of servicing our foreign currency-denominated debt, while continued exchange rate volatility may also result in foreign exchange losses for us. Furthermore, as a result of adverse global and Korean economic conditions, there has been significant volatility in securities prices, including the stock prices of Korean and foreign companies in which we hold an interest. Such volatility has resulted in and may lead to further trading and valuation losses on our trading and investment securities portfolio as well as impairment losses on our investments accounted for under the equity method, including our noncontrolling equity stake in JSC Bank CenterCredit, a Kazakhstan bank, the initial stake in which we acquired in 2008. See "Item 4.B. Business Overview—Capital Markets Activities and International Banking—International Banking."

Our business may be materially and adversely affected by legal claims and regulatory actions against us.

We are subject to the risk of legal claims and regulatory actions in the ordinary course of our business, which may expose us to substantial monetary damages and legal costs, injunctive relief, criminal and civil penalties, sanctions against our management and employees and regulatory restrictions on our operations, as well as significant reputational harm. In particular, commencing in November 2013, Kookmin Bank was subject to a number of investigations by the Financial Supervisory Service and other governmental authorities concerning alleged issues with Kookmin Bank's internal controls and possible legal violations by Kookmin Bank and its employees.

- In November 2013, Kookmin Bank filed a complaint against the former head and two former employees of its Tokyo Branch for allegedly extending illegal loans under borrowed names. Each of the Financial Supervisory Service and the Financial Services Agency of Japan launched an investigation into the allegations.
- The Financial Supervisory Service launched an investigation into alleged embezzlement of funds by employees at Kookmin Bank's headquarters, who have since been dismissed, through the presentation for payment of forged Korean government housing bonds.
- In May 2014, the Financial Supervisory Service launched an investigation into a dispute between Kookmin Bank and us regarding the replacement of Kookmin Bank's main computing system.

In August 2014, the Financial Supervisory Agency of Japan suspended Kookmin Bank from conducting new transactions at its branches in Japan for four months from September 2014 to January 2015. Furthermore, in August 2014, the Financial Supervisory Service imposed disciplinary sanctions on Kookmin Bank and a number of its officers, directors and employees, including the then chief executive officer of Kookmin Bank. In September 2014, the Financial Services Commission imposed a disciplinary sanction on our then chief executive officer. Both the chief executive officer of Kookmin Bank and our chief executive officer, as well as a number of our respective outside directors, subsequently resigned from their posts and have been replaced. In September 2014, the Financial Supervisory Service completed its investigation into Kookmin Bank and us with respect to such allegations.

Furthermore, in February 2014, the Financial Services Commission suspended the new credit card issuance and other related activities of KB Kookmin Card for three months from February to May 2014, in response to an incident involving the misappropriation of the personal information of a large number of its customers by an employee of the Korea Credit Bureau in the first half of 2013. In connection with the incident, a number of customers have filed lawsuits against KB Kookmin Card seeking damages, and it could become subject to additional litigation and regulatory sanctions.

In addition, in connection with certain amendments to standard loan policy conditions for mortgage loan agreements that were instituted by the Korea Fair Trade Commission in January 2008 (which require banks to be responsible for the payment of mortgage registration expenses when issuing mortgage loans and which were upheld by the Supreme Court of Korea in August 2010), a number of Kookmin Bank's customers have filed lawsuits in recent years seeking the return of mortgage registration expenses paid by such customers. See "Item 8A. Consolidated Statements and Other Financial Information—Legal Proceedings."

We are unable to predict the outcome of these and other lawsuits and regulatory actions, and the scope of the claims or the total amount in dispute in these matters may increase. Furthermore, adverse final determinations, decisions or resolutions in such matters could encourage other parties to bring related claims and actions against us. Accordingly, the outcome of current and future legal claims and regulatory actions, particularly those for which it is difficult to assess the maximum potential exposure or the ultimate adverse impact with any degree of certainty, may materially and adversely impact our business, reputation, results of operations and financial condition.

Our risk management system may not be effective in mitigating risk and loss.

We seek to monitor and manage our risk exposure through a group-wide risk management platform, encompassing a multi-layered risk management governance structure, reporting and monitoring systems, early warning systems, credit risk management systems for our banking operations and other risk management infrastructure, using a variety of risk management strategies and techniques. See "Item 11. Quantitative and Qualitative Disclosures about Market Risk." However, such risk management strategies and techniques employed by us and the judgments that accompany their application cannot anticipate the economic and financial outcome in all market environments, and many of our risk management strategies and techniques have a basis in historic market behavior that may limit the effectiveness of such strategies and techniques in times of significant market stress or other unforeseen circumstances. Furthermore, our risk management strategies may not be effective in a difficult or less liquid market environment, as other market participants may be attempting to use the same or similar strategies as us to deal with such market conditions. In such circumstances, it may be difficult for us to reduce our risk positions due to the activity of such other market participants.

We are generally subject to Korean corporate governance and disclosure standards, which may differ from those in other countries.

Companies in Korea, including us, are subject to corporate governance standards applicable to Korean public companies which may differ in some respects from standards applicable in other countries, including the United States. As a reporting company registered with the U.S. Securities and Exchange Commission and listed on the New York Stock Exchange, we are subject to certain corporate governance standards as mandated by the Sarbanes-Oxley Act of 2002. However, foreign private issuers, including us, are exempt from certain corporate governance requirements under the Sarbanes-Oxley Act or under the rules of the New York Stock Exchange. There may also be less publicly available information about Korean companies, such as us, than is regularly made available by public or non-public companies in other countries. Such differences in corporate governance standards and less public information could result in corporate governance practices or disclosures that are perceived as less than satisfactory by investors in certain countries.

A decline in the value of the collateral securing our loans and our inability to realize full collateral value may adversely affect our credit portfolio.

A substantial portion of our loans is secured by real estate, the values of which have fluctuated significantly in recent years. Although it is our general policy to lend up to 40% to 80% of the appraised value of collateral (except in areas of high speculation designated by the government where we generally limit our lending to between 40% to 60% of the appraised value of collateral) and to periodically re-appraise our collateral, the downturn in the real estate market in Korea in recent years has resulted in declines in the value of the collateral securing our mortgage and home equity loans. If collateral values decline further in the future, they may not be sufficient to cover uncollectible amounts in respect of our secured loans. Any future declines in the value of the real estate or other collateral securing our loans, or our inability to obtain additional collateral in the event of such declines, could result in a deterioration in our asset quality and may require us to take additional loan loss provisions.

In Korea, foreclosure on collateral generally requires a written petition to a court. An application, when made, may be subject to delays and administrative requirements that may result in a decrease in the value realized with respect to such collateral. We cannot guarantee that we will be able to realize the full value on our collateral as a result of, among other factors, delays in foreclosure proceedings and defects in the perfection of our security interest in collateral. Our failure to recover the expected value of collateral could expose us to losses.

The secondary market for corporate bonds in Korea is not fully developed, and, as a result, we may not be able to realize the full "marked-to-market" value of debt securities we hold at the time of any sale of such securities.

As of December 31, 2014, we held debt securities issued by Korean companies and financial institutions (other than those issued by government-owned or -controlled enterprises or financial institutions, which include Korea Electric Power Corporation, the Bank of Korea, Korea Development Bank, Korea Finance Corporation and Industrial Bank of Korea) with a total carrying amount of ₩21,337 billion in our trading and investment securities portfolio. The market value of these securities could decline significantly due to various factors, including future increases in interest rates or a deterioration in the financial and economic condition of any particular issuer or of Korea in general. Any of these factors individually or a combination of these factors would require us to write down the fair value of these debt securities, resulting in impairment losses. Because the secondary market for corporate bonds in Korea is not fully developed, the market value of many of these securities as reflected on our statements of financial position is determined by references to suggested prices posted by Korean rating agencies or the Korea Securities Dealers Association. These valuations, however, may differ significantly from the actual value that we could realize in the event we elect to sell these securities. As a result, we may not be able to realize the full "marked-to-market" value at the time of any such sale of these securities and thus may incur losses.

We may be required to make transfers from our general banking operations to cover shortfalls in our guaranteed trust accounts, which could have an adverse effect on our results of operations.

We manage a number of money trust accounts through Kookmin Bank, our banking subsidiary. Under Korean law, trust account assets of a bank are required to be segregated from the assets of that bank's general banking operations. Those assets are not available to satisfy the claims of a bank's depositors or other creditors of its general banking operations. For some of the trust accounts we manage, we have guaranteed either the principal amount of the investor's investment or the principal and a fixed rate of interest.

If, at any time, the income from our guaranteed trust accounts is not sufficient to pay any guaranteed amount, we will have to cover the shortfall first from the special reserves maintained in these trust accounts, then from our fees from such trust accounts and finally from funds transferred from our general banking operations. As of December 31, 2014, we had ₩96 billion of special reserves in respect of trust accounts for which we provided guarantees of principal. There was no transfer from general banking operations to cover deficiencies in guaranteed trust accounts in 2012, 2013 and 2014. However, we may be required to make transfers from our general banking operations to cover shortfalls, if any, in our guaranteed trust accounts in the future. Such transfers may adversely impact our results of operations.

Our activities are subject to cybersecurity risk.

Our activities have been, and will continue to be, subject to an increasing risk of cyber attacks, the nature of which is continually evolving. For example, many of our customers increasingly rely on our Internet banking services as well as our mobile and smartphone banking services for various types of transactions and, while such transactions are protected by encryption and other security programs, they are not free from security breaches. We have made substantial and continuous investments to build systems and defenses to address threats from cyber attacks and our monitoring and protection systems have been able to detect and respond to such breaches to date. However, we may experience security breaches or unexpected disruptions in connection with our services in the future, which may result in liability to our customers and third parties and have an adverse effect on our business, reputation and results of operations.

We may experience disruptions, delays and other difficulties from our information technology systems.

We rely on our information technology systems for our daily operations including customer service, transactions, billing and record keeping. We may experience disruptions, delays or other difficulties from our information technology systems, which may have an adverse effect on our business and adversely impact our customers' confidence in us.

Risks relating to liquidity and capital management

A considerable increase in interest rates could decrease the value of our debt securities portfolio and raise our funding costs while reducing loan demand and the repayment ability of our borrowers, which, as a result, could adversely affect us.

Interest rates in Korea have been subject to significant fluctuations in recent years. In late 2008 and early 2009, the Bank of Korea reduced its policy rate by a total of 325 basis points to support Korea's economy amid the global financial crisis, and left such rate unchanged at 2.00% throughout 2009. In an effort to stem inflation amid improved growth prospects, the Bank of Korea gradually increased its policy rate in 2010 and 2011 by a total of 125 basis points to 3.25%. However, the Bank of Korea reduced its policy rate to 2.00% through a series of reductions from 2012 to 2014 to support Korea's economy in light of the slowdown in Korea's growth and uncertain global economic prospects. In March 2015, the Bank of Korea further reduced its policy rate to an unprecedented 1.75% amid deflationary concerns and interest rate cuts by central banks around the world. All else being equal, an increase in interest rates in the future could lead to a decline in the value of our portfolio of debt securities, which generally pay interest based on a fixed rate. A sustained increase in interest rates will also raise our funding costs, while reducing loan demand, especially among consumers. Rising interest rates may therefore require us to re-balance our asset portfolio and our liabilities in order to minimize the risk of potential mismatches and maintain our profitability.

In addition, rising interest rate levels may adversely affect the Korean economy and the financial condition of our corporate and retail borrowers, including holders of our credit cards, which in turn may lead to a deterioration in our credit portfolio. Since most of our retail and corporate loans bear interest at rates that adjust periodically based on prevailing market rates, a sustained increase in interest rate levels will increase the interest costs of our retail and corporate borrowers and could adversely affect their ability to make payments on their outstanding loans.

Our funding is highly dependent on short-term deposits, which dependence may adversely affect our operations.

We meet a significant amount of our funding requirements through short-term funding sources, which consist primarily of customer deposits. As of December 31, 2014, approximately 94.4% of our deposits had maturities of one year or less or were payable on demand. In the past, a substantial proportion of our customer deposits have been rolled over upon maturity. We cannot guarantee, however, that depositors will continue to roll over their deposits in the future. In the event that a substantial number of our short-term deposit customers withdraw their funds or fail to roll over their deposits as higher-yielding investment opportunities emerge, our liquidity position could be adversely affected. We may also be required to seek more expensive sources of short-term and long-term funding to finance our operations. See "Item 5.B. Liquidity and Capital Resources—Financial Condition—Liquidity."

We may be required to raise additional capital if our capital adequacy ratio deteriorates or the applicable capital requirements change in the future, but we may not be able to do so on favorable terms or at all.

Under the capital adequacy requirements of the Financial Services Commission, both we and Kookmin Bank, our banking subsidiary, are required to maintain a minimum common equity Tier I capital adequacy ratio of 4.5%, Tier I capital adequacy ratio of 6.0% and combined Tier I and Tier II capital adequacy ratio of 8.0%, on a consolidated basis from, January 1, 2015. As of December 31, 2014, our common equity Tier I capital, Tier I capital and combined Tier I and Tier II capital adequacy ratios were 13.19%, 13.29% and 15.53%, respectively, and Kookmin Bank's common equity Tier I capital, Tier I capital and combined Tier I and Tier II capital adequacy ratios were 13.38%, 13.38% and 15.97%, respectively, all of which exceeded the minimum levels required by the Financial Services Commission. However, our capital base and capital adequacy ratios may deteriorate in the future if our results of operations or financial condition deteriorates for any reason, including as a result of a deterioration in the asset quality of our retail loans (including credit card balances) and loans to small- and medium-sized enterprises, or if we are not able to deploy our funding into suitably low-risk assets.

The current capital adequacy requirements of the Financial Services Commission are derived from a new set of bank capital measures, referred to as Basel III, which the Basel Committee on Banking Supervision initially introduced in 2009 and began phasing in starting from 2013. In July 2013 and September 2013, the Financial Services Commission promulgated amended regulations implementing Basel III, pursuant to which Korean banks and bank holding companies were required to maintain a minimum ratio of common equity Tier I capital (which principally includes equity capital, capital surplus and retained earnings less reserve for credit losses) to risk-weighted assets of 3.5% and Tier I capital to risk-weighted assets of 4.5% from December 1, 2013, which minimum ratios were increased to 4.0% and 5.5%, respectively, from January 1, 2014 and increased further to 4.5% and 6.0%, respectively, from January 1, 2015. Such requirements are in addition to the pre-existing requirement for a minimum ratio of Tier I and Tier II capital (less any capital deductions) to risk-weighted assets of 8.0%, which remains unchanged. The amended regulations also contemplate an additional capital conservation buffer of 0.625% starting in 2016, with such buffer to increase in stages to 2.5% by 2019. The implementation of Basel III in Korea may have a significant effect on the capital requirements of Korean financial institutions, including us. See "Item 4.B. Business Overview—Supervision and Regulation—Principal Regulations Applicable to Financial Holding Companies—Capital Adequacy" and "—Principal Regulations Applicable to Banks—Capital Adequacy."

We may be required to obtain additional capital in the future in order to remain in compliance with more stringent capital adequacy and other regulatory requirements. However, we may not be able to obtain additional capital on favorable terms, or at all. Our ability to obtain additional capital at any time may be constrained to the extent that banks or other financial institutions in Korea or from other Asian countries are seeking to raise capital at the same time. To the extent that we fail to comply with applicable capital adequacy ratio or other regulatory requirements in the future, Korean regulatory authorities may impose penalties on us ranging from a warning to suspension or revocation of our banking license.

Risks relating to government regulation and policy

The Korean government may promote lending and financial support by the Korean financial industry to certain types of borrowers as a matter of policy, which financial institutions, including us, may decide to follow.

Through its policies and recommendations, the Korean government has promoted and, as a matter of policy, may continue to attempt to promote lending by the Korean financial industry to particular types of borrowers. For example, the Korean government has in the past provided and may continue to provide policy loans, which encourage lending to particular types of borrowers. It has generally done this by identifying sectors of the economy it wishes to promote and making low-interest funding available to financial institutions that may voluntarily choose to lend to these sectors. The government has in this manner provided policy loans intended to promote mortgage lending to low-income individuals and lending to small- and medium-sized enterprises. All loans or credits we choose to make pursuant to these policy loans would be subject to review in accordance with our credit approval procedures. However, the availability of policy loans may influence us to lend to certain sectors or in a manner in which we otherwise would not in the absence of such loans from the government.

In the past, the Korean government has also announced policies under which financial institutions in Korea are encouraged to provide financial support to particular sectors. For example, in light of the deteriorating financial condition and liquidity position of small- and medium-sized enterprises in Korea as a result of the global financial crisis commencing in the second half of 2008 and adverse conditions in the Korean economy affecting consumers, the Korean government introduced measures intended to encourage Korean banks to provide financial support to small- and medium-sized enterprise and retail borrowers. See "—Risks relating to our small- and medium-sized enterprise loan portfolio—We have significant exposure to small- and medium-sized enterprises, and any financial difficulties experienced by these customers may result in a deterioration of our asset quality and have an adverse impact on us." and "—Risks relating to our retail credit portfolio—Future changes in market conditions as well as other factors may lead to increases in delinquency levels of our retail loan portfolio." The Korean government may in the future request financial institutions in Korea, including us, to make investments in or provide other forms of financial support to particular sectors of the Korean economy as a matter of policy, which financial institutions, including us, may decide to accept. We may incur costs or losses as a result of providing such financial support.

The Financial Services Commission may impose burdensome measures on us if it deems us or one of our subsidiaries to be financially unsound.

If the Financial Services Commission deems our financial condition or the financial condition of our subsidiaries to be unsound, or if we or our subsidiaries fail to meet applicable regulatory standards, such as minimum capital adequacy and liquidity ratios, the Financial Services Commission may order or recommend, among other things:

- capital increases or reductions;
- stock cancellations or consolidations;
- transfers of businesses;
- sales of assets;
- closures of subsidiaries or branch offices;
- mergers with other financial institutions; and
- suspensions of a part of our business operations.

If any of these measures are imposed on us by the Financial Services Commission, they could hurt our business, results of operations and financial condition. In addition, if the Financial Services Commission orders us to partially or completely reduce our capital, you may lose part or all of your investment.

Risks relating to Korea

Escalations in tensions with North Korea could have an adverse effect on us and the market price of our ADSs.

Relations between Korea and North Korea have been tense throughout Korea's modern history. The level of tension between the two Koreas has fluctuated and may increase abruptly as a result of future events. In particular, since the death of Kim Jong-il in December 2011, there has been increased uncertainty with respect to the future of North Korea's political leadership and concern regarding its implications for political and economic stability in the region. Although Kim Jong-il's third son, Kim Jong-eun, has assumed power as his father's designated successor, the long-term outcome of such leadership transition remains uncertain.

In addition, there have been heightened security concerns in recent years stemming from North Korea's nuclear weapon and long-range missile programs as well as its hostile military actions against Korea. Some of the significant incidents in recent years include the following:

- In March 2013, North Korea stated that it had entered "a state of war" with Korea, declaring the 1953 armistice invalid, and put its artillery at the highest level of combat readiness to protest the Korea-United States allies' military drills and additional sanctions imposed on North Korea for its missile and nuclear tests.
- North Korea renounced its obligations under the Nuclear Non-Proliferation Treaty in January 2003 and conducted three rounds of nuclear tests between October 2006 to February 2013, which increased tensions in the region and elicited strong objections worldwide. In response, the United Nations Security Council unanimously passed resolutions that condemned North Korea for the nuclear tests and expanded sanctions against North Korea, most recently in March 2013.
- In December 2012, North Korea launched a satellite into orbit using a long-range rocket, despite concerns in the international community that such a launch would be in violation of the agreement with the United States as well as United Nations Security Council resolutions that prohibit North Korea from conducting launches that use ballistic missile technology.
- In March 2010, a Korean naval vessel was destroyed by an underwater explosion, killing many of the crewmen on board. The Korean government formally accused North Korea of causing the sinking, while North Korea denied responsibility. Moreover, in November 2010, North Korea fired more than one hundred artillery shells that hit Korea's Yeonpyeong Island near the Northern Limit Line, which acts as the de facto maritime boundary between Korea and North Korea on the west coast of the Korean peninsula, causing casualties and significant property damage. The Korean government condemned North Korea for the attack and vowed stern retaliation should there be further provocation.

North Korea's economy also faces severe challenges, which may aggravate social and political pressures within North Korea. There can be no assurance that the level of tensions affecting the Korean peninsula will not escalate in the future. Any further increase in tensions, which may occur, for example, if North Korea experiences a leadership crisis, high-level contacts between Korea and North Korea break down or military hostilities occur, could have a material adverse effect on the Korean economy and on our business, financial condition and results of operations and the market value of our common stock and ADSs.

Unfavorable financial and economic developments in Korea may have an adverse effect on us.

We are incorporated in Korea, and substantially all of our operations are located in Korea. As a result, we are subject to political, economic, legal and regulatory risks specific to Korea. The economic indicators in Korea in recent years have shown mixed signs of growth and uncertainty, and future growth of the economy is subject to many factors beyond our control.

In recent years, adverse conditions and volatility in the worldwide financial markets, fluctuations in oil and commodity prices and the general weakness of the U.S. and global economy have contributed to the uncertainty of global economic prospects in general and have adversely affected, and may continue to adversely affect, the Korean economy. See "Other risks relating to our business—Difficult conditions in the global financial markets could adversely affect our results of operations and financial condition." The value of the Won relative to major foreign currencies in general and the U.S. dollar in particular has also fluctuated widely. See "Item 3.A. Selected Financial Data—Exchange Rates." Furthermore, as a result of adverse global and Korean economic conditions, there has been significant volatility in the stock prices of Korean companies in recent years. Future declines in the Korea Composite Stock Price Index (known as the "KOSPI") and large amounts of sales of Korean securities by foreign investors and subsequent repatriation of the proceeds of such sales may adversely affect the value of the Won, the foreign currency reserves held by financial institutions in Korea, and the ability of Korean companies to raise capital. Any future deterioration of the Korean or global economy could adversely affect our business, financial condition and results of operations.

Developments that could hurt Korea's economy in the future include:

- difficulties in the financial sectors in Europe and elsewhere and increased sovereign default risks in select countries and the resulting adverse effects on the global financial markets;
- adverse changes or volatility in foreign currency reserve levels, commodity prices (including oil prices), exchange rates (including fluctuation of the U.S. dollar, the euro or the Japanese yen exchange rates or revaluation of the Chinese Renminbi), interest rates, inflation rates or stock markets;
- continuing adverse conditions in the economies of countries and regions that are important export markets for Korea, such as the United States, Europe, Japan and China, or in emerging market economies in Asia or elsewhere;
- further decreases in the market prices of Korean real estate;
- increasing delinquencies and credit defaults by retail or small- and medium-sized enterprise borrowers;
- declines in consumer confidence and a slowdown in consumer spending;
- increasing levels of household debt;
- difficulties in the financial sector in Korea, including the savings bank sector;
- the continued emergence of the Chinese economy, to the extent its benefits (such as increased exports to China) are outweighed by its costs (such as competition in export markets or for foreign investment and the relocation of the manufacturing base from Korea to China);
- social and labor unrest;
- a decrease in tax revenues and a substantial increase in the Korean government's expenditures for fiscal stimulus measures, unemployment compensation and other economic and social programs that, together, would lead to an increased government budget deficit;
- financial problems or lack of progress in the restructuring of *chaebols*, other large troubled companies, their suppliers or the financial sector;
- loss of investor confidence arising from corporate accounting irregularities and corporate governance issues concerning certain *chaebols*;
- increases in social expenditures to support an aging population in Korea or decreases in economic productivity due to the declining population size in Korea;
- the economic impact of any pending or future free trade agreements;
- geo-political uncertainty and risk of further attacks by terrorist groups around the world;
- natural disasters that have a significant adverse economic or other impact on Korea or its major trading partners;
- the occurrence of severe health epidemics in Korea or other parts of the world, including the recent Ebola outbreak;
- deterioration in economic or diplomatic relations between Korea and its trading partners or allies, including deterioration resulting from territorial or trade disputes or disagreements in foreign policy;
- political uncertainty or increasing strife among or within political parties in Korea;

- hostilities or political or social tensions involving oil producing countries in the Middle East and North Africa and any material disruption in the global supply of oil or increase in the price of oil;
- an increase in the level of tensions or an outbreak of hostilities between North Korea and Korea or the United States; and
- changes in financial regulations in Korea.

Labor unrest in Korea may adversely affect our operations.

Economic difficulties in Korea or increases in corporate reorganizations and bankruptcies could result in layoffs and higher unemployment. Such developments could lead to social unrest and substantially increase government expenditures for unemployment compensation and other costs for social programs. According to statistics from the Korea National Statistical Office, the unemployment rate was 3.2% in 2012 and decreased to 3.1% in 2013, but increased to 3.5% in 2014. Future increases in unemployment and any resulting labor unrest in the future could adversely affect our operations, as well as the operations of many of our customers and their ability to repay their loans, and could adversely affect the financial condition of Korean companies in general, depressing the price of their securities. These developments would likely have an adverse effect on our financial condition and results of operations.

Risks relating to our common stock and ADSs

We or our major stockholders may sell shares of our common stock or ADSs in the future, and these and other sales may adversely affect the market price of our common stock and ADSs and may dilute your investment and relative ownership in us.

In September 2009, we issued 30,000,000 new shares of our common stock (including 2,775,585 new shares in the form of ADSs) at a subscription price of ₩37,250 per share (and US$29.95 per ADS), pursuant to a rights offering to our existing shareholders. In July 2011, Kookmin Bank, our wholly-owned subsidiary, sold 34,966,962 shares of our common stock in a block sale. We have no current plans for any subsequent public offerings of our common stock, ADSs or securities exchangeable for or convertible into such securities. However, it is possible that we may decide to offer or sell such securities in the future. In addition, our major stockholder, the Korean National Pension Service, held approximately 9.42% of our total issued common stock as of December 31, 2014, which it may sell at any time.

Any future offerings or sales by us of our common stock or ADSs or securities exchangeable for or convertible into such securities, significant sales of our common stock by a major stockholder, or the public perception that an offering or sales may occur, could have an adverse effect on the market price of our common stock and ADSs. Furthermore, any offerings by us in the future of any such securities could have a dilutive impact on your investment and relative ownership interest in us.

Ownership of our common stock is restricted under Korean law.

Under the Financial Holding Company Act, a single stockholder, together with its affiliates, is generally prohibited from owning more than 10.0% of the issued and outstanding shares of voting stock of a bank holding company such as us that controls a nationwide bank, with the exception of certain stockholders that are non-financial business group companies, whose applicable limit has been reduced from 9.0% to 4.0% pursuant to an amendment of the Financial Holding Company Act which became effective from February 14, 2014. To the extent that the total number of shares of our common stock (including those represented by ADSs) that a holder and its affiliates own exceeds the applicable limits, that holder will not be entitled to exercise the voting rights for the excess shares, and the Financial Services Commission may order that holder to dispose of the excess shares within a period of up to six months. Failure to comply with such an order would result in an administrative fine of up to 0.03% of the book value of such shares per day until the date of disposal. Non-financial business group companies can no longer acquire more than 4.0% of the issued and outstanding shares of voting stock of a bank holding company pursuant to the amended Financial Holding Company Act, which grants an exception for non-financial business group companies which, at the time of the enactment of the amended provisions, held more than 4.0% of the shares thereof with the approval of the Financial Services Commission before the amendment. See "Item 4.B. Business Overview—Supervision and Regulation—Principal Regulations Applicable to Financial Holding Companies—Restrictions on Ownership of a Financial Holding Company."

A holder of our ADSs may not be able to exercise dissent and appraisal rights unless it has withdrawn the underlying shares of our common stock and become our direct stockholder.

In some limited circumstances, including the transfer of the whole or any significant part of our business and the merger or consolidation of us with another company, dissenting stockholders have the right to require us to purchase their shares under Korean law. However, holders of our ADSs will not be able to exercise such dissent and appraisal rights if the depositary refuses to do so on their behalf. Our deposit agreement does not require the depositary to take any action in respect of exercising dissent and appraisal rights. In such a situation, holders of our ADSs must withdraw the underlying common stock from the ADS facility (and incur charges relating to that withdrawal) and become our direct stockholder prior to the record date of the stockholders' meeting at which the relevant transaction is to be approved, in order to exercise dissent and appraisal rights.

A holder of our ADSs may be limited in its ability to deposit or withdraw common stock.

Under the terms of our deposit agreement, holders of common stock may deposit such stock with the depositary's custodian in Korea and obtain ADSs, and holders of ADSs may surrender ADSs to the depositary and receive common stock. However, to the extent that a deposit of common stock exceeds the difference between:

(1) the aggregate number of common shares we have deposited or we have consented to allow to be deposited for the issuance of ADSs (including deposits in connection with offerings of ADSs and stock dividends or other distributions relating to ADSs); and

(2) the number of shares of common stock on deposit with the custodian for the benefit of the depositary at the time of such proposed deposit,

such common stock will not be accepted for deposit unless

(A) our consent with respect to such deposit has been obtained; or

(B) such consent is no longer required under Korean laws and regulations.

Under the terms of the deposit agreement, no consent is required if the shares of common stock are obtained through a dividend, free distribution, rights offering or reclassification of such stock. We have consented, under the terms of the deposit agreement, to any deposit to the extent that, after the deposit, the number of deposited shares does not exceed such number of shares as we determine from time to time (which number shall at no time be less than 100,000,000 shares), unless the deposit would be prohibited by applicable laws or violate our articles of incorporation. We might not consent to the deposit of any additional common stock. As a result, if a holder surrenders ADSs and withdraws common stock, it may not be able to deposit the stock again to obtain ADSs.

A holder of our ADSs will not have preemptive rights in some circumstances.

The Korean Commercial Code of 1962, as amended, and our articles of incorporation require us, with some exceptions, to offer stockholders the right to subscribe for new shares of our common stock in proportion to their existing shareholding ratio whenever new shares are issued. If we offer any rights to subscribe for additional shares of our common stock or any rights of any other nature, the depositary, after consultation with us, may make the rights available to holders of our ADSs or use reasonable efforts to dispose of the rights on behalf of such holders and make the net proceeds available to such holders. The depositary, however, is not required to make available to holders any rights to purchase any additional shares of our common stock unless it deems that doing so is lawful and feasible and:

- a registration statement filed by us under the U.S. Securities Act of 1933, as amended, is in effect with respect to those shares; or
- the offering and sale of those shares is exempt from or is not subject to the registration requirements of the Securities Act.

Similarly, holders of our common stock located in the United States may not exercise any such rights they receive absent registration or an exemption from the registration requirements under the Securities Act.

We are under no obligation to file any registration statement with the U.S. Securities and Exchange Commission or to endeavor to cause such a registration statement to be declared effective. Moreover, we may not be able to establish an exemption from registration under the Securities Act. Accordingly, a holder of our ADSs may be unable to participate in our rights offerings and may experience dilution in its holdings. If a registration statement is required for a holder of our ADSs to exercise preemptive rights but is not filed by us or is not declared effective, the holder will not be able to exercise its preemptive rights for additional ADSs and it will suffer dilution of its equity interest in us. If the depositary is unable to sell rights that are not exercised or not distributed or if the sale is not lawful or feasible, it will allow the rights to lapse, in which case the holder will receive no value for these rights.

Dividend payments and the amount a holder of our ADSs may realize upon a sale of its ADSs will be affected by fluctuations in the exchange rate between the U.S. dollar and the Won.

Our common stock is listed on the KRX KOSPI Market and quoted and traded in Won. Cash dividends, if any, in respect of the shares represented by the ADSs will be paid to the depositary in Won and then converted by the depositary into U.S. dollars, subject to certain conditions. Accordingly, fluctuations in the exchange rate between the Won and the U.S. dollar will affect, among other things, the amounts a holder of our ADSs will receive from the depositary in respect of dividends, the U.S. dollar value of the proceeds that it would receive upon sale in Korea of the shares of our common stock obtained upon surrender of ADSs and the secondary market price of ADSs. Such fluctuations will also affect the U.S. dollar value of dividends and sales proceeds received by holders of our common stock.

The market value of an investment in our ADSs may fluctuate due to the volatility of the Korean securities market.

Our common stock is listed on the KRX KOSPI Market, which has a smaller market capitalization and is more volatile than the securities markets in the United States and many European countries. The market value of ADSs may fluctuate in response to the fluctuation of the trading price of shares of our common stock on the KRX KOSPI Market. The KRX KOSPI Market has experienced substantial fluctuations in the prices and volumes of sales of listed securities and the KRX KOSPI Market has prescribed a fixed range in which share prices are permitted to move on a daily basis. The KOSPI declined from 1,897.1 on December 31, 2007 to 938.8 on October 24, 2008. The KOSPI was 2,159.8 on April 24, 2015. There is no guarantee that the stock prices of Korean companies will not decline again in the future. Like other securities markets, including those in developed markets, the Korean securities market has experienced problems including market manipulation, insider trading and settlement failures. The recurrence of these or similar problems could have a material adverse effect on the market price and liquidity of the securities of Korean companies, including our common stock and ADSs, in both the domestic and the international markets.

The Korean government has the potential ability to exert substantial influence over many aspects of the private sector business community, and in the past has exerted that influence from time to time. For example, the

Korean government has promoted mergers to reduce what it considers excess capacity in a particular industry and has also encouraged private companies to publicly offer their securities. Similar actions in the future could have the effect of depressing or boosting the Korean securities market, whether or not intended to do so. Accordingly, actions by the government, or the perception that such actions are taking place, may take place or has ceased, may cause sudden movements in the market prices of the securities of Korean companies in the future, which may affect the market price and liquidity of our common stock and ADSs.

If the Korean government deems that emergency circumstances are likely to occur, it may restrict holders of our ADSs and the depositary from converting and remitting dividends and other amounts in U.S. dollars.

If the Korean government deems that certain emergency circumstances, including, but not limited to, severe and sudden changes in domestic or overseas economic circumstances, extreme difficulty in stabilizing the balance of payments or implementing currency exchange rate and other macroeconomic policies, have occurred or are likely to occur, it may impose certain restrictions provided for under the Foreign Exchange Transaction Law, including the suspension of payments or requiring prior approval from governmental authorities for any transaction. See “Item 10.D. Exchange Controls—General.”

A holder of our ADSs may not be able to enforce a judgment of a foreign court against us.

We are a corporation with limited liability organized under the laws of Korea. Substantially all of our directors and officers and other persons named in this document reside in Korea, and all or a significant portion of the assets of our directors and officers and other persons named in this document and substantially all of our assets are located in Korea. As a result, it may not be possible for holders of our ADSs to effect service of process within the United States, or to enforce against them or us in the United States judgments obtained in United States courts based on the civil liability provisions of the federal securities laws of the United States. There is doubt as to the enforceability in Korea, either in original actions or in actions for enforcement of judgments of United States courts, of civil liabilities predicated on the United States federal securities laws.

Item 4. INFORMATION ON THE COMPANY

Item 4.A. *History and Development of the Company*

Overview

We were established as a new financial holding company on September 29, 2008 pursuant to a “comprehensive stock transfer” under Korean law, whereby holders of the common stock of Kookmin Bank and certain of its subsidiaries transferred all of their shares to us in return for shares of our common stock. We were established pursuant to the Financial Holding Company Act, which was enacted in October 2000 and which, together with associated regulations and a related Enforcement Decree, has enabled banks and other financial institutions, including insurance companies, investment trust companies, credit card companies and securities companies, to be organized and managed under the auspices of a single financial holding company.

Our legal and commercial name is KB Financial Group Inc. Our registered office and principal executive offices are located at 84, Namdaemoon-ro, Jung-gu, Seoul 100-703, Korea. Our telephone number is 822-2073-7114. Our agent in the United States, Kookmin Bank, New York Branch, is located at 565 Fifth Avenue, 24th Floor, New York, NY 10017. Its telephone number is (212) 697-6100.

History of the Former Kookmin Bank

The former Kookmin Bank was established by the Korean government in 1963 under its original name of Citizens National Bank under the Citizens National Bank Act of Korea with majority government ownership. Under this Act, we were limited to providing banking services to the general public and to small- and medium-sized enterprises. In September 1994, we completed our initial public offering in Korea and listed our shares on the KRX KOSPI Market.

In January 1995, the Citizens National Bank Act of Korea was repealed and replaced by the Repeal Act of the Citizens National Bank Act. Our status was changed from a specialized bank to a nationwide commercial bank and in February 1995, we changed our name to Kookmin Bank. The Repeal Act allowed us to engage in lending to large businesses.

History of H&CB

H&CB was established by the Korean government in 1967 under the name Korea Housing Finance Corporation. In 1969, Korea Housing Finance Corporation became the Korea Housing Bank pursuant to the Korea Housing Bank Act. H&CB was originally established to provide low and middle income households with long-term, low-interest mortgages in order to help them purchase their own homes, and to promote the increase of housing supply in Korea by providing low-interest housing loans to construction companies. Under the Korea Housing Bank Act, up to 20% of H&CB's lending (excluding lending pursuant to government programs) could be non-mortgage lending. Until 1997 when the Korea Housing Bank Act was repealed, H&CB was the only entity in Korea allowed to provide mortgage loans with a term of longer than ten years. H&CB also had the exclusive ability to offer housing-related deposit accounts offering preferential rights to subscribe for newly-built apartments.

In July 1999, H&CB entered into an investment agreement with certain affiliates of the ING Groep N.V., a leading global financial services group. Through ING Insurance International B.V. and ING International Financial Holdings, ING Groep N.V. invested ₩332 billion to acquire 9,914,777 new common shares of H&CB representing 9.99999% of H&CB's outstanding common shares. As of December 31, 2012, ING Groep N.V. beneficially owned, through its consolidated subsidiary ING Bank N.V., 5.02% of our issued common stock. In February 2013, ING Bank N.V. sold all of its stake in our company in a block trade.

The Merger of the Former Kookmin Bank and H&CB

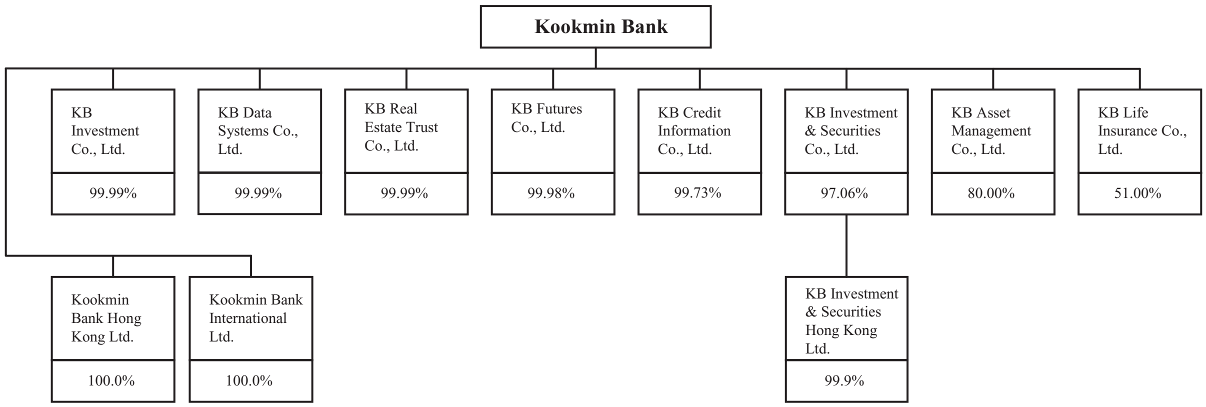
Effective November 1, 2001, the former Kookmin Bank and H&CB merged into a new entity named Kookmin Bank. This merger resulted in Kookmin Bank becoming the largest commercial bank in Korea. Kookmin Bank's ADSs were listed on the New York Stock Exchange on November 1, 2001 and its common shares were listed on the KRX KOSPI Market on November 9, 2001. As of October 31, 2001, H&CB's total assets were ₩67,399 billion, its total deposits were ₩51,456 billion, its total liabilities were ₩64,537 billion and it had stockholders' equity of ₩2,849 billion. As required by U.S. GAAP, we recognized H&CB's total assets and liabilities at their estimated fair values of ₩68,329 billion and ₩64,840 billion, respectively. These amounts reflect the recognition of ₩562 billion of negative goodwill, which was allocated to the fixed assets, core deposit intangible assets and credit card relationship intangible assets assumed.

The Establishment of KB Financial Group

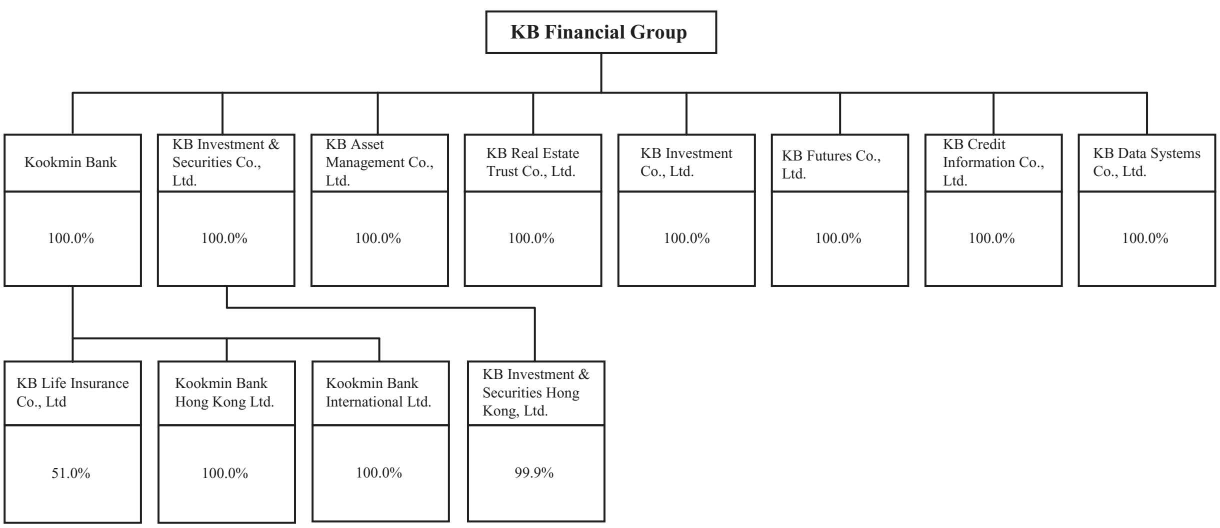
We were established on September 29, 2008 pursuant to a "comprehensive stock transfer" under Article 360-15 of the Korean Commercial Code, whereby holders of the common stock of Kookmin Bank and certain of its subsidiaries transferred all of their shares to us, a new financial holding company, and in return received shares of our common stock. In the stock transfer, each holder of one share of Kookmin Bank common stock received one share of our common stock, par value ₩5,000 per share. Holders of Kookmin Bank ADSs and global depositary shares, each of which represented one share of Kookmin Bank common stock, received one of our ADSs for every ADS or global depositary share they owned. In addition, holders of the common stock of KB Investment & Securities Co., Ltd., KB Asset Management Co., Ltd., KB Real Estate Trust Co., Ltd., KB Investment Co., Ltd., KB Futures Co., Ltd., KB Credit Information Co., Ltd., and KB Data Systems Co., Ltd., all of which were Kookmin Bank's subsidiaries, transferred all of their shares to us and, as consideration for such transferred shares, received shares of our common stock in accordance with the specified stock transfer ratio applicable to each such subsidiary. Following the completion of the stock transfer, Kookmin Bank, KB Investment & Securities Co., Ltd., KB Asset Management Co., Ltd., KB Real Estate Trust Co., Ltd., KB

Investment Co., Ltd., KB Futures Co., Ltd., KB Credit Information Co., Ltd., and KB Data Systems Co., Ltd. became our wholly-owned subsidiaries. The stock transfer was accounted for under U.S. GAAP as a transaction between entities under common control and, with respect to the transfer by noncontrolling stockholders of Kookmin Bank's subsidiaries included in the stock transfer, the acquisition by us of such noncontrolling interests of such subsidiaries was accounted for using the purchase method.

The following chart illustrates the organizational structure of Kookmin Bank prior to the completion of the stock transfer:



The following chart illustrates our organizational structure after the completion of the stock transfer:



The purpose of the stock transfer and our establishment as a financial holding company was to reorganize the different businesses of Kookmin Bank and its subsidiaries under a holding company structure, the adoption of which we believe will:

- assist us in creating an integrated system that facilitates the sharing of customer information and the development of integrated products and services by the different businesses within our subsidiaries;
- assist us in expanding our business scope to include new types of business with higher profit margins;

- enhance our ability to pursue strategic investments or reorganizations by way of mergers, acquisitions, spin-offs or other means;
- maximize our management efficiency; and
- further enhance our capacity to expand our overseas operations.

Following the stock transfer, our common stock was listed on the KRX KOSPI Market on October 10, 2008 and our ADSs were listed on the New York Stock Exchange on September 29, 2008.

In connection with the stock transfer, Kookmin Bank common stockholders who opposed the stock transfer were entitled to exercise appraisal rights and require Kookmin Bank to repurchase their shares in the event the stock transfer was completed. The purchase price for shares in respect of which appraisal rights were exercised was set at ₩63,293 per share. Kookmin Bank repurchased 38,263,249 shares of its common stock as a result of the exercise of appraisal rights by dissenting stockholders. In addition, prior to the stock transfer, Kookmin Bank executed a share buy back program, pursuant to which it repurchased 16,840,000 shares of its common stock. Accordingly, as a result of the transfer by Kookmin Bank of such treasury shares and the shares it held in its subsidiaries to us, Kookmin Bank received 73,607,601 shares of our common stock in the stock transfer, all of which it subsequently sold.

Item 4.B. *Business Overview*

Business

We are one of the largest financial holding companies in Korea, in terms of consolidated total assets, and our operations include Kookmin Bank, the largest commercial bank in Korea in terms of total assets (including loans). Our subsidiaries collectively engage in a broad range of businesses, including commercial banking, credit cards, asset management, life insurance, capital markets activities and international banking. As of December 31, 2014, we had consolidated total assets of ₩308 trillion, consolidated total deposits of ₩212 trillion and consolidated stockholders' equity of ₩28 trillion.

We were established as a financial holding company in September 2008, pursuant to a "comprehensive stock transfer" under Korean law. See "Item 4.A. History and Development of the Company—The Establishment of KB Financial Group."

On the asset side, we provide credit and related financial services to individuals and small- and medium-sized enterprises and, to a lesser extent, to large corporate customers. On the deposit side, we provide a full range of deposit products and related services to both individuals and enterprises of all sizes. We provide these services predominantly through Kookmin Bank.

By their nature, our core consumer and small- and medium-sized enterprise operations place a high premium on customer access and convenience. Our combined banking network of 1,161 branches as of December 31, 2014, one of the most extensive in Korea, provides a solid foundation for our business and is a major source of our competitive strength. This network provides us with a large, stable and cost effective funding source, enables us to provide our customers convenient access and gives us the ability to provide the customer attention and service essential to conducting our business, particularly in an increasingly competitive environment. Our branch network is further enhanced by automated banking machines and fixed-line, mobile telephone and Internet banking. As of December 31, 2014, we had a customer base of approximately 29.2 million retail customers, which represented over one-half of the Korean population.

The following table sets forth the principal components of our lending business as of the dates indicated. As of December 31, 2014, retail loans and credit card loans and receivables accounted for 56.0% of our total loan portfolio:

	As of December 31,					
	2012		2013		2014	
	(in billions of Won, except percentages)					
Retail						
Mortgage and home equity [(1)]	₩ 74,463	34.3%	₩ 77,969	35.1%	₩ 86,994	37.2%
Other consumer [(2)]	28,969	13.4	29,675	13.4	32,255	13.8
Total retail	103,432	47.7	107,644	48.5	119,249	51.0
Credit card	11,874	5.5	11,784	5.3	11,632	5.0
Corporate	99,683	45.9	100,534	45.3	100,878	43.1
Foreign	1,925	0.9	1,900	0.9	2,143	0.9
Total loans	₩216,914	100.0%	₩221,862	100.0%	₩233,902	100.0%

(1) Includes ₩942 billion, ₩945 billion and ₩1,035 billion of overdraft loans secured by real estate in connection with home equity loans as of December 31, 2012, 2013 and 2014, respectively.

(2) Includes ₩7,978 billion, ₩7,181 billion and ₩6,941 billion of overdraft loans as of December 31, 2012, 2013 and 2014, respectively.

We provide a full range of personal lending products and retail banking services to individual customers, including mortgage loans. We are the largest private sector mortgage lender in Korea.

Lending to small- and medium-sized enterprises is the single largest component of our non-retail credit portfolio and represents a widely diversified exposure to a broad spectrum of the Korean corporate community, both by type of lending and type of customer, with one of the categories being collateralized loans to SOHO customers that are among the smallest of the small- and medium-sized enterprises. The volume of our loans to small- and medium-sized enterprises requires a customer-oriented approach that is facilitated by our large and geographically diverse branch network.

With respect to large corporate customers, we continue to seek to maintain and expand quality relationships by providing them with an increasing range of fee-related services.

Since the former Kookmin Bank initiated the issuance of domestic credit cards in 1980, we have seen our credit card business grow rapidly over the past decade as the nationwide trend towards credit card use accelerated. In March 2011, we effected a horizontal spin-off of the credit card business from Kookmin Bank. As a result, our credit card business is operated by a separate wholly-owned subsidiary, KB Kookmin Card Co., Ltd. As of December 31, 2014, we had approximately 18.2 million holders of check cards or credit cards issued by KB Kookmin Card.

Strategy

Our strategic focus is to become a world-class financial group that ranks among the leaders of the financial industry in Asia and globally. We plan to continue to solidify our market position as Korea's leading bank, enhance our ability to provide comprehensive financial services to our retail and corporate customers and strengthen our overseas operating platform and network. We believe our strong market position in the commercial banking area in Korea is an important competitive advantage, which will enable us to compete more effectively based on convenient delivery, product breadth and differentiation, and service quality while focusing on our profitability.

The key elements of our strategy are as follows:

Providing comprehensive financial services and maximizing synergies among our subsidiaries through our financial holding company structure

We believe the Korean financial services market has been undergoing and will continue to undergo significant change, resulting from, among other things, fluctuations in the Korean and global economy and the evolving social landscape in Korea, including the acceleration of population aging in Korea, the prevalence of smartphone usage, developments in digital and mobile technologies and the ensuing trend toward high-tech "smart banking" in the banking sector. In the context of such changes, we plan to become a comprehensive financial services provider capable of offering a full range of products and services to our large existing base of retail and corporate banking customers, as well as a global firm that can effectively compete with leading international financial institutions. To that end, we are continuing to implement specific initiatives including the enhancement of our group-wide integrated customer relationship management system to facilitate the sharing of customer information and the integration of various customer loyalty programs among our subsidiaries.

We believe our financial holding company structure gives us a competitive advantage over commercial banks and unaffiliated financial services providers by:

- allowing us to offer a more extensive range of financial products and services;
- enabling us to share customer information, which is not permitted outside a financial holding company structure, thereby enhancing our risk management capabilities;
- enhancing our ability to reduce costs in areas such as back-office processing and procurement; and
- enabling us to raise and manage capital on a centralized basis.

Identifying, targeting and marketing to attractive customer segments and providing superior customer value and service to such segments

In recent years, rather than focusing on developing products and services to satisfy the overall needs of the general population, we have increasingly targeted specific market segments in Korea that we expect to generate superior growth and profitability. We will continue to implement a targeted marketing approach that seeks to identify the most attractive customer segments and to develop strategies to build market share in those segments. In particular, we intend to increase our "wallet share" of superior existing customers by using our advanced customer relationship management technology to better identify and meet the needs of our most creditworthy and high net worth customers, on whom we intend to concentrate our marketing efforts. For example, as part of this strategy, we operate a "priority customer" program called KB Star Club through four of our subsidiaries: Kookmin Bank, KB Investment & Securities, KB Life Insurance and KB Kookmin Card. We select and classify KB Star Club customers based on their transaction history with the four subsidiaries and provide such customers with preferential treatment in various areas, including interest rates and transaction fees, depending upon how they are classified. We also provide private banking services, including personal wealth management services through our exclusive brand "Gold & Wise," to increase our share of the priority customer market and in turn increase our profitability and strengthen our position in retail banking.

We are also focusing on attracting and retaining creditworthy customers by offering more differentiated fee-based products and services that are tailored to meet their specific needs. The development and marketing of our products and services are, in part, driven by customer segmentation to ensure we meet the needs of each customer segment. For instance, we continue to develop hybrid financial products with enhanced features, including various deposit products and investment products, for which consumer demand has increased in recent years. We are also focusing on addressing the needs of our customers by providing the highest-quality products and services and developing an open-architecture strategy, which allows us to sell such products through one of the largest branch networks in Korea. In short, we aim to offer our customers a convenient one-stop financial services destination where they can meet their traditional retail and corporate banking requirements, as well as find a broad array of fee-based products and services tailored to address more specific financial needs, including in investment banking, insurance and wealth management. We believe such differentiated, comprehensive services and cross-selling will not only enhance customer loyalty but also increase profitability.

One of our key customer-related strategies continues to be creating greater value and better service for our customers. We intend to continue improving our customer service, including through:

- *Improved customer relationship management technology*. Management has devoted substantial resources toward development of our customer relationship management system, which is designed to provide our employees with the needed information to continually improve the level of service and incentives offered to our preferred customers. Our system is based on an integrated customer database, which allows for better customer management and streamlines our customer reward system. We have also developed state-of-the-art call centers and online Internet capabilities to provide shorter response times to customers seeking information or to execute transactions. Our goals are to continually focus on improving customer service to satisfy our customer's needs through continuing efforts to deliver new and improved services and to upgrade our customer relationship management system to provide the best possible service to our customers in the future.
- *Enhanced distribution channels*. We also believe we can improve customer retention and usage rates by increasing the range of products and services we offer and by developing a differentiated, multi-channel distribution network, including branches, ATMs, call centers, mobile-banking and Internet banking. We believe that our leading market position in the commercial banking area in Korea gives us a competitive advantage in developing and enhancing our distribution capabilities.

Focusing on expanding and improving credit quality in our corporate lending business and increasing market share in the corporate financial services market

We plan to focus on corporate lending as one of our core businesses through attracting top-tier corporate customers and providing customized and distinctive products and services to build our position as a leading service provider in the Korean corporate financial market. To increase our market share in providing financial services to the corporate market, we intend to:

- promote a more balanced and strengthened portfolio with respect to our corporate business by developing our large corporate customer base and utilizing our improved credit management operations to better evaluate new large corporate and small- and medium-sized enterprise customers;
- develop and sell more varied corporate financial products, consisting of transactional banking products which provide higher margin and less risk;
- generate more fee income from large corporate customers through business-to-business transactions, foreign exchange transactions and derivative and other investment products, as well as investment banking services;
- strengthen our marketing system based on our accumulated expertise in order to attract top-tier corporate customers;
- focus on enhancing our channel network in order to provide the best service by strengthening our corporate customer management; and
- further develop and train our core professionals with respect to this market, including through programs such as the "Career Development Path."

Strengthening internal risk management capabilities

We believe that ensuring strong asset quality through effective credit risk management is critical to maintaining stable growth and profitability and risk management will continue to be one of our key focus areas. One of our highest priorities is to improve our asset quality and more effectively price our lending products to take into account inherent credit risk in our portfolio. Our goal is to maintain the soundness of our credit portfolio, profitability and capital base. To this end, we intend to continue to strengthen our internal risk management capabilities by tightening our underwriting and management policies and improving our internal compliance policies. To accomplish this objective, we have undertaken the following initiatives:

- *Strengthening underwriting procedures with advanced credit scoring techniques*. We have centralized our credit management operations into our Credit Management & Analysis Group. Through such centralization, we aim to enhance our credit management expertise and improve our system of checks-and-balances with respect to our credit portfolio. We have also improved our ability to evaluate the credit of our small- and medium-sized enterprise customers through assigning experienced credit officers to our regional credit offices. We also require the same officer to evaluate, review and monitor the outstanding loans and other credits with respect to a customer, which we believe enhances the expertise and improves the efficiency and accountability of such officer, while enabling us to maintain a consistent credit policy. We have also, as a general matter, implemented enhanced credit analysis and scoring techniques, which we believe will enable us to make better-informed decisions about the credit we extend and improve our ability to respond more quickly to incipient credit problems. We are also focusing on enhancing our asset quality through improvement of our early monitoring systems and collection procedures.

- *Improving our internal compliance policy and ensuring strict application in our daily operations*. We have improved our monitoring capabilities with respect to our internal compliance by providing training and educational programs to our management and employees. We have also implemented strict compliance policies to maintain the integrity of our risk management system.

Cultivating a performance-based, customer-oriented culture that emphasizes market best practices

We believe a strong and dedicated workforce is critical to our ability to offer our customers the highest quality financial services and is integral to our goal of maintaining our position as one of Korea's leading financial services providers. In the past, we have dedicated significant resources to develop and train our core professionals, and we intend to continue to enhance the productivity of our employees, including by regularly sponsoring in-house training and educational programs. We have also been seeking to cultivate a performance-based culture to create a work environment where members of our staff are incentivized to maximize their potential and in which our employees are directly rewarded for superior performance. We intend to maintain a professional workforce whose high quality of customer service reflects our goal to achieve and maintain global best practice standards in all areas of operations.

Retail Banking

Due to Kookmin Bank's history and development as a retail bank and the know-how and expertise we have acquired from our activities in that market, retail banking has been and will continue to remain one of our core businesses. Our retail banking activities consist primarily of lending and deposit-taking.

Lending Activities

We offer various loan products that target different segments of the population, with features tailored to each segment's financial profile and other characteristics. The following table sets forth the balances and the percentage of our total retail lending represented by the categories of our retail loans as of the dates indicated:

	As of December 31,					
	2012		2013		2014	
	(in billions of Won, except percentages)					
Retail:						
Mortgage and home equity loans	₩ 74,463	72.0%	₩ 77,969	72.4%	₩ 86,994	73.0%
Other consumer loans (1)	28,969	28.0	29,675	27.6	32,255	27.0%
Total	₩103,432	100.0%	₩107,644	100.0%	₩119,249	100.0%

(1) Excludes credit card loans, but includes overdraft loans.

Our retail loans consist of:

- *Mortgage loans*, which are loans made to customers to finance home purchases, construction, improvements or rentals; and *home equity loans*, which are loans made to our customers secured by their homes to ensure loan repayment. We also provide overdraft loans in connection with our home equity loans.
- *Other consumer loans*, which are loans made to customers for any purpose (other than mortgage and home equity loans). These include overdraft loans, which are loans extended to customers to cover insufficient funds when they withdraw funds from their demand deposit accounts with us in excess of the amount in such accounts up to a limit established by us.

For secured loans, including mortgage and home equity loans, our policy is to lend up to 100% of the adjusted collateral value (except in areas of high speculation designated by the government where we generally limit our lending to between 40% to 60% of the appraised value of collateral) minus the value of any lien or other security interests that are prior to our security interest. In calculating the adjusted collateral value for real estate, we use the appraisal value of the collateral multiplied by a factor, generally between 40% to 80% (40% to 70% in the case of mortgage and home equity loans). This factor varies depending upon the location and use of the real estate and is established in part by taking into account court-supervised auction prices for nearby properties.

A borrower's eligibility for our mortgage loans depends on the value of the mortgage property, the appropriateness of the use of proceeds and the borrower's creditworthiness. A borrower's eligibility for home equity loans is determined by the borrower's credit and the value of the property, while the borrower's eligibility for other consumer loans is primarily determined by the borrower's credit. If the borrower's credit deteriorates, it may be difficult for us to recover the loan. As a result, we review the borrower's creditworthiness, collateral value, credit scoring and third party guarantees when evaluating a borrower. In addition, to reduce the interest rate of a loan or to qualify for a loan, a borrower may provide collateral, deposits or guarantees from third parties.

Mortgage and Home Equity Lending

The housing finance market in Korea is divided into public sector and private sector lending. In the public sector, two government entities, the National Housing Fund and the National Agricultural Cooperative Federation, are responsible for most of the mortgage lending.

Private sector mortgage and home equity lending in Korea has expanded substantially in recent years. We provide customers with a number of mortgage and home equity loan products that have flexible features, including terms, repayment schedules, amounts and eligibility for loans, and we offer interest rates on a commercial basis. The maximum term of mortgage loans is 35 years and the majority of our mortgage loans have long-term maturities, which may be renewed. Non-amortizing home equity loans have an initial maturity of one year, which may be extended on an annual basis for a maximum of five years. Home equity loans subject to amortization of principal may have a maximum term of up to 35 years. As of December 31, 2014, we had ₩29,384 billion of amortizing home equity loans, representing 85.3% of our total home equity loans, and ₩5,079 billion of non-amortizing home equity loans, representing 14.7% of our total home equity loans. Any customer is eligible for a mortgage or an individual home equity loan regardless of whether it participates in one of our housing related savings programs and so long as that customer is not barred by regulation from obtaining a loan because of bad credit history. However, customers with whom we frequently transact business and provide us with significant revenue receive preferential interest rates on loans.

As of December 31, 2014, 71.1% of our mortgage loans were secured by residential property which is the subject of the loan, 17.8% of our mortgage loans were guaranteed by the Housing Finance Credit Guarantee

Fund, a government housing-related entity, and the remaining 11.1% of our mortgage loans, contrary to general practices in the United States, were unsecured (although the use of proceeds from these loans are restricted for the purpose of financing home purchases and some of these loans were guaranteed by a third party). One reason that a relatively high percentage of our mortgage loans are unsecured is that we, along with other Korean banks, provide advance loans to borrowers for the down payment of new housing (particularly apartments) that is in the process of being built. Once construction is completed, which may take several years, these mortgage loans become secured by the new housing purchased by these borrowers. For the year ended December 31, 2014, the average initial loan-to-value ratio of our mortgage loans, which is a measure of the amount of loan exposure to the appraised value of the security collateralizing the loan, was approximately 50.8%. There are three reasons that our loan-to-value ratio is relatively lower (as is the case with other Korean banks) compared to similar ratios in other countries, such as the United States. The first reason is that housing prices are high in Korea relative to average income, so most people cannot afford to borrow an amount equal to the entire value of their collateral and make interest payments on such an amount. The second reason relates to the "*jeonsae*" system, through which people provide a key money deposit while residing in the property prior to its purchase. At the time of purchase, most people use the key money deposit as part of their payment and borrow the remaining amount from Korean banks, which results in a loan that will be for an amount smaller than the appraised value of the property for collateral and assessment purposes. The third reason is that Korean banks discount the appraised value of the borrower's property for collateral and assessment purposes so that a portion of the appraised value is reserved in order to provide recourse to a renter who lives at the borrower's property. This is in the event that the borrower's property is seized by a creditor, and the renter is no longer able to reside at that property. See "Item 3.D. Risk Factors—Other risks relating to our business—A decline in the value of the collateral securing our loans and our inability to realize full collateral value may adversely affect our credit portfolio."

The following table sets forth our unsecured and secured mortgage loans and home equity loans as of December 31, 2012, 2013 and 2014, based on their loan classification categories under IFRS and our internal credit ratings for loans (which are described in Note 4.2.4 of the notes to our consolidated financial statements):

(1) Includes advance loans guaranteed by the Housing Finance Credit Guarantee Fund to borrowers for the down payment of new housing that is in the process of being built.

Our home equity loan portfolio includes loans that are in a second lien position. In addition to the underwriting procedures we perform when we issue home equity loans in general, we perform additional underwriting procedures with respect to home equity loans secured by a second lien to assess and confirm the value and status of any loans secured by security interests on the collateral which would be prior to our security interest under the second lien home equity loan. Under regulations implemented by the Financial Supervisory Service, our home equity loans are subject to maximum loan-to-value ratios (i.e., the ratio of the aggregate principal amount of loans, including first and second lien loans, secured by a particular item of collateral to the appraised value of such collateral) of between 40% and 70%. As such, for home equity loans, we do not lend more than an amount equal to the adjusted collateral value (i.e., the collateral value as discounted by the required loan-to-value ratio) minus the value of any loans secured by security interests on the collateral that are prior to our security interest. Accordingly, in order to ascertain the value of loans secured by security interests on the collateral which would be prior to our security interest and to confirm the status of such loans, we perform additional underwriting procedures including a review of the relevant title and security interest registration documents and bank documents and certificates regarding such loans. In addition, for purposes of calculating debt-to-income ratios applicable to loans secured by certain types of housing under regulations implemented by the Financial Supervisory Service (see "—Supervision and Regulation—Principal Regulations Applicable to Banks—Regulations Relating to Retail Household Loans"), which we apply on a nationwide basis for our home equity loans, we perform additional adjustments in our debt-to-income ratio calculations with respect to second lien home equity loans to account for the value of loans secured by security interests on the collateral that are prior to our security interest.

Following the issuance of a home equity loan, we make use of the Korea Federation of Bank's database of delinquent borrowers to generally monitor the compliance of our borrowers with their other loan obligations, including the compliance of our second lien borrowers with their first lien loans. If a borrower in Korea is past due on payments of interest or principal for more than three months on any of its outstanding loans to Korean financial institutions (including mortgage, home equity, other consumer and credit card loans), such borrower is registered on the Korea Federation of Banks' database of delinquent borrowers, which we monitor on a daily basis. The information disclosed by such database, which includes the outstanding loan amount which is past due, the identity of the delinquent borrower and the name of the applicable lending institution for such loan, provides an early warning about such borrower to our loan officers at the branch level, who then closely monitor our outstanding loans to such delinquent borrower and take appropriate preventive and remedial measures (including requiring such borrower to provide additional collateral) as necessary. Upon the occurrence of a default in the first lien position, we treat the second lien home equity loan as part of our potential problem loans or non-performing loans. More specifically, upon learning of the occurrence of a default in the first lien position, we examine our second lien home equity loan to determine whether the loan should be re-classified as "precautionary," "substandard" or "doubtful" according to the asset classification guidelines of the Financial Services Commission. Assuming that such second lien home equity loan is not delinquent, if the outstanding principal amount of the relevant first lien loan is less than ₩15 million, we classify the entire amount of the second lien home equity loan as "precautionary" and closely monitor it as a loan that may potentially become problematic. If the outstanding principal amount of the relevant first lien loan is ₩15 million or above or the borrower is undergoing, or preparing to undergo, foreclosure proceedings with respect to the underlying collateral, we classify the estimated recoverable amount of the second lien home equity loan as "substandard" and the rest of such loan amount as "doubtful."

Pricing. The interest rates on our retail mortgage loans are generally based on a periodic floating rate (which is based on a base rate determined for three-month, six-month or twelve-month periods using our Market Opportunity Rate system, which reflects our internal cost of funding, further adjusted to account for our expenses related to lending). Our interest rates also incorporate a margin based among other things on the type of security, the credit score of the borrower and the estimated loss on the security. We can adjust the price to reflect the borrower's current and/or expected future contribution to us. The applicable interest rate is determined at the time of the loan. If a loan is terminated prior to its maturity, the borrower is obligated to pay us an early termination fee of approximately 0.7% to 1.4% of the loan amount in addition to the accrued interest.

The interest rates on our home equity loans are determined on the same basis as our retail mortgage loans.

As of December 31, 2014, our three-month, six-month and twelve-month base rates were 2.13%, 2.17% and 2.18%, respectively.

As of December 31, 2014, 75.7% of our outstanding mortgage and home equity loans were priced based on a floating rate.

Other Consumer Loans

Other consumer loans are primarily unsecured. However, such loans may be secured by real estate, deposits or securities. As of December 31, 2014, approximately ₩16,035 billion, or 49.7% of our consumer loans (other than mortgage and home equity loans) were unsecured loans (although some of these loans were guaranteed by a third party). Overdraft loans are also classified as other consumer loans, are primarily unsecured and generally have an initial maturity of one year, which is typically extended automatically on an annual basis and may be extended up to a maximum of five years. The amount of overdraft loans as of December 31, 2014 was approximately ₩6,941 billion.

Pricing. The interest rates on our other consumer loans (including overdraft loans) are determined on the same basis as on our mortgage and home equity loans, except that, for unsecured loans, the borrower's credit score as determined during our loan approval process is also taken into account. See "Item 11. Quantitative and Qualitative Disclosures about Market Risk—Credit Risk Management."

As of December 31, 2014, 97.9% of our other consumer loans had interest rates that were not fixed but were variable in reference to our base rate, which is based on the Market Opportunity Rate.

Deposit-taking Activities

Due to our extensive nationwide network of branches, together with our long history of development and our resulting know-how and expertise, as of December 31, 2014, we had the largest number of retail customers and retail deposits among Korean commercial banks. The balance of our deposits from retail customers was ₩126,581 billion, ₩132,733 billion and ₩138,246 billion as of December 31, 2012, 2013 and 2014, respectively, which constituted 64.1%, 66.1% and 65.3%, respectively, of the balance of our total deposits.

We offer many deposit products that target different segments of our retail customer base, with features tailored to each segment's financial profile, characteristics and needs, including:

- *Demand deposits*, which either do not accrue interest or accrue interest at a lower rate than time deposits. Demand deposits allow the customer to deposit and withdraw funds at any time and, if they are interest bearing, accrue interest at a variable rate depending on the amount of deposit. Retail and corporate demand deposits constituted 34.5% of our total deposits as of December 31, 2014 and paid average interest of 0.42% for 2014.

- *Time deposits*, which generally require the customer to maintain a deposit for a fixed term, during which the deposit accrues interest at a fixed rate or a variable rate based on the KOSPI, or to deposit specified amounts on an installment basis. If the amount of the deposit is withdrawn prior to the end of the fixed term, the customer will be paid a lower interest rate than that originally offered. The term for time deposits typically ranges from one month to five years, and the term for installment savings deposits ranges from six months to ten years. Retail and corporate time deposits constituted 58.9% of our total deposits as of December 31, 2014 and paid average interest of 2.7% for 2014. Most installment savings deposits offer fixed interest rates.
- *Certificates of deposit*, the maturities of which typically range from 30 days to 730 days with a required minimum deposit of ₩10 million. Interest rates on certificates of deposit are determined based on the length of the deposit and prevailing market rates. Our certificates of deposit are sold at a discount to their face value, reflecting the interest payable on the certificates of deposit.
- *Foreign currency deposits* are available to Korean residents, non-residents and overseas immigrants. We offer foreign currency demand deposits and time deposits as well as checking accounts in eleven currencies. *Foreign currency demand deposits*, which accrue interest at a variable rate, allow customers to deposit and withdraw funds at any time. Foreign currency demand deposits accrue interest at a lower rate than *foreign currency time deposits*, which generally require customers to maintain the deposit for a fixed term, during which it accrues interest at a fixed rate.

We offer varying interest rates on our deposit products depending upon average funding costs, the rate of return on our interest earning assets and the interest rates offered by other commercial banks.

We also offer deposits that provide the holder with preferential rights to housing subscriptions and eligibility for mortgage loans. These products include:

- *Housing subscription time deposits*, which are special purpose time deposit accounts providing the holder with a preferential right to subscribe for new private apartment units under the Housing Law. This law is the basic law setting forth various measures supporting the purchase of houses and the supply of such houses by construction companies. These products accrue interest at a fixed rate for one year, and at an adjustable rate after one year. Deposit amounts per account range from ₩2 million to ₩15 million depending on the location of the holder's current residence and the size of the desired apartment unit. These deposit products target high and middle income households.
- *Housing subscription installment savings deposits*, which are monthly installment savings programs providing the holder with a preferential subscription right for new private apartment units under the Housing Law. Account holders are also eligible for our mortgage loans. These deposits require monthly installments of ₩50,000 to ₩500,000, have maturities of between two and five years and accrue interest at fixed or variable rates depending on the term. These deposit products target low- and middle-income households.

In 2002, after significant research and planning, we launched private banking operations at Kookmin Bank's headquarters. Shortly thereafter, we launched a comprehensive strategy with respect to customers with higher net worth, which included staffing appropriate representatives, marketing aggressively, establishing IT systems, selecting appropriate branch locations and readying such branches with the necessary facilities to service such customers. As of December 31, 2014, we operated 23 private banking centers through Kookmin Bank.

The Monetary Policy Committee of the Bank of Korea (the "Monetary Policy Committee") imposes a reserve requirement on Won currency deposits of commercial banks based generally on the type of deposit instrument. The reserve requirement is currently up to 7%. See "—Supervision and Regulation—Principal Regulations Applicable to Banks—Liquidity."

The Depositor Protection Act provides for a deposit insurance system where the Korea Deposit Insurance Corporation guarantees to depositors the repayment of their eligible bank deposits. The deposit insurance system insures up to a total of ₩50 million per depositor per bank. See "—Supervision and Regulation—Principal Regulations Applicable to Banks—Deposit Insurance System." We paid ₩330 billion of premium for 2014.

Credit Cards

Credit cards are another of our core retail products. We issue most of our credit cards under the "KB Kookmin Card" brand. In March 2011, we effected a horizontal spin-off of the credit card business from Kookmin Bank. As a result, our credit card business is operated by a separate wholly-owned subsidiary, KB Kookmin Card Co., Ltd.

The following table sets forth certain data relating to our credit card operations, on a non-consolidated basis, as of the dates and for the periods indicated:

	As of and for the Year Ended December 31,		
	2012	2013	2014
	(in billions of Won, except number of holders, accounts and percentages)		
Number of credit cardholders (at year end) (thousands)			
General accounts	10,112	8,987	8,487
Corporate accounts	424	435	416
Total	10,536	9,422	8,903
Number of merchants (at year end) (thousands)	2,024	2,058	2,178
Active ratio (at year end) [1]	81.0%	88.6%	87.7%
Credit card fees			
Merchant fees [2]	₩ 1,484	₩ 1,480	₩ 1,503
Installment and cash advance fees	683	578	475
Annual membership fees	66	68	63
Other fees	542	539	493
Total	₩ 2,775	₩ 2,665	₩ 2,534
Charge volume [3]			
General purchase	₩45,768	₩46,735	₩45,295
Installment purchase	12,153	10,852	10,861
Cash advance	11,606	10,516	9,535
Card loan [4]	3,800	4,688	4,227
Total	₩73,327	₩72,791	₩69,918
Outstanding balance (at year end)			
General purchase	₩ 4,533	₩ 4,716	₩ 4,496
Installment purchase	2,679	2,600	2,786
Cash advance	2,032	1,525	1,323
Card loan [4]	2,647	2,959	3,046
Total	₩11,891	₩11,800	₩11,651
Average outstanding balances			
General purchase	₩ 4,461	₩ 4,601	₩ 4,533
Installment purchase	2,728	2,474	2,528
Cash advance	2,134	1,717	1,390
Card loan [4]	2,759	2,829	2,869
Total	₩12,082	₩11,621	₩11,320
Delinquency ratios (at year end) [5]			
From 1 month to 3 months	0.94%	0.81%	0.64%
From 3 months to 6 months	0.25	0.83	0.77
Over 6 months	0.13	0.07	0.08
Total	1.32%	1.71%	1.48%
Non-performing loan ratio	0.40%	0.91%	0.85%
Write-offs (gross)	₩ 541	₩ 404	₩ 427
Recoveries [6]	185	141	131
Net write-offs	₩ 356	₩ 263	₩ 296
Gross write-off ratio [7]	4.48%	2.93%	3.77%
Net write-off ratio [8]	2.95%	1.91%	2.61%

(1) The active ratio represents the ratio of accounts used at least once within the last six months to total accounts as of year end.

(2) Merchant fees consist of maintenance fees and costs associated with prepayment by us (on behalf of customers) of sales proceeds to merchants, processing fees relating to sales and membership applications, costs relating to the management of delinquencies and

recoveries, provision for loan losses, general variable expenses and other fixed costs that are charged to our member merchants. We typically charge our member merchants fees that range from 1.5% to 2.7%.

(3) Represents the aggregate cumulative amount charged during the year.

(4) Card loans consist of loans that are provided on an unsecured basis to cardholders upon prior agreement. Payment on such a loan can be due either in one payment or in installments after a fixed period, in the case of principal payments, and will be due in installments, in the case of interest payments.

(5) Represents ratio of credit card balances overdue by one month or more to outstanding balance. In line with industry practice, we have restructured a portion of delinquent credit card account balances as loans. As of December 31, 2014, these restructured loans amounted to ₩45 billion. Because these restructured loans are not treated as being delinquent at the time of conversion or for a period of time thereafter, our delinquency ratios may not fully reflect all delinquent amounts relating to our outstanding balances.

(6) Does not include proceeds that we received from sales of our non-performing loans that were written off.

(7) Represents the ratio of gross write-offs for the year to average outstanding balance for the year. Our charge-off policy is generally to write off balances which have been overdue for four payment cycles or more or which have been classified as expected loss.

(8) Represents the ratio of net write-offs for the year to average outstanding balances for the year. Our charge-off policy is generally to write off balances which have been overdue for four payment cycles or more or which have been classified as expected loss.

In contrast to the system in the United States and many other countries, where most credit cards are revolving cards that allow outstanding amounts to be rolled over from month to month so long as a required minimum percentage is repaid, credit cardholders in Korea are generally required to pay for their purchases within approximately 14 to 44 days of purchase depending on their payment cycle. However, we also offer revolving payment plans to individuals that allow outstanding amounts to be rolled over to subsequent payment periods. Delinquent accounts (defined as amounts overdue for one day or more) are charged penalty interest and closely monitored. For installment purchases, we charge interest on unpaid installments at rates that vary according to the individual cardholder's membership level, which is based on, among others, transaction history, the length of the cardholder's relationship with us and contribution to our profitability.

We are committed to continuing to enhance our credit card business by strengthening our risk management and maximizing our operational efficiency. In addition, we believe that our extensive branch network, brand recognition and overall size will enable us to cross-sell products such as credit cards to our existing and new customers.

To promote our credit card business, we offer services targeted to various financial profiles and customer requirements and are concentrating on:

- strengthening cross-sales to existing customers and offering integrated financial services;
- offering cards that provide additional benefits such as frequent flyer miles and reward program points that can be redeemed by the customer for complementary services, prizes and cash;
- offering platinum cards, VVIP cards and other prime members' cards, which have a higher credit limit and provide additional services in return for a higher fee;
- acquiring new customers through strategic alliances and cross-marketing with retailers;
- encouraging increased use of credit cards by existing customers through special offers for frequent users;
- introducing new features such as travel services and insurance through alliance partners; and
- developing fraud detection and security systems to prevent the misuse of credit cards.

As of December 31, 2014, we had approximately 8.9 million credit cardholders. Of the credit cards outstanding, approximately 87.7% were active, meaning that they had been used at least once during the previous six months.

Our card revenues consist principally of cash advance fees, merchant fees, credit card installment fees, interest income from credit card loans, annual fees paid by cardholders, interest and fees on late payments and, with respect to revolving payment plans we offer, interest and fees relating to revolving balances. Cardholders are generally required to pay for their purchases within 14 to 44 days after the date of purchase, depending on their payment cycle. Except in the case of installment purchases, accounts which remain unpaid after this period are deemed to be delinquent.

We generate other fees through a processing charge on merchants, which ranges from 1.5% to 2.7%.

Under non-exclusive license agreements with overseas financial services corporations, we also issue MasterCard, Visa, American Express, JCB and China UnionPay credit cards.

We issue debit cards and charge merchants commissions that range from 1.0% to 2.0% of the amounts purchased using a debit card. We also issue "check cards," which are similar to debit cards except that "check cards" are accepted by all merchants that accept credit cards, and charge merchants commissions that range from 1.0% to 1.7%. Much like debit cards, check card purchases are also debited directly from customers' accounts with us.

In the second half of 2012, we (through KB Kookmin Card) commenced accounts receivable factoring activities in partnership with SK Telecom Co., Ltd., a leading Korean mobile telecommunications company, pursuant to which we purchase accounts receivable arising from SK Telecom's installment sale of mobile handsets to its customers. The outstanding balance of factored receivables amounted to ₩2,806 billion as of December 31, 2014.

In February 2014, the Financial Services Commission suspended the new credit card issuance and other related activities of KB Kookmin Card for three months from February to May 2014, in response to an incident involving the misappropriation of the personal information of a large number of its customers by an employee of an external credit information company in the first half of 2013. See "Item 8A. Consolidated Statements and Other Financial Information—Legal Proceedings."

Corporate Banking

We lend to and take deposits from small- and medium-sized enterprises and, to a lesser extent, large corporate customers. We had over 230,000 small- and medium-sized enterprise borrowers as of December 31, 2012, over 220,000 small- and medium-sized enterprise borrowers as of December 31, 2013 and over 220,000 small- and medium-sized enterprise borrowers as of December 31, 2014, for Won-currency loans. As of December 31, 2012, 2013 and 2014, we had 1,486, 1,654 and 1,784 large corporate borrowers, respectively, for Won-currency loans. For 2012, 2013 and 2014, we received fee revenue from cash management services offered to corporate customers, which include "firm-banking" services such as inter-account transfers, transfers of funds from various branches and agencies of a company (such as insurance premium payments) to the account of the headquarters of such company and transfers of funds from various customers of a company to the main account of such company, in the amount of ₩115 billion, ₩117 billion and ₩119 billion, respectively. Of our branch network as of December 31, 2014, we had eight branches that primarily handled large corporate banking.

The following table sets forth the balances and the percentage of our total corporate lending represented by our small- and medium-sized enterprise business loans and our large corporate business loans as of the dates indicated, estimated based on our internal classifications of corporate borrowers:

	As of December 31,					
	2012		2013		2014	
	(in billions of Won, except percentages)					
Corporate:						
Small- and medium-sized enterprise loans	₩70,471	70.7%	₩ 71,045	70.7%	₩ 71,960	71.3%
Large corporate loans	29,212	29.3	29,489	29.3	28,918	28.7
Total	₩99,683	100.0%	₩100,534	100.0%	₩100,878	100.0%

On the deposit-taking side, we currently offer our corporate customers several types of corporate deposits. Our corporate deposit products can be divided into two general categories: (1) demand deposits that have no restrictions on deposits or withdrawals, but which offer a relatively low interest rate; and (2) deposits from which withdrawals are restricted for a period of time, but offer higher interest rates. We also offer installment savings deposits, certificates of deposit and repurchase instruments. We offer varying interest rates on deposit products depending upon the rate of return on our income-earning assets, average funding costs and interest rates offered by other nationwide commercial banks.

The total amount of deposits from our corporate customers amounted to ₩66,389 billion as of December 31, 2014, or 31.4% of our total deposits.

Small- and Medium-sized Enterprise Banking

Our small- and medium-sized enterprise banking business has traditionally been and will remain one of our core businesses because of both our historical development and our accumulated expertise. We believe that we possess the necessary elements to succeed in the small- and medium-sized enterprise market, including our extensive branch network, our credit rating system for credit approval, our marketing capabilities (which we believe have provided us with significant brand loyalty) and our ability to take advantage of economies of scale.

We use the term "small- and medium-sized enterprises" as defined in the Small and Medium Industry Basic Act and related regulations. Under the amended Small and Medium Industry Basic Act, which became effective on February 3, 2015, and related regulations, an enterprise must meet each of the following criteria in order to meet the definition of a small- and medium-sized enterprise: (i) total assets at the end of the immediately preceding fiscal year must be less than ₩500 billion, (ii) the average or annual sales revenue standards as prescribed by the Enforcement Decree of the Small and Medium Industry Basic Act that are applicable to the enterprise's primary business must be met and (iii) the standards of management independence as prescribed by the Enforcement Decree of the Small and Medium Industry Basic Act must be met. However, even if an enterprise that qualified as a small- and medium-sized enterprise under the Small and Medium Industry Basic Act prior to the amendment thereof no longer meets the definition due to such amendments, such enterprise will continue to be deemed a small- and medium-sized enterprise until March 31, 2018. Further, certified social enterprises (as defined in the Social Enterprise Promotion Act of Korea), as well as cooperatives or federations of cooperatives (as defined in the Framework Act on Cooperatives) that satisfy the requirements prescribed by the Small and Medium Industry Basic Act, may also qualify as small- and medium-sized enterprises.

Industry-wide delinquency ratios for Won-denominated loans to small- and medium-sized enterprises decreased from 2012 to 2014. However, our delinquency ratio for loans to small- and medium-sized enterprises may increase in the future as a result of, among other things, adverse economic conditions in Korea and globally. See "Item 3.D. Risk Factors—Other risks relating to our business—Difficult conditions in the global financial markets could adversely affect our results of operations and financial condition." In addition, in light of the deteriorating financial condition and liquidity position of small- and medium-sized enterprises in Korea, the Korean government has in recent years introduced measures intended to encourage Korean banks to provide financial support to small- and medium-sized enterprise borrowers. See "Item 3.D. Risk Factors—Risks relating to our small- and medium-sized enterprise loan portfolio—We have significant exposure to small- and medium-sized enterprises, and any financial difficulties experienced by these customers may result in a deterioration of our asset quality and have an adverse impact on us."

Lending Activities

Our principal loan products for our small- and medium-sized enterprise customers are working capital loans and facilities loans. Working capital loans are provided to finance working capital requirements and include notes discounted and trade financing. Facilities loans are provided to finance the purchase of equipment and the establishment of manufacturing assembly plants. As of December 31, 2014, working capital loans and facilities loans accounted for 56.7% and 43.3%, respectively, of our total small- and medium-sized enterprise loans. As of December 31, 2014, we had over 220,000 small- and medium-sized enterprise customers on the lending side.

Loans to small- and medium-sized enterprises may be secured by real estate or deposits or may be unsecured. As of December 31, 2014, secured loans and guaranteed loans accounted for, in the aggregate, 86.6% of our small- and medium-sized enterprise loans. Among the secured loans, 95.9% were secured by real estate and 4.1% were secured by deposits or securities. Working capital loans generally have a maturity of one year, but may be extended for additional terms of up to one year in length for an aggregate term of five years. Facilities loans have a maximum maturity of 15 years.

When evaluating the extension of working capital loans, we review the corporate customer’s creditworthiness and capability to generate cash. Furthermore, we take credit guaranty letters from other financial institutions and use time deposits that the borrower has with us as collateral, and may require additional collateral.

The value of any collateral is defined using a formula that takes into account the appraised value of the property, any prior liens or other claims against the property and an adjustment factor based on a number of considerations including, with respect to property, the value of any nearby property sold in a court-supervised auction during the previous five years. We revalue any collateral on a periodic basis (generally every year) or if a trigger event occurs with respect to the loan in question.

We also offer mortgage loans to home builders or developers who build or sell single- or multi-family housing units, principally apartment buildings. Many of these builders and developers are categorized as small- and medium-sized enterprises. We offer a variety of such mortgage loans, including loans to purchase property or finance the construction of housing units and loans to contractors used for working capital purposes. Such mortgage loans subject us to the risk that the housing units will not be sold. As a result, we review the probability of the sale of the housing unit when evaluating the extension of a loan. We also review the borrower’s creditworthiness and the adequacy of the intended use of proceeds. Furthermore, we take a lien on the land on which the housing unit is to be constructed as collateral. If the collateral is not sufficient to cover the loan, we also take a guarantee from the Housing Finance Credit Guarantee Fund as security.

A substantial number of our small- and medium-sized enterprise customers are SOHOs, which we currently define to include sole proprietorships and individual business interests. With respect to SOHOs, we apply credit risk evaluation models, which not only use quantitative analysis related to a customer’s accounts, personal credit and financial information and due amounts but also require our credit officers to perform a qualitative analysis of each potential SOHO customer. With respect to SOHO loans in excess of ₩1 billion, our credit risk evaluation model also includes a quantitative analysis of the financial statements of the underlying business. We generally lend to SOHOs on a secured basis, although a small portion of our SOHO exposures are unsecured.

Pricing

We establish the price for our corporate loan products based principally on transaction risk, our cost of funding and market considerations. Transaction risk is measured by such factors as the credit rating assigned to a particular borrower, the size of the borrower and the value and type of collateral. Our loans are priced based on the Market Opportunity Rate system, which is a periodic floating rate system that takes into account the current market interest rate. As of December 31, 2014, the Market Opportunity Rate was 2.13% for three months, 2.17% for six months and 2.18% for one year.

While we generally utilize the Market Opportunity Rate system, depending on the price and other terms set by competing banks for similar borrowers, we may adjust the interest rate we charge to compete more effectively with other banks.

Large Corporate Banking

Large corporate customers include all companies that are not small- and medium-sized enterprise customers. Kookmin Bank's articles of incorporation provide that financial services to large corporate customers must be no more than 40% of the total amount of our Won-denominated loans. Our business focus with respect to large corporate banking is to selectively increase the proportion of high quality large corporate customers. Specifically, we are carrying out various initiatives to improve our customer relationship with large corporate customers and have been seeking to expand our service offerings to this segment.

Lending Activities

Our principal loan products for our large corporate customers are working capital loans and facilities loans. As of December 31, 2014, working capital loans and facilities loans accounted for 79.6% and 20.4%, respectively, of our total large corporate loans. We also offer mortgage loans to large corporate clients who build or sell single- or multi-family housing units, as described above under "—Small- and Medium-sized Enterprise Banking—Lending Activities."

As of December 31, 2014, secured loans and guaranteed loans accounted for, in the aggregate, 18.2% of our large corporate loans. Among the secured loans, 80.4% were secured by real estate and 19.6% were secured by deposits or securities. Working capital loans generally have a maturity of one year, but may be extended for additional terms ranging from three months to one year in length for an aggregate term of five years. Facilities loans have a maximum maturity of 15 years.

In our unsecured lending to large corporate customers, a critical consideration in our policy regarding the extension of such unsecured loans is the borrower's creditworthiness. We assign each borrower a credit rating based on the judgment of our experts or scores calculated using the appropriate credit rating system, taking into account both financial factors and non-financial factors (such as our perception of a borrower's reliability, management and operational risk and risk relating to the borrower's industry). The credit ratings, along with such factors, are key determinants that inform our lending to large corporate customers. Large corporate customers generally have higher credit ratings due to their higher repayment capability compared to other types of borrowers, such as small- and medium-sized enterprise borrowers. In addition, large corporate borrowers generally are affected to a lesser extent than small- and medium-sized enterprise borrowers by fluctuations in the Korean economy and also maintain more sophisticated financial records. As of December 31, 2014, 85.4% of our large corporate customers had credit ratings or BBB- or above according to the internal credit rating system of Kookmin Bank, compared to 48.4% of our small- and medium-sized enterprise customers. A credit rating of BBB- is assigned to customers whose ability to repay the principal and interest on their outstanding loans is determined by us to be generally satisfactory but nonetheless subject to adverse effects under unfavorable economic conditions or during downturns in the business environment. Based on our internal analysis of historical data, we believe that the probability of default for loans extended to large corporate customers with a credit rating of BBB- or above is between 0.00% and 2.26%.

We monitor the credit status of large corporate borrowers and collect information to adjust our ratings appropriately. We also manage and monitor our large corporate customers through a dedicated Corporate Banking Branch and Kookmin Bank's Large Corporate Business Department. In addition, Kookmin Bank's Credit Risk Department manages the exposures to each large corporate customer and conducts in-depth analysis of various economic and industry-related risks that are relevant to large corporate customers.

As of December 31, 2014, in terms of our outstanding loan balance, 32.5% was extended to borrowers in the manufacturing industry, 27.6% of our large corporate loans was extended to borrowers in the financial institutions industry, and 21.2% was extended to borrowers in the service industry.

Pricing

We determine pricing of our large corporate loans in the same way as we determine the pricing of our small- and medium-sized enterprise loans. See "—Small- and Medium-sized Enterprise Banking—Pricing" above. As of December 31, 2014, the Market Opportunity Rate, which is utilized in pricing loans offered by us, was the same for our large corporate loans as for our small- and medium-sized enterprise loans.

Capital Markets Activities and International Banking

Through our capital markets operations, we invest and trade in debt and equity securities and, to a lesser extent, engage in derivatives and asset securitization transactions and make call loans. We also provide investment banking services to corporate customers.

Securities Investment and Trading

We invest in and trade securities for our own account in order to maintain adequate sources of liquidity and to generate interest and dividend income and capital gains. As of December 31, 2012, 2013 and 2014, our investment portfolio, which consists primarily of held-to-maturity financial assets and available-for-sale financial assets, and our trading portfolio had a combined total carrying amount of ₩46,962 billion, ₩44,933 billion and ₩46,389 billion and represented 16.4%, 15.4% and 15.0% of our total assets, respectively.

Our trading and investment portfolios consist primarily of Korean treasury securities and debt securities issued by Korean government agencies, local governments or certain government-invested enterprises and debt securities issued by financial institutions. As of December 31, 2012, 2013 and 2014, we held debt securities with a total carrying amount of ₩42,285 billion, ₩39,776 billion and ₩41,642 billion, respectively, of which:

- held-to-maturity debt securities accounted for ₩12,256 billion, ₩13,017 billion and ₩12,569 billion, or 29.0%, 32.7% and 30.2%, respectively;
- available-for-sale debt securities accounted for ₩21,737 billion, ₩18,933 billion and ₩19,360 billion, or 51.4%, 47.6% and 46.5%, respectively; and
- debt securities at fair value through profit or loss accounted for ₩8,292 billion, ₩7,826 billion and ₩9,713 billion, or 19.6%, 19.7% and 23.3%, respectively.

Of these amounts, debt securities issued by the Korean government and government agencies as of December 31, 2012, 2013 and 2014 amounted to:

- ₩4,449 billion, ₩4,357 billion and ₩3,557 billion, or 36.3%, 33.5% and 28.3%, respectively, of our held-to-maturity debt securities;
- ₩6,256 billion, ₩6,926 billion and ₩4,702 billion, or 28.8%, 36.6% and 24.3%, respectively, of our available-for-sale debt securities; and
- ₩2,376 billion, ₩2,085 billion and ₩3,067 billion, or 28.7%, 26.6% and 31.6%, respectively, of our debt securities at fair value through profit or loss.

From time to time we also purchase equity securities for our securities portfolios. Our equity securities consist primarily of marketable beneficiary certificates and equities listed on the KRX KOSPI Market or the KRX KOSDAQ Market. As of December 31, 2012, 2013 and 2014:

- equity securities in our available-for-sale portfolio had a carrying amount of ₩2,474 billion, ₩2,899 billion and ₩3,032 billion, or 10.2%, 13.3% and 13.5% of our available-for-sale portfolio, respectively; and
- equity securities in our trading portfolio had a carrying amount of ₩1,035 billion, ₩1,217 billion and ₩492 billion, or 10.8%, 13.0% and 4.6% of our debt and equity trading portfolio, respectively.

Our trading portfolio also includes derivative instruments. See "—Derivatives Trading."

The following tables show, as of the dates indicated, the gross unrealized gains and losses on available-for-sale and held-to-maturity financial assets within our investment portfolio, and the amortized cost and fair value of the portfolio by type of financial asset:

(1) Includes debt securities issued by the Bank of Korea, Korea Development Bank, Korea Finance Corporation and Industrial Bank of Korea in the aggregate amount of ₩5,702 billion as of December 31, 2012, ₩4,463 billion as of December 31, 2013 and ₩5,025 billion as of December 31, 2014. These financial institutions are controlled by the Korean government.

(2) Includes debt securities issued by Korea Electric Power Corporation, which is controlled by the Korean government, in the amount of ₩393 billion as of December 31, 2012, ₩143 billion as of December 31, 2013 and ₩114 billion as of December 31, 2014.

(3) Includes debt securities issued by the Bank of Korea, Korea Development Bank, Korea Finance Corporation and Industrial Bank of Korea in the aggregate amount of ₩986 billion as of December 31, 2012, ₩519 billion as of December 31, 2013 and ₩1,103 billion as of December 31, 2014. These financial institutions are controlled by the Korean government.

(4) Includes debt securities issued by Korea Electric Power Corporation, which is controlled by the Korean government, in the amount of ₩432 billion as of December 31, 2012, ₩545 billion as of December 31, 2013 and ₩553 billion as of December 31, 2014.

Derivatives Trading

Until the full-scale launch of our derivatives operations in mid-1999, we had been engaged in limited volumes of derivatives trading, mostly on behalf of our customers. Since then, our trading volume significantly increased to ₩195,879 billion in 2012 but decreased to ₩194,307 billion in 2013 and ₩154,872 billion in 2014. Our net trading revenue from derivatives for the year ended December 31, 2012, 2013 and 2014 was ₩456 billion, ₩544 billion and ₩98 billion, respectively.

We provide and trade a range of derivatives products, including:

- Won interest rate swaps, relating to Won interest rate risks;
- cross-currency swaps, forwards and options relating to foreign exchange risks; and
- stock price index options linked to the KOSPI index.

Our derivatives operations focus on addressing the needs of our corporate clients to hedge their risk exposure and the need to hedge our risk exposure that results from such client contracts. We also engage in derivatives trading activities to hedge the interest rate and foreign currency risk exposures that arise from our own assets and liabilities. In addition, we engage in proprietary trading of derivatives within our regulated open position limits.

The following shows the estimated fair value of our derivatives as of December 31, 2012, 2013 and 2014:

	As of December 31,					
	2012		2013		2014

Asset Securitization Transactions

We are active in the Korean asset-backed securities market. Based on our diverse experience with respect to product development and management capabilities relating to asset securitization, we offer customers a wide range of financial products and participate in various asset securitization transactions, including through our subsidiary KB Investment & Securities, to reinforce our position as a leading financial services provider with respect to the asset securitization market. We were involved in asset securitization transactions with an initial aggregate issue amount of ₩5,040 billion in 2012, ₩7,296 billion in 2013 and ₩5,524 billion in 2014, all of which were public offerings of asset-backed securities. Most of these securities were sold to institutional investors through Korean securities houses.

Call Loans

We make call loans and borrow call money in the short-term money market. Call loans are defined as short-term lending among banks and financial institutions either in Won or in foreign currencies with maturities of 90 days or less. Typically, call loans have maturities of one day. As of December 31, 2014, we had made call loans of ₩2,032 billion and borrowed call money of ₩2,882 billion, compared to ₩3,206 billion and ₩2,648 billion, respectively, as of December 31, 2013 and ₩2,534 billion and ₩2,597 billion, respectively, as of December 31, 2012.

Investment Banking

We have focused on selectively expanding our investment banking activities in order to increase our fee income and diversify our revenue base. The main focus of our investment banking operations is project finance and financial advisory services. Our principal investment banking services include:

- project finance and financial advisory services for social overhead capital projects such as highway, port, power, water and sewage projects;
- financing and financial advisory services for real estate development projects;
- structured finance; and
- financing for mergers and acquisitions.

In 2014, we generated investment banking revenue of ₩203 billion, consisting of ₩32 billion of interest income and ₩171 billion of fee income.

International Banking

We engage in various international banking activities, including foreign exchange services and derivatives dealing, import and export-related services, offshore lending, syndicated loans and foreign currency securities investment. These services are provided primarily to our domestic customers and overseas subsidiaries and affiliates of Korean corporations. We also raise foreign currency funds through our international banking operations.

The table below sets forth certain information regarding our foreign currency assets and borrowings:

	As of December 31,		
	2012	2013	2014
	(in millions of US$)		
Total foreign currency assets	US$14,459	US$14,989	US$15,171

Kookmin Bank, Hanoi Representative Office	Vietnam

(1) Does not include subsidiaries and branches in liquidation or dissolution.

Our overseas branches and subsidiaries principally provide Korean companies and nationals in overseas markets with trade financing, local currency funding and foreign exchange services, in conjunction with the operations of our headquarters.

In March 2008, we entered into agreements to acquire shares of JSC Bank CenterCredit, a Kazakhstan bank, and acquired an initial equity stake of 29,972,840 common shares (equal to 23.0% of the then-outstanding voting shares) for approximately ₩528 billion in August 2008. Pursuant to the terms of such agreements, we acquired an aggregate of 14,163,836 additional common shares of JSC Bank CenterCredit in November and December 2008. In addition, in September 2009, we entered into agreements with International Finance Corporation and certain shareholders of JSC Bank CenterCredit pursuant to which we acquired 3,886,574 additional common shares and 36,561,465 non-voting convertible preferred shares of JSC Bank CenterCredit in January and February 2010. As of December 31, 2014, we held 29.6% of the outstanding common shares of JSC Bank CenterCredit. Our investment in JSC Bank CenterCredit is accounted for under the equity method from the initial acquisition date and we applied the purchase method to account for each acquisition.

In May 2009, we acquired 132,600 common shares of Khmer Union Bank, a Cambodian bank, for approximately ₩10 billion. As a result, we acquired 51% of the voting rights in Khmer Union Bank, which was renamed Kookmin Bank Cambodia PLC. In December 2010, July 2012 and June 2013, we acquired additional 37,602 common shares, 125,592 common shares and 24,206 common shares of Kookmin Bank Cambodia PLC, respectively. As of December 31, 2014, we held 100.0% of the outstanding common shares of Kookmin Bank Cambodia PLC. We applied the purchase method to account for the initial acquisition of Kookmin Bank Cambodia PLC in May 2009. The subsequent acquisitions in December 2010, July 2012 and June 2013 were accounted for as equity transactions.

Trustee and Custodian Services Relating to Investment Trusts and Other Functions

We act as a trustee for 66 financial investment companies with a collective investment license, which invest in investment assets using funds raised by the sale of beneficiary certificates of investment trusts to investors. We also act as custodian for 141 financial institutions and as fund administrator for 44 financial institutions with respect to various investments, as well as acting as settlement agent in connection with such services. We receive a fee for acting in these capacities and generally perform the following functions:

- holding assets for the benefit of the investment trusts or institutional investors;
- receiving and making payments in respect of such investments;
- acting as settlement agent in respect of such investments on behalf of the investment trust or institutional investors, in the domestic and overseas markets;
- providing reports on assets held in custody;
- providing certain foreign exchange services for overseas investment and foreign investors; and
- providing fund-related administration and accounting services.

For the year ended December 31, 2014, our fee income from our trustee and custodian services was ₩24 billion and revenue collected as a result of administration of the underlying investments was ₩6 billion.

Other Businesses

Trust Account Management Services

Money Trust Management Services

We provide trust account management services for both specified money trusts and unspecified money trusts. We receive fees for our trust account management services consisting of basic fees that are based upon a percentage of either the net asset value of the assets or the principal under management and, for certain types of trust account operations, performance fees that are based upon the performance of the trust account operations. In 2014, our basic fees ranged from 0.1% to 2.0% of total assets under management depending on the type of trust account. We also charge performance fees with respect to certain types of trust account products. We receive penalty payments when customers terminate their trust accounts prior to the original contract maturity.

We currently provide trust account management services for 20 types of money trusts. The money trusts we manage are generally trusts with a fixed maturity. Approximately 7.4% of our money trusts also provide periodic payments of dividends which are added to the assets held in such trusts and not distributed.

Under Korean law, the assets of our trust accounts are segregated from our banking account assets and are not available to satisfy the claims of any of our potential creditors. We are, however, permitted to deposit surplus funds generated by trust assets into our banking accounts in certain circumstances as set forth under the Trust Act of Korea.

As of December 31, 2014, the total balance of our money trusts was ₩29,041 billion (as calculated in accordance with Statement of Korea Accounting Standard No. 5004, *Trust Accounts*, and the Enforcement Regulations of Financial Investment Services under the Financial Investment Services and Capital Markets Act, which we refer to as an "SKAS basis"). As for unspecified money trust accounts, we have investment discretion over all money trusts, which are pooled and managed jointly for each type of trust account. Specified money trust accounts are established on behalf of individual customers who direct our investment of trust assets.

The following table shows the balances of our money trusts by type as of the dates indicated. Under IFRS, commencing in 2013, we consolidate trust accounts for which we guarantee both the repayment of the principal amount and a fixed rate of interest as well as trust accounts for which we guarantee only the repayment of the principal amount.

	As of December 31,		
	2012	2013	2014
	(in billions of Won)		
Principal and interest guaranteed trusts [1]	₩ 0.2	₩ 0.2	₩ 0.2
Principal guaranteed trusts [1]	2,919	3,070	3,187
Performance trusts [1][2]	18,066	20,842	25,854
Total	₩20,985	₩23,912	₩29,041

(1) Calculated on an SKAS basis.
(2) Trusts which are primarily non-guaranteed.

The balance of our money trusts increased 38.4% between December 31, 2012 and December 31, 2014. As of December 31, 2014, the trust assets we managed consisted principally of securities investments and loans from the trust accounts. As of December 31, 2014, on an SKAS basis, our trust accounts had invested in securities in the aggregate amount of ₩15,906 billion, of which ₩13,972 billion was debt securities and derivative-linked securities. Securities investments consist of government-related debt securities, corporate debt securities, including bonds and commercial paper, equity securities, derivative-linked securities and other securities. Loans made by our trust account operations are similar in type to the loans made by our bank account operations. As of December 31, 2014, on an SKAS basis, our trust accounts had made loans in the principal amount of ₩152 billion (excluding loans from the trust accounts to our banking accounts of ₩948 billion), which accounted for 0.52% of our money trust assets. Loans by our money trusts are subject to the same credit approval process as loans from our banking accounts. As of December 31, 2014, substantially all loans from our money trust accounts were collateralized or guaranteed.

Our money trust accounts also invest, to a lesser extent, in equity securities, including beneficiary certificates issued by financial investment companies with a collective investment license. On an SKAS basis, as of December 31, 2014, equity securities in our money trust accounts amounted to ₩1,934 billion, which accounted for 6.6% of our total money trust assets. Of this amount, ₩1,883 billion was from specified money trusts and ₩51 billion was from unspecified money trusts.

We continue to offer pension-type money trusts that provide a guarantee of the principal amount of the investment. On an SKAS basis, as of December 31, 2014, the balance of the money trusts for which we guaranteed the principal was ₩3,187 billion.

If the income from a money trust for which we provide a guarantee is less than the amount of the payments we have guaranteed, we will need to pay the amount of the shortfall with funds from special reserves maintained with respect to trust accounts followed by basic fees from that money trust and funds from our general banking operations. In 2012, 2013 and 2014, we made no payment from our banking accounts to cover shortfalls in our guaranteed trusts. On an SKAS basis, we derived trust fees with regard to trust account management services (including those fees related to property trust management services) of ₩136 billion in 2012, ₩131 billion in 2013 and ₩198 billion in 2014.

Property Trust Management Services

We also offer property trust management services, where we manage non-cash assets in return for a fee. Non-cash assets include mostly securities, but can also include other liquid receivables and real estate. Under these arrangements, we render custodial services for the property in question and collect fee income in return.

In 2014, our property trust fees ranged from 0.001% to 0.3% of total assets under management depending on the type of trust accounts. On an SKAS basis, as of December 31, 2014, the aggregate balance of our property trusts increased to ₩1,879 billion, compared to ₩1,377 billion as of December 31, 2013 and ₩1,171 billion as of December 2012.

Under IFRS, the property trusts are not consolidated within our financial statements.

Investment Trust Management

Through KB Asset Management, we offer investment trust products to customers and manage the funds invested by them in investment trusts. As of December 31, 2014, KB Asset Management had ₩27,780 billion of assets under management.

Management of the National Housing Fund

The National Housing Fund is a government fund that provides financial support to low-income households in Korea by providing mortgage financing and construction loans for projects to build small-sized housing. The operations of the National Housing Fund include providing and managing National Housing Fund loans, issuing National Housing Fund bonds and collecting subscription savings deposits.

In February 2013, the Ministry of Land, Infrastructure and Transport (formerly the Ministry of Land, Transport and Maritime Affairs) designated us as one of the managers of the National Housing Fund. During the five years preceding such designation, we chose not to participate in the bidding process to become a designated manager of the National Housing Fund and only managed pre-existing Fund accounts. In return for managing such pre-existing Fund accounts, we received quarterly fund management fees, calculated based on activity levels for the relevant quarter. In 2014, we received total fees of ₩23 billion for managing the National Housing Fund, compared to ₩28 billion in each of 2013 and 2012.

The financial accounting for the National Housing Fund is entirely separate from our financial accounting, and the non-performing loans and loan losses of the National Housing Fund, in general, do not impact our financial condition. Regulations and guidelines for managing the National Housing Fund are issued by the Minister of Land, Infrastructure and Transport pursuant to the Housing Act.

Bancassurance

The Korean government's liberalization of the bancassurance market in Korea has allowed us to offer insurance products of other institutions since September 2003. We currently market a wide range of bancassurance products and hope to develop additional fee-based revenues by expanding our offering of these products.

Currently, our bancassurance business has alliances with 17 life insurance companies (including our subsidiary, KB Life Insurance) and nine non-life insurance companies and offers 66 different products through our branch network. These products are composed of 43 types of life insurance policies such as annuities, savings insurance and variable life insurance, and 23 types of non-life insurance products. In 2014, our commission income from our bancassurance business amounted to ₩97 billion.

Insurance

Through KB Life Insurance Co., Ltd., we offer a variety of individual and group life insurance products, including annuities, savings insurance, variable life insurance, whole life insurance and term life insurance as well as health insurance. KB Life Insurance utilizes its multi-channel distribution platform to market these products, which includes sales through agents, financial consultants, telemarketers and bancassurance arrangements with commercial banks and other financial institutions.

In June 2014, we entered into a share purchase agreement, which was amended in March 2015, to acquire a 19.47% stake in LIG Insurance Co., Ltd., a publicly listed Korean property and casualty insurance company, and will be required under applicable Korean law to increase our shareholding in LIG Insurance to at least 30% within one year from the date of such acquisition. LIG Insurance provides non-life insurance products, including automobile insurance, property insurance, marine insurance, fire insurance, accident insurance and casualty insurance, as well as long-term care insurance. We expect to achieve synergies between KB Life Insurance and LIG Insurance through cross-selling our life and non-life insurance products and expanding our customer base.

Consumer Finance

We provide consumer finance services through KB Capital Co., Ltd. We acquired 52.02% of the outstanding shares of KB Capital (formerly known as Woori Financial Co., Ltd.) in March 2014. KB Capital provides leasing services and installment finance services for various products, including automobiles, heavy machineries and medical equipment, as well as microlending services. We expect KB Capital to continue to expand our customer base by providing a variety of non-banking financial services to retail customers, as well as synergies through coordinated business operations with our other subsidiaries, including Kookmin Bank.

Distribution Channels

Banking Branch Network

As of December 31, 2014, Kookmin Bank operated a network of 1,161 branches and sub-branches in Korea, which was one of the largest branch networks among Korean commercial banks. An extensive branch network is important to attracting and maintaining retail customers, who use branches extensively and value convenience. We believe that our extensive branch network in Korea and retail customer base provide us with a source of stable and relatively low cost funding. Approximately 37.0% of our branches and sub-branches are located in Seoul, and approximately 23.4% of our branches are located in the six next largest cities. The following table presents the geographical distribution of our branch network in Korea as of December 31, 2014:

Area	Number of Branches	Percentage
Seoul	429	37.0%
Six largest cities (other than Seoul)	272	23.4
Other	460	39.6
Total	1,161	100.0%

In addition, we have continued to implement the specialization of our branch functions. Of our branch network as of December 31, 2014, we had eight branches that primarily handled large corporate banking.

In order to support our branch network, we have established an extensive network of ATMs, which are located in branches and in unmanned outlets known as "autobanks." As of December 31, 2014, we had 9,265 ATMs.

We have actively promoted the use of these distribution outlets in order to provide convenient service to customers, as well as to maximize the marketing and sales functions at the branch level, reduce employee costs and improve profitability. The aggregate number of transactions conducted using our ATMs amounted to approximately 640 million in 2012, 606 million in 2013 and 573 million in 2014.

Other Distribution Channels

The following table sets forth information, for the periods indicated, on the number of users and transactions of the other distribution channels for our retail and corporate banking customers, which are discussed below:

	For the Year Ended December 31,		
	2012	**2013**	**2014**
Internet banking:			
Number of users [(1)]	14,049,444	15,634,113	16,767,588
Number of transactions (thousands) [(2)]	4,117,653	5,024,132	4,569,185
Phone banking:			
Number of users [(3)]	4,766,251	4,870,204	4,914,616
Number of transactions (thousands) [(2)]	213,941	183,434	165,130
Smartphone banking:			
Number of users [(4)]	5,460,955	8,002,176	9,484,234
Number of transactions (thousands) [(2)]	3,377,862	6,554,649	7,504,638

(1) Number of users is defined as the total cumulative number of retail and corporate customers who have registered through our branch offices to use our Internet banking services.

(2) Number of transactions includes balance and transaction inquiries, fund transfers and other transactions.

(3) Number of users is defined as the total cumulative number of retail and corporate customers who have registered through our branch offices to use our phone banking services.

(4) Number of users is defined as the total cumulative number of retail customers who have registered through our branch offices, or the customers' smartphones, to use our smartphone banking services.

Internet Banking

Our goal is to consolidate our position as a market leader in on-line banking. Our Internet banking services currently include:

- basic banking services, including fund transfers, balance and transaction inquiries, pre-set automatic transfers, product inquiries, on-line bill payments and foreign exchange services;
- investment services, including opening deposit accounts and investing in funds;
- processing of loan applications;
- electronic certification services, which permit our Internet banking service users to authenticate transactions on a confidential basis through digital signatures; and
- wealth management and advisory services, including financial planning and real estate information services.

Phone Banking

We offer a variety of phone banking services, including inter-account fund transfers, balance and transaction inquiries, customer service inquiries and bill payments. We also have call centers, which we primarily use to:

- advise clients with respect to deposits, loans and credit cards and to provide our customers a way to report any emergencies with respect to their accounts;
- allow our customers to conduct transactions with respect to their accounts, such as balance and transfer inquiries, transfers or payments and opening accounts; and
- conduct telemarketing to our customers or potential customers to advertise products or services.

Smartphone Banking

"KB Star Banking," our mobile banking application for smartphones, allows our customers the flexibility to conduct a variety of financial transactions, including balance and transaction inquiries, fund transfers and asset management, anywhere at any time. Our smartphone banking services currently include:

- basic banking services, including fund transfers, balance and transaction inquiries, bill payments and foreign exchange services;
- investment services, including investing in savings deposits that are designed specifically for and offered to smartphone banking customers; and
- processing of loan applications and bancassurance services.

Other Channels

We provide cash management services, which include automatic transfers, connection services to other financial institutions, real-time firm banking, automatic fund concentration and transmittal of trading information.

Competition

We compete principally with other financial institutions in Korea, including other financial holding companies and nationwide commercial banks, as well as regional banks, development banks, specialized banks and branches of foreign banks operating in Korea and installment finance corporations for mortgage loan products. We also compete for customer funds with other types of financial service institutions, including savings institutions (such as mutual savings and finance companies and credit unions and credit cooperatives), investment institutions (such as merchant banking corporations), life insurance companies and financial investment companies. Competition in the domestic banking industry is generally based on the types and quality of the products and services offered, including the size and location of retail networks, the level of automation and interest rates charged and paid.

Competition has increased significantly in our traditional core businesses, retail banking, small- and medium-sized enterprise banking and credit card lending, contributing to some extent to the asset quality deterioration in retail and small- and medium-sized loans. As a result, our margins on lending activities may decrease in the future.

In addition, general regulatory reforms in the Korean financial industry have increased competition among banks and financial institutions in Korea. As the reform of the financial sector continues, foreign financial institutions, some with greater resources than us, have entered, and may continue to enter, the Korean market either by themselves or in partnership with existing Korean financial institutions and compete with us in providing financial and related services.

In addition, the Korean financial industry is undergoing significant consolidation. The number of nationwide commercial banks in Korea has decreased from 16 as of December 31, 1997, to seven banks and five financial holding companies as of December 31, 2014. Furthermore, a number of significant mergers and acquisitions in the industry have taken place in Korea over the past decade, including the acquisition of Koram Bank by an affiliate of Citibank in 2004, Standard Chartered Bank's acquisition of Korea First Bank in April 2005, Chohung Bank's merger with Shinhan Bank in April 2006, Hana Financial Group's acquisition of a controlling interest in Korea Exchange Bank in February 2012 and the proposed merger of Hana Bank into Korea Exchange Bank in the second half of 2015. Moreover, as part of the Korean government's plans to privatize Woori Finance Holdings Co., Ltd. (the financial holding company of Woori Bank), certain subsidiaries of Woori Finance Holdings Co., Ltd. were sold to other financial institutions and Woori Finance Holdings Co., Ltd. itself was merged into Woori Bank in 2014. We expect that consolidation in the financial industry will continue. The financial institutions resulting from such consolidation may, by virtue of their increased size and business scope, provide significantly greater competition for us. We intend to review potential acquisition opportunities as they arise. We cannot guarantee that we will not be involved in any future mergers or acquisitions.

For additional information, you should read the section entitled "Item 3.D. Risk Factors—Risks relating to competition."

Information Technology

Pursuant to our establishment as a financial holding company, we are implementing various IT system-related initiatives and upgrades at the group and subsidiary level. We believe that continuous improvement of our IT systems is crucial in supporting our operations and management and providing high-quality customer service. Accordingly, we continue to upgrade and improve our systems through various activities, including projects to develop next generation banking systems for Kookmin Bank, further strengthen system security and timely develop and implement various new IT systems and services (including group-wide software) that support our business operations and risk management activities.

Our mainframe-based banking and credit card IT systems are designed to ensure continuity of services even where there is a failure of the host data center due to a natural disaster or other accidents by utilizing backup systems in disaster recovery data centers. In addition, through the implementation of Parallel Sysplex, a "multi-CPU system," our bank and credit card systems are designed and operated to be able to process transactions without material interruption in the event of CPU failure. In 2010, we launched a next-generation banking and credit card IT system that is designed to ensure greater reliability in financial transactions and allow more efficient development of new financial products. We also launched a new disaster recovery system to ensure continuity of operations. In addition, we implemented new technologies, including Multi Channel Integration and Enterprise Application Integration systems, to standardize our IT system and better manage IT system operational risk.

In 2011, we launched a mobile weblink to provide online banking services for smartphone users. In addition, we implemented virtual storage technology for our server systems to achieve a more flexible and cost-effective information storage capability.

The integrity of our IT systems, and their ability to withstand potential catastrophic events (such as natural calamities and internal system failures), are crucial to our continuing operations. We currently test our disaster recovery systems on a quarterly basis. For additional information, see "Item 11. Quantitative and Qualitative Disclosures about Market Risk—Operational Risk Management."

In 2014, we spent approximately ₩478 billion for our IT systems, including expenses related to the construction of new IT systems, implementation of hardware and software technologies and other new systems. As of December 31, 2014, we employed a total of 973 full-time employees in our IT operations.

Assets and Liabilities

The tables below set out selected financial highlights regarding our banking operations and individual assets and liabilities. Except as otherwise indicated, amounts as of and for the years ended December 31, 2010, 2011, 2012, 2013 and 2014 are presented on a consolidated basis under IFRS.

Loan Portfolio

As of December 31, 2014, our total loan portfolio was ₩233,902 billion compared to ₩221,862 billion as of December 31, 2013 and ₩216,914 billion as of December 31, 2012. As of December 31, 2014, 94.8% of our total loans were Won-denominated loans compared to 94.6% as of December 31, 2013 and 94.4% as of December 31, 2012.

Loan Types

The following table presents loans by type as of the dates indicated. Except where we specify otherwise, all loan amounts stated below are before deduction of allowances for loan losses. Total loans reflect our loan portfolio, including past due amounts.

	As of December 31,				
	2010	2011	2012	2013	2014
	(in billions of Won)				
Domestic:					
Corporate					
Small- and medium-sized enterprise	₩ 65,132	₩ 68,730	₩ 70,471	₩ 71,045	₩ 71,960
Large corporate [(1)]	23,143	28,509	29,212	29,489	28,918
Retail					
Mortgage and home equity	71,715	75,580	74,463	77,969	86,994
Other consumer	27,281	28,275	28,969	29,675	32,255
Credit cards	12,413	12,421	11,874	11,784	11,632
Total domestic	199,684	213,515	214,989	219,962	231,759
Foreign	1,693	2,040	1,925	1,900	2,143
Total gross loans	₩201,377	₩215,555	₩216,914	₩221,862	₩233,902

(1) Large corporate loans include ₩53 billion, ₩35 billion, ₩33 billion, ₩132 billion and ₩191 billion of loans to the Korean government and government related agencies (including the Korea Deposit Insurance Corporation) as of December 31, 2010, 2011, 2012, 2013 and 2014, respectively.

Loan Concentrations

On a consolidated basis, our exposure to any single borrower or any single *chaebol* is limited by law to 20% and 25%, respectively, of our "net aggregate equity capital," as defined under the Enforcement Decree of the Financial Holding Company Act. See "—Supervision and Regulation—Principal Regulations Applicable to Financial Holding Companies—Financial Exposure to Any Individual Customer and Major Shareholder." In addition, Kookmin Bank's exposure to any single borrower or any single *chaebol* is limited by the Bank Act to 20% and 25%, respectively, of its total Tier I and Tier II capital.

20 Largest Exposures by Borrower

As of December 31, 2014, our 20 largest exposures totaled ₩11,309 billion and accounted for 3.9% of our total exposures. The following table sets forth, as of December 31, 2014, our total exposures to these top 20 borrowers or issuers:

Company [(1)]	Loans: Won Currency	Loans: Foreign Currency	Equity Securities	Debt Securities	Guarantees and Acceptances	Total Exposures	Amounts Classified as Impaired Loans
	(in billions of Won)						
Daewoo Shipbuilding & Marine Engineering Co., Ltd.	₩ 22	₩ 180	₩ —	₩ —	₩ 963	₩ 1,165	₩—
Mizuho Bank, Ltd.	—	984	—	—	—	984	—

Total	₩997	₩3,401	₩1,348	₩2,781	₩2,782	₩11,309	₩—

(1) Excludes exposures to government-owned or -controlled enterprises or financial institutions, including Bank of Korea, Korea Housing Finance Corporation, Korea Land & Housing Corporation, Korea Deposit Insurance Corporation and Korea Development Bank.

As of December 31, 2014, 12 of these top 20 borrowers or issuers were companies belonging to the 42 largest *chaebols* in Korea designated as such by the Financial Supervisory Service based on their outstanding exposures.

Exposure to Chaebols

As of December 31, 2014, 7.5% of our total exposure was to the 42 largest *chaebols* in Korea designated as such by the Financial Supervisory Service based on their outstanding exposures. The following table shows, as of December 31, 2014, our total exposures to the ten *chaebol* groups to which we have the largest exposure:

Chaebol	Loans: Won Currency	Loans: Foreign Currency	Equity Securities	Debt Securities	Guarantees and Acceptances	Total Exposures	Amounts Classified as Impaired Loans
	(in billions of Won)						
Hyundai Motor [1]	₩ 887	₩ 521	₩ 11	₩ 766	₩ 801	₩ 2,986	₩—
Samsung [2]	307	645	119	581	1,157	2,809	—
SK [3]	237	654	449	417	498	2,255	—
POSCO [4]	173	331	525	261	236	1,526	—
Daewoo Shipbuilding & Marine Engineering [5]	45	178	—	—	964	1,187	—
Hyundai Heavy Industries [6]	43	322	47	—	768	1,180	—

Total	₩3,262	₩2,984	₩1,333	₩2,881	₩4,974	₩15,434	₩—

(1) Includes principally Hyundai Capital Services Inc., Hyundai Steel Company and Hyundai Engineering & Construction Co., Ltd.
(2) Includes principally Samsung Heavy Industries Co., Ltd., Samsung Card and Samsung C&T Corporation.
(3) Includes principally SK C&C Co., Ltd., SK Energy Co., Ltd. and SK Networks Co., Ltd.
(4) Includes principally POSCO, Daewoo International Corporation and POSCO Energy Co., Ltd.
(5) Includes principally Daewoo Shipbuilding & Marine Engineering Co., Ltd., Shinhan Machinery Co., Ltd. and DSME Construction Co., Ltd.
(6) Includes principally Hyundai Heavy Industries Co., Ltd., Hyundai Mipo Dockyard Co., Ltd. and Hyundai Samho Heavy Industries Co., Ltd.
(7) Includes principally LG Electronics Inc., LG Chem, Ltd. and LG Uplus Corp.
(8) Includes principally Hanwha Engineering & Construction Corp., Hanwha Corporation and Hanwha Advanced Materials Corporation.
(9) Includes principally GS Engineering & Construction Corporation, GS Caltex Corporation, and GS Holdings Corp.
(10) Includes principally Lotte Engineering & Construction Co., Ltd., Lotte Card Co., Ltd. and Lotte Capital Co., Ltd.

Loan Concentration by Industry

The following table presents the aggregate balance of our domestic and foreign corporate loans, by industry concentration, as of December 31, 2012, 2013 and 2014:

Industry	2012 Amount	2012 %	2013 Amount	2013 %	2014 Amount	2014 %
	As of December 31, (in billions of Won, except percentages)					
Services	₩ 38,650	38.1%	₩ 38,375	37.5%	₩ 39,385	38.2%
Manufacturing	31,320	30.8	31,161	30.5	32,694	31.7
Wholesale and retail	15,124	14.9	13,874	13.6	13,287	12.9
Financial institutions	7,291	7.2	10,524	10.3	9,117	8.9
Construction	4,689	4.6	4,428	4.3	3,862	3.8
Public sector	520	0.5	655	0.6	755	0.7
Others	3,941	3.9	3,318	3.2	3,871	3.8
Total	₩101,535	100.0%	₩102,335	100.0%	₩102,971	100.0%

Maturity Analysis

We typically roll over our working capital loans and unsecured consumer loans (other than those payable in installments) after we conduct our normal loan review in accordance with our loan review procedures. Working capital loans may generally be extended on an annual basis for an aggregate term of five years and unsecured consumer loans may generally be extended for another term of up to 12 months for an aggregate term of 10 years.

The following table sets out the scheduled maturities (time remaining until maturity) of our loan portfolio as of December 31, 2014. The amounts disclosed are before deduction of allowances for loan losses:

	1 Year or Less	Over 1 Year But Not More Than 5 Years	Over 5 Years	Total
		(in billions of Won)		
Domestic:				
Corporate				
Small- and medium-sized enterprises	₩ 52,276	₩13,940	₩ 5,744	₩ 71,960
Large corporate	20,454	5,721	2,743	28,918
Total corporate	72,730	19,661	8,487	100,878
Retail				
Mortgage and home equity	7,547	6,171	73,276	86,994
Other consumer	18,019	10,699	3,537	32,255
Total retail	25,566	16,870	76,813	119,249
Credit cards	10,249	1,181	202	11,632
Total domestic	108,545	37,712	85,502	231,759
Foreign:	1,789	264	90	2,143
Total gross loans	₩110,334	₩37,976	₩85,592	₩233,902

Interest Rate Sensitivity

The following table shows, as of December 31, 2014, the total amount of loans due after one year, which have fixed interest rates and variable or adjustable interest rates:

	As of December 31, 2014
	(in billions of Won)
Fixed rate(1)	₩ 19,207
Variable or adjustable rates(2)	104,361
Total gross loans	₩123,568

(1) Fixed rate loans are loans for which the interest rate is fixed for the entire term.

(2) Variable or adjustable rate loans are loans for which the interest rate is not fixed for the entire term.

For additional information regarding our management of interest rate risk, see "Item 11. Quantitative and Qualitative Disclosures about Market Risk—Market Risk Management—Market Risk Management for Non-Trading Activities."

Credit Exposures to Companies in Workout, Restructuring or Rehabilitation

Workout is a voluntary procedure through which we, together with the borrower and other creditors, restore the borrower's financial stability and viability. Previously, workouts were regulated under the prior Corporate

Restructuring Promotion Act, which expired on December 31, 2013. In December 2013, the National Assembly of Korea adopted another Corporate Restructuring Promotion Act, or the New Corporate Restructuring Promotion Act, which became effective on January 1, 2014. Workouts that had been initiated under the Corporate Restructuring Promotion Act are also governed by the New Corporate Restructuring Promotion Act effective from January 1, 2014. Under the New Corporate Restructuring Promotion Act, which is similar to the Corporate Restructuring Promotion Act, all creditor financial institutions of a financially troubled borrower are required to participate in a creditors' committee which is authorized to prohibit such creditor financial institutions from exercising their rights against the borrower, commencing workout procedures or approving a reorganization plan prepared by the borrower. Any decision of the creditors' committee requires the approval of creditor financial institutions holding not less than 75% of the total debt outstanding of a borrower. An additional approval of creditor financial institutions holding not less than 75% of the secured debt is required with respect to the borrower's debt restructuring. Once approved, any decision made by the creditors' committee is binding on all the creditor financial institutions of the borrower. Creditor financial institutions that voted against commencement of workout, debt restructuring or granting of new credit have the right to request the creditor financial institutions that voted in favor of such matters to purchase their claims at a mutually agreed price. In the event that the parties are not able to agree on the terms of purchase, a coordination committee consisting of experts would determine the terms. The creditor financial institutions that oppose a decision made by the coordination committee may request a court to change such decision. The New Corporate Restructuring Promotion Act is scheduled to expire on December 31, 2015.

Upon approval of the workout plan, a credit exposure is initially classified as precautionary or lower and thereafter cannot be classified higher than precautionary with limited exceptions. If a corporate borrower is in workout, restructuring or rehabilitation, we take the status of the borrower into account in valuing our loans to and collateral from that borrower for purposes of establishing our allowances for credit losses.

Korean law also provides for corporate rehabilitation proceedings, which are court-supervised procedures to rehabilitate an insolvent company. Under these procedures, a restructuring plan is adopted at a meeting of interested parties, including creditors of the company. Such restructuring plan is subject to court approval.

A portion of our loans to and debt securities of corporate customers are currently in workout, restructuring or rehabilitation. As of December 31, 2014, ₩683 billion or 0.2% of our total loans and debt securities were in workout, restructuring or rehabilitation. This included ₩309 billion of loans to and debt securities of large corporate borrowers and ₩374 billion of loans to and debt securities of small- and medium-sized enterprises.

The following table shows, as of December 31, 2014, our ten largest exposures that were in workout, restructuring or rehabilitation:

Company	Loans: Won Currency	Loans: Foreign Currency	Equity Securities	Debt Securities	Guarantees and Acceptances	Total Exposures	Amounts Classified as Impaired Loans
	(in billions of Won)						
Orient Shipyard Co., Ltd.	₩ 53	₩ 2	₩—	₩—	₩ 65	₩120	₩ 56
Kumho Industrial Co., Ltd.	58	—	26	—	13	97	58

SolarPark Korea Co., Ltd.	13	—	—	—	—	13	13
Total	₩314	₩ 18	₩ 59	₩ 5	₩ 83	₩479	₩331

Provisioning Policy

We establish allowances for loan losses with respect to loans to absorb such losses. We assess individually significant loans on a case-by-case basis and other loans on a collective basis. In addition, if we determine that no objective evidence of impairment exists for a loan, we include such loan in a group of loans with similar credit risk characteristics and assess them collectively for impairment regardless of whether such loan is significant. For individually significant loans, allowances for loan losses are recorded if objective evidence of impairment exists as a result of one or more events that occurred after initial recognition. For collectively assessed loans, we base the level of allowances for loan losses on our evaluation of the risk characteristics of such loans, taking into account such factors as historical loss experience, the financial condition of the borrowers and current economic conditions. If additions or changes to the allowances for loan losses are required, then we record a provision for loan losses, which is included in impairment losses on credit loss and treated as a charge against current income. Credit exposures that we deem to be uncollectible, including actual loan losses, net of recoveries of previously charged-off amounts, are charged directly against the allowances for loan losses. See "Item 5.A. Operating Results—Critical Accounting Policies—Impairment of Loans and Allowances for Loan Losses."

We generally consider the following loans to be impaired loans:

- loans that are past due by 90 days or more;
- loans that are subject to legal proceedings related to collection;
- loans to a borrower that has received a warning from the Korea Federation of Banks indicating that such borrower has exhibited difficulties in making timely payments of principal and interest;
- loans to corporate borrowers that are rated C or D according to Kookmin Bank's internal credit ratings for large companies or small-and medium-sized enterprises;
- loans for which account-specific provisions have been made resulting from a significant perceived decline in credit quality; and
- loans with respect to which the amount of principal and interest payable has been materially decreased due to restructuring.

The actual amount of incurred loan losses may vary from loss estimates due to changing economic conditions or changes in industry or geographic concentrations. We have procedures in place to monitor differences between estimated and actual incurred loan losses, which include detailed periodic assessments by senior management of both individual loans and loan portfolios and the use of models to estimate incurred loan losses in those portfolios.

We regularly evaluate the adequacy of the overall allowances for loan losses and we believe that the allowances for loan losses reflect our best estimate of probable loan losses as of each balance sheet date.

Loan Aging Schedule

The following table shows our loan aging schedule (excluding accrued interest) as of the dates indicated:

As of December 31,	Normal Amount	%	Amount Past Due 1-3 Months	%	Amount Past Due 3-6 Months	%	Amount Past Due 6 Months or More	%	Total Amount
	(in billions of Won, except percentages)								
2010	₩199,013	98.8%	₩752	0.4%	₩608	0.3%	₩1,004	0.5%	₩201,377
2011	213,515	99.0	860	0.4	327	0.2	853	0.4	215,555
2012	214,489	98.9	819	0.4	532	0.2	1,074	0.5	216,914
2013	219,777	99.1	664	0.3	426	0.2	995	0.4	221,862
2014	232,159	99.2	675	0.3	385	0.2	683	0.3	233,902

Non-Accrual Loans and Past Due Accruing Loans

We generally consider impaired loans to be non-accrual loans. However, we exclude from non-accrual status and continue to accrue interest on loans that are fully secured by cash on deposit or on which there are financial guarantees from the government, Korea Deposit Insurance Corporation or certain financial institutions.

We no longer recognize interest on non-accrual loans from the date the loan is placed on non-accrual status. We reclassify loans as accruing when interest and principal payments are up-to-date and future payments of principal and interest are reasonably assured. We generally do not recognize interest income on non-accrual loans unless collected.

Interest foregone is the interest due on non-accrual loans that has not been accrued in our books of account. For the year ended December 31, 2014, we would have recorded gross interest income of ₩275 billion compared to ₩332 billion for the year ended December 31, 2013, ₩309 billion for the year ended December 31, 2012, ₩336 billion for the year ended December 31, 2011 and ₩328 billion for the year ended December 31, 2010 on loans accounted for on a non-accrual basis throughout the year, or since origination for loans held for part of the year, had we not foregone interest on those loans. The amount of interest income on those loans that was included in our profit for the years ended December 31, 2010, 2011, 2012, 2013 and 2014 was ₩194 billion, ₩192 billion, ₩187 billion, ₩206 billion and ₩175 billion, respectively.

The following table shows, as of the dates indicated, the amount of loans that were placed on a non-accrual basis and accruing loans which were past due 90 days or more. The category "accruing but past due 90 days" includes loans which are still accruing interest but on which principal or interest payments are contractually past due 90 days or more.

	As of December 31,				
	2010	2011	2012	2013	2014
	(in billions of Won)				
Loans accounted for on a non-accrual basis					
Corporate	₩2,466	₩2,021	₩1,851	₩2,220	₩1,673
Consumer	1,012	1,200	1,290	1,253	1,022
Sub-total	3,478	3,221	3,141	3,473	2,695
Accruing loans which are contractually past due 90 days or more as to principal or interest					
Corporate	5	4	84	98	39
Consumer	28	45	97	116	72
Sub-total	33	49	181	214	111
Total	₩3,511	₩3,270	₩3,322	₩3,687	₩2,806

Troubled Debt Restructurings

The following table presents, as of the dates indicated, our loans that are "troubled debt restructurings" for which we, for economic or legal reasons relating to the debtor's financial difficulties, grant a concession to the debtor that we would not otherwise consider. These loans consist principally of corporate loans that have been restructured (through the process of workout, court receivership or composition) and which are accruing interest at rates lower than the original contractual terms as a result of a variation of terms upon restructuring.

	As of December 31,				
	2010	2011	2012	2013	2014
	(in billions of Won)				
Loans classified as "troubled debt restructurings"	₩573	₩412	₩465	₩269	₩256

For 2014, interest income that would have been recorded under the original contract terms of restructured loans amounted to ₩30 billion, out of which ₩16 billion was reflected as interest income during 2014.

Potential Problem Loans

We classify potential problem loans as loans that are designated as "early warning loans" and reported to the Financial Services Commission. "Early warning loans" are loans extended to borrowers that have been (i) identified by our early warning system as exhibiting signs of credit risk based on the relevant borrower's financial data, credit information and/or transactions with banks and, following such identification and (ii) designated by our loan officers as potential problem borrowers based on their evaluation of known information about such borrowers' possible credit problems. Such loans are required to be reported on a quarterly basis to the Financial Services Commission. If a borrower's loans are designated as "early warning loans" pursuant to the process described above and included in our quarterly report to the Financial Services Commission, we consider such borrowers to have serious doubt as to their ability to comply with repayment terms in the near future.

As of December 31, 2014, we had ₩2,490 billion of potential problem loans.

Other Problematic Interest Earning Assets

We have certain other interest earning assets received in connection with troubled debt restructurings that, if they were loans, would be required to be disclosed as part of the non-accrual, past due or restructuring or potential problem loan disclosures provided above. As of December 31, 2010, 2011, 2012, 2013 and 2014, we did not have any debt securities received in connection with troubled debt restructurings on which interest was past due.

Non-Performing Loans

Non-performing loans are defined as loans that are past due by 90 days or more. These loans are generally classified as "substandard" or below. For further information on the classification of non-performing loans under Korean regulatory requirements, see "—Regulatory Reserve for Credit Losses" below.

The following table shows, as of the dates indicated, certain details of our total non-performing loan portfolio:

	As of December 31,				
	2010	2011	2012	2013	2014
	(in billions of Won, except percentages)				
Total non-performing loans	₩1,612	₩1,180	₩1,606	₩1,421	₩1,068
As a percentage of total loans	0.8%	0.5%	0.7%	0.6%	0.5%

Analysis of Non-Performing Loans

The following table sets forth, as of the dates indicated, our total non-performing loans by type of borrower:

	As of December 31,									
	2010		2011		2012		2013		2014	
	Amount	%	Amount	%	Amount	%	Amount	%	Amount	%

Total		₩304	₩ 90

(1) If the estimated recovery value of collateral for a non-performing loan is sufficient compared to the outstanding loan balance, we record no allowances for loan losses for such non-performing loan.

Non-Performing Loan Strategy

One of our primary objectives is to prevent our loans from becoming non-performing. Through our corporate credit rating systems, we believe that we have reduced our risks relating to future non-performing loans. Our credit rating systems are designed to prevent our loan officers from extending new loans to borrowers with high credit risks based on the borrower's credit rating. Our early warning system is designed to bring any sudden increase in a borrower's credit risk to the attention of our loan officers, who then closely monitor such loans. See "Item 11. Quantitative and Qualitative Disclosures about Market Risk—Credit Risk Management—Credit Review and Monitoring."

Notwithstanding the above, if a loan becomes non-performing, an officer at the branch level responsible for monitoring non-performing loans will commence a due diligence review of the borrower's assets, send a notice either demanding payment or stating that we will take legal action and prepare for legal action.

At the same time, we also initiate our non-performing loan management process, which begins with:

- identifying loans subject to a proposed sale by assessing the estimated losses from such sale based on the estimated recovery value of collateral, if any, for such non-performing loans;

- identifying loans subject to charge-off based on the estimated recovery value of collateral, if any, for such non-performing loans and the estimated rate of recovery of unsecured loans; and
- on a limited basis, identifying corporate loans subject to normalization efforts based on the cash-flow situation of the borrower.

Once the details of a non-performing loan are identified, we pursue early solutions for recovery. While the overall process is the responsibility of Kookmin Bank's Credit Division, actual recovery efforts on non-performing loans are handled at the operating branch level.

In addition, we use the services of our wholly-owned loan collection subsidiary, KB Credit Information Co., Ltd., which receives payments from recoveries made on charged-off loans and certain loans that are overdue for over three months (28 days on average in the case of credit card loans). KB Credit Information has over 140 employees, including legal experts and management employees. The fees that it receives are based on the amounts of non-performing and charged off loans that are recovered. In 2012, 2013 and 2014, the amount recovered was ₩589 billion, ₩473 billion and ₩443 billion, respectively.

Methods for resolving non-performing loans include the following:

- non-performing loans are managed by the operating branches of Kookmin Bank until such loans are charged off;
- a demand note is dispatched by mail if payment is generally one month past due;
- calls and visits are made by Kookmin Bank's operating branches to customers encouraging them to make payments;
- borrowers who are past due on payments of interest and principal are registered on the Korea Federation of Banks' database of non-performing loans;
- for unsecured loans other than credit card loans, the loans are transferred to KB Credit Information for collection on a case-by-case basis;
- for secured loans, actions to enforce or protect the security interests (including foreclosure and auction of the collateral) are commenced within four months of such loans becoming past due; and
- charged off loans are given to KB Credit Information for collection, except for loans where the cost of collection exceeds the possible recovery or where the statute of limitations for collection has expired.

In addition, credit card loans that are in arrears for over 28 days on average are transferred to KB Credit Information for collection.

If a loan becomes non-performing, it is managed by an operating branch of Kookmin Bank until such loan is charged off. However, in order to promote speedy recovery on loans subject to foreclosures and litigation, our policy is to permit the branch responsible for handling these loans to request one of Kookmin Bank's regional head offices for assistance with litigation proceedings and proceedings related to foreclosure and auction of the collateral.

In addition to making efforts to collect on these non-performing loans, we also undertake measures to reduce the level of our non-performing loans, which include:

- selling our non-performing loans to third parties, including the Korea Asset Management Corporation; and
- entering into asset securitization transactions with respect to our non-performing loans.

We generally expect to suffer a partial loss on loans that we sell or securitize, to the extent such sales and securitizations are recognized under IFRS as sale transactions.

Pursuant to a memorandum of understanding among the Financial Supervisory Service and seven banks, including Kookmin Bank, a private equity fund was established in June 2011 to acquire approximately ₩1.2 trillion of non-performing bank loans to construction companies in workout, restructuring or rehabilitation. The general partner of the fund is United Asset Management Corp. and the limited partners consist of the seven banks and other investors. The fund purchases non-performing bank loans at market price and the funds required to purchase such loans are contributed or lent by the same banks that sell such loans to the fund. In June 2011, we agreed to make a capital commitment of ₩148 billion and provide a ₩109 billion revolving loan facility to the fund. From June to December 2011, we contributed the entire amount of our capital commitment to the fund in connection with its purchase of ₩148 billion of non-performing loans from us. In September 2012, we agreed to increase our capital commitment to ₩241 billion. From September to December 2012, we contributed ₩44 billion to the fund. Our revolving loan facility to the fund was decreased to ₩55 billion in 2013 and terminated in 2014. We have made no additional capital commitments to the fund in 2013 or 2014.

Allocation and Analysis of Allowances for Loan Losses

The following table presents, as of the dates indicated, the allocation of our allowances for loan losses by loan type. The ratio represents the percentage of allowances for loan losses in each category to total allowances for loan losses.

	As of December 31,									
	2010		2011		2012		2013		2014	
	Amount	%	Amount	%	Amount	%	Amount	%	Amount	%

(1) The amount for 2014 reflects an increase in allowances for loan losses of ₩83 billion attributable to the addition of KB Capital Co., Ltd. as a consolidated subsidiary in March 2014.

Regulatory Reserve for Credit Losses

If our allowances for credit losses are deemed insufficient for regulatory purposes, we are required to compensate for the difference by recording a regulatory reserve for credit losses, which is segregated within our retained earnings. Regulatory reserve for credit losses are not available for distribution to shareholders as dividends. The level of regulatory reserve for credit losses required to be recorded is equal to the amount by which our allowances for credit losses under IFRS are less than the greater of (x) the amount of expected loss calculated using the internal ratings-based approach under Basel III and as approved by the Financial Supervisory Service and (y) the required amount of credit loss reserve calculated based on standards prescribed by the Financial Services Commission. As of December 31, 2014, our regulatory reserve for credit losses was ₩2,456 billion.

The following tables set forth the Financial Services Commission's guidelines for the classification of loans and the minimum percentages of the outstanding principal amount of the relevant loans or balances that the credit loss reserve must cover:

Loan Classification	Loan Characteristics
Normal	Loans extended to customers that, based on our consideration of their business, financial position and future cash flows, do not raise concerns regarding their ability to repay the loans.
Precautionary	Loans extended to customers that (i) based on our consideration of their business, financial position and future cash flows, show potential risks with respect to their ability to repay the loans, although showing no immediate default risk or (ii) are in arrears for one month or more but less than three months.
Substandard	(i) Loans extended to customers that, based on our consideration of their business, financial position and future cash flows, are judged to have incurred considerable default risks as their ability to repay has deteriorated; or (ii) the portion that we expect to collect of total loans (a) extended to customers that have been in arrears for three months or more, (b) extended to customers that have incurred serious default risks due to the occurrence of, among other things, final refusal to pay their debt instruments, entry into liquidation or bankruptcy proceedings or closure of their businesses, or (c) extended to customers who have outstanding loans that are classified as "doubtful" or "estimated loss."
Doubtful	Loans exceeding the amount that we expect to collect of total loans to customers that: (i) based on our consideration of their business, financial position and future cash flows, have incurred serious default risks due to noticeable deterioration in their ability to repay; or (ii) have been in arrears for three months or more but less than twelve months.
Estimated loss	Loans exceeding the amount that we expect to collect of total loans to customers that: (i) based on our consideration of their business, financial position and future cash flows, are judged to be accounted as a loss because the inability to repay became certain due to serious deterioration in their ability to repay; (ii) have been in arrears for twelve months or more; or (iii) have incurred serious risks of default in repayment due to the occurrence of, among other things, final refusal to pay their debt instruments, liquidation or bankruptcy proceedings or closure of their business.

Loan Classifications	Corporate (1)	Consumer	Credit Card Balances (2)	Credit Card Loans (3)
Normal	0.85% or above	1% or above	1.1% or above	2.5% or above
Precautionary	7% or above	10% or above	40% or above	50% or above
Substandard	20% or above	20% or above	60% or above	65% or above
Doubtful	50% or above	55% or above	75% or above	75% or above
Estimated loss	100%	100%	100%	100%

(1) Subject to certain exceptions pursuant to the Banking Industry Supervision Regulations of Korea.
(2) Applicable for credit card balances from general purchases.
(3) Applicable for cash advances, card loans and revolving credit card assets.

Loan Charge-Offs

Basic Principles

We attempt to minimize loans to be charged off by adhering to a sound credit approval process based on credit risk analysis prior to extending loans and a systematic management of outstanding loans. However, if charge-offs are necessary, we charge off loans subject to our charge-off policy at an early stage in order to maximize accounting transparency, to minimize any waste of resources in managing loans which have a low probability of being collected and to reduce our non-performing loan ratio.

Loans To Be Charged Off

Loans are charged off if they are deemed to be uncollectible by falling under any of the following categories:

- loans for which collection is not foreseeable due to insolvency, bankruptcy, compulsory execution, disorganization, dissolution or the shutting down of the business of the debtor;
- loans for which collection is not foreseeable due to the death or disappearance of the debtor;
- loans for which expenses of collection exceed the collectable amount;
- loans on which collection is not possible through legal or any other means;
- payments in arrears in respect of credit cards that have been overdue for a period of six months or more and have been classified as expected loss (excluding instances where there has been partial payment of the overdue balance, where a related balance is not overdue or where a charge off is not possible due to Korean regulations); and
- the portion of loans classified as "estimated loss," net of any recovery from collateral, which is deemed to be uncollectible.

Procedure for Charge-off Approval

In order to charge off corporate loans, an application for a charge-off must be submitted to Kookmin Bank's Credit Management Department promptly after the corporate loan is classified as estimated loss or deemed uncollectible. The Credit Management Department refers the charge-off application to Kookmin Bank's Branch Audit Department for their review to ensure compliance with our internal procedures for charge-offs. Then, the Credit Management Department, after reviewing the application to confirm that it meets relevant requirements, seeks an approval from the Financial Supervisory Service for our charge-offs, which is typically granted. Once we receive approval from the Financial Supervisory Service, we must also obtain approval from our senior management to charge off those loans. For accounting purposes, we recognize charge-offs of corporate loans under IFRS prior to approval from the Financial Supervisory Service.

With respect to credit card balances and unsecured retail loans, we follow a different process to determine which credit card balances and unsecured retail loans should be charged off, based on the length of time those loans or balances are past due. We charge off unsecured retail loans deemed to be uncollectible and credit card balances which have been overdue for a period of six months or more or which have been deemed to be uncollectible under IFRS.

Treatment of Loans Charged Off

Once loans are charged off, we classify them as charged-off loans and remove them from our balance sheet. These loans are managed based on a different set of procedures. We continue our collection efforts in respect of these loans, including through our subsidiary, KB Credit Information, although loans may be charged off before we begin collection efforts in some circumstances.

If a collateralized loan is overdue, we will, typically within one year from the time that such loan became overdue (or after a longer period in certain circumstances), petition a court to foreclose and sell the collateral through a court-supervised auction. If a debtor ultimately fails to repay and the court grants its approval for foreclosure, we will sell the collateral, net of expenses incurred from the auction.

Credit Rehabilitation Programs for Delinquent Consumer Borrowers

In light of the rapid increase in delinquencies in credit card and other consumer credit in recent years, and concerns regarding potential social issues posed by the growing number of individuals with bad credit, the

Korean government has implemented a number of measures intended to support the rehabilitation of the credit of delinquent consumer borrowers. These measures may affect the amount and timing of our collections and recoveries on our delinquent consumer credits.

For example, in March 2009, the Financial Services Commission requested Korean banks, including us, to establish a "pre-workout program," including a credit counseling and recovery service, for retail borrowers with outstanding short-term debt. Under the pre-workout program, which has been in operation since April 2009, maturity extensions and/or interest reductions are provided for retail borrowers with total loans of ₩1.5 billion or less (consisting of no more than ₩500 million of unsecured loans and ₩1 billion of secured loans) who are in arrears on their payments for more than 30 days but less than 90 days or for retail borrowers with an annual income of ₩40 million or less who have been in arrears on their payments for more than 30 days on an aggregate basis for the 12 months prior to their application.

In March 2013, in order to support low income consumer borrowers experiencing difficulty in repaying their unsecured long-term debt, the Financial Services Commission announced the establishment of a "National Happiness Fund" to provide one-time relief to such borrowers by:

- purchasing from creditors unsecured loans of individual borrowers not exceeding ₩100 million in principal amount in the aggregate, which loans have been in arrears for a period of six months or more as of February 28, 2013 and, if requested by the borrower, reducing the balance of such loans by up to 50% and/or extending the maturity of such loans to up to ten years based on the borrower's expected ability to repay;
- purchasing from certain creditors student loans of individual borrowers, which loans have been in arrears for a period of six months or more as of February 28, 2013 and, if requested by the borrower, restructuring the balance and/or extending the maturity of such loans based on the borrower's expected ability to repay or extending the maturity of such loans until the borrower is employed; and
- for individuals with annual income of ₩40 million or less with loans of a principal amount not exceeding ₩30 million in the aggregate and with an interest rate of 20% or higher, facilitating the refinancing of such loans at lower interest rates, provided that such loans have not been in default during the six months prior to the application for relief.

Over 4,000 Korean financial institutions and private lenders, including our subsidiaries, Kookmin Bank, KB Savings Bank and KB Kookmin Card, have signed a memorandum of understanding with the National Happiness Fund to sell eligible loans to the fund. The price and volume of such loans to be sold are subject to further negotiations between the National Happiness Fund and such financial institutions and lenders. The National Happiness Fund accepted applications from individual borrowers to participate in such relief programs until October 2013 and until January 2014 for individual borrowers of student loans from the Korea Student Aid Foundation.

Investment Portfolio

Investment Policy

We invest in and trade Won-denominated and, to a lesser extent, foreign currency-denominated securities for our own account to:

- maintain the stability and diversification of our assets;
- maintain adequate sources of back-up liquidity to match our funding requirements; and
- supplement income from our core lending activities.

In making securities investments, we take into account a number of factors, including macroeconomic trends, industry analysis and credit evaluation in determining whether to make particular investments in securities.

Our investments in securities are also subject to a number of guidelines, including limitations prescribed under the Financial Holding Company Act and the Bank Act. Under these regulations, a bank holding company may not own (i) more than 5% of the total issued and outstanding shares of another finance-related company, (ii) any shares of its affiliates, other than its direct or indirect subsidiaries or (iii) any shares of a non-finance-related company. In addition, Kookmin Bank must limit its investments in equity securities and bonds with a maturity in excess of three years (other than monetary stabilization bonds issued by the Bank of Korea and national government bonds) to 100.0% of its total Tier I and Tier II capital amount (less any capital deductions). Generally, Kookmin Bank is also prohibited from acquiring more than 15.0% of the shares with voting rights issued by any other corporation subject to certain exceptions. Pursuant to the Bank Act, a bank and its trust accounts are prohibited from acquiring the shares of a major shareholder (for the definition of "major shareholder," see "—Supervision and Regulation—Principal Regulations Applicable to Banks—Financial Exposure to Any Individual Customer and Major Shareholders") of that bank in excess of an amount equal to 1% of the sum of the bank's Tier I and Tier II capital (less any capital deductions). Further information on the regulatory environment governing our investment activities is set out in "—Supervision and Regulation—Principal Regulations Applicable to Financial Holding Companies—Liquidity," "—Supervision and Regulation—Principal Regulations Applicable to Financial Holding Companies—Restrictions on Shareholdings in Other Companies," "—Supervision and Regulation—Principal Regulations Applicable to Banks—Liquidity" and "—Supervision and Regulation—Principal Regulations Applicable to Banks—Restrictions on Shareholdings in Other Companies."

The following table sets out the definitions of the four categories of securities we hold:

Category	Classification
Financial assets held for trading	Financial assets bought and held for trading.
Financial assets designated at fair value through profit or loss	Financial assets which were not bought and held for trading but are otherwise designated as at fair value through profit or loss.
Available-for-sale financial assets	Non-derivative financial assets not classified as held-to-maturity, at fair value through profit or loss or loans and receivables.
Held-to-maturity financial assets	Non-derivative financial assets with fixed or determinable payments and fixed maturity dates that the Bank has the positive intent and ability to hold to maturity.

See "Item 5.A. Operating Results—Critical Accounting Policies—Valuation of Securities and Financial Instruments."

We also hold limited balances of venture capital securities, non-marketable and restricted equity securities and derivative instruments.

Carrying Amount and Market Value

The following table sets out the carrying amount and market value of securities in our securities portfolio as of the dates indicated:

	As of December 31,

(1) The weighted average yield for the portfolio represents the yield to maturity for each individual security, weighted using its carrying amount (which is the amortized cost in the case of held-to-maturity financial assets and the fair value in the case of available-for-sale financial assets and financial assets at fair value through profit or loss).

Concentrations of Risk

As of December 31, 2014, we held the following securities of individual issuers where the aggregate carrying amount of those securities exceeded 10% of our stockholders' equity at such date. As of December 31, 2014, our stockholders' equity was ₩27,315 billion.

	Carrying Amount	Market Value
	(in billions of Won)	
Name of issuer:		
Korean government	₩10,192	₩10,374
Bank of Korea	4,006	4,006
Total	₩14,198	₩14,380

The Bank of Korea is controlled by the Korean government.

Funding

We obtain funding for our lending activities from a variety of sources, both domestic and foreign. Our principal source of funding is customer deposits. In addition, we acquire funding through long-term borrowings (comprising debentures and debts), short-term borrowings, including borrowings from the Bank of Korea, and call money.

Our primary funding strategy has been to achieve low-cost funding by increasing the average balances of low-cost retail deposits, in particular demand deposits and time deposits. We also have focused our marketing efforts on higher net worth individuals, who account for a significant portion of the assets in our retail deposit base. Customer deposits accounted for 83.1% of total funding as of December 31, 2012, 83.0% of total funding as of December 31, 2013 and 82.4% of total funding as of December 31, 2014.

Our borrowings consist of issuances of debentures and debt from financial institutions, the Korean government and government-affiliated funds. The majority of our debt is long-term, with maturities ranging from one year to 30 years.

Deposits

Although the majority of our deposits are short-term, it has been our experience that the majority of our depositors generally roll over their deposits at maturity, providing us with a stable source of funding.

The following table shows the average balances of our deposits and the average rates paid on our deposits for the periods indicated:

	2012		2013		2014	
	Average Balance [1]	Average Rate Paid	Average Balance [1]	Average Rate Paid	Average Balance [1]	Average Rate Paid
	(in billions of Won, except percentages)					
Demand deposits:						
Non-interest bearing	₩ 3,075	—	₩ 3,252	—	₩ 3,486	—
Interest bearing	56,154	0.60%	60,894	0.47%	67,612	0.42%
Time deposits	136,617	3.69	130,286	3.02	130,258	2.70
Certificates of deposit	1,735	3.86	1,780	3.03	1,689	2.72
Average total deposits	₩197,581	2.76%	₩196,212	2.18%	₩203,045	1.89%

(1) Average balances are based on daily balances for our banking, credit card and investment and securities operations and monthly or quarterly balances for our other operations.

For a description of our retail deposit products, see "—Business—Retail Banking—Lending Activities—Mortgage and Home Equity Lending" and "—Business—Retail Banking—Deposit-Taking Activities."

Time Deposits and Certificates of Deposit

The following table presents the remaining maturities of our time deposits and certificates of deposit which had a fixed maturity in excess of ₩100 million as of December 31, 2014:

	Time Deposits	Certificates of Deposit	Total
	(in billions of Won)		
Maturing within three months	₩22,410	₩ 613	₩23,023
After three but within six months	16,775	363	17,138
After six but within 12 months	21,971	567	22,538
After 12 months	2,922	—	2,922
Total	₩64,078	₩1,543	₩65,621

Long-term borrowings

The aggregate amount of contractual maturities of all long-term borrowings (comprising debentures and debt) as of December 31, 2014 was as follows:

	As of December 31, 2014
	(in billions of Won)
Due in 2015	₩ 8,781
Due in 2016	10,343
Due in 2017	5,154
Due in 2018	2,080
Due in 2019	1,133
Thereafter	4,618
Gross long-term borrowings	32,109
Fair value adjustments	54
Deferred financing costs	(2)
Discount	(5)
Total long-term borrowings, net	₩32,156

Short-term borrowings

The following table presents information regarding our short-term borrowings (borrowings with an original maturity of one year or less) for the periods indicated:

	As of and for the Year Ended December 31,		
	2012	2013	2014
	(in billions of Won, except percentages)		
Call money:			
Year-end balance	₩ 2,597	₩ 2,648	₩ 2,882
Average balance (1)	4,788	4,679	4,164
Maximum balance (2)	5,043	5,835	5,503
Average interest rate (3)	2.38%	2.12%	1.87%
Year-end interest rate	0.15-2.72%	0.17-5.23%	0.10-3.61%
Borrowings from the Bank of Korea: (4)			
Year-end balance	₩ 782	₩ 558	₩ 1,003
Average balance (1)	745	649	763
Maximum balance (2)	953	917	1,048
Average interest rate (3)	1.48%	1.08%	0.92%
Year-end interest rate	1.25%	0.50-1.00%	0.50-1.00%
Other short-term borrowings: (5)			
Year-end balance	₩ 7,382	₩ 4,963	₩ 9,025
Average balance (1)	9,766	6,166	7,460
Maximum balance (2)	12,340	7,064	9,164
Average interest rate (3)	2.11%	1.25%	1.41%
Year-end interest rate	0.24-5.47%	0.00-4.81%	0.00-8.62%

(1) Average balances are based on daily balances for our banking, credit card and investment and securities operations and monthly or quarterly balances for our other operations.
(2) Maximum balances are based on month-end balances.
(3) Average interest rates for the year are calculated by dividing the total interest expense by the average amount borrowed.
(4) Borrowings from the Bank of Korea generally mature within one month for borrowings in Won and six months for borrowings in foreign currencies. These short-term borrowings were secured by securities totaling ₩990 billion as of December 31, 2014.
(5) Other short-term borrowings include securities sold under repurchase agreement, bills sold, borrowings and debentures. Other short-term borrowings have maturities of one year or less. Securities sold under repurchase agreements were secured by securities totaling ₩2,412 billion as of December 31, 2014.

Supervision and Regulation

Principal Regulations Applicable to Financial Holding Companies

General

The Financial Holding Company Act, last amended on May 28, 2014, regulates Korean financial holding companies and their subsidiaries. The entities that regulate and supervise Korean financial holding companies and their subsidiaries are the Financial Services Commission and the Financial Supervisory Service.

The Financial Services Commission exerts direct control over financial holding companies pursuant to the Financial Holding Company Act. Among other things, the Financial Services Commission approves the establishment of financial holding companies, issues regulations on the capital adequacy of financial holding companies and their subsidiaries, and drafts regulations relating to the supervision of financial holding companies.

Following the instructions and directives of the Financial Services Commission, the Financial Supervisory Service supervises and examines financial holding companies and their subsidiaries. In particular, the Financial Supervisory Service sets requirements relating to Korean financial holding companies' liquidity and capital adequacy ratios and establishes reporting requirements within the authority delegated under the Financial Services Commission regulations. Financial holding companies must submit quarterly reports to the Financial Supervisory Service discussing business performance, financial status and other matters identified in the Enforcement Decree of the Financial Holding Company Act.

Under the Financial Holding Company Act, a financial holding company is a company which primarily engages in controlling its subsidiaries by holding equity stakes in them equal in aggregate to at least 50% of the financial holding company's aggregate assets based on its balance sheet as of the end of the immediately preceding fiscal year. A company is required to obtain approval from the Financial Services Commission to become a financial holding company.

A financial holding company may engage only in controlling the management of its subsidiaries, as well as certain ancillary activities including:

- financially supporting its direct and indirect subsidiaries;
- raising capital necessary for investment in its subsidiaries or providing financial support to its direct and indirect subsidiaries;
- supporting the business of its direct and indirect subsidiaries for the joint development and marketing of new products;
- providing data processing, legal, accounting and other resources and services that have been commissioned by its direct and indirect subsidiaries so as to support their operations; and
- any other businesses exempted from authorization, permission or approval under the applicable laws and regulations.

The Financial Holding Company Act requires every financial holding company (other than a financial holding company that is controlled by another financial holding company) and its subsidiaries to obtain prior approval from the Financial Services Commission before acquiring control of another company or to file a report with the Financial Services Commission within 30 days thereafter in certain cases (including acquiring control of another company whose assets are less than ₩100 billion as of the end of the immediately preceding fiscal year). In addition, the Financial Services Commission must grant permission to liquidate or to merge with any other company before the liquidation or merger. A financial holding company must report to the Financial Services Commission when certain events, including the following, occur:

- when its officers or largest shareholder changes;
- in the case of a bank holding company, when a major shareholder changes;
- when the shareholding of the controlling shareholder (i.e., the "largest shareholder" or a "principal shareholder," each as defined in the Financial Holding Company Act) or a person who has a "special relationship" with such controlling shareholder (as defined in the Enforcement Decree of the Financial Holding Company Act) changes by 1% or more of the total issued and outstanding voting shares of the financial holding company;
- when it changes its corporate name;
- when there is a cause for its dissolution; and
- when it or its subsidiaries cease to control any of their respective direct or indirect subsidiaries by disposing of their shares of such direct or indirect subsidiary.

Capital Adequacy

The Financial Holding Company Act does not provide for a minimum paid-in capital requirement related to financial holding companies. However, all financial holding companies are required to maintain a specified level of solvency. In addition, with respect to the allocation of net profit earned in a fiscal term, a financial holding company must set aside in its legal reserve an amount equal to at least 10% of its net income after tax each time it pays dividends on its net profits earned until its legal reserve reaches at least the aggregate amount of its paid-in capital.

A bank holding company, which is a financial holding company controlling banks or other financial institutions conducting banking business as prescribed in the Financial Holding Company Act, is required to maintain a minimum consolidated capital adequacy ratio of 8.0%. "Consolidated capital adequacy ratio" is defined as the ratio of equity capital as a percentage of risk-weighted assets on a consolidated basis, determined in accordance with the Financial Services Commission requirements that have been formulated based on Bank of International Settlements ("BIS") standards. "Equity capital," as applicable to bank holding companies, is defined as the sum of common equity Tier I capital, additional Tier I capital and Tier II capital less any deductible items, each as defined under the Regulation on the Supervision of Financial Holding Companies. "Risk-weighted assets" is defined as the sum of credit risk-weighted assets and market risk-weighted assets.

Pursuant to the amended regulations promulgated by the Financial Services Commission in 2013 to implement Basel III, Korean bank holding companies were required to maintain a minimum ratio of common equity Tier I capital to risk-weighted assets of 3.5% and Tier I capital to risk-weighted assets of 4.5% from December 1, 2013, which minimum ratios were increased to 4.0% and 5.5%, respectively, from January 1, 2014 and increased further to 4.5% and 6.0%, respectively, from January 1, 2015. Such requirements are in addition to the pre-existing requirement for a minimum ratio of Tier I and Tier II capital (less any capital deductions) to risk-weighted assets of 8.0%, which remains unchanged. The amended regulations also contemplate an additional capital conservation buffer of 0.625% starting in 2016, with such buffer to increase in stages to 2.5% by 2019.

Liquidity

All financial holding companies are required to match the maturities of their assets and liabilities on a non-consolidated basis in accordance with the Financial Holding Company Act in order to ensure liquidity. Financial holding companies must:

- maintain a Won liquidity ratio (defined as Won assets due within one month, including marketable securities, divided by Won liabilities due within one month) of not less than 100% on a non-consolidated basis;
- maintain a foreign currency liquidity ratio (defined as foreign currency liquid assets due within three months divided by foreign currency liabilities due within three months) of not less than 80% on a non-consolidated basis (except that such requirement is not applicable to a financial holding company whose foreign currency liabilities constitute less than 1% of its total assets);
- maintain a ratio of foreign currency liquid assets due within seven days less foreign currency liabilities due within seven days as a percentage of total foreign currency assets of not less than 0% on a non-consolidated basis (except that such requirement is not applicable to a financial holding company whose foreign currency liabilities constitute less than 1% of its total assets);
- maintain a ratio of foreign currency liquid assets due within a month less foreign currency liabilities due within a month as a percentage of total foreign currency assets of not less than negative 10% on a non-consolidated basis (except that such requirement is not applicable to a financial holding company whose foreign currency liabilities constitute less than 1% of its total assets); and
- make quarterly reports regarding their Won liquidity and foreign currency liquidity to the Financial Supervisory Service.

Financial Exposure to Any Individual Customer and Major Shareholder

Subject to certain exceptions, the aggregate credit (as defined in the Financial Holding Company Act, the Bank Act, the Financial Investment Services and Capital Markets Act, the Insurance Business Act, the Mutual

Savings Bank Act and the Specialized Credit Financial Business Act, respectively) of a financial holding company and its direct and indirect subsidiaries that are banks, merchant banks, financial investment companies, insurance companies, savings banks or specialized credit financial business companies (which we refer to as "Financial Holding Company Total Credit") to a single group of companies that belong to the same conglomerate as defined in the Monopoly Regulations and Fair Trade Act will not be permitted to exceed 25% of net aggregate equity capital (as defined below).

"Net aggregate equity capital" is defined under the Enforcement Decree of the Financial Holding Company Act as the sum of:

(1) in case of a financial holding company, the capital amount as defined in Article 24-3(7), Item 2 of the Enforcement Decree of the Financial Holding Company Act;

(2) in case of a bank, the capital amount as defined in Article 2(1), Item 5 of the Bank Act;

(3) in case of a merchant bank, the capital amount as defined in Article 342(1) of the Financial Investment Services and Capital Markets Act; and

(4) in case of a financial investment company, the capital amount as defined in Article 37(3) of the Enforcement Decree of the Financial Investment Services and Capital Markets Act;

(5) in case of an insurance company, the capital amount as defined in Article 2, Item 15 of the Insurance Business Act;

(6) in case of a savings bank, the capital amount as defined in Article 2, Item 4 of the Mutual Savings Bank Act; and

(7) in case of a specialized credit financial business company, the capital amount as defined in Article 2, Item 19 of the Specialized Credit Financial Business Act;

less the sum of:

(1) the amount of shares of direct and indirect subsidiaries held by the financial holding company;

(2) the amount of shares that are cross-held by each direct and indirect subsidiary that is a bank, merchant bank, financial investment company, insurance company, savings bank or specialized credit financial business company; and

(3) the amount of shares of a financial holding company held by such direct and indirect subsidiaries that are banks, merchant banks, financial investment companies, insurance companies, savings banks or specialized credit financial business companies.

The Financial Holding Company Total Credit to a single individual or judicial person may not exceed 20% of the net aggregate equity capital. In addition, the Financial Holding Company Total Credit to a shareholder holding (together with the persons who have a "special relationship" with the shareholder, as defined in the Enforcement Decree of the Financial Holding Company Act) in aggregate more than 10% of the total issued and outstanding voting shares of a financial holding company generally may not exceed the lesser of (x) 25% of the net aggregate equity capital and (y) the amount of the equity capital of the financial holding company multiplied by the shareholding ratio of the shareholder (together with the persons who have a special relationship with the shareholder).

Further, the total sum of credits (as defined in the Financial Holding Company Act, the Bank Act, the Financial Investment Services and Capital Markets Act, the Insurance Business Act, the Mutual Savings Bank Act and the Specialized Credit Financial Business Act, respectively) of a bank holding company and its direct and indirect subsidiaries that are banks, merchant banks, financial investment companies, insurance companies, savings banks or specialized credit financial business companies as applicable ("Bank Holding Company Total Credit") extended to a "major shareholder" (as defined below) (together with the persons who have a special relationship with that major shareholder) will not be permitted to exceed the lesser of (x) 25% of the net aggregate equity capital and (y) the amount of the equity capital of the bank holding company multiplied by the shareholding ratio of the major shareholder, except for certain cases.

"Major shareholder" is defined as:

- a shareholder holding (together with persons who have a special relationship with that shareholder), in excess of 10% (or in the case of a bank holding company controlling regional banks only, 15%) in the aggregate of the bank holding company's total issued and outstanding voting shares; or
- a shareholder holding (together with persons who have a special relationship with that shareholder), more than 4% in the aggregate of the total issued and outstanding voting shares of the bank holding company controlling nationwide banks, where the shareholder is the largest shareholder or has actual control over the major business affairs of the bank holding company through, for example, appointment and dismissal of the officers pursuant to the Enforcement Decree of the Financial Holding Company Act.

In addition, the total sum of the Bank Holding Company Total Credit granted to all of a bank holding company's major shareholders must not exceed 25% of the bank holding company's net aggregate equity capital. Furthermore, any bank holding company that, together with its direct and indirect subsidiaries, intends to extend credit to the bank holding company's major shareholder in an amount equal to or exceeding the lesser of (x) the amount equivalent to 0.1% of the net aggregate equity capital and (y) ₩5 billion, in any single transaction, must obtain prior unanimous board resolutions and then, immediately after providing the credit, must file a report to the Financial Services Commission and publicly disclose the filing of the report.

Restrictions on Transactions Among Direct and Indirect Subsidiaries and Financial Holding Company

Generally, a direct or indirect subsidiary of a financial holding company may not extend credits (excluding the amount of corporate credit card payments issued by a direct or indirect subsidiary of a financial holding company that is engaged in the banking business) to that financial holding company. In addition, a direct or indirect subsidiary of a financial holding company may not extend credits (excluding the amount of corporate credit card payments issued by a direct or indirect subsidiary of a financial holding company that is engaged in the banking business) to other direct or indirect subsidiaries of the financial holding company in excess of 10% of its capital amount on an individual basis or to those subsidiaries in excess of 20% of its capital amount on an aggregate basis. The subsidiary extending the credit must also obtain an adequate level of collateral depending on the type of such collateral from the other subsidiaries unless the credit is otherwise approved by the Financial Services Commission. The adequate level of collateral for each type of collateral is as follows:

(1) for deposits and installment savings, obligations of the Korean government or the Bank of Korea, obligations guaranteed by the Korean government or the Bank of Korea, obligations secured by securities issued or guaranteed by the Korean government or the Bank of Korea, 100% of the credit extended;

(2) for obligations of municipal governments under the Local Autonomy Act, local public enterprise under the Local Public Enterprises Act and investment institutions and other quasi-investment institutions under the Basic Act on the Management of Government-Invested Institution or for obligations guaranteed by, or secured by the securities issued or guaranteed by, the aforementioned entities pursuant to the relevant regulations, 110% of the credit extended; and

(3) for any property other than those set forth in paragraphs (1) and (2) above, 130% of the credit extended.

Subject to certain exceptions, a direct or indirect subsidiary of a financial holding company is prohibited from owning the shares of any other direct or indirect subsidiaries (other than those directly controlled by that direct or indirect subsidiary) under the common control of the financial holding company.

Subject to certain exceptions, a direct or indirect subsidiary of a financial holding company is also prohibited from owning the shares of the financial holding company controlling that direct or indirect subsidiary. The transfer of certain assets classified as precautionary or below between a financial holding company and its direct or indirect subsidiary or between the direct and indirect subsidiaries of a financial holding company is prohibited except for:

(1) transfers to a special purpose company, or entrustment with a trust company, for an asset-backed securitization transaction under the Asset-Backed Securitization Act;

(2) transfers to a mortgage-backed securities issuance company for a mortgage securitization transaction;

(3) transfers or in-kind contributions to a corporate restructuring vehicle under the Corporate Restructuring Investment Companies Act; and

(4) transfers to a corporate restructuring company under the Industry Promotion Act.

Disclosure of Management Performance

For the purpose of protecting the depositors and investors in the subsidiaries of financial holding companies, the Financial Services Commission requires financial holding companies to disclose certain material matters including:

(1) financial condition and profit and loss of the financial holding company and its direct and indirect subsidiaries;

(2) fund-raising by the financial holding company and its direct and indirect subsidiaries and the appropriation of such funds;

(3) any sanctions levied on the financial holding company and its direct and indirect subsidiaries under the Financial Holding Company Act or any corrective measures or sanctions under the Law on Improvement of Structure of Financial Industry; and

(4) occurrence of any non-performing assets or financial incident that may have a material adverse effect, or any other event as prescribed in the applicable regulations.

Restrictions on Shareholdings in Other Companies

Generally, a financial holding company may not own (i) more than 5% of the total issued and outstanding shares of another finance-related company, (ii) any shares of its affiliates, other than its direct or indirect subsidiaries or (iii) any shares of a non-finance-related company.

Restrictions on Shareholdings by Direct and Indirect Subsidiaries

Generally, a direct subsidiary of a financial holding company may not control any other company other than, as an indirect subsidiary of the financial holding company:

- financial institutions established in foreign jurisdictions;
- certain financial institutions which are engaged in any business that the direct subsidiary may conduct without any licenses or permits;
- certain financial institutions whose business is related to the business of the direct subsidiary as described by the Enforcement Decree of the Financial Holding Company Act (for example, a bank subsidiary may control only credit information companies, credit card companies and financial investment companies with a dealing, brokerage, collective investment, investment advice, discretionary investment management and/or trust license);
- certain financial institutions whose business is related to the financial business as prescribed by the regulations of the Ministry of Strategy and Finance; and

- certain companies which are not financial institutions but whose business is related to the financial business of the financial holding company as prescribed by the Enforcement Decree of the Financial Holding Company Act (for example, a finance-related research company or a finance-related information technology company).

Acquisition of such indirect subsidiaries by direct subsidiaries of a financial holding company requires prior permission from the Financial Services Commission or the submission of a report to the Financial Services Commission, depending on the types of the indirect subsidiaries and the amount of total assets of the indirect subsidiaries.

Subject to certain exceptions, an indirect subsidiary of a financial holding company may not control any other company. If an indirect subsidiary of a financial holding company had control over another company at the time it became such an indirect subsidiary, the indirect subsidiary is required to dispose of its interest in the other company within two years from such time.

Restrictions on Transactions between a Bank Holding Company and its Major Shareholder

A bank holding company and its direct and indirect subsidiaries may not acquire (including through their respective trust accounts) shares issued by the bank holding company's major shareholder in excess of 1% of the net aggregate equity capital (as defined above). In addition, if those entities intend to acquire shares issued by that major shareholder in any single transaction equal to or exceeding the lesser of (x) the amount equivalent to 0.1% of the net aggregate equity capital and (y) ₩5 billion, that entity must obtain prior unanimous board resolutions and then, immediately after the acquisition, file a report to the Financial Services Commission and publicly disclose the filing of the report.

Restriction on Ownership of a Financial Holding Company

Under the Financial Holding Company Act, a financial institution generally may not control a financial holding company. In addition, any single shareholder and persons who have a special relationship with that shareholder may acquire beneficial ownership of up to 10% of the total issued and outstanding shares with voting rights of a bank holding company that controls nationwide banks or 15% of the total issued and outstanding shares with voting rights of a bank holding company that controls only regional banks, subject to certain exceptions. Among others, the Korean government and the Korea Deposit Insurance Corporation are not subject to this limit. "Non-financial business group companies" (as defined below), however, may not acquire the beneficial ownership of shares of a bank holding company controlling nationwide banks in excess of 4% of that bank holding company's outstanding voting shares unless they obtain the approval of the Financial Services Commission and agree not to exercise voting rights in respect of shares in excess of the 4% limit, in which case they may acquire beneficial ownership of up to 10%. Any other person (whether a Korean national or a foreign investor) may acquire no more than 10% of total voting shares issued and outstanding of a bank holding company controlling nationwide banks unless they obtain approval from the Financial Services Commission in each instance where the total holding will exceed 10% (or 15% in the case of a bank holding company controlling only regional banks), 25% or 33% of the total voting shares issued and outstanding of that bank holding company controlling nationwide banks.

Furthermore, in the case where a person (including Korean and foreign investors, but excluding certain persons prescribed under the Enforcement Decree of the Financial Holding Company Act) (i) acquires in excess of 4% of the total issued and outstanding voting shares of any bank holding company (other than a bank holding company controlling only regional banks), (ii) becomes the largest shareholder of such bank holding company in which such person has acquired in excess of 4% of the total issued and outstanding voting shares, (iii) changes its shareholding in such bank holding company, in which it has acquired in excess of 4% of the total issued and outstanding voting shares, by 1% or more of the total issued and outstanding voting shares of such bank holding company or (iv) is a private equity fund or an investment purpose company holding in excess of 4% of the total outstanding voting shares of a bank holding company and changes its members or shareholders, such person must file a report on such change with the Financial Services Commission (x) in case of (i) and (iii), within ten days after the end of the month in which such change occurred, or (y) in case of (ii) and (iv), within ten days after the end of the quarter in which such change occurred.

"Non-financial business group companies" as defined under the Financial Holding Company Act include:

(1) any same shareholder group where the aggregate net assets of all non-financial business companies belonging to that group equals or exceeds 25% of the aggregate net assets of all members of that group;

(2) any same shareholder group where the aggregate assets of all non-financial business companies belonging to that group equals or exceeds ₩2 trillion;

(3) any mutual fund where a same shareholder group identified in (1) or (2) above beneficially owns and/or exercises the voting rights of more than 4% of the total issued and outstanding voting shares of that mutual fund;

(4) any private equity fund (a) where a person falling under any of items (1) through (3) above is a limited partner holding not less than 10% of the total amount of contributions to the private equity fund, or (b) where a person falling under any of items (1) through (3) above is a general partner, or (c) where the total equity of the private equity fund acquired by each affiliate belonging to several enterprise groups subject to the limitation on mutual investment is 30% or more of the total amount of contributions to the private equity fund; or

(5) the investment purpose company concerned, where a private equity fund falling under item (4) above acquires or holds stocks in excess of 4% of the stock or equity of such company or exercises *de facto* control over significant managerial matters of such company through appointment or dismissal of executives or in any other manner.

Sharing of Customer Information among Financial Holding Company and its Subsidiaries

Under the Act on Use and Protection of Credit Information, any individual customer's credit information must be disclosed or otherwise used by financial institutions only to determine, establish or maintain existing commercial transactions with them and only after obtaining written consent to use that information. Under the Financial Holding Company Act, a financial holding company and its direct and indirect subsidiaries, however, may share certain credit information of individual customers among themselves for internal management purposes outlined in the Enforcement Decree of the Financial Holding Company Act (such as credit risk management, internal control and customer analysis), without the customers' written consent, subject to the methods and procedures for provision of such information set forth therein. A subsidiary financial investment company with a dealing and/or brokerage license of a financial holding company may provide that financial holding company and its other direct and indirect subsidiaries information relating to the aggregate amount of cash or securities that a customer of the financial investment company with a dealing and/or brokerage license has deposited, for internal management purposes outlined in the Enforcement Decree of the Financial Holding Company Act, subject to the methods and procedures for provision of such information set forth therein. Recent amendments to the Financial Holding Company Act, which became effective on November 29, 2014, limit the scope of credit information that may be shared without the customers' prior consent and require certain procedures for provision of customer information as prescribed by the Financial Services Commission. Beginning in May 29, 2015, notice must be given to customers at least once a year regarding (i) the provider of customer information, (ii) the recipient of customer information, (iii) the purpose of providing the information and (iv) the categories of the information provided.

Principal Regulations Applicable to Banks

The banking system in Korea is governed by the Bank Act of 1950, as amended (the "Bank Act") and the Bank of Korea Act of 1950, as amended (the "Bank of Korea Act"). In addition, Korean banks subject to the regulations and supervision of the Bank of Korea, the Monetary Policy Committee of the Bank of Korea, the Financial Services Commission and its executive body, the Financial Supervisory Service.

The Bank of Korea, established in June 1950 under the Bank of Korea Act, performs the customary functions of a central bank. It seeks to contribute to the sound development of the national economy by price stabilization through establishing and implementing efficient monetary and credit policies. The Bank of Korea acts under instructions of the Monetary Policy Committee, the supreme policy-making body of the Bank of Korea.

Under the Bank of Korea Act, the Monetary Policy Committee's primary responsibilities are to formulate monetary and credit policies and to determine the operations, management and administration of the Bank of Korea.

The Financial Services Commission, established on April 1, 1998, regulates commercial banks pursuant to the Bank Act, including establishing guidelines on capital adequacy of commercial banks, and promulgates regulations relating to supervision of banks. Furthermore, pursuant to the Amendment to the Government Organization Act and the Bank Act on May 24, 1999, the Financial Services Commission, instead of the Ministry of Strategy and Finance, now regulates market entry into the banking business.

The Financial Supervisory Service was established on January 2, 1999 as a unified body of the former Bank Supervisory Authority (the successor to the Office of Bank Supervision), the Securities Supervisory Board, the Insurance Supervisory Board and the Credit Management Fund. The Financial Supervisory Service is subject to the instructions and directives of the Financial Services Commission and carries out supervision and examination of commercial banks. In particular, the Financial Supervisory Service sets requirements both for the prudent control of liquidity and for capital adequacy and establishes reporting requirements pursuant to the authority delegated to it under the Financial Services Commission regulations, pursuant to which banks are required to submit annual reports on financial performance and shareholdings, regular reports on management strategy and non-performing loans, including write-offs, and management of problem companies and plans for the settlement of bad loans.

Under the Bank Act, approval to commence a commercial banking business or a long-term financing business must be obtained from the Financial Services Commission. Commercial banking business is defined as the lending of funds acquired predominantly from the acceptance of demand deposits for a period not exceeding one year or subject to the limitation established by the Financial Services Commission, for a period between one year and three years. Long-term financing business is defined as the lending, for periods in excess of one year, of funds acquired predominantly from paid-in capital, reserves or other retained earnings, the acceptance of time deposits with maturities of at least one year, or the issuance of debentures or other bonds. A bank wishing to enter into any business other than commercial banking and long-term financing businesses, such as the trust business, must obtain approval from the Financial Services Commission. Approval to merge with any other banking institution, to liquidate, to spin off, to close a banking business or to transfer all or a part of a business must also be obtained from the Financial Services Commission.

If the Financial Services Commission deems a bank's financial condition to be unsound or if a bank fails to meet the applicable capital adequacy ratio set forth under Korean law, the Financial Services Commission may order:

- admonitions, warnings or reprimands with respect to its officers and employees;
- capital increases or reductions;
- assignments of contractual rights and obligations relating to financial transactions;
- a suspension of performance by its officers of their duties and the appointment of receivers;
- stock cancellations or consolidations;

- disposals of property holdings;
- closures of subsidiaries or branch offices or downsizing;
- mergers with other financial institutions;
- acquisition of such bank by a third party; or
- suspensions of a part or all of its business operations.

Capital Adequacy

The Bank Act requires nationwide banks, such as us, to maintain a minimum paid-in capital of ₩100 billion and regional banks to maintain a minimum paid-in capital of ₩25 billion. All banks, including foreign bank branches in Korea, are also required to maintain a prescribed solvency position. A bank must also set aside in its legal reserve an amount equal to at least 10% of the net income after tax each time it pays dividends on net profits earned until its legal reserve reaches at least the aggregate amount of its paid-in capital.

Under the Detailed Regulation on the Supervision of Banking Business, the capital of a bank is divided into two categories, Tier I and Tier II capital. Tier I capital (core capital) consists of (i) common equity Tier I capital, including paid-in capital, capital surplus and retained earnings related to common equity and accumulated other comprehensive gains and losses, and (ii) additional Tier I capital, including paid-in capital and capital surplus related to hybrid Tier I capital instruments that, among other things, qualify as contingent capital and are subordinated to subordinated debt. Tier II capital (supplementary capital) consists of, among other things, capital and capital surplus from the issuance of Tier II capital, allowances for loan losses on loans classified as "normal" or "precautionary," subordinated debt and other capital securities which meet the standards prescribed by the governor of the Financial Supervisory Service under Article 26(2) of the Regulation on the Supervision of Banking Business.

All banks must meet minimum ratios of Tier I and Tier II capital (less any capital deductions) to risk-weighted assets, determined in accordance with Financial Services Commission requirements that have been formulated based on BIS standards. These requirements were adopted and became effective in 1996, and were amended effective January 1, 2008 upon the implementation by the Financial Supervisory Service of Basel II. Under such requirements, all domestic banks and foreign bank branches must meet a minimum ratio of Tier I and Tier II capital (less any capital deductions) to risk-weighted assets of 8%. In July and September 2013, the Financial Services Commission promulgated amended regulations implementing Basel III in Korea, pursuant to which Korean banks and bank holding companies were required to maintain a minimum ratio of common equity Tier I capital to risk-weighted assets of 3.5% and Tier I capital to risk-weighted assets of 4.5% from December 1, 2013, which minimum ratios were increased to 4.0% and 5.5%, respectively, from January 1, 2014 and increased further to 4.5% and 6.0%, respectively, from January 1, 2015. Such requirements are in addition to the pre-existing requirement for a minimum ratio of Tier I and Tier II capital (less any capital deductions) to risk-weighted assets of 8.0%, which remains unchanged. The amended regulations also contemplate an additional capital conservation buffer of 0.625% starting in 2016, with such buffer to increase in stages to 2.5% by 2019.

Under the Detailed Regulation on the Supervision of the Banking Business, the following risk-weight ratios must be applied by Korean banks in respect of home mortgage loans:

(1) for those banks which adopted a standardized approach for calculating credit risk capital requirements, a risk-weight ratio of 35% (only in the case where the loan is fully secured by a first ranking mortgage) and, with respect to high-risk home mortgage loans, 50% or 70%; and

(2) for those banks which adopted an internal ratings-based approach for calculating credit risk capital requirements, a risk-weight ratio calculated with reference to the probability of default, loss given default and exposure at default, each as defined under the Detailed Regulation on the Supervision of the Banking Business.

Liquidity

All banks are required to ensure adequate liquidity by matching the maturities of their assets and liabilities in accordance with the Regulation on the Supervision of the Banking Business. Banks may not invest an amount exceeding 100% of their Tier I and Tier II capital (less any capital deductions) in equity securities and certain other securities with a redemption period of over three years. This stipulation does not apply to Korean government bonds, Monetary Stabilization Bonds issued by the Bank of Korea or debentures and stocks referred to in items 1 and 2, respectively, of paragraph (6) of Article 11 of the Act on the Improvement of the Structure of the Financial Industry. The Financial Services Commission also requires each Korean bank to:

- maintain a liquidity coverage ratio (defined as the ratio of highly liquid assets to total net cash outflows over a one-month period) of not less than 80%, from January 1, 2015 until December 31, 2015, with such minimum liquidity coverage ratio to increase in increments of 5% per annum to 100% by 2019;
- maintain a foreign currency liquidity ratio (defined as the ratio of foreign currency assets due within three months to foreign currency liabilities due within three months) of not less than 85%;
- maintain a ratio of foreign currency assets due within seven days less foreign currency liabilities due within seven days, divided by total foreign currency assets, of not less than negative 3%;
- maintain a ratio of foreign currency assets due within a month less foreign currency liabilities due within a month, divided by total foreign currency assets, of not less than negative 10%; and
- submit monthly reports with respect to the maintenance of these ratios.

The Monetary Policy Committee of the Bank of Korea is empowered to fix and alter minimum reserve requirements that banks must maintain against their deposit liabilities. The current minimum reserve ratio is:

- 7% of average balances for Won currency demand deposits outstanding;
- 0% of average balances for Won currency employee asset establishment savings deposits, employee long-term savings deposits, employee house purchase savings deposits, long-term house purchase savings deposits, household long-term savings deposits and employee preferential savings deposits outstanding (with respect to employee-related deposits, only if such deposits were made prior to February 28, 2013); and
- 2% of average balances for Won currency time deposits, installment savings deposits, mutual installments, housing installments and certificates of deposit outstanding.

For foreign currency deposit liabilities, a 2% minimum reserve ratio is applied to time deposits with a maturity of one month or longer, certificates of deposit with a maturity of 30 days or longer and savings deposits with a maturity of six months or longer and a 7% minimum reserve ratio is applied to other deposits. A 1% minimum reserve ratio applies to deposits in offshore accounts, immigrant accounts and resident accounts opened by foreign exchange banks as well as foreign currency certificates of deposit held by account holders of such offshore accounts, immigrant accounts and resident accounts opened by foreign exchange banks.

Furthermore, pursuant to the Regulation on the Supervision of the Banking Business, foreign exchange agencies, including our subsidiary, Kookmin Bank, are required to hold “foreign currency safe assets” in an aggregate amount that is not less than the lower of (i) the product of (x) its total foreign currency-denominated debt maturing in one year or less multiplied by 2/12 and (y) an amount equal to one minus the “lowest rollover ratio” and (ii) 2% of its total foreign currency-denominated assets as shown in the balance sheet for the immediately preceding quarter. The “lowest rollover ratio” of a foreign exchange agency means the ratio of (A) its total debt with a maturity of one year or less (excluding overnight money) incurred in a particular month to (B) its total debt with maturity of one year or less (excluding overnight money) payable in that particular month, and is calculated by taking the lowest three month average from a period to be designated by the governor of the Financial Supervisory Service. Under the Regulation on the Supervision of Banking Business, foreign currency-denominated debt maturing in one year or less includes financial bonds, borrowings, call monies and repurchase selling denominated in foreign currencies and such other similar debt instruments denominated in a foreign currency as designated by the governor of the Financial Supervisory Service. "Foreign currency safe assets" are defined as cash denominated in foreign currency, deposits denominated in foreign currency with a central bank or financial institutions rated A or above, bonds issued or guaranteed by a government or central bank rated A or above or corporate bonds issued or guaranteed by corporations rated A or above. Under the Regulation on the Supervision of Banking Business, Kookmin Bank is also required to maintain a minimum "mid- to long-term foreign exchange funding ratio" of 100%. "Mid-to long term foreign exchange funding ratio" refers to the ratio of (1) the total outstanding amount of foreign exchange borrowing with a maturity of more than one year to (2) the total outstanding amount of foreign exchange lending with a maturity of one year or more.

Financial Exposure to Any Individual Customer and Major Shareholder

Under the Bank Act, subject to certain exceptions, the sum of large exposures by a bank—in other words, the total sum of its credits to single individuals, juridical persons or business groups that exceed 10% of the sum of Tier I and Tier II capital (less any capital deductions)—generally must not exceed five times the sum of Tier I and Tier II capital (less any capital deductions). In addition, subject to certain exceptions, banks generally may not extend credit (including loans, guarantees, purchases of securities (only in the nature of a credit) and any other transactions that directly or indirectly create credit risk) in excess of 20% of the sum of Tier I and Tier II capital (less any capital deductions) to a single individual or juridical person, or grant credit in excess of 25% of the sum of Tier I and Tier II capital (less any capital deductions) to a single group of companies as defined in the Monopoly Regulations and Fair Trade Act.

Amendments to the Bank Act which became effective on July 28, 2002 strengthened restrictions on extending credits to a major shareholder. A "major shareholder" is defined as:

- a shareholder holding (together with persons who have a special relationship with that shareholder) in excess of 10%; (or 15% in the case of regional banks) in the aggregate of the bank's total issued and outstanding voting shares; or
- a shareholder holding (together with persons who have a special relationship with such shareholder) in excess of 4% in the aggregate of the bank's (excluding regional banks) total issued and outstanding voting shares of a bank (excluding shares subject to the shareholding restrictions on "non-financial business group companies" as described below), where such shareholder is the largest shareholder or has actual control over the major business affairs of the bank through, for example, appointment and dismissal of the officers pursuant to the Enforcement Decree of the Bank Act. Non-financial business group companies primarily consist of: (i) any single shareholding group whose non-financial company assets comprise no less than 25% of its aggregate net assets; (ii) any single shareholding group whose non-financial company assets comprise no less than ₩2 trillion in aggregate; or (iii) any mutual fund of which any single shareholding group identified in (i) or (ii) above, owns more than 9% of the total issued and outstanding shares.

Under these amendments, banks may not extend credits to a major shareholder (together with persons who have a special relationship with that shareholder) in an amount greater than the lesser of (x) 25% of the sum of the bank's Tier I and Tier II capital (less any capital deductions) and (y) the relevant major shareholders' shareholding ratio multiplied by the sum of the bank's Tier I and Tier II capital (less any capital deductions). In addition, the total sum of credits granted to all major shareholders must not exceed 25% of the bank's Tier I and Tier II capital (less any capital deductions).

Interest Rates

Korean banks generally depend on deposits as their primary funding source. Under the Act on Registration of Credit Business and Protection of Finance Users, interest rates on loans made by registered banks in Korea may not exceed 34.9% per annum. Historically, interest rates on deposits and lending rates were regulated by the Monetary Policy Committee. Controls on deposit interest rates in Korea have been gradually reduced and, in February 2004, the Korean government removed restrictions on all interest rates, except for the prohibition on interest payments on current account deposits. This deregulation process has increased competition for deposits based on interest rates offered and, therefore, may increase a bank's interest expense.

Lending to Small- and Medium-sized Enterprises

In order to obtain funding from the Bank of Korea at concessionary rates for their small- and medium-sized enterprise loans, banks are required to allocate a certain minimum percentage of any quarterly increase in their Won currency lending to small- and medium-sized enterprises. Currently, this minimum percentage is 45% in the case of nationwide banks and 60% in the case of regional banks. If a bank does not comply with this requirement, the Bank of Korea may:

- require the bank to prepay all or a portion of funds provided to that bank in support of loans to small- and medium-sized enterprises; or
- lower the bank's credit limit.

Disclosure of Management Performance

For the purpose of protecting depositors and investors in commercial banks, the Financial Services Commission requires commercial banks to publicly disclose certain material matters, including:

- financial condition and profit and loss of the bank and its subsidiaries;
- fund raising by the bank and the appropriation of such funds;
- any sanctions levied on the bank under the Bank Act or any corrective measures or sanctions under the Law on Improvement of Structure of Financial Industry; and
- except as may otherwise have been disclosed by a bank or its financial holding company listed on the KRX KOSPI Market in accordance with the Financial Investment Services and Capital Markets Act, occurrence of any of the following events or any other event as prescribed by the applicable regulations:
  - (i) loans bearing no profit made to a single business group in an amount exceeding 10% of the sum of the bank's Tier I and Tier II capital (less any capital deductions) as of the end of the previous month (where the loan exposure to that borrower is calculated pursuant to the criteria under the Detailed Regulation on the Supervision of the Banking Business), unless the loan exposure to that group is not more than ₩4 billion;
  - (ii) the occurrence of any financial incident involving embezzlement, malfeasance or misappropriation of funds with respect to which damages are expected to exceed ₩1 billion, or any financial incident regarding which the governor of the Financial Supervisory Service has made a public announcement; and
  - (iii) any loss due to court judgments or similar decisions in civil proceedings in an amount exceeding 1% of the sum of the bank's Tier I and Tier II capital (less any capital deductions) as of the end of the previous month, unless the loss is not more than ₩1 billion.

Restrictions on Lending

Pursuant to the Bank Act, commercial banks may not provide:

- loans directly or indirectly secured by a pledge of a bank's own shares;
- loans directly or indirectly to enable a natural or juridical person to buy the bank's own shares;

- loans to any of the bank's officers or employees, other than *de minimis* loans of up to (i) ₩20 million in the case of a general loan, (ii) ₩50 million in the case of a general loan plus a housing loan or (iii) ₩60 million in the aggregate for general loans, housing loans and loans to pay damages arising from wrongful acts of employees in financial transactions;
- credit (including loans) secured by a pledge of shares of a subsidiary corporation of the bank or to enable a natural or juridical person to buy shares of a subsidiary corporation of the bank; or
- loans to any officers or employees of a subsidiary corporation of the bank, other than general loans of up to ₩20 million or general and housing loans of up to ₩50 million in the aggregate.

Regulations Relating to Retail Household Loans

The Financial Services Commission has implemented a number of changes in recent years to the regulations relating to retail household lending by banks. Under the currently applicable regulations:

- as to loans secured by a collateral of housing (including apartments) located nationwide, the loan-to-value ratio (the aggregate principal amount of loans secured by such collateral over the appraised value of the collateral) should not exceed 60%;
- as to loans secured by collateral of housing (including apartments) located in areas of excessive investment or housing (excluding apartments) located in areas of high speculation, in each case, as designated by the government, (i) the loan-to-value ratio for loans with a maturity of not more than three years should not exceed 50% and (ii) the loan-to-value ratio for loans with a maturity of more than three years should not exceed 60%;
- as to loans secured by collateral of housing located outside of Seoul, Incheon and Gyeong-gi province, which housing was offered for sale on or before June 10, 2008 and with respect to which a sale contract is executed and earnest money deposit paid during the period between June 11, 2008 and June 30, 2009, the loan-to-value ratio should not exceed 70%;
- as to loans secured by apartments located in areas of high speculation as designated by the government, (i) the loan-to-value ratio for loans with a maturity of not more than ten years should not exceed 40%; and (ii) the loan-to-value ratio for loans with a maturity of more than ten years should not exceed (a) 40%, if the price of such apartment is over ₩600 million, and (b) 60%, if the price of such apartment is ₩600 million or lower;
- as to loans secured by collateral of housing (regardless of housing type or location) to be amortized over a period of ten years, further requirements relating to which are set forth in the Regulation on the Supervision of Banking Business, the loan-to-value ratio should not exceed 70%;
- as to loans secured by apartments with appraisal value of more than ₩600 million in areas of high speculation as designated by the government or certain metropolitan areas designated as areas of excessive investment by the government, the borrower's debt-to-income ratio (calculated as (i) the aggregate annual total payment amount of (x) the principal of and interest on loans secured by such apartment(s) and (y) the interest on other debts of the borrower over (ii) the borrower's annual income) should not exceed 40%;
- as to apartments located in areas of high speculation as designated by the government, a borrower is permitted to have only one new loan secured by such apartment;
- where a borrower has two or more loans secured by apartments located in areas of high speculation as designated by the government, the loan with the earliest maturity date must be repaid first and the number of loans must be eventually reduced to one; and
- in the case of a borrower (i) whose spouse already has a loan secured by housing or (ii) who is single and under 30 years old, the debt-to-income ratio of the borrower in respect of loans secured by apartment(s) located in areas of high speculation as designated by the government should not exceed 40%.

Restrictions on Investments in Property

A bank may not invest in securities set forth below in excess of 100% of the sum of the bank's Tier I and Tier II capital (less any capital deductions):

- debt securities (within the meaning of paragraph (3) of Article 4 of the Financial Investment Services and Capital Markets Act) the maturity of which exceeds three years, but excluding government bonds, monetary stabilization bonds issued by the Bank of Korea and bonds within the meaning of item 2, paragraph (6) of Article 11 of the Act on the Improvement of the Structure of the Financial Industry;
- equity securities, but excluding securities within the meaning of item 1, paragraph (6) of Article 11 of the Act on the Improvement of the Structure of the Financial Industry;
- derivatives linked securities (within the meaning of paragraph (7) of Article 4 of the Financial Investment Services and Capital Markets Act) the maturity of which exceeds three years; and
- beneficiary certificates, investment contracts and depositary receipts (within the meaning of paragraph (2) of Article 4 of the Financial Investment Services and Capital Markets Act) the maturity of which exceeds three years.

A bank may possess real estate property only to the extent necessary for the conduct of its business. The aggregate value of such property may not exceed 60% of the sum of the bank's Tier I and Tier II capital (less any capital deductions). Any property that a bank acquires by exercising its rights as a secured party, or which a bank is prohibited from acquiring under the Bank Act, must be disposed of within one year.

Restrictions on Shareholdings in Other Companies

Under the Bank Act, a bank may not own more than 15% of shares outstanding with voting rights of another corporation, except where, among other reasons:

- that corporation engages in a category of financial businesses set forth by the Financial Services Commission; or
- the acquisition of shares by the bank is necessary for the corporate restructuring of such corporation and is approved by the Financial Services Commission.
- In the above cases, the total investment in corporations in which the bank owns more than 15% of the outstanding shares with voting rights may not exceed (i) 15% of the sum of Tier I and Tier II capital (less any capital deductions) or (ii) 30% of the sum of Tier I and Tier II capital (less any capital deductions) where the acquisition satisfies the requirements determined by the Financial Services Commission.

The Bank Act provides that a bank using its bank accounts and its trust accounts is not permitted to acquire the shares issued by the major shareholder of such bank in excess of an amount equal to 1% of the sum of Tier I and Tier II capital (less any capital deductions).

Restrictions on Bank Ownership

Under the Bank Act, a single shareholder and persons who have a special relationship with that shareholder generally may acquire beneficial ownership of no more than 10% of a nationwide bank's total issued and outstanding shares with voting rights and no more than 15% of a regional bank's total issued and outstanding shares with voting rights. The Korean government, the Korea Deposit Insurance Corporation and bank holding companies qualifying under the Financial Holding Company Act are not subject to this limit. However, pursuant to an amendment to the Bank Act which became effective on February 14, 2014, non-financial business group companies may not acquire beneficial ownership of shares of a nationwide bank in excess of 4% (or 15% in the case of a regional bank) of that bank's outstanding voting shares, unless they satisfy certain requirements set forth by the Enforcement Decree of the Banking Act, obtain the approval of the Financial Services Commission and agree not to exercise voting rights in respect of shares in excess of the 4% limit (or the 15% limit in the case of a regional bank), in which case they may acquire beneficial ownership of up to 10% of a nationwide bank's outstanding voting shares. Such amendment grants an exception for non-financial business group companies which, at the time of the enactment of the amended provisions, held more than 4% of the shares of a bank.

In addition, if a foreign investor, as defined in the Foreign Investment Promotion Act, owns in excess of 4% of a nationwide bank's outstanding voting shares, non-financial business group companies may acquire beneficial ownership of up to 10% (or 15% in the case of a regional bank) of that bank's outstanding voting shares, and in excess of 10% (or 15% in the case of a regional bank), 25% or 33% of that bank's outstanding voting shares with the approval of the Financial Services Commission in each instance, up to the number of shares owned by the foreign investor. Any other person (whether a Korean national or a foreign investor), with the exception of non-financial business group companies described above, may acquire no more than 10% of a nationwide bank's total voting shares issued and outstanding, unless they obtain approval from the Financial Services Commission in each instance where the total holding will exceed 10% (or 15% in the case of regional banks), 25% or 33% of the bank's total voting shares issued and outstanding provided that, in addition to the foregoing threshold shareholding ratios, the Financial Services Commission may, at its discretion, designate a separate and additional threshold shareholding ratio.

Deposit Insurance System

The Depositor Protection Act provides insurance for certain deposits of banks in Korea through a deposit insurance system. Under the Depositor Protection Act, all banks governed by the Bank Act are required to pay an insurance premium to the Korea Deposit Insurance Corporation on a quarterly basis and the rate is determined under the Enforcement Decree to the Depositor Protection Act. If the Korea Deposit Insurance Corporation makes a payment on an insured amount, it will acquire the depositors' claims with respect to that payment amount. The Korea Deposit Insurance Corporation insures a maximum of ₩50 million per individual for deposits and interest in a single financial institution, regardless of when the deposits were made and the size of the deposits.

Laws and Regulations Governing Other Business Activities

A bank must register with the Ministry of Strategy and Finance to enter the foreign exchange business, which is governed by the Foreign Exchange Transaction Act of Korea. A bank must obtain the permission of the Financial Services Commission to enter the securities business, which is governed by regulations under the Financial Investment Services and Capital Markets Act. Under these laws, a bank may engage in the foreign exchange business, securities repurchase business, governmental/public bond underwriting business and governmental bond dealing business.

Trust Business

A bank must obtain approval from the Financial Services Commission to engage in trust businesses. The Trust Act and the Financial Investment Services and Capital Markets Act govern the trust activities of banks, and they are subject to various legal and accounting procedures and requirements, including the following:

- under the Trust Act, assets accepted in trust by a bank in Korea must be segregated from other assets in the accounts of that bank; and
- depositors and other general creditors cannot obtain or assert claims against the assets comprising the trust accounts in the event the bank is liquidated or wound-up.

The bank must make a special reserve of 25% or more of fees from each unspecified money trust account for which a bank guarantees the principal amount and a fixed rate of interest until the total reserve for that account equals 5% of the trust amount. Since January 1999, the Korean government has prohibited Korean banks from offering new guaranteed fixed rate trust account products whose principal and interest are guaranteed.

Under the Financial Investment Services and Capital Markets Act, which became effective in February 2009, a bank with a trust business license (such as Kookmin Bank) is permitted to offer both specified money trust account products and unspecified money trust account products. Previously, banks were not permitted to offer unspecified money trust account products pursuant to the Indirect Investment Asset Management Act, which is no longer in effect following the effectiveness of the Financial Investment Services and Capital Markets Act.

Credit Card Business

General

In order to enter the credit card business, a company must register with the Financial Services Commission. Credit card businesses are governed by the Specialized Credit Financial Business Act, enacted on August 28, 1997 and last amended on January 20, 2015, which sets forth specific requirements with respect to the credit card business as well as generally prohibiting unsound business practices relating to the credit card business which may infringe on the rights of credit card holders or negatively affect the soundness of the credit card industry. Credit card companies, including our wholly-owned subsidiary, KB Kookmin Card Co., Ltd., are regulated by the Financial Services Commission and the Financial Supervisory Service.

Disclosure and Reports

Under the Specialized Credit Financial Business Act and the regulations thereunder, a credit card company is required to disclose on a periodic and on-going basis certain material matters and events. In addition, a credit card company must submit its business reports with respect to its results of operations to the Governor of the Financial Supervisory Service within one month from the end of each quarter.

Restrictions on Funding

Under the Specialized Credit Financial Business Act and the regulations thereunder, a credit card company must ensure that its total assets do not exceed an amount equal to six times its equity capital. However, if a credit card company is unable to comply with such limit upon the occurrence of unavoidable events, such as drastic changes in the domestic and global financial markets, such limit may be adjusted through a resolution of the Financial Services Commission.

Risk of Loss Due to Lost, Stolen, Forged or Altered Credit Cards

Under the Specialized Credit Financial Business Act, a credit card company is liable for any loss arising from the unauthorized use of credit cards or debit cards after it has received notice from the holder of the loss or theft of the card. A credit card company is also responsible for any losses resulting from the use of forged or altered credit cards, debit cards and pre-paid cards. A credit card company may, however, transfer all or part of this latter risk of loss to holders of credit card in the event of willful misconduct or gross negligence by holders of credit card if the terms and conditions of the agreement entered between the credit card company and members of such cards specifically provide for that transfer.

For these purposes, disclosure of a customer’s password that is made intentionally or through gross negligence, or the transfer of or giving as collateral of the credit card or debit card, is considered willful misconduct or gross negligence. However, a disclosure of a cardholder’s password that is made under irresistible force or threat to cardholder or his/her relatives' life or health will not be deemed as willful misconduct or negligence of the cardholder.

Each credit card company must institute appropriate measures to fulfill these obligations, such as establishing provisions, purchasing insurance or joining a cooperative association.

Pursuant to the Enforcement Decree to Specialized Credit Financial Business Act, a credit card company will be liable for any losses arising from loss or theft of a credit card (which was not from the holder's willful misconduct or negligence) during the period beginning 60 days before the notice by the holder to the credit card company.

Pursuant to the Specialized Credit Financial Business Act, the Financial Services Commission may either restrict the limit or take other necessary measures against the credit card company with respect to such matters as the maximum limits on the amount per credit card, details of credit card terms and conditions, management of credit card merchants and collection of claims, including the following:

- maximum limits for cash advances on credit cards;
- use restrictions on debit cards with respect to per day or per transaction usage;
- aggregate issuance limits and maximum limits on the amount per card on pre-paid cards; and
- other matters prescribed by the Enforcement Decree to the Specialized Credit Financial Business Act.

Lending Ratio in Ancillary Business

Pursuant to the Enforcement Decree to the Specialized Credit Financial Business Act, a credit card company must maintain an aggregate quarterly average outstanding lending balance to credit cardholders (including cash advances and credit card loans, but excluding restructured loans) no greater than the sum of (i) its aggregate quarterly average outstanding credit card balance arising from the purchase of goods and services and (ii) the aggregate quarterly debit card transaction volume.

Issuance of New Cards and Solicitation of New Cardholders

The Enforcement Decree to the Specialized Credit Financial Business Act establishes the conditions under which a credit card company may issue new cards and solicit new members. New credit cards may be issued only to the following persons:

- persons who are at least 19 years old when they apply for a credit card;
- persons whose capability to pay bills as they come due has been verified using standards established by the credit card company; and
- in the case of minors who are 18 years old, persons who submit documents evidencing employment as of the date of the credit card application, such as an employment certificate, or persons for whom the issuance of a credit card is necessitated by governmental policies, such as financial aid.

In addition, a credit card company may not solicit credit card members by:

- providing economic benefits or promising to provide economic benefits in excess of 10% of the annual credit card fee (in the case of credit cards with annual fees that are less than the average of the annual fees charged by the major credit cards in Korea, the annual fee will be deemed to be equal to such average annual fee) in connection with issuing a credit card;
- soliciting applicants on roads, public places or along corridors used by the general public;
- soliciting applicants through visits, except those visits made upon prior consent and visits to a business area;

- soliciting applicants through the Internet without verifying whether the applicant is who he or she purports to be, by means of a certified digital signature under the Digital Signature Act; and
- soliciting applicants through pyramid sales methods.

Compliance Rules on Collection of Receivable Claims

Pursuant to Supervisory Regulation on the Specialized Credit Financial Business, a credit card company may not:

- exert violence or threaten violence;
- inform a related party (a guarantor of the debtor, blood relative or fiancée of the debtor, a person living in the same household as the debtor or a person working in the same workplace as the debtor) of the debtor's obligations without just cause;
- provide false information relating to the debtor's obligation to the debtor or his or her related parties;
- threaten to sue or sue the debtor for fraud despite lack of affirmative evidence to establish that the debtor has submitted forged or false documentation with respect to his/her capacity to make payment;
- visit or telephone the debtor during late evening hours (between the hours of 9:00 p.m. and 8:00 a.m.); and
- utilize other uncustomary methods to collect the receivables that interfere with the privacy or the peace in the workplace of the debtor or his or her related parties.

Regulations on Class Actions Regarding Securities

The Law on Class Actions Regarding Securities was enacted as of January 20, 2004 and last amended on May 28, 2013. The Law on Class Actions Regarding Securities governs class actions suits instituted by one or more representative plaintiff(s) on behalf of 50 or more persons who claim to have been damaged in a capital markets transaction involving securities issued by a listed company in Korea.

Applicable causes of action with respect to such suits include:

- claims for damages caused by misleading information contained in a securities statement;
- claims for damages caused by the filing of a misleading business report, semi-annual report, or quarterly report;
- claims for damages caused by insider trading or market manipulation; and
- claims instituted against auditors for damages caused by accounting irregularities.

Any such class action may be instituted upon approval from the presiding court and the outcome of such class action will have a binding effect on all potential plaintiffs who have not joined the action, with the exception of those who have filed an opt out notice with such court.

Financial Investment Services and Capital Markets Act

On July 3, 2007, the National Assembly of Korea passed the Financial Investment Services and Capital Markets Act, a new law consolidating six laws regulating capital markets. The Financial Investment Services and Capital Markets Act became effective in February 2009.

The following is a summary of the major changes introduced under the Financial Investment Services and Capital Markets Act.

Consolidation of Capital Markets-Related Laws

Prior to the effectiveness of the Financial Investment Services and Capital Markets Act, there were separate laws regulating various types of financial institutions depending on the type of financial institution (for example, securities companies, futures companies, trust business companies and asset management companies) and subjecting financial institutions to different licensing and ongoing regulatory requirements (for example, the Korean Securities Exchange Act, the Futures Business Act and the Indirect Investment Asset Management Business Act). By applying one uniform set of rules to the same financial business having the same economic function, the Financial Investment Services and Capital Markets Act attempts to improve and address issues caused by the current regulatory system under which the same economic function relating to capital markets-related businesses are governed by multiple regulations. To this end, the Financial Investment Services and Capital Markets Act categorizes capital markets-related businesses into six different functions, as follows:

- dealing (trading and underwriting of "financial investment products" (as defined below)),
- brokerage (brokerage of financial investment products),
- collective investment (establishment of collective investment schemes and the management thereof),
- investment advice,
- discretionary investment management, and
- trusts (together with the five businesses set forth above, the "Financial Investment Businesses").

Therefore, all financial businesses relating to financial investment products have been reclassified as one or more of the Financial Investment Businesses described above, and financial institutions are subject to the regulations applicable to their relevant Financial Investment Business(es), irrespective of the type of the financial institution (for example, in principle, derivative businesses conducted by former securities companies and futures companies are subject to the same regulations under the Financial Investment Services and Capital Markets Act).

The banking business and insurance business are not subject to the Financial Investment Services and Capital Markets Act and continue to be regulated under separate laws. However, they may become subject to the Financial Investment Services and Capital Markets Act if their activities involve any financial investment businesses requiring a license pursuant to the Financial Investment Services and Capital Markets Act.

Comprehensive Definition of Financial Investment Products

In an effort to encompass the various types of securities and derivative products available in the capital markets, the Financial Investment Services and Capital Markets Act sets forth a comprehensive term "financial investment products," defined to mean all financial products with a risk of loss in the invested amount (in contrast to "deposits," which are financial products for which the invested amount is protected or preserved). Financial investment products are classified into two major categories: (i) "securities" (relating to financial investment products where the risk of loss is limited to the invested amount) and (ii) "derivatives" (relating to financial investment products where the risk of loss may exceed the invested amount). As a result of the general and open-ended manner in which financial investment products are defined, any future financial product could potentially come within the scope of the definition of financial investment products, thereby enabling Financial Investment Companies (as defined below) to handle a broader range of financial products. Under the Financial Investment Services and Capital Markets Act, securities companies, asset management companies, futures companies and other entities engaging in any Financial Investment Business are classified as "Financial Investment Companies."

New License System and the Conversion of Existing Licenses

Under the Financial Investment Services and Capital Markets Act, Financial Investment Companies are able to choose what Financial Investment Business to engage in (via a "check the box" method set forth in the relevant license application), by specifying the desired (i) Financial Investment Business, (ii) financial investment product and (iii) target customers to which financial investment products may be sold or dealt to (i.e., general investors or professional investors). Licenses will be issued under the specific business sub-categories described in the foregoing sentence. For example, it would be possible for a Financial Investment Company to obtain a license to engage in the Financial Investment Business of (i) dealing (ii) over the counter derivatives products (iii) only with sophisticated investors.

Financial institutions that engage in business activities constituting a Financial Investment Business are required to take certain steps, such as renewal of their license or registration, in order to continue engaging in such business activities. Financial institutions that are not licensed Financial Investment Companies are not permitted to engage in any Financial Investment Business, subject to the following exceptions: (i) banks and insurance companies are permitted to engage in certain categories of Financial Investment Business; and (ii) other financial institutions that engaged in any Financial Investment Business prior to the effective date of the Financial Investment Services and Capital Markets Act (whether in the form of a concurrent business or an incidental business) are permitted to continue such Financial Investment Business for a period not exceeding six months commencing on the effective date of the Financial Investment Services and Capital Markets Act.

Expanded Business Scope of Financial Investment Companies

Under the previous regulatory system in Korea, it was difficult for a financial institution to explore a new line of business or expand upon its existing line of business. For example, a financial institution licensed as a securities company generally was not permitted to engage in the asset management business. In contrast, under the Financial Investment Services and Capital Markets Act, pursuant to the integration of its current businesses involving financial investment products into a single Financial Investment Business, a licensed Financial Investment Company is permitted to engage in all types of Financial Investment Businesses, subject to satisfying relevant regulations (for example, maintaining an adequate “Chinese Wall,” to the extent required). As to incidental businesses (i.e., a financial related business which is not a Financial Investment Business), the Financial Investment Services and Capital Markets Act generally allows a Financial Investment Company to freely engage in such incidental businesses by shifting away from the previous positive-list system towards a more comprehensive system. In addition, a Financial Investment Company is permitted to outsource marketing activities by contracting “introducing brokers” that are individuals but not employees of the Financial Investment Company. Financial Investment Companies are permitted (i) to engage in foreign exchange businesses related to their Financial Investment Business and (ii) to participate in the settlement network, pursuant to an agreement among the settlement network participants.

Improvement in Investor Protection Mechanism

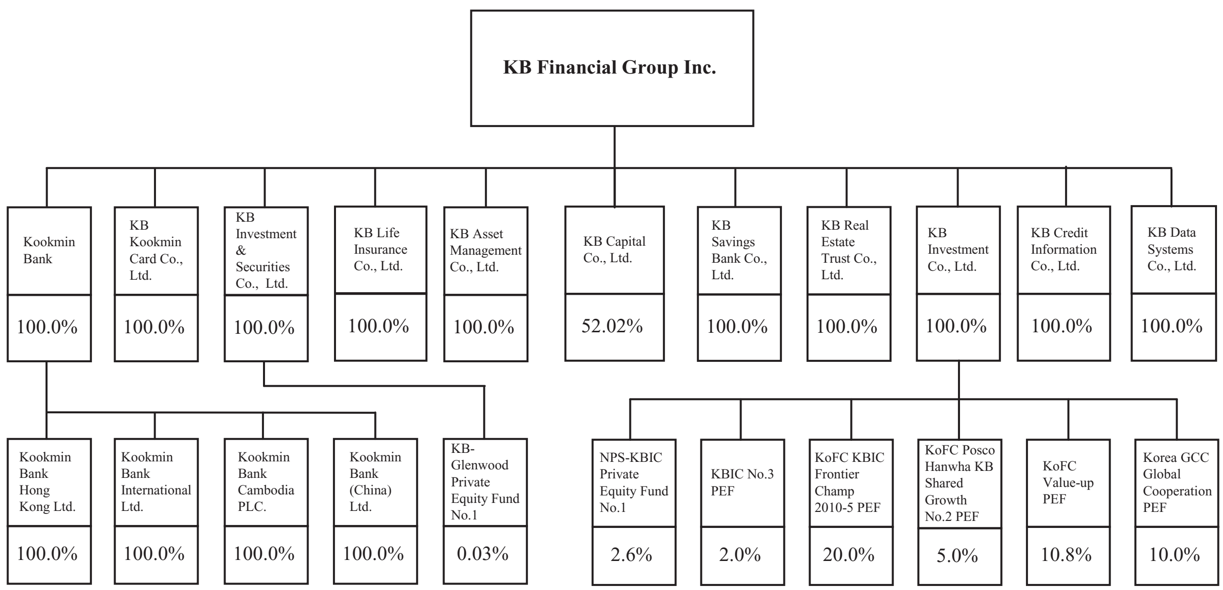
While the Financial Investment Services and Capital Markets Act widens the scope of financial businesses in which financial institutions are permitted to engage, a more rigorous investor-protection mechanism is also imposed upon Financial Investment Companies dealing in financial investment products. The Financial Investment Services and Capital Markets Act distinguishes general investors from sophisticated investors and provides new or enhanced protections to general investors. For instance, the Financial Investment Services and Capital Markets Act expressly provides for a strict know-your-customer rule for general investors and imposes an obligation that Financial Investment Companies should market financial investment products suitable to each general investor, using written explanatory materials. Under the Financial Investment Services and Capital Markets Act, a Financial Investment Company could be liable if a general investor proves (i) damage or losses relating to such general investor’s investment in financial investment products solicited by such Financial Investment Company and (ii) the absence of the requisite written explanatory materials, without having to prove fault or causation. With respect to conflicts of interest between Financial Investment Companies and investors, the Financial Investment Services and Capital Markets Act expressly requires (i) disclosure of any conflict of interest to investors and (ii) mitigation of conflicts of interest to a comfortable level or abstention from the relevant transaction.

Other Changes of Securities/Fund Regulations

The Financial Investment Services and Capital Markets Act also affected various securities regulations including those relating to public disclosure, insider trading and proxy contests, which were previously governed by the Korean Securities Exchange Act. For example, the 5% and 10% reporting obligations under the Korean Securities Exchange Act has become more stringent. The Indirect Investment and Asset Management Business Act strictly limited the kind of vehicles that could be utilized under a collective investment scheme, restricting the range of potential vehicles to trusts and corporations, and the type of funds that can be used for investments. However, under the Financial Investment Services and Capital Markets Act, these restrictions have been significantly liberalized, permitting all vehicles that may be created under Korean law, such as limited liability companies or partnerships, to be used for the purpose of collective investments and allowing investment funds to be much more flexible as to their investments.

Item 4.C. *Organizational Structure*

The following chart provides an overview of our structure, including our significant subsidiaries and our ownership of such subsidiaries as of the date of this annual report:



Our largest subsidiary is Kookmin Bank, the assets of which represented approximately 89.3% of our total assets as of December 31, 2014. The following table provides summary information for our operating subsidiaries that are consolidated in our consolidated financial statements as of and for the year ended December 31, 2014, including their consolidated total assets, operating revenue, profit (loss) and total equity:

Subsidiaries	Total Assets	Operating Revenue	Profit (Loss)	Total Equity
		(in millions of Won)		
Kookmin Bank	₩275,453,664	₩16,283,978	₩1,029,041	₩21,940,473
KB Kookmin Card Co., Ltd.	15,886,769	2,864,957	332,701	3,480,455
KB Investment & Securities Co., Ltd.	4,131,568	578,345	25,624	576,740
KB Life Insurance Co., Ltd.	7,680,184	1,453,057	6,537	583,725
KB Asset Management Co., Ltd.	254,481	105,234	49,560	201,940
KB Real Estate Trust Co., Ltd.	204,888	50,283	14,818	183,958
KB Investment Co., Ltd.	225,353	33,371	1,382	134,784
KB Credit Information Co., Ltd.	28,805	38,796	(1,605)	20,850
KB Data Systems Co., Ltd.	31,397	59,129	367	14,523
KB Savings Bank Co., Ltd.	772,676	56,712	(15,079)	152,794
KB Capital Co., Ltd. (1)	4,023,965	250,042	29,990	411,815

(1) KB Capital Co., Ltd. (formerly known as Woori Financial Co., Ltd.) was added as a subsidiary in March 2014 as a result of our purchase of 52.02% of its shares.

Further information regarding our subsidiaries is provided below:

- *Kookmin Bank* was established in Korea in 2001 as a result of the merger of the former Kookmin Bank (established in 1963) and H&CB (established in 1967). Kookmin Bank provides a wide range of banking and other financial services to individuals, small- and medium-sized enterprises and large corporations in Korea. As of December 31, 2014, Kookmin Bank was one of the largest commercial banks in Korea based upon total assets (including loans) and deposits. As of December 31, 2014, Kookmin Bank had approximately 28.7 million customers, with 1,161 branches nationwide.

- *KB Kookmin Card Co., Ltd.* was established in March 2011 as a separate entity upon the completion of a horizontal spin-off of Kookmin Bank's credit card business, to provide credit card services.

- *KB Investment & Securities Co., Ltd.* was established in Korea in 1995 to provide various investment banking services. KB Investment & Securities was formerly known as Hannuri Investment & Securities Co., Ltd. and was acquired by Kookmin Bank on March 11, 2008. In March 2011, KB Investment & Securities was merged with KB Futures Co., Ltd., with KB Investment & Securities as the surviving entity.

- *KB Life Insurance Co., Ltd.* was established in Korea in April 2004 to provide life insurance and wealth management products primarily through our branch network.

- *KB Asset Management Co., Ltd.* was established in Korea in April 1988 as a subsidiary of Citizens Investment Trust Company to provide investment advisory services.

- *KB Capital Co., Ltd.*, which provides leasing services and installment finance services, was formerly known as Woori Financial Co., Ltd. and was acquired by us on March 20, 2014.

- *KB Savings Bank Co., Ltd.* was established in Korea in January 2012 to provide small-loan finance services. KB Savings Bank was established in connection with our purchase of assets and assumption of liabilities of Jeil Savings Bank in January 2012. We acquired Yehansoul Savings Bank, which provided small-loan finance services, in September 2013 and merged it with KB Savings Bank in January 2014, with KB Savings Bank as the surviving entity.

- *KB Real Estate Trust Co., Ltd.* was established in Korea in December 1996 to provide real estate development and brokerage services by managing trusts related to the real estate industry.
- *KB Investment Co., Ltd.* was established in Korea in March 1990 to invest in and finance small- and medium-sized enterprises.
- *KB Credit Information Co., Ltd.* was established in Korea in October 1999 to collect delinquent loans and to check credit history.
- *KB Data Systems Co., Ltd.* was established in Korea in September 1991 to provide software services to us and other financial institutions.

Item 4.D. *Property, Plants and Equipment*

Our registered office and corporate headquarters are located at 84, Namdaemoon-ro, Jung-gu, Seoul 100-703, Korea. The following table presents information regarding certain of our properties in Korea:

Type of facility/building	Location	Area (square meters)
Registered office and corporate headquarters	84, Namdaemoon-ro, Jung-gu, Seoul 100-703	1,749
Kookmin Bank headquarters building	26, Gukjegeumyung-ro 8-gil, Yeongdeungpo-gu, Seoul 150-758	5,354
KB Kookmin Card headquarters building	Jongro-gu, Seoul	3,797
Kookmin Bank training institute	Ilsan	207,659
Kookmin Bank training institute	Daecheon	4,158
Kookmin Bank training institute	Sokcho	15,584
Kookmin Bank training institute	Cheonan	196,649
Kookmin Bank IT center	Gangseo-gu, Seoul	13,116
Kookmin Bank IT center	Yeouido, Seoul	5,928
Kookmin Bank IT center	Yeouido, Seoul	2,006
Kookmin Bank support center	Seongbuk-gu, Seoul	4,748

As of December 31, 2014, we had a countrywide network of 1,161 banking branches and sub-branches, as well as 121 branches and sub-branches and 6 representative offices for our other operations including credit card, investment banking and insurance-related businesses. Approximately one-quarter of these facilities are housed in buildings owned by us, while the remaining branches are leased properties. Lease terms are generally from two to three years and seldom exceed five years. We also have subsidiaries in Cambodia, China, Hong Kong and the United Kingdom and branches of Kookmin Bank in Osaka and Tokyo in Japan, Auckland in New Zealand, New York in the United States and Ho Chi Minh City in Vietnam, as well as a branch of Kookmin Bank Cambodia PLC in Phnom Penh and branches of Kookmin Bank (China) Ltd. in Beijing, Guangzhou, Harbin and Suzhou in China. We also have representative offices of Kookmin Bank in Mumbai in India, Yangon in Myanmar and Hanoi in Vietnam. We do not own any material properties outside of Korea.

The net carrying amount of all the properties owned by us at December 31, 2014 was ₩2,826 billion.

Item 4A. UNRESOLVED STAFF COMMENTS

We do not have any unresolved comments from the U.S. Securities and Exchange Commission staff regarding our periodic reports under the Securities Exchange Act of 1934, as amended, or the Exchange Act.

Item 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

Item 5.A. *Operating Results*

Overview

The following discussion is based on our consolidated financial statements, which have been prepared in accordance with IFRS as issued by the IASB. The consolidated financial statements include the accounts of subsidiaries over which substantive control is exercised through majority ownership of voting stock and/or other means. Investments in jointly controlled entities and associates (companies over which we have the ability to exercise significant influence) are accounted for by the equity method of accounting.

Trends in the Korean Economy

Our financial position and results of operations have been and will continue to be significantly affected by financial and economic conditions in Korea. Substantial growth in lending in Korea to small- and medium-sized enterprises in recent years, and financial difficulties experienced by such enterprises as a result of, among other things, adverse economic conditions in Korea and globally, have generally led to increasing delinquencies and a deterioration in overall asset quality in the credit exposures of Korean banks to small- and medium-sized enterprises. In 2014, we recorded charge-offs of ₩746 billion in respect of our loans to small- and medium-sized enterprises, compared to charge-offs of ₩691 billion in 2013 and charge-offs of ₩943 billion in 2012. In light of the difficult financial condition and liquidity position of small- and medium-sized enterprises in Korea since the second half of 2008, the Korean government introduced measures intended to encourage Korean banks to provide financial support to small- and medium-sized enterprise borrowers. See "Item 3.D. Risk Factors—Risks relating to our small- and medium-sized enterprise loan portfolio—We have significant exposure to small- and medium-sized enterprises, and any financial difficulties experienced by these customers may result in a deterioration of our asset quality and have an adverse impact on us."

In recent years, commercial banks, consumer finance companies and other financial institutions in Korea have also made significant investments and engaged in aggressive marketing in retail lending (including mortgage and home equity loans), leading to substantially increased competition in this segment. Furthermore, in 2014, the Korean government announced several measures to encourage consumer spending and revive the housing market in Korea, including loosening regulations on mortgage lending, which contributed to an increase in our portfolio of retail loans from ₩107,644 billion as of December 31, 2013 to ₩119,249 billion as of December 31, 2014. The rapid growth in retail lending, together with adverse economic conditions in recent years, may lead to increasing delinquencies and a deterioration in asset quality. In 2014, we recorded charge-offs of ₩574 billion and provision for loan losses of ₩340 billion in respect of our retail loan portfolio, compared to charge-offs of ₩581 billion and provision for loan losses of ₩361 billion in 2013 and charge-offs of ₩453 billion and provision for loan losses of ₩402 billion in 2012. See "Item 3.D. Risk Factors—Risks relating to our retail credit portfolio."

The Korean economy is closely tied to, and is affected by developments in, the global economy. While the rate of deterioration of the global economy since the commencement of the global financial crisis in 2008 has slowed, with some signs of stabilization and improvement, the overall prospects for the Korean and global economy in 2015 and beyond remain uncertain. Starting in the second half of 2011, the global financial markets have experienced significant volatility as a result of, among other things:

- the financial difficulties affecting many governments worldwide, in particular in southern Europe and Latin America;
- the slowdown of economic growth in China and other major emerging market economies;
- interest rate fluctuations amid speculation that the U.S. Federal Reserve would raise interest rates, as well as reductions in policy rates by an increasing number of central banks, including the Bank of Korea; and

- political and social instability in various countries in the Middle East and Northern Africa, including Iraq, Syria and Yemen, as well as in the Ukraine and Russia.

In light of the high level of interdependence of the global economy, any of the foregoing developments could have a material adverse effect on the Korean economy and financial markets, and in turn on our business, financial condition and results of operations.

We are also exposed to adverse changes and volatility in global and Korean financial markets as a result of our liabilities and assets denominated in foreign currencies and our holdings of trading and investment securities, including structured products. The value of the Won relative to major foreign currencies in general and the U.S. dollar in particular has fluctuated widely in recent years. See "Item 3.A. Selected Financial Data—Exchange Rates." A depreciation of the Won will increase our cost in Won of servicing our foreign currency-denominated debt, while continued exchange rate volatility may also result in foreign exchange losses for us. Furthermore, as a result of adverse global and Korean economic conditions, there has been significant volatility in securities prices, including the stock prices of Korean and foreign companies in which we hold an interest. Such volatility has resulted in and may lead to further trading and valuation losses on our trading and investment securities portfolio as well as impairment losses on our investments accounted for under the equity method, including our noncontrolling equity stake in JSC Bank CenterCredit, a Kazakhstan bank, the initial stake in which we acquired in 2008. See "Item 4.B. Business Overview—Capital Markets Activities and International Banking—International Banking."

As a result of volatile conditions and weakness in the Korean and global economies, as well as factors such as the uncertainty surrounding the global financial markets, fluctuations in oil and commodity prices, interest and exchange rate fluctuations, higher unemployment, lower consumer confidence, increased inflation volatility, potential tightening of fiscal and monetary policies and continued tensions with North Korea, the economic outlook for the financial services sector in Korea in 2015 and for the foreseeable future remains uncertain.

Acquisitions

In January 2012, we established KB Savings Bank to provide small-loan finance services to retail customers. KB Savings Bank was established in connection with our purchase of the assets of Jeil Savings Bank and assumption of its liabilities pursuant to a purchase and assumption agreement among Jeil Savings Bank, the Korea Deposit Insurance Corporation and us. In May 2012, pursuant to the purchase and assumption agreement, we transferred to the Korea Deposit Insurance Corporation a portion of the assets we purchased and related liabilities we assumed. In connection with such purchase and assumption (and after giving effect to the transfer to the Korea Deposit Insurance Corporation), we recognized an acquisition of ₩2,546 billion of assets and an assumption of ₩2,654 billion of liabilities and also ₩108 billion of goodwill.

In June 2013, we purchased ING Insurance International II B.V.'s 49% interest in KB Life Insurance Co., Ltd. for ₩167 billion, as a result of which KB Life Insurance Co., Ltd. became our wholly-owned subsidiary.

In September 2013, we purchased 100% of the shares of Yehansoul Savings Bank from the Korea Deposit Insurance Corporation for ₩38 billion. In connection with such purchase, we recognized an acquisition of ₩470 billion of assets and an assumption of ₩439 billion of liabilities and also ₩7 billion of goodwill. In January 2014, KB Savings Bank merged with Yehansoul Savings Bank, with KB Savings Bank as the surviving entity.

In March 2014, we acquired 52.02% of the outstanding shares of Woori Financial Co., Ltd., a publicly listed Korean consumer finance company, from Woori Finance Holdings Co., Ltd. for ₩280 billion, and subsequently renamed the entity KB Capital Co., Ltd.

In addition, in June 2014, we entered into a share purchase agreement, which was amended in March 2015, to acquire 19.47% of the outstanding shares of LIG Insurance Co., Ltd., a publicly listed Korean property and casualty insurance company, from a group of individual shareholders for ₩645 billion. Pursuant to applicable Korean law, we will be required to increase our shareholding in LIG Insurance to at least 30% within one year from the date of such acquisition. As of December 31, 2014, LIG Insurance had total assets of ₩23,929 billion and total equity of ₩1,785 billion, and in 2014, its total revenues amounted to ₩10,878 billion and its profit for the year amounted to ₩139 billion.

Changes in Accounting Policies

Pursuant to the adoption of IFRS 10, *Consolidated Financial Statements*, which is effective beginning in 2013, our consolidated financial statements as of and for the years ended December 31, 2013 and 2014 include trust accounts for which we guarantee only the repayment of principal, as well as certain other entities, which were not previously subject to consolidation, while excluding certain other entities that were previously consolidated. We included in our scope of consolidation those entities with respect to which (i) we had existing rights that gave us the current ability to direct the relevant activities of such entities, (ii) we had exposure or rights to variable returns from our investment in such entities and (iii) we had the ability to use our power over such entities to affect the amount of our returns. Our consolidated financial statements as of and for the year ended December 31, 2012 have been restated to retroactively apply this change.

Upon the adoption of IFRS 10, *Consolidated Financial Statements*, in 2013, we applied the standard described above and consolidated five asset-backed securitization specialty companies and seven funds (including a subsidiary of a fund), while excluding KB-Glenwood Private Equity Fund 1, NPS KBIC Private Equity No. 1 and KBIC Private Equity Fund No. 3 from our scope of consolidation. The asset-backed securitization specialty companies that were consolidated in 2013 are Samho Kyungwon Co., Ltd., Taejon Samho The First Co., Ltd., Prince DCM Co., Ltd. and KH First Co., Ltd. The funds that were consolidated in 2013 are KB Hope Sharing BTL Private Special Asset, Hanbando BTL Private Special Asset Fund 1, Global Logistics Infra Private Fund 1, Global Logistics Infra Private Fund 2, KB Mezzanine Private Securities Fund 1, KB Private Real Estate Securities Fund 1 (NPL), K Star KTB ETF (Bond) and Woori KA First Asset Securitization (a subsidiary of KB Private Real Estate Securities Fund 1 (NPL)). For further information regarding changes in our consolidated subsidiaries, see Note 40 of the notes to our consolidated financial statements included elsewhere in this annual report.

In addition, in 2014, we changed our accounting policy with respect to uncertain tax positions. Prior to January 1, 2014, we had recognized our uncertain tax positions in the financial statements based on the guidance in International Accounting Standards 37, or IAS 37, *Provisions, Contingent Liabilities and Contingent Assets*, which allows recognition of the best estimate of expenditures as tax expenses if the uncertain tax position is probable of resulting in an additional payment to the tax authorities. Under IAS 37, however, tax benefits are recognized only when it has become virtually certain that a tax refund from a claim for rectification or an appeal for refund of amounts claimed from the tax authorities will occur. Beginning in 2014, we recognize our uncertain tax positions in the financial statements based on the guidance in International Accounting Standards 12, or IAS 12, *Income Taxes*, which allows recognition of tax payments as current income tax assets to the extent it is probable that they will be recovered from the tax authorities. Our consolidated financial statements as of and for the years ended December 31, 2012 and 2013 have been restated to retroactively apply such change in our accounting policy.

For further information regarding these and other changes to our accounting policies and their effect on our consolidated financial statements, see Note 2.1 of the notes to our consolidated financial statements included elsewhere in this annual report.

Changes in Securities Values, Exchange Rates and Interest Rates

Fluctuations of exchange rates, interest rates and stock prices affect, among other things, the demand for our products and services, the value of and rate of return on our assets, the availability and cost of funding and the financial condition of our customers. The following table shows, for the dates indicated, the stock price index of all equities listed on the KRX KOSPI Market as published in the KOSPI, the Won to U.S. dollar exchange rates and benchmark Won borrowing interest rates.

	June 30, 2010	Dec. 30, 2010	June 30, 2011	Dec. 29, 2011	June 29, 2012	Dec. 31, 2012	June 28, 2013	Dec. 31, 2013	June 30, 2014	Dec. 31, 2014
KOSPI	1,698.29	2,051.00	2,100.69	1,825.74	1,854.01	1,997.05 (4)	1,863.32	2,011.34 (5)	2,002.21	1,915.59 (6)
₩/US$ exchange rates (1)	₩ 1,220.9	₩ 1,130.6	₩ 1,066.3	₩ 1,158.5	₩ 1,141.2	₩ 1,063.2	₩ 1,141.5	₩ 1,055.3	₩ 1,011.6	₩ 1,090.9
Corporate bond rates (2)	4.96%	4.30%	4.49%	4.22%	3.94%	3.44%	3.54%	3.64%	3.42%	2.87%
Treasury bond rates (3)	3.86%	3.38%	3.76%	3.34%	3.30%	2.82%	2.88%	2.86%	2.68%	2.10%

(1) Represents the noon buying rate on the dates indicated.

(2) Measured by the yield on three-year Korean corporate bonds rated as A+ by the Korean credit rating agencies.

(3) Measured by the yield on three-year treasury bonds issued by the Ministry of Strategy and Finance of Korea.

(4) As of December 28, 2012, the last day of trading for the KRX KOSPI Market in 2012.

(5) As of December 30, 2013, the last day of trading for the KRX KOSPI Market in 2013.

(6) As of December 30, 2014, the last day of trading for the KRX KOSPI Market in 2014.

Critical Accounting Policies

The notes to our consolidated financial statements contain a summary of our significant accounting policies, including a discussion of recently issued accounting pronouncements. Certain of these policies are critical to the portrayal of our financial condition, since they require management to make difficult, complex or subjective judgments, some of which may relate to matters that are inherently uncertain. We discuss these critical accounting policies below.

Impairment of Loans and Allowances for Loan Losses

We evaluate our loan portfolio for impairment on an ongoing basis. We have established allowances for loan losses, which are available to absorb probable losses that have been incurred in our loan portfolio as of the balance sheet date. If we believe that additions or changes to the allowances for loan losses are required, we record a provision for loan losses (as part of our provision for credit losses), which is treated as a charge against current income. Loan exposures that we deem to be uncollectible, including actual loan losses, net of recoveries of previously written-off amounts, are charged directly against the allowances for loan losses.

Our accounting policies for losses arising from the impairment of loans and allowances for loan losses are described in Note 3.6 of the notes to our consolidated financial statements. We base the level of our allowances for loan losses on an evaluation of the risk characteristics of our loan portfolio. The evaluation considers factors such as historical loss experience, the financial condition of our borrowers and current economic conditions.

Allowances represent our management's best estimate of losses incurred in the loan portfolio as of the balance sheet date. Our management is required to exercise judgment in making assumptions and estimates when calculating loan allowances on both individually and collectively assessed loans.

The determination of the allowances required for loans which are deemed to be individually significant often requires the use of considerable management judgment concerning such matters as economic conditions, the financial performance of the counterparty and the value of any collateral held for which there may not be a readily accessible market. Once we have identified loans as impaired, we generally value them either based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as a practical expedient, at a loan's observable market price or the fair value of the collateral if a loan is collateral dependent. The actual amount of the future cash flows and their timing may differ from the estimates used by our management and consequently may cause actual losses to differ from the reported allowances.

The allowances for portfolios of smaller-balance homogenous loans, such as those to individuals and small business customers, and for those loans which are individually significant but for which no objective evidence of impairment exists, are determined on a collective basis. The collective allowances are calculated on a portfolio basis using statistical models which incorporate numerous estimates and judgments. We perform a regular review of the models and underlying data and assumptions.

Our consolidated financial statements for the year ended December 31, 2014 included total allowances for loan losses of ₩2,452 billion as of that date. Our total loan charge-offs, net of recoveries, amounted to ₩1,560 billion and we recorded a provision for loan losses (which forms a part of the provision for credit losses, together with provisions for unused loan commitments, acceptances and guarantees, financial guarantee contracts and other financial assets) of ₩1,211 billion in 2014.

We believe that the accounting estimates related to our impairment of loans and allowances for loan losses are a "critical accounting policy" because: (1) they are highly susceptible to change from period to period because they require us to make assumptions about future default rates and losses relating to our loan portfolio; and (2) any significant difference between our estimated loan losses (as reflected in our allowances for loan losses) and actual loan losses could require us to take an additional provision which, if significant, could have a material impact on our profit. Our assumptions about estimated losses require significant judgment because actual losses have fluctuated in the past and are expected to continue to do so, based on a variety of factors.

Valuation of Financial Instruments

Our accounting policy for determining the fair value of financial instruments is described in Notes 3.3 and 6 of the notes to our consolidated financial statements.

The best evidence of fair value is a quoted price in an actively traded market. In the event that the market for a financial instrument is not active, a valuation technique is used. The majority of valuation techniques employ only observable market data and, as such, the reliability of the fair value measurement is high. However, certain financial instruments are valued on the basis of valuation techniques that feature one or more significant market inputs that are unobservable. Valuation techniques that rely to a greater extent on unobservable inputs require a higher level of management judgment to calculate a fair value than those based wholly on observable inputs.

Valuation techniques used to calculate fair values are discussed in Note 6.1 of the notes to our consolidated financial statements. The main assumptions and estimates which our management considers when applying a model with valuation techniques are:

- The likelihood and expected timing of future cash flows on the instrument. These cash flows are usually governed by the terms of the instrument, although judgment may be required when the ability of the counterparty to service the instrument in accordance with the contractual terms is in doubt. Future cash flows may be sensitive to changes in market rates.
- Selecting an appropriate discount rate for the instrument. The determination of this rate is based on an assessment of what a market participant would regard as the appropriate spread of the rate for the instrument over the appropriate risk-free rate.
- Judgment to determine what model to use to calculate fair value in areas where the choice of valuation model is particularly subjective (for example, valuation of complex derivative products).

The financial instruments carried at fair value have been categorized under the three levels of the IFRS fair value hierarchy as follows:

- Level 1: Quoted prices in active markets for identical assets or liabilities.
- Level 2: Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities.
- Level 3: Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The fair value hierarchy requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Fair value is a market-based measure considered from the perspective of a market participant. As such, even when market assumptions are not readily available, our own assumptions are intended to reflect those that market participants would use in pricing the asset or liability at the measurement date.

For financial instruments traded in the over-the-counter market, we measure the fair value of such instruments as the arithmetic mean of prices obtained from Korea Asset Pricing (an affiliate of Fitch Ratings), KIS Pricing (an affiliate of Moody's Investors Service) and NICE Pricing and Information, all three of which are recognized as major qualified independent pricing services in Korea. There are extremely rare cases where we do not receive price quotes from all three of the pricing services described above. In such cases, we contact the pricing service which did not submit a price quote to discuss the reason why it cannot provide a price and, following such discussion, we use the arithmetic mean of only the prices obtained from the other pricing services so long as there is no reason to believe that the prices that have been submitted are inadequate. We generally do not adjust the prices we obtain from these independent pricing services, as the variance among such prices is insignificant in most cases (primarily because most of the financial instruments we hold consist of government bonds and highly-rated corporate bonds, there is a high volume of transactions in the over-the-counter market and actual transaction prices are monitored and referenced by the pricing services).

Our consolidated financial statements for the year ended December 31, 2014 included financial assets measured at fair value using a valuation technique of ₩22,411 billion, representing 63.8% of total financial assets measured at fair value, and financial liabilities measured at fair value using a valuation technique of ₩2,778 billion, representing 76.9% of total financial liabilities measured at fair value. As used herein, the fair value using a valuation technique means the fair value at Level 2 and Level 3 in the fair value hierarchy.

We believe that the accounting estimates related to the determination of the fair value of financial instruments are a "critical accounting policy" because: (1) they may be highly susceptible to change from period to period based on factors beyond our control; and (2) any significant difference between our estimate of the fair value of these financial instruments on any particular date and either their estimated fair value on a different date or the actual proceeds that we receive upon sale of these financial instruments could result in valuation losses or losses on disposal which may have a material impact on our profit. Our assumptions about the fair value of financial instruments we hold require significant judgment because actual valuations have fluctuated in the past and are expected to continue to do so, based on a variety of factors.

Deferred Income Tax Assets

Our accounting policy for the recognition of deferred income tax assets is described in Notes 3.21 and 16 of the notes to our consolidated financial statements. The recognition of deferred income tax assets relies on an assessment of the probability and sufficiency of future taxable profits, future reversals of existing taxable temporary differences and ongoing tax planning strategies.

We recognize deferred income tax assets and liabilities for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, unused tax losses and unused tax credits. Deferred income tax assets are recognized only to the extent it is probable that sufficient taxable profit will be available against which those deductible temporary differences, unused tax losses or unused tax credits can be utilized. This assessment requires significant management judgment and assumptions. In determining the amount of deferred income tax assets, we use historical tax capacity and profitability information and, if relevant, forecasted operating results, based upon approved business plans, including a review of the eligible carry-forward periods, available tax planning opportunities and other relevant considerations.

Our consolidated financial statements for the year ended December 31, 2014 included deferred income tax assets and liabilities of ₩16 billion and ₩93 billion, respectively, as of that date, after offsetting of ₩1,236 billion of deferred income tax liabilities and assets.

We believe that the estimates related to our recognition and measurement of deferred income tax assets are a "critical accounting policy" because: (1) they may be highly susceptible to change from period to period based on our assumptions regarding our future profitability; and (2) any significant difference between our estimates of future profits on any particular date and estimates of such future profits on a different date could result in an income tax expense or benefit which may have a material impact on our profit from period to period. Our assumptions about our future profitability require significant judgment and are inherently subjective.

Results of Operations

Net Interest Income

The following table shows, for the periods indicated, the principal components of our net interest income:

	Year Ended December 31,			Percentage Change	
	2012	2013	2014	2013/2012	2014/2013
	(in billions of Won, except percentages)			(%)	
Interest income					
Cash and interest earning deposits in other banks	₩ 160	₩ 146	₩ 190	(8.8)%	30.1%
Loans	12,624	10,942	10,325	(13.3)	(5.6)
Financial investments (debt securities) (1)	1,426	1,269	1,120	(11.0)	(11.7)
Total interest income	14,210	12,357	11,635	(13.0)	(5.8)
Interest expense					
Deposits	5,450	4,279	3,845	(21.5)	(10.1)
Debts	460	365	342	(20.7)	(6.3)
Debentures	1,262	1,190	1,032	(5.7)	(13.3)
Total interest expense	7,172	5,834	5,219	(18.7)	(10.5)
Net interest income	₩ 7,038	₩ 6,523	₩ 6,416	(7.3)	(1.6)
Net interest margin (2)	2.71%	2.51%	2.39%		

(1) Consists of debt securities in our available-for-sale and held-to-maturity financial asset portfolios.

(2) The ratio of net interest income to average interest earning assets. See "Item 3.A. Selected Financial Data—Profitability ratios and other data."

Comparison of 2014 to 2013

Interest income. Interest income decreased 5.8% from ₩12,357 billion in 2013 to ₩11,635 billion in 2014, primarily as a result of a 5.6% decrease in interest on loans. Average yields on our interest earning assets decreased 42 basis points from 4.76% in 2013 to 4.34% in 2014, which reflected a decrease in the general level of interest rates in Korea in 2014 compared to 2013. The effect of this decrease was partially offset by a 3.3% increase in the average volume of our interest earning assets from ₩259,645 billion in 2013 to ₩268,330 billion in 2014, principally due to growth in our loan portfolio.

The 5.6% decrease in interest on loans from ₩10,942 billion in 2013 to ₩10,325 billion in 2014 was primarily the result of:

- a 43 basis point decrease in the average yields on corporate loans from 4.50% in 2013 to 4.07% in 2014, which was partially offset by a 1.3% increase in the average volume of such loans from ₩100,614 billion in 2013 to ₩101,875 billion in 2014;
- a 77 basis point decrease in the average yields on credit card receivables from 10.70% in 2013 to 9.93% in 2014, which was enhanced by a 2.6% decrease in the average volume of such receivables from ₩11,611 billion in 2013 to ₩11,312 billion in 2014;

- a 47 basis point decrease in the average yields on mortgage loans from 4.10% in 2013 to 3.63% in 2014, which was partially offset by an 8.2% increase in the average volume of such loans from ₩44,514 billion in 2013 to ₩48,160 billion in 2014; and
- a 45 basis point decrease in the average yields on home equity loans from 4.25% in 2013 to 3.80% in 2014, which was partially offset by a 5.8% increase in the average volume of such loans from ₩30,275 billion in 2013 to ₩32,030 billion in 2014.

The average yields on corporate loans, credit card receivables, mortgage loans and home equity loans decreased mainly as a result of the decrease in the general level of interest rates in Korea applicable to such loans and receivables from 2013 to 2014. The increase in the average volume of corporate loans mainly reflected our increased marketing efforts as well as increased demand for such loans in Korea. The decrease in the average volume of credit card loans was principally due to initiatives by the Korean government to encourage the use of debit cards instead of credit cards. The increase in the average volume of mortgage loans was mainly a result of initiatives by the Korean government to revive the housing market in Korea by loosening regulations on mortgage lending in 2014. The increase in the average volume of home equity loans mainly reflected the loosening of the maximum loan-to-value ratios, to which our home equity loans are subject, by the Korean government in 2014.

Overall, the average yields on our loans decreased by 45 basis points from 4.96% in 2013 to 4.51% in 2014, while the average volume of our loans increased 3.9% from ₩220,401 billion in 2013 to ₩228,989 billion in 2014.

Debt securities in our financial investments portfolio consist of available-for-sale debt securities and held-to-maturity debt securities, including debt securities issued by government-owned or -controlled enterprises or financial institutions and debt securities issued by Korean banks and other financial institutions. Interest on debt securities in our financial investments portfolio decreased 11.7% from ₩1,269 billion in 2013 to ₩1,120 billion in 2014, primarily as a result of a 26 basis point decrease in average yields on such debt securities from 3.81% in 2013 to 3.55% in 2014, which was enhanced by a 5.4% decrease in the average volume of such debt securities from ₩33,339 billion in 2013 to ₩31,530 billion in 2014. The decrease in average yields on such debt securities was primarily due to a decrease in the general level of interest rates in Korea for debt securities from 2013 to 2014. The decrease in average volume of such debt securities primarily reflected our decreased purchases of such debt securities due to the lower interest rate environment in Korea in 2014.

Interest expense. Interest expense decreased 10.5% from ₩5,834 billion in 2013 to ₩5,219 billion in 2014 primarily due to a 10.1% decrease in interest expense on deposits, which was enhanced by a 13.3% decrease in interest expense on debentures. The average cost of interest bearing liabilities decreased by 33 basis points from 2.45% in 2013 to 2.12% in 2014, which was driven mainly by the lower interest rate environment in Korea in 2014. The effect of this decrease was offset in part by a 3.5% increase in the average volume of interest-bearing liabilities from ₩238,452 billion in 2013 to ₩246,692 billion in 2014, which mainly reflected an increase in the average volume of debentures.

The 10.1% decrease in interest expense on deposits from ₩4,279 billion in 2013 to ₩3,845 billion in 2014 was primarily due to a 32 basis point decrease in the average cost of time deposits from 3.02% in 2013 to 2.70% in 2014. The decrease in the average cost of time deposits mainly reflected a decrease in the general level of interest rates in Korea from 2013 to 2014. Overall, the average cost of our deposits decreased by 29 basis points from 2.22% in 2013 to 1.93% in 2014, while the average volume of our deposits increased 3.4% from ₩192,960 billion in 2013 to ₩199,559 billion in 2014.

The 13.3% decrease in interest expense on debentures from ₩1,190 billion in 2013 to ₩1,032 billion in 2014 was mainly due to a 102 basis point decrease in the average cost of debentures from 4.70% in 2013 to 3.68% in 2014, which was offset in part by a 10.8% increase in the average volume of debentures from ₩25,319 billion in 2013 to ₩28,048 billion in 2014. The decrease in the average cost of debentures mainly reflected the general decrease in market interest rates in Korea, including for long-term debentures, in 2014. The increase in the average volume of debentures was principally due to the addition of KB Capital as a consolidated subsidiary in March 2014.

Net interest margin. Net interest margin represents the ratio of net interest income to average interest earning assets. Our overall net interest margin decreased from 2.51% in 2013 to 2.39% in 2014, as a 1.6% decrease in our net interest income from ₩6,523 billion in 2013 to ₩6,416 billion in 2014 was enhanced a 3.3% increase in the average volume of our interest earning assets from ₩259,645 billion in 2013 to ₩268,330 billion in 2014. The growth in average interest earning assets exceeded a 3.5% increase in average interest bearing liabilities from ₩238,452 billion in 2013 to ₩246,692 billion in 2014, while the decrease in interest income outpaced a decrease in interest expense, resulting in a decrease in net interest income. Our net interest spread, which represents the difference between the average yield on our interest earning assets and the average cost of our interest bearing liabilities, declined from 2.31% in 2013 to 2.22% in 2014. The decline in our net interest spread reflected a larger decrease in the average yield of our interest earning assets, relative to the decrease in the average cost of our interest bearing liabilities, primarily due to the earlier adjustment of interest rates on interest earning assets compared to interest rates on interest bearing liabilities in the context of the lower interest rate environment, as well as the continuing rate-based competition in the Korean banking industry for the marketing of both loan and deposit products.

Comparison of 2013 to 2012

Interest income. Interest income decreased 13.0% from ₩14,210 billion in 2012 to ₩12,357 billion in 2013, primarily as a result of a 13.3% decrease in interest on loans. The average balance of our interest earning assets decreased 0.2% from ₩260,120 billion in 2012 to ₩259,645 billion in 2013, principally due to a decrease in our loan portfolio. The effect of this decrease was enhanced by a 70 basis point decrease in average yields on our interest earning assets from 5.46% in 2012 to 4.76% in 2013, which reflected a decrease in the general level of interest rates in Korea in 2013.

The 13.3% decrease in interest on loans from ₩12,624 billion in 2012 to ₩10,942 billion in 2013 was primarily the result of:

- a 68 basis point decrease in the average yields on corporate loans from 5.18% in 2012 to 4.50% in 2013, which was enhanced by a 2.1% decrease in the average volume of such loans from ₩102,773 billion in 2012 to ₩100,614 billion in 2013;
- a 82 basis point decrease in the average yields on other consumer loans from 7.28% in 2012 to 6.46% in 2013, which was partially offset by a 2.7% increase in the average volume of such loans from ₩29,721 billion in 2012 to ₩30,536 billion in 2013;
- a 76 basis point decrease in the average yields on mortgage loans from 4.86% in 2012 to 4.10% in 2013, which was partially offset by a 0.2% increase in the average volume of such loans from ₩44,444 billion in 2012 to ₩44,514 billion in 2013; and
- an 84 basis point decrease in the average yields on home equity loans from 5.09% in 2012 to 4.25% in 2013, which was partially offset by a 0.3% increase in the average volume of such loans from ₩30,170 billion in 2012 to ₩30,275 billion in 2013.

The average yields for corporate loans, other consumer loans, mortgage loans and home equity loans decreased mainly as a result of the decrease in the general level of interest rates in Korea applicable to such loans from 2012 to 2013. The decrease in the average volume of corporate loans was primarily due to our efforts to improve the asset quality of our corporate loans by applying more stringent standards to the origination of new loans and renewal of existing loans to corporate customers. The increase in the average volume of other consumer loans was principally due to higher demand for such loans in Korea. The increase in the average volume of mortgage loans was primarily a result of an increase in loans relating to key money deposits. The increase in the average volume of home equity loans mainly reflected higher demand for such loans in Korea.

Overall, the average volume of our loans decreased 0.7%, from ₩221,930 billion in 2012 to ₩220,401 billion in 2013, while the average yields on our loans decreased by 73 basis points, from 5.69% in 2012 to 4.96% in 2013.

Interest on debt securities in our financial investments portfolio decreased 11.0% from ₩1,426 billion in 2012 to ₩1,269 billion in 2013 primarily as a result of a 46 basis point decrease in average yields on such debt securities from 4.27% in 2012 to 3.81% in 2013, which was enhanced by a 0.1% decrease in the average volume of such debt securities from ₩33,382 billion in 2012 to ₩33,339 billion in 2013. The decrease in average yields on such debt securities was primarily due to the decrease in the general level of interest rates in Korea for debt securities from 2012 to 2013.

Interest expense. Interest expense decreased 18.7% from ₩7,172 billion in 2012 to ₩5,834 billion in 2013 primarily due to a 21.5% decrease in interest expense on deposits, which was enhanced by a 20.7% decrease in interest expense on debts. The average volume of interest bearing liabilities decreased 1.0% from ₩240,831 billion in 2012 to ₩238,452 billion in 2013, which mainly reflected a decrease in the average volume of deposits. The effect of this decrease was enhanced by a decrease of 53 basis points in the average cost of interest bearing liabilities from 2.98% in 2012 to 2.45% in 2013, which was driven mainly by the lower interest rate environment in Korea in 2013.

The 21.5% decrease in interest expense on deposits from ₩5,450 billion in 2012 to ₩4,279 billion in 2013 was primarily due to a 67 basis point decrease in the average cost of time deposits from 3.69% in 2012 to 3.02% in 2013, which was enhanced by a 4.6% decrease in the average volume of such deposits from ₩136,617 billion in 2012 to ₩130,286 billion in 2013. The decrease in the average cost of time deposits mainly reflected the decrease in the general level of interest rates in Korea from 2012 to 2013. The decrease in the average volume of time deposits was principally due to a decrease in time deposits for corporate customers. Overall, the average cost of our deposits decreased by 58 basis points from 2.80% in 2012 to 2.22% in 2013, while the average volume of our deposits decreased by 0.8% from ₩194,506 billion in 2012 to ₩192,960 billion in 2013.

The 20.7% decrease in interest expense on debts from ₩460 billion in 2012 to ₩365 billion in 2013 resulted from a 30 basis point decrease in the average cost of debts from 2.11% in 2012 to 1.81% in 2013, which was enhanced by a 7.3% decrease in the average volume of debts from ₩21,773 billion in 2012 to ₩20,173 billion in 2013. The decrease in the average cost of debts was primarily attributable to the general decrease in market interest rates in Korea, including for short-term borrowings and call money, in 2013, while the decrease in the average volume of debts mainly reflected a decrease in the use of short-term borrowings to meet our funding needs.

Net interest margin. Our overall net interest margin decreased from 2.71% in 2012 to 2.51% in 2013, as a 7.3% decrease in our net interest income from ₩7,038 billion in 2012 to ₩6,523 billion in 2013 outpaced a 0.2% decrease in the average volume of our interest earning assets from ₩260,120 billion in 2012 to ₩259,645 billion in 2013. The decrease in average interest earning assets was outpaced by a 1.0% decrease in average interest bearing liabilities from ₩240,831 billion in 2012 to ₩238,452 billion in 2013, while the decrease in interest expense was more than offset by a decrease in interest income, resulting in a decrease in net interest income. Our net interest spread declined from 2.48% in 2012 to 2.31% in 2013. The decline in our net interest spread reflected a larger decrease in the average yield of our interest earning assets, relative to the decrease in the average cost of our interest bearing liabilities, primarily due to the earlier adjustment of interest rates on interest earning assets compared to interest rates on interest bearing liabilities in the context of the lower interest rate environment, as well as the continuing rate-based competition in the Korean banking industry for the marketing of loan products.

Provision for Credit Losses

Provision for credit losses includes provision for loan losses, provision for unused loan commitments, provision for acceptances and guarantees, provision for financial guarantee contracts and provision for other financial assets, in each case net of reversal of provisions. For a discussion of our loan loss provisioning policy, see "Item 4.B. Business Overview—Assets and Liabilities—Loan Portfolio—Provisioning Policy."

In accordance with the guidelines of the Financial Supervisory Service, if our provision for loan losses is deemed insufficient for regulatory purposes, we compensate for the difference by recording a regulatory reserve for credit losses, which is segregated within retained earnings. See “Item 4.B. Business Overview—Assets and Liabilities—Loan Portfolio—Regulatory Reserve for Credit Losses” and Note 26 of the notes to our consolidated financial statements included elsewhere in this annual report.

Comparison of 2014 to 2013

Our provision for credit losses decreased 14.9% from ₩1,443 billion in 2013 to ₩1,228 billion in 2014, primarily due to a decrease in provision for loan losses in respect of our corporate loans and credit card receivables. Such decrease resulted mainly from an improvement in the overall asset quality of such loans and receivables reflecting a decrease in delinquency rates.

Our write-offs, net of recoveries, decreased 9.1% from ₩1,717 billion in 2013 to ₩1,560 billion in 2014, primarily due to a an increase in recoveries from written-off corporate loans.

Our reversal of provision for acceptances and guarantees and unused loan commitments increased from ₩8 billion in 2013 to ₩21 billion in 2014, due mainly to an increase in reversal of provision for acceptances and guarantees issued on behalf of construction companies, as well as an increase in reversal of provision for unused loan commitments.

Comparison of 2013 to 2012

Our provision for credit losses decreased 10.2% from ₩1,607 billion in 2012 to ₩1,443 billion in 2013, primarily due to an improvement in the overall asset quality of our loans reflecting a decrease in delinquency rates.

Our loan write-offs, net of recoveries, decreased 1.7% from ₩1,747 billion in 2012 to ₩1,717 billion in 2013, primarily due to a decrease in write-offs of credit card receivables.

Our reversal of provision for acceptances and guarantees and unused loan commitments decreased from ₩91 billion in 2012 to ₩8 billion in 2013, due primarily to a decrease in reversal of provision for refund guarantees issued on behalf of shipbuilding companies.

Allowances for Loan Losses

We establish allowances for loan losses with respect to loans to absorb such losses. We assess individually significant loans on a case-by-case basis and other loans on a collective basis. In addition, if we determine that no objective evidence of impairment exists for a loan, we include such loan in a group of loans with similar credit risk characteristics and assess them collectively for impairment regardless of whether such loan is significant. For further information on allowances for loan losses, see “—Critical Accounting Policies—Impairment of Loans and Allowances for Loan Losses” and “Item 4.B. Business Overview—Assets and Liabilities—Loan Portfolio—Allocation and Analysis of Allowances for Loan Losses.”

Corporate Loans. The following table shows, for the periods indicated, certain information regarding our impaired corporate loans:

	As of December 31,		
	2012	2013	2014
Impaired corporate loans as a percentage of total corporate loans	2.3%	2.8%	2.0%
Allowances for loan losses for corporate loans as a percentage of total corporate loans	2.2	1.8	1.5
Allowances for loan losses for corporate loans as a percentage of impaired corporate loans	94.5	65.5	72.7
Net charge-offs of corporate loans as a percentage of total corporate loans	1.0	1.0	0.8

During 2014, impaired corporate loans and allowances for loan losses for corporate loans, each as a percentage of total corporate loans, decreased primarily due to a decrease in our impaired corporate loans, which mainly reflected our efforts to improve the asset quality of our corporate loan portfolio. Such decrease in our impaired corporate loans outpaced a decrease in allowance for loan losses for corporate loans, which caused the level of allowances for loan losses for corporate loans as a percentage of impaired corporate loans to increase during 2014.

During 2013, impaired corporate loans as a percentage of total corporate loans increased due to a reclassification of impaired corporate loans to include all loans for which account-specific provisions have been made, while allowances for loan losses for corporate loans as a percentage of total corporate loans decreased primarily as a result of an improvement in the overall asset quality of our corporate loans, resulting in a decrease in allowance for loan losses for corporate loans as a percentage of impaired corporate loans.

During 2012, impaired corporate loans as a percentage of total corporate loans remained relatively constant. Allowances for loan losses for corporate loans, as a percentage of total corporate loans and as a percentage of impaired corporate loans, respectively, decreased during 2012 primarily as a result of a decrease in our allowances for loan losses for such loans, which mainly reflected an increase in the relative proportion of such loan amounts that are secured by collateral.

Retail Loans. The following table shows, for the periods indicated, certain information regarding our impaired retail loans:

	As of December 31,		
	2012	**2013**	**2014**
Impaired retail loans as a percentage of total retail loans	1.1%	1.0%	0.6%
Allowances for loan losses for retail loans as a percentage of total retail loans	0.7	0.5	0.5
Allowances for loan losses for retail loans as a percentage of impaired retail loans	58.1	56.7	70.1
Net charge-offs of retail loans as a percentage of total retail loans	0.3	0.4	0.4

During 2014, impaired retail loans as a percentage of total retail loans decreased as the effect of a decrease in our impaired retail loans, which reflected an improvement in the asset quality of our retail loan portfolio, was enhanced by an increase in the amount of our total retail loans. Such decrease in our impaired retail loans outpaced a decrease in allowance for loan losses for retail loans, which caused the level of allowances for loan losses for retail loans as a percentage of impaired retail loans to increase during 2014.

During 2013, impaired retail loans as a percentage of total retail loans remained relatively constant. However, an improvement in the asset quality of our existing impaired retail loans led to a better overall mix of impaired loans, which caused the level of allowances for loan losses as a percentage of both total retail loans and impaired retail loans to decrease.

During 2012, impaired retail loans as a percentage of total retail loans increased as the effect of an increase in our impaired retail loans, which reflected a deterioration in the asset quality of our retail loan portfolio due to adverse economic conditions in Korea in 2012, was enhanced by a slight decrease in the amount of our total retail loans. Allowances for loan losses for retail loans as a percentage of total retail loans similarly increased during 2012 as the effect of an increase in allowances for retail loans, reflecting the deterioration in the asset quality of our retail loan portfolio, was enhanced by the decrease in the amount of our total retail loans. However, an improvement in the asset quality of our existing impaired retail loans reflecting our increased charge-offs of such loans in 2012 led to a better overall mix of impaired retail loans, which caused the level of allowances for loan losses for retail loans as a percentage of impaired retail loans to decrease.

Credit Card Balances. The following table shows, for the periods indicated, certain information regarding our impaired credit card balances:

	As of December 31,		
	2012	2013	2014
Impaired credit card balances as a percentage of total credit card balances	1.0%	1.8%	1.7%
Allowances for loan losses for credit card balances as a percentage of total credit card balances	2.8	3.5	3.4
Allowances for loan losses for credit card balances as a percentage of impaired credit card balances	272.9	196.4	195.3
Net charge-offs as a percentage of total credit card balances	3.0	2.2	2.5

During 2014, impaired credit card balances as a percentage of total credit card balances decreased slightly as the rate of decrease in our impaired credit card balances outpaced the rate of decrease in the amount of our total credit card balances. Allowances for loan losses for credit card balances as a percentage of both total credit card balances and impaired credit card balances similarly decreased slightly during 2014, primarily as a result of an improvement in the asset quality of our existing impaired credit card balances.

During 2013, impaired credit card balances as a percentage of total credit card balances increased primarily due to an increase in impaired credit card balances, which mainly reflected a decrease in charge-off of such balances due to a change in our charge-off policy in 2013 which increased the delinquency period for credit card balances before charge-off from three months to six months. Allowances for loan losses for credit card balances as a percentage of total credit card balances increased during 2013 mainly as a result of an increase in impaired credit card balances. Allowance for loan losses for credit card balances as a percentage of impaired credit card balances decreased during 2013 as the increase in impaired credit card balances outpaced the increase in allowance for loans losses for credit card balances.

During 2012, impaired credit card balances as a percentage of total credit card balances increased slightly primarily due to the effect of a decrease in our total credit card balances while the amount of our impaired credit card balances remained relatively steady. Allowances for loan losses for credit card balances, which decreased during 2012 mainly as a result of a decrease in our total credit card balances as well as increased charge-offs (which, in turn, principally reflected increased delinquencies in our credit card portfolio from the second half of 2011 becoming subject to charge off in 2012), remained relatively constant as a percentage of total credit card balances and decreased as a percentage of impaired credit card balances.

Net Fee and Commission Income

The following table shows, for the periods indicated, the components of our net fee and commission income:

	Year Ended December 31,			Percentage Change	
	2012	2013	2014	2013/2012	2014/2013
	(in billions of Won)			(%)	
Fee and commission income	₩ 2,754	₩ 2,657	₩ 2,666	(3.5)%	0.3%
Fee and commission expense	(1,187)	(1,178)	(1,283)	(0.8)	8.9
Net fee and commission income	₩ 1,567	₩ 1,479	₩ 1,383	(5.6)	(6.5)

Comparison of 2014 to 2013

Our net fee and commission income decreased 6.5% from ₩1,479 billion in 2013 to ₩1,383 billion in 2014, primarily due to an 8.9% increase in fee and commission expense from ₩1,178 in 2013 to ₩1,283 in 2014.

Our fee and commission income remained relatively constant at ₩2,666 billion in 2014 compared to ₩2,657 billion in 2013, as increases in trust and other fiduciary fees and debit card related fees and commissions were offset by decreases in agent activity fees and commissions from transfer agent services. Trust and other fiduciary fees increased 43.5% from ₩161 billion in 2013 to ₩231 billion in 2014 primarily due to an increase in sales of equity linked securities. Debit card related fees and commissions increased 14.1% from ₩256 billion in 2013 to ₩292 billion in 2014, which mainly reflected the impact of the government initiative to encourage the use of debit cards instead of credit cards. Credit card related fees and commissions received decreased from ₩1,127 billion in 2013 to ₩1,107 billion in 2014. Agent activity fees decreased 23.7% from ₩207 billion in 2013 to ₩158 billion in 2014 principally as a result of reduced bancassurance activities, while commissions from transfer agent services decreased 16.3% from ₩178 billion in 2013 to ₩149 billion in 2014 primarily due to a decrease in sales of beneficiary certificates.

The 8.9% increase in fee and commission expense was primarily due to a 48.8% increase in other fees and commissions paid from ₩125 billion in 2013 to ₩186 billion in 2014 and a 4.9% increase in credit card and debit card related fees and commissions paid from ₩934 billion in 2013 to ₩980 billion in 2014. The increase in other fees and commissions paid resulted mainly from an increase in investment banking related fees and commissions. The increase in credit card and debit card related fees and commissions paid resulted primarily from an increase in debit card related fees and commissions, including fees paid to value-added network providers, reflecting the increased use of debit cards.

Comparison of 2013 to 2012

Our net fee and commission income decreased 5.6% from ₩1,567 billion in 2012 to ₩1,479 billion in 2013, primarily due to a 3.5% decrease in fee and commission income from ₩2,754 billion in 2012 to ₩2,657 billion in 2013, which was partially offset by a 0.8% decrease in fee and commission expense from ₩1,187 billion in 2012 to ₩1,178 billion in 2013. The 3.5% decrease in fee and commission income was mainly the result of decreases in agent activity fees, mostly related to bancassurance activities, from ₩285 billion in 2012 to ₩207 billion in 2013 and in credit card related fees and commissions received from ₩1,180 billion in 2012 to ₩1,127 billion in 2013, which mainly reflected the impact of the new government initiative to encourage the use of check cards instead of credit cards. Check card related fees and commissions increased from ₩218 billion in 2012 to ₩256 billion in 2013.

The 0.8% decrease in fee and commission expense was primarily due to a decrease in credit card and debit card related fees and commissions paid from ₩997 billion in 2012 to ₩934 billion in 2013. The effect of such decrease was partially offset by a 62.3% increase in other fee and commission expenses from ₩77 billion in 2012 to ₩125 billion in 2013, mainly resulting from an increase in fee and commission expenses from factored receivables.

For further information regarding our net fee and commission income, see Note 28 of the notes to our consolidated financial statements included elsewhere in this annual report.

Net Gain on Financial Assets and Liabilities at Fair Value through Profit or Loss

The following table shows, for the periods indicated, the components of our net gain on financial assets and liabilities at fair value through profit or loss:

	Year Ended December 31,			Percentage Change	
	2012	2013	2014	2013/2012	2014/2013
	(in billions of Won)			(%)	
Net gain on financial assets held-for-trading	₩437	₩250	₩414	(42.8)%	65.6%
Net gain on derivatives held-for-trading	456	544	98	19.3	(82.0)
Net loss on financial liabilities held-for-trading	(44)	(15)	(62)	(65.9)	313.3
Net gain on financial instruments designated at fair value through profit or loss	(37)	(22)	(11)	(40.5)	(50.0)
Net gain on financial assets and liabilities at fair value through profit or loss	₩812	₩757	₩439	(6.8)	(42.0)

Comparison of 2014 to 2013

Our net gain on financial assets and liabilities at fair value through profit or loss decreased 42.0% from ₩757 billion in 2013 to ₩439 billion in 2014, primarily as a result of an 82.0% decrease in net gain on derivatives held-for-trading from ₩544 billion in 2013 to ₩98 billion in 2014, which was offset in part by a 65.6% increase in net gain on financial assets held-for-trading from ₩250 billion in 2013 to ₩414 billion in 2014. The decrease in net gain on derivatives held-for-trading was principally due to a 76.2% decrease in net gain on currency derivatives held-for-trading from ₩517 billion in 2013 to ₩123 billion in 2014. The increase in net gain on financial assets held-for-trading mainly reflected a 94.6% increase net gain on debt securities held-for-trading from ₩222 billion in 2013 to ₩432 billion in 2014.

Comparison of 2013 to 2012

Our net gain on financial assets and liabilities at fair value through profit or loss decreased 6.8% from ₩812 billion in 2012 to ₩757 billion in 2013, primarily as a result of a 42.8% decrease in net gain on financial assets held-for-trading from ₩437 billion in 2012 to ₩250 billion in 2013, which was offset in part by a 19.3% increase in net gain on derivatives held-for-trading from ₩456 billion in 2012 to ₩544 billion in 2013. The decrease in net gain on financial assets held-for-trading was principally due to a 43.1% decrease in net gain on debt securities held-for-trading from ₩390 billion in 2012 to ₩222 billion in 2013. The increase in net gain on derivatives held-for-trading mainly reflected a 16.4% increase in net gain on currency derivatives held-for-trading from ₩444 billion in 2012 to ₩517 billion in 2013.

For further information regarding our net gain on financial assets and liabilities at fair value through profit or loss, see Note 29 of the notes to our consolidated financial statements included elsewhere in this annual report.

General and Administrative Expenses

The following table shows, for the periods indicated, the components of our general and administrative expenses:

	Year Ended December 31,			Percentage Change	
	2012	2013	2014	2013/2012	2014/2013
	(in billions of Won)			(%)	
Employee compensation and benefits	₩2,442	₩2,534	₩2,593	3.8%	2.3%
Depreciation and amortization	328	287	261	(12.5)	(9.1)
Other general and administrative expenses	1,076	1,163	1,155	8.1	(0.7)
General and administrative expenses	₩3,846	₩3,984	₩4,010	3.6	0.7

Comparison of 2014 to 2013

Our general and administrative expenses increased 0.7% from ₩3,984 billion in 2013 to ₩4,010 billion in 2014, primarily as a result of a 2.3% increase in employee compensation and benefits from ₩2,534 billion in 2013 to ₩2,593 billion in 2014, which was offset in part by a 9.1% decrease in depreciation and amortization from ₩287 billion in 2013 to ₩261 billion in 2014. The increase in employee compensation and benefits was principally due to a 3.6% increase in salaries and short-term employee benefits from ₩1,641 billion in 2013 to ₩1,700 billion in 2014, which mainly reflected an increase in the average wage of our employees. The 9.1% decrease in depreciation and amortization was principally due to a decrease in the depreciation and amortization of software.

Comparison of 2013 to 2012

Our general and administrative expenses increased 3.6% from ₩3,846 billion in 2012 to ₩3,984 billion in 2013, primarily as a result of a 3.8% increase in employee compensation and benefits from ₩2,442 billion in 2012 to ₩2,534 billion in 2013, which was enhanced by an 8.1% increase in other general and administrative expenses from ₩1,076 billion in 2012 to ₩1,163 billion in 2013. The increase in employee compensation and benefits was principally due to a 2.7% increase in salaries and short-term employee benefits from ₩1,598 billion in 2012 to ₩1,641 billion in 2013, which mainly reflected an increase in the average wage of our employees. The 8.1% increase in other general and administrative expenses was principally due to a 95.8% increase in tax and dues from ₩72 billion in 2012 to ₩141 billion in 2013, which primarily reflected refunds of previously levied education taxes in 2012 as a result of claims filed by Kookmin Bank which were not repeated in 2013.

Net Other Operating Expenses

The following table shows, for the periods indicated, the components of our net other operating expenses:

	Year Ended December 31,			Percentage Change	
	2012	2013	2014	2013/2012	2014/2013
	(in billions of Won)			(%)	
Other operating income	₩ 3,286	₩ 3,137	₩ 3,100	(4.5)%	(1.2)%
Other operating expenses	(4,818)	(4,442)	(4,141)	(7.8)	(6.8)
Net other operating expenses	₩(1,532)	₩(1,305)	₩(1,041)	(14.8)	(20.2)

Comparison of 2014 to 2013

Our net other operating expenses decreased 20.2% from ₩1,305 billion in 2013 to ₩1,041 billion in 2014 as a 6.8% decrease in other operating expenses from ₩4,442 billion in 2013 to ₩4,141 billion in 2014 outpaced a 1.2% decrease in other operating income from ₩3,137 billion in 2013 to ₩3,100 billion in 2014.

Other operating income includes principally gain on foreign exchange transactions, income related to insurance, gain on sale of available-for-sale financial assets and other income. The 1.2% decrease in other operating income was attributable mainly to a 51.3% decrease in gain on sale of available-for-sale financial assets from ₩189 billion in 2013 to ₩92 billion in 2014 and a 15.3% decrease in other income from ₩262 billion in 2013 to ₩222 billion in 2014, the effect of which was partially offset by a 7.5% increase in gain on foreign exchange transactions from ₩1,387 billion in 2013 to ₩1,491 billion in 2014. The decrease in gain on sale of available-for-sale financial assets was principally due to gains realized in 2013 from sales of shares of Hyundai Merchant Co., Ltd. and Kumho Petrochemical Co., Ltd. held by us, which were not repeated in 2014. The decrease in other income was mainly due to a decrease in gain on sales of loans. The increase in gain on foreign exchange transactions, which was mainly the result of increased exchange rate volatility, was enhanced by a decrease in loss on foreign exchange transactions, which is recorded as part of other operating expenses. On a net basis, we recognized a net gain on foreign exchange transactions of ₩34 billion in 2014 compared to a net loss on foreign exchange transactions of ₩280 billion in 2013.

Other operating expenses include principally loss on foreign exchange transactions, expenses related to insurance, loss on sale of available-for-sale financial assets and other expenses. The 6.8% decrease in other operating expenses was primarily the result of a 12.6% decrease in loss on foreign exchange transactions from ₩1,667 billion in 2013 to ₩1,457 billion in 2014. The decrease in loss on foreign exchange transactions, which was mainly due to a decrease in the volume of our foreign currency transactions, was enhanced by an increase in gain on foreign exchange transactions, which is recorded as part of other operating income as discussed above.

Comparison of 2013 to 2012

Our net other operating expenses decreased 14.8% from ₩1,532 billion in 2012 to ₩1,305 billion in 2013, as a 7.8% decrease in other operating expenses from ₩4,818 billion in 2012 to ₩4,442 billion in 2013 outpaced a 4.5% decrease in other operating income from ₩3,286 billion in 2012 to ₩3,137 billion in 2013.

The 4.5% decrease in other operating income was attributable mainly to a 28.7% decrease in income related to insurance from ₩1,730 billion in 2012 to ₩1,234 billion in 2013, the effect of which was partially offset by a 26.8% increase in gains on foreign exchange transaction from ₩1,094 billion in 2012 to ₩1,387 billion in 2013.

The decrease in income related to insurance was mainly the result of a decrease in demand for insurance products in 2013, which was substantially offset by a corresponding decrease in expense related to insurance, which is recorded as part of other operating expenses. On a net basis, our net expense related to insurance increased 35.9% from ₩92 billion in 2012 to ₩125 billion in 2013. The increase in gain on foreign exchange transactions, which was mainly the result of increased exchange rate volatility, was more than offset by a corresponding increase in loss on foreign exchange transactions, which is recorded as part of other operating expenses.

The 7.8% decrease in other operating expenses was primarily the result of a 25.4% decrease in expense related to insurance from ₩1,822 billion in 2012 to ₩1,359 billion in 2013, which was enhanced by a 36.6% decrease in expense related to available-for-sale financial assets from ₩298 billion in 2012 to ₩189 billion in 2013. The decrease in expense related to insurance reflected a decrease in policy reserves due to a decrease in insurance products sold. The decrease in expense related to available-for-sale financial assets, which was principally due to a decrease in impairment on available-for-sale financials assets, was partially offset by an increase in revenue related to available-for-sale financial assets, which is recorded as part of other operating income.

For further information regarding our net other operating expenses, see Note 30 of the notes to our consolidated financial statements included elsewhere in this annual report.

Income Tax Expense (Benefit)

Our income tax expense is calculated by adding or subtracting changes in deferred income tax liabilities and assets to income tax amounts payable for the period. Deferred income tax assets are recognized for deductible temporary differences, unused tax losses and unused tax credits, while deferred income tax liabilities are recognized for taxable temporary differences. Temporary differences are those between the carrying values of assets and liabilities for financial reporting purposes and their respective tax bases. Deferred income tax assets, including unused tax losses and credits, are recognized only to the extent it is probable that sufficient taxable profit will be available against which such deferred income tax assets can be utilized. See "—Critical Accounting Policies—Deferred Income Tax Assets."

In 2014, we changed our accounting policy with respect to uncertain tax positions based on the guidance in IAS 12, *Income Taxes*, which allows recognition of tax payments as current income tax assets to the extent it is probable that they will be recovered from the tax authorities. Our consolidated financial statements as of and for the years ended December 31, 2012 and 2013 have been restated to reflect such change in accounting policy. See "—Overview—Changes in Accounting Policies" and Note 2.1 of the notes to our consolidated financial statements included elsewhere in this annual report.

Comparison of 2014 to 2013

Income tax expense decreased by 10.2% from ₩541 billion in 2013 to ₩486 billion in 2014, primarily due to a decrease in adjustments recognized in 2014 for current tax of prior years, as well as a change in income tax expense (benefit) recognized directly in equity relating to the value of available-for-sale financial assets from an income tax expense of ₩8 billion in 2013 to an income tax benefit of ₩79 billion in 2014. The statutory tax rate was 24.2% in 2013 and 2014. Our effective tax rate was 25.6% in 2014 compared to 29.8% in 2013.

Comparison of 2013 to 2012

Income tax expense increased 4.0% from ₩520 billion in 2012 to ₩541 billion in 2013, primarily due to an increase in adjustments recognized in 2013 for current tax of prior years. The statutory tax rate was 24.2% in 2012 and 2013. Our effective tax rate was 29.8% in 2013 compared to 22.6% in 2012.

See Note 33 of the notes to our consolidated financial statements included elsewhere in this annual report.

Profit for the Year

As a result of the above, our profit for the year was ₩1,415 billion in 2014, compared to ₩1,275 billion in 2013 and ₩1,779 billion in 2012.

Results by Principal Business Segment

We compile and analyze financial information for our business segments based upon segment information used by our management for the purposes of resource allocation and performance evaluation. We are organized into six major business segments: retail banking operations, corporate banking operations, other banking operations, credit card operations, investment and securities operations and life insurance operations.

The following table shows, for the periods indicated, our results of operations by segment:

	Profit [1][2] for the Year Ended December 31,			Total Operating Revenue [3] for the Year Ended December 31,		
	2012	2013	2014	2012	2013	2014
	(in billions of Won)					
Retail banking operations	₩ 686	₩ 178	₩ 110	₩3,041	₩2,454	₩2,212
Corporate banking operations	238	157	383	1,953	1,732	1,710
Other banking operations	555	496	536	1,297	1,486	1,481
Credit card operations	291	384	333	1,287	1,421	1,281
Investment and securities operations	18	12	26	143	115	141
Life insurance operations	17	9	7	131	102	105
Other	48	61	115	33	144	266
Total [4]	₩1,853	₩1,297	₩1,510	₩7,885	₩7,454	₩7,196

(1) After deduction of income tax allocated to each segment.

(2) The amounts for 2014 reflect a change in our accounting policies with respect to uncertain tax positions in 2014. Corresponding amounts for 2012 and 2013 have been restated to retroactively apply such change. See "—Overview—Changes in Accounting Policies."

(3) Represents operating revenue from external customers. See Note 5 of the notes to our consolidated financial statements.

(4) Prior to adjustments for consolidation, inter-segment transactions and certain differences in classification under our management reporting system.

Retail Banking Operations

This segment consists of retail banking services provided by Kookmin Bank. The following table shows, for the periods indicated, our income statement data for this segment:

	Year Ended December 31,			Percentage Change	
	2012	2013	2014	2013/2012	2014/2013
	(in billions of Won)			(%)	
Income statement data					
Interest income	₩ 5,682	₩ 4,786	₩ 4,433	(15.8)%	(7.4)%
Interest expense	(3,158)	(2,773)	(2,353)	(12.2)	(15.1)
Net fee and commission income	696	612	525	(12.1)	(14.2)
Net loss from financial assets and liabilities at fair value through profit or loss	(15)	(2)	(20)	(86.7)	900.0
Net other operating expense	(235)	(261)	(421)	11.1	61.3
General and administrative expenses	(1,673)	(1,740)	(1,696)	4.0	(2.5)
Provision for credit losses	(392)	(358)	(304)	(8.7)	(15.1)
Profit before income tax	905	264	164	(70.8)	(37.9)
Tax expense	(219)	(86)	(54)	(60.7)	(37.2)
Profit for the year	₩ 686	₩ 178	₩ 110	(74.1)	(38.2)

Comparison of 2014 to 2013

Our profit before income tax for this segment decreased 37.9% from ₩264 billion in 2013 to ₩164 billion in 2014.

Interest income from our retail banking operations decreased 7.4% from ₩4,786 billion in 2013 to ₩4,433 billion in 2014. This decrease was principally due to decreases in the average yields on mortgage, home equity and other consumer loans, mainly reflecting a decrease in the general level of interest rates in Korea from 2013 to 2014, which were partially offset by increases in the average volume of such loans from 2013 to 2014.

Our largest and most important funding source is deposits from retail customers, which represent more than half of our total deposits. Interest expense for this segment decreased 15.1% from ₩2,773 billion in 2013 to ₩2,353 billion in 2014. This decrease was primarily due to a decrease in the average cost of time deposits held by retail customers, which mainly reflected a decrease in the general level of interest rates in Korea from 2013 to 2014.

Net fee and commission income attributable to this segment decreased 14.2% from ₩612 billion in 2013 to ₩525 billion in 2014, mainly due to decreases in fee and commission income from bancassurance operations and sales of beneficiary certificates as agents.

Net loss from financial assets and liabilities at fair value through profit or loss attributable to this segment increased tenfold from ₩2 billion in 2013 to ₩20 billion in 2014, principally as a result of an increase in valuation loss on derivatives.

Net other operating expense attributable to this segment increased 61.3% from ₩261 billion in 2013 to ₩421 billion in 2014, mainly as a result of an increase in expenses related to inter-segment borrowings.

General and administrative expenses attributable to this segment decreased 2.5% from ₩1,740 billion in 2013 to ₩1,696 billion in 2014, primarily due to a decrease in education taxes, reflecting a decrease in interest income. Education taxes are levied on revenues of financial institutions.

Provision for credit losses decreased 15.1% from ₩358 billion in 2013 to ₩304 billion in 2014, mainly due to an improvement in the asset quality of retail loans, reflecting a decrease in delinquency rates.

Comparison of 2013 to 2012

Our profit before income tax for this segment decreased 70.8% from ₩905 billion in 2012 to ₩264 billion in 2013.

Interest income from our retail banking operations decreased 15.8% from ₩5,682 billion in 2012 to ₩4,786 billion in 2013. This decrease was principally due to a decrease in the average yields on mortgage, home equity and other consumer loans, mainly reflecting a decrease in the general level of interest rates in Korea in 2013.

Interest expense for this segment decreased 12.2% from ₩3,158 billion in 2012 to ₩2,773 billion in 2013. This decrease was primarily due to a decrease in the average cost of time deposits held by retail customers, which mainly reflected a decrease in the general level of interest rates in Korea in 2013.

Net fee and commission income attributable to this segment decreased 12.1% from ₩696 billion in 2012 to ₩612 billion in 2013, mainly due to a decrease in fee and commission income from bancassurance operations.

Net loss from financial assets and liabilities at fair value through profit or loss attributable to this segment decreased 86.7% from ₩15 billion in 2012 to ₩2 billion in 2013, principally as a result of a decrease in valuation loss on derivatives.

Net other operating expense attributable to this segment increased 11.1% from ₩235 billion in 2012 to ₩261 billion in 2013, mainly as a result of an increase in expenses related to inter-segment borrowings.

General and administrative expenses attributable to this segment increased 4.0% from ₩1,673 billion in 2012 to ₩1,740 billion in 2013, principally due to an increase in salary expense.

Provision for credit losses decreased 8.7% from ₩392 billion in 2012 to ₩358 billion in 2013, due mainly to an improvement in the asset quality of retail loans reflecting a decrease in delinquency rates for retail loans.

Corporate Banking Operations

This segment consists of corporate banking services provided by Kookmin Bank. The following table shows, for the periods indicated, our income statement data for this segment:

	Year Ended December 31,			Percentage Change	
	2012	2013	2014	2013/2012	2014/2013
	(in billions of Won)			(%)	
Income statement data					
Interest income	₩ 5,190	₩ 4,391	₩ 4,009	(15.4)%	(8.7)%
Interest expense	(2,597)	(1,840)	(1,560)	(29.1)	(15.2)
Net fee and commission income	233	241	237	3.4	(1.7)
Net gain (loss) from financial assets and liabilities at fair value through profit or loss	(1)	—	—	(100.0)	—
Net other operating expense	(871)	(1,055)	(906)	21.1	(14.1)
General and administrative expenses	(792)	(822)	(711)	3.8	(13.5)
Provision for credit losses	(853)	(706)	(567)	(17.2)	(19.7)
Net other non-operating revenue	6	1	2	(83.3)	100.0
Profit before income tax	315	210	504	(33.3)	140.0
Tax expense	(77)	(53)	(121)	(31.2)	128.3
Profit for the year	₩ 238	₩ 157	₩ 383	(34.0)	143.9

Comparison of 2014 to 2013

Our profit before income tax for this segment increased 140.0% from ₩210 billion in 2013 to ₩504 billion in 2014.

Interest income from our corporate banking operations decreased 8.7% from ₩4,391 billion in 2013 to ₩4,009 billion in 2014. This decrease was principally due to a decrease in average yields on corporate loans, mainly reflecting the lower interest rate environment in Korea in 2014, which was offset in part by an increase in the average volume of such loans.

Interest expense for this segment decreased 15.2% from ₩1,840 billion in 2013 to ₩1,560 billion in 2014. This decrease was principally due to a decrease in the average cost of time deposits held by corporate customers, which mainly reflected a decrease in the general level of interest rates in Korea from 2013 to 2014.

Net fee and commission income attributable to this segment decreased 1.7% from ₩241 billion in 2013 to ₩237 billion in 2014, primarily due to decreases in foreign currency related fees and guarantee fees.

Net other operating expense attributable to this segment decreased 14.1% from ₩1,055 in 2013 to ₩906 billion in 2014, mainly as a result of a decrease in expenses related to inter-segment borrowings.

General and administrative expenses attributable to this segment decreased 13.5% from ₩822 billion in 2013 to ₩711 billion in 2014, principally due to a decrease in labor expenses allocated to this segment based on the relative volume of loans attributable to this segment.

Provision for credit losses decreased 19.7% from ₩706 billion in 2013 to ₩567 billion in 2014, due mainly to an overall improvement in the asset quality of corporate loans, reflecting a decrease in delinquency rates.

Net other non-operating revenue attributable to this segment increased from ₩1 billion in 2013 and ₩2 billion in 2014.

Comparison of 2013 to 2012

Our profit before income tax for this segment decreased 33.3% from ₩315 billion in 2012 to ₩210 billion in 2013.

Interest income from our corporate banking operations decreased 15.4% from ₩5,190 billion in 2012 to ₩4,391 billion in 2013. This decrease was principally due to a decrease in the average yields on corporate loans, mainly reflecting the lower interest rate environment in Korea in 2013, which was enhanced by a decrease in the average volume of such loans.

Interest expense for this segment decreased 29.1% from ₩2,597 billion in 2012 to ₩1,840 billion in 2013. This decrease was principally due to a decrease in the average cost of time deposits held by corporate customers, which mainly reflected a decrease in the general level of interest rates in Korea in 2013.

Net fee and commission income attributable to this segment increased 3.4% from ₩233 billion in 2012 to ₩241 billion in 2013, due primarily to an increase in commissions on management of retirement annuity pensions.

Net loss from financial assets and liabilities at fair value through profit or loss attributable to this segment decreased by ₩1 billion from 2012 to 2013.

Net other operating expense attributable to this segment increased 21.1% from ₩871 billion in 2012 to ₩1,055 billion in 2013, mainly as a result of an increase in expenses related to inter-segment borrowings.

General and administrative expenses attributable to this segment increased 3.8% from ₩792 billion in 2012 to ₩822 billion in 2013, principally due to an increase in the average wages of our employees in this segment.

Provision for credit losses decreased 17.2% from ₩853 billion in 2012 to ₩706 billion in 2013, due mainly to an overall improvement in the asset quality of corporate loans reflecting a decrease in delinquency rates for corporate loans.

Net other non-operating revenue attributable to this segment decreased 83.3% from ₩6 billion in 2012 to ₩1 billion in 2013, primarily due to a decrease in net other non-operating revenue from Kookmin Bank (China) Ltd., a subsidiary of Kookmin Bank.

Other Banking Operations

This segment primarily consists of Kookmin Bank's banking operations other than retail and corporate banking operations, including treasury activities and Kookmin Bank's "back office" administrative operations. The following table shows, for the periods indicated, our income statement data for this segment:

	Year Ended December 31,			Percentage Change	
	2012	2013	2014	2013/2012	2014/2013
	(in billions of Won)			(%)	
Income statement data					
Interest income	₩1,623	₩1,418	₩1,261	(12.6)%	(11.1)%
Interest expense	(961)	(822)	(819)	(14.5)	(0.4)
Net fee and commission income	324	252	316	(22.2)	25.4
Net gain from financial assets and liabilities at fair value through profit or loss	757	693	376	(8.5)	(45.7)
Net other operating income (expense)	(144)	261	558	N/M [1]	113.8
General and administrative expenses	(811)	(835)	(966)	3.0	15.7
Provision for credit losses	(49)	(1)	(17)	(98.0)	1,600.0
Share of profit (loss) of associates	(6)	(203)	18	3,283.3	N/M [1]
Net other non-operating expense	(71)	(25)	(35)	(64.8)	40.0
Profit (loss) before income tax	662	738	692	11.5	(6.2)
Tax expense [2]	(107)	(242)	(156)	126.2	(35.5)
Profit for the year [2]	₩ 555	₩ 496	₩ 536	(10.6)	8.1

(1) "N/M" means not meaningful.

(2) The amounts for 2014 reflect a change in our accounting policies with respect to uncertain tax positions in 2014. Corresponding amounts for 2012 and 2013 have been restated to retroactively apply such change. See "—Overview—Changes in Accounting Policies."

Comparison of 2014 to 2013

Our profit before income tax for this segment decreased 6.2% from ₩738 billion in 2013 to ₩692 billion in 2014.

Interest income from our other banking operations decreased 11.1% from ₩1,418 billion in 2013 to ₩1,261 billion in 2014. This decrease was attributable primarily to a decrease in the average yields on debt securities in Kookmin Bank's financial investments portfolio, due mainly to the lower interest rate environment in Korea in 2014, as well as a decrease in the average volume of such debt securities.

Interest expense for this segment remained relatively constant at ₩819 billion in 2014 compared to ₩822 billion in 2013.

Net fee and commission income attributable to this segment increased 25.4% from ₩252 billion in 2013 to ₩316 billion in 2014, mainly due an increase other fees and commissions received, as well as an increase in fee and commission income from providing agency services to affiliates.

Net gain from financial assets and liabilities at fair value through profit or loss attributable to this segment decreased 45.7% from ₩693 billion in 2013 to ₩376 billion in 2014, principally as a result of a decrease in net gain on derivatives held-for-trading.

Net other operating income increased 113.8% from ₩261 billion in 2013 to ₩558 billion in 2014, mainly as a result of an increase in income from inter-segment lending.

General and administrative expenses attributable to this segment increased 15.7% from ₩835 billion in 2013 to ₩966 billion in 2014, principally due to an increase in salary expense.

Provision for credit losses increased seventeen-fold from ₩1 billion in 2013 to ₩17 billion in 2014, mainly reflecting an increase in provision for receivables from derivatives transactions.

Share of profit (loss) of associates attributable to this segment changed from a loss of ₩203 billion in 2013 to a profit of ₩18 billion in 2014, principally as a result of a decrease in loss on equity method investments from Kookmin Bank's investment in JSC Bank CenterCredit.

Net other non-operating expense attributable to this segment increased 40.0% from ₩25 billion in 2013 to ₩35 billion in 2014, primarily due to an increase other non-operating expense related to satisfaction of judgments in legal proceedings with respect to which the actual payments made were greater than the litigation allowances established.

Comparison of 2013 to 2012

Our profit before income tax for this segment increased 11.5% from ₩662 billion in 2012 to ₩738 billion in 2013.

Interest income from our other banking operations decreased 12.6% from ₩1,623 billion in 2012 to ₩1,418 billion in 2013. This decrease was attributable primarily to a decrease in the average yields on debt securities in Kookmin Bank's financial investments portfolio, due mainly to the lower interest rate environment in Korea in 2013.

Interest expense for this segment decreased 14.5% from ₩961 billion in 2012 to ₩822 billion in 2013. This decrease was principally due to a decrease in the average cost of debentures, which mainly reflected the decrease in the general level of interest rates in Korea in 2013.

Net fee and commission income attributable to this segment decreased 22.2% from ₩324 billion in 2012 to ₩252 billion in 2013, mainly due to decreases in brokerage fees and participation fees.

Net gain from financial assets and liabilities at fair value through profit or loss attributable to this segment decreased 8.5% from ₩757 billion in 2012 to ₩693 billion in 2013, principally as a result of a decrease in net gains on financial instruments held-for-trading.

Net other operating income (expense) changed from a net expense of ₩144 billion in 2012 to a net income of ₩261 billion in 2013, mainly as a result of an increase in income from inter-segment lending.

General and administrative expenses attributable to this segment increased 3.0% from ₩811 billion in 2012 to ₩835 billion in 2013, principally due to an increase in special termination benefits in connection with Kookmin Bank's voluntary early retirement program, as well as an increase in salary expense.

Provision for credit losses decreased by ₩48 billion from ₩49 billion in 2012 to ₩1 billion in 2013, mainly reflecting a decrease in provision for receivables from derivative transactions.

Share of loss of associates increased by ₩197 billion from ₩6 billion in 2012 to ₩203 billion in 2013, principally as a result of an increase in loss on equity method investments from Kookmin Bank's investment in JSC Bank CenterCredit.

Net other non-operating expense attributable to this segment decreased 64.8% from ₩71 billion in 2012 to ₩25 billion in 2013, primarily due to an increase in net other non-operating income, including income from employment insurance support and interest on delinquent leasehold deposits.

Credit Card Operations

This segment consists of credit card activities conducted by KB Kookmin Card. The following table shows, for the periods indicated, our income statement data for this segment:

	Year Ended December 31,			Percentage Change	
	2012	2013	2014	2013/2012	2014/2013
	(in billions of Won)			(%)	
Income statement data					
Interest income	₩1,388	₩1,436	₩1,354	3.5%	(5.7)%
Interest expense	(414)	(379)	(360)	(8.5)	(5.0)
Net fee and commission income	158	185	95	17.1	(48.6)
Net other operating expense	(83)	(39)	(32)	(53.0)	(17.9)
General and administrative expenses	(349)	(354)	(341)	1.4	(3.7)
Provision for credit losses	(315)	(345)	(278)	9.5	(19.4)
Net other non-operating expense	(4)	(2)	(5)	(50.0)	150.0
Profit before income tax	381	502	433	31.8	(13.7)
Tax expense	(90)	(118)	(100)	31.1	(15.3)
Profit for the year	₩ 291	₩ 384	₩ 333	32.0	(13.3)

Comparison of 2014 to 2013

Our profit before income tax for this segment decreased 13.7% from ₩502 billion in 2013 to ₩433 billion in 2014.

Interest income from our credit card operations decrease 5.7% from ₩1,436 billion in 2013 to ₩1,354 billion in 2014. This decrease was primarily due to a decrease in average yields on credit card receivables, mainly reflecting the lower interest rate environment in Korea in 2014, which was enhanced by a decrease in the average volume of such receivables.

Interest expense for this segment decreased 5.0% from ₩379 billion in 2013 to ₩360 billion in 2014. This decrease was primarily due to decreased funding costs for this segment in light of the lower interest rate environment in Korea in 2014.

Net fee and commission income attributable to this segment decreased 48.6% from ₩185 billion in 2013 to ₩95 billion in 2014, which resulted mainly from an increase in credit card and debit card related fee and commission expenses. Such increase was principally due to an increase in debit card related fee and commission expenses, including fees paid to value-added network providers, reflecting the increased use of debit cards.

Net other operating expense attributable to this segment decreased 17.9% from ₩39 billion in 2013 to ₩32 billion in 2014, primarily due to a decrease in accumulated reward points that are recognized as other operating expense, reflecting a change in our rewards program in 2014.

General and administrative expenses attributable to this segment decreased 3.7% from ₩354 billion in 2013 to ₩341 billion in 2014, mainly due to a decrease in other general and administrative expenses, including communication expenses and supplies expenses.

Provision for credit losses decreased 19.4% from ₩345 billion in 2013 to ₩278 billion in 2014, mainly due to an improvement in the overall asset quality of our credit card receivables, reflecting a decrease in delinquency rates.

Net other non-operating expense attributable to this segment increased 150.0% from ₩2 billion in 2013 to ₩5 billion in 2014, primarily due to an increase in miscellaneous other non-operating expense, which resulted mainly from an increase in expenses related to management of credit card receivables, as well as an increase in charitable donations by KB Kookmin Card.

Comparison of 2013 to 2012

Our profit before income tax for this segment increased by 31.8% from ₩381 billion in 2012 to ₩502 billion in 2013.

Interest income from our credit card operations increased by 3.5% from ₩1,388 billion in 2012 to ₩1,436 billion in 2013. This increase was primarily due to an increase in interest income from factored receivables, reflecting an increase in the average volume of such receivables.

Interest expense for this segment decreased 8.5% from ₩414 billion in 2012 to ₩379 billion in 2013. This decrease was primarily due to decreased funding costs for this segment in light of the lower interest rate environment in Korea in 2013.

Net fee and commission income attributable to this segment increased 17.1% from ₩158 billion in 2012 to ₩185 billion in 2013, which resulted mainly from an increase in fee and commission income from check cards.

Net other operating expense attributable to this segment decreased 53.0% from ₩83 billion in 2012 to ₩39 billion in 2013, primarily due to an increase in other operating income resulting from proceeds from sales of written-off credit card loans to the National Happiness Fund.

General and administrative expenses attributable to this segment increased 1.4% from ₩349 billion in 2012 to ₩354 billion in 2013, mainly due to an increase in salary expense.

Provision for credit losses increased 9.5% from ₩315 billion in 2012 to ₩345 billion in 2013, mainly reflecting a decrease in reversal of provisions primarily due to our sale of written-off credit card loans to the National Happiness Fund and an increase in impaired credit card balances due to a change in our charge-off policy in 2013 which increased the delinquency period for credit card balances before charge-off from three months to six months.

Net other non-operating expense attributable to this segment decreased 50.0% from ₩4 billion in 2012 to ₩2 billion in 2013, primarily due to a decrease in charitable donations by KB Kookmin Card.

Investment and Securities Operations

This segment consists primarily of securities brokerage, investment banking, securities investment and trading and other capital markets services conducted by KB Investment & Securities. The following table shows, for the periods indicated, our income statement data for this segment:

	Year Ended December 31,			Percentage Change	
	2012	2013	2014	2013/2012	2014/2013
	(in billions of Won)			(%)

(1) Represents income tax attributable to KB Investment & Securities.

Comparison of 2014 to 2013

Our profit before income tax for this segment increased 129.4% from ₩17 billion in 2013 to ₩39 billion in 2014.

Interest income from this segment increased 9.8% from ₩41 billion in 2013 to ₩45 billion in 2014. This increase was primarily due to an increase in the average volume of loans secured by securities.

Interest expense for this segment increased 58.8% from ₩17 billion in 2013 to ₩27 billion in 2014, which mainly reflected an increase in the average volume of repurchase agreements.

Net fee and commission income attributable to this segment remained constant at ₩76 billion in 2013 and 2014.

Net gain from financial assets and liabilities at fair value through profit or loss attributable to this segment increased 147.4% from ₩19 billion in 2013 to ₩47 billion in 2014, principally as a result of an increase in net gain on financial assets held-for-trading and derivatives held-for-trading.

Net other operating income attributable to this segment increased five-fold from ₩1 billion in 2013 to ₩5 billion in 2014, principally as a result of an increase in net gain on foreign exchange transactions.

General and administrative expenses attributable to this segment increased 7.3% from ₩96 billion in 2013 to ₩103 billion in 2014, principally due to an increase in performance-based salary expense.

Provision for credit losses decreased 20.0% from ₩5 billion in 2013 to ₩4 billion in 2014.

Net other non-operating expense attributable to this segment decreased from ₩2 billion in 2013 to nil in 2014.

Comparison of 2013 to 2012

Our profit before income tax for this segment decreased 29.2% from ₩24 billion in 2012 to ₩17 billion in 2013.

Interest income from this segment increased 7.9% from ₩38 billion in 2012 to ₩41 billion in 2013. This increase was primarily due to an increase in the average volume of available-for-sale financial assets.

Interest expense for this segment decreased 10.5% from ₩19 billion in 2012 to ₩17 billion in 2013, which mainly reflected a general decrease in the average cost of our debts in light of the lower interest rate environment in Korea, which was enhanced by a decrease in the average volume of call money and customers’ deposits.

Net fee and commission income attributable to this segment decreased 11.6% from ₩86 billion in 2012 to ₩76 billion in 2013, principally as a result of a decrease in commissions relating to securities underwriting activities.

Net gain from financial assets and liabilities at fair value through profit or loss attributable to this segment decreased 51.3% from ₩39 billion in 2012 to ₩19 billion in 2013, principally as a result of a decrease in net gain on financial assets held-for-trading and derivatives held-for-trading.

Net other operating income attributable to this segment decreased 80.0% from ₩5 billion in 2012 to ₩1 billion in 2013, primarily as a result of a reversal of provisions for litigation in 2012 that was not repeated in 2013.

General and administrative expenses attributable to this segment decreased by 18.6% from ₩118 billion in 2012 to ₩96 billion and 2013, principally due to a decrease in performance-based salary expense.

Provision for credit losses increased 25.0% from ₩4 billion in 2012 to ₩5 billion in 2013.

Net other non-operating expense attributable to this segment decreased 33.3% from ₩3 billion in 2012 to ₩2 billion in 2012.

Life Insurance Operations

This segment consists of life insurance and wealth management services provided by KB Life Insurance. The following table shows, for the periods indicated, our income statement data for this segment:

	Year Ended December 31,			Percentage Change	
	2012	2013	2014	2013/2012	2014/2013
	(in billions of Won)			(%)

(1) "N/M" means not meaningful.

(2) Represents income tax attributable to KB Life Insurance.

Comparison of 2014 to 2013

Our profit before income tax for this segment remained constant at ₩12 billion in 2013 and 2014.

Interest income from this segment increased 13.5% from ₩200 billion in 2013 to ₩227 billion in 2014, primarily due to an increase in the average volume of held-to-maturity debt securities held by KB Life Insurance, particularly government agency debt securities.

Net gain from financial assets and liabilities at fair value through profit or loss attributable to this segment decreased 44.4% from ₩18 billion in 2013 to ₩10 billion in 2014, which mainly reflected a decrease in gains on sales of beneficiary certificates.

Net other operating expense attributable to this segment increased 5.8% from ₩154 billion in 2013 to ₩163 billion in 2014, principally due to a decrease in income related to insurance as the number of insurance policies cancelled or partially withdrawn increased, mainly reflecting a downturn in the economy.

General and administrative expenses attributable to this segment increased 17.6% from ₩51 billion in 2013 to ₩60 billion in 2014, primarily due to increases in rental expense and salary expense.

Provision for credit losses remained constant at ₩1 billion in 2013 and 2014.

Net other non-operating expense attributable to this segment changed from nil in 2013 to ₩1 billion in 2014.

Comparison of 2013 to 2012

Our profit before income tax for this segment decreased 45.5% from ₩22 billion in 2012 to ₩12 billion in 2013.

Interest income for this segment increased 4.2% from ₩192 billion in 2012 to ₩200 billion in 2013, primarily due to an increase in the average volume of held-to-maturity debt securities held by KB Life Insurance, particularly government agency debt securities.

Net gain from financial assets and liabilities at fair value through profit or loss attributable to this segment increased 125.0% from ₩8 billion in 2012 to ₩18 billion in 2013, which mainly reflected an increase in gains on sales of beneficiary certificates.

Net other operating expense attributable to this segment increased 16.7% from ₩132 billion in 2012 to ₩154 billion in 2013, principally due to an increase in the amortization expense of deferred acquisition costs.

General and administrative expenses attributable to this segment increased 13.3% from ₩45 billion in 2012 to ₩51 billion in 2013, primarily due to an increase in expenses relating to tax and dues.

Provision for credit losses changed from nil in 2012 to ₩1 billion in 2013.

Net other non-operating expense attributable to this segment decreased from ₩1 billion in 2012 to nil in 2013.

Other

"Other" includes the operations of our holding company and all of our subsidiaries that were consolidated under IFRS as issued by the IASB as of December 31, 2014 except Kookmin Bank, KB Kookmin Card, KB Investment & Securities and KB Life Insurance, including principally KB Asset Management, KB Real Estate Trust, KB Investment, KB Credit Information, KB Data System, KB Savings Bank and KB Capital (commencing in 2014). See "—Overview—Acquisitions." The following table shows, for the periods indicated, our income statement data for this segment:

	Year Ended December 31, (in billions of Won)			Percentage Change (%)	
	2012	2013	2014	2013/2012	2014/2013
Income statement data

(1) "N/M" means not meaningful.

(2) Represents income tax attributable to our holding company and all of our subsidiaries that were consolidated under IFRS as issued by the IASB except Kookmin Bank, KB Kookmin Card, KB Investment & Securities and KB Life Insurance.

Comparison of 2014 to 2013

Our profit before income tax for this segment increased 62.6% from ₩91 billion in 2013 to ₩148 billion in 2014.

Interest income attributable to this segment increased 207.5% from ₩106 billion in 2013 to ₩326 billion in 2014. This increase was primarily due to an increase in interest on loans, mainly reflecting the addition of KB Capital to this segment from 2014.

Interest expense attributable to this segment increased 392.0% from ₩25 billion in 2013 to ₩123 billion in 2014, principally reflecting the addition of KB Capital to this segment from 2014.

Net fee and commission income attributable to this segment increased 13.6% from ₩118 billion in 2013 to ₩134 billion in 2014, mainly as the result of increases in rental fees and lease fees, mainly reflecting the addition of KB Capital to this segment from 2014.

Net gain from financial assets and liabilities at fair value through profit or loss attributable to this segment decreased 10.3% from ₩29 billion in 2013 to ₩26 billion in 2014, principally due to a decrease in net gain on valuation of derivatives held by KB Mezzanine Private Securities Fund I, which was partially offset by an increase in net gain on valuation of financial assets held for trading by KStar KTB ETF (Bond).

Net other operating income attributable to this segment increased 75.0% from ₩40 billion in 2013 to ₩70 billion in 2014, primarily as a result of an increase in other operating income from sales of non-performing loans held by KB Capital and KB Savings Bank.

General and administrative expenses attributable to this segment increased 33.1% from ₩142 billion in 2013 to ₩189 billion in 2014, which mainly reflected the addition of KB Capital to this segment from 2014.

Provision for credit losses increased 103.6% from ₩28 billion in 2013 to ₩57 billion in 2014, principally reflecting the addition of KB Capital to this segment from 2014.

Share of loss of associates attributable to this segment decreased 63.2% from ₩38 billion in 2013 to ₩14 billion in 2014, primarily due to a decrease in impairment losses attributable to this segment.

Net other non-operating revenue (expense) attributable to this segment changed from a revenue of ₩31 billion in 2013 to an expense of ₩25 billion in 2014, primarily due to a decrease in other non-operating revenue from KB Asset Management, which was enhanced by an increase in impairment losses on goodwill recognized by KB Savings Bank.

Comparison of 2013 to 2012

Our profit before income tax for this segment increased 44.4% from ₩63 billion in 2012 to ₩91 billion in 2013.

Interest income attributable to this segment decreased 13.8% from ₩123 billion in 2012 to ₩106 billion in 2013. This decrease was primarily due to a decrease in the average volume of deposits attributable to KB Savings Bank.

Interest expense attributable to this segment decreased 46.8% from ₩47 billion in 2012 to ₩25 billion in 2013, principally reflecting a decrease in the average volume of time deposits attributable to KB Savings Bank.

Net fee and commission income attributable to this segment increased 21.6% from ₩97 billion in 2012 to ₩118 billion in 2013, mainly as the result of an increase in fees received by KB Asset Management.

Net gain from financial assets and liabilities at fair value through profit or loss attributable to this segment increased 16.0% from ₩25 billion in 2012 to ₩29 billion in 2013, principally due to an increase in gain on valuation of derivatives held by KB Mezzanine Private Securities Fund 1.

Net other operating income attributable to this segment increased 8.1% from ₩37 billion in 2012 to ₩40 billion in 2013, primarily as a result of an increase in other operating income from sales of non-performing loans held by KB Savings Bank.

General and administrative expenses attributable to this segment increased 6.8% from ₩133 billion in 2012 to ₩142 billion in 2013, which mainly reflected an increase in salary expense for KB Asset Management and the inclusion of Yehansoul Savings Bank in this segment in 2013.

Provision for credit losses attributable to this segment changed from a reversal of provision of ₩6 billion in 2012 to a provision of ₩28 billion in 2013, principally due to an increase in provision for credit losses relating to the trust account lending activities of KB Real Estate Trust.

Share of profit of associates attributable to this segment changed from nil in 2012 to a loss of ₩38 billion in 2013, primarily due to an increase in impairment losses attributable to this segment.

Net other non-operating revenue (expense) attributable to this segment changed from an expense of ₩45 billion in 2012 to a revenue of ₩31 billion in 2013, primarily due to an increase in other non-operating revenue from KB Asset Management.

(1) "N/M" means not meaningful.

(2) Includes investments in associates and joint ventures, investment properties, intangible assets, current income tax assets, deferred income tax assets, assets held for sale and other assets.

(3) The amount as of December 31, 2014 reflects a change in our accounting policy with respect to uncertain tax positions in 2014. Corresponding amounts as of December 31, 2012 and 2013 have been restated to retroactively apply such change. See "—Overview—Changes in Accounting Policies" and Note 2.1 of the notes to our consolidated financial statements included elsewhere in this annual report.

For further information on our assets, see "Item 4.B. Business Overview—Assets and Liabilities."

Comparison of 2014 to 2013

Our total assets increased 5.5% from ₩292,168 billion as of December 31, 2013 to ₩308,356 billion as of December 31, 2014, principally due to a 5.7% increase in loans from ₩219,001 billion as of December 31, 2013 to ₩231,450 billion as of December 31, 2014. This increase in loans was mainly the result of a 5.7% increase in loans in Won from ₩189,516 billion as of December 31, 2013 to ₩200,345 billion as of December 31, 2014, which was offset in part by a 35.7% decrease in bonds purchased under repurchase from ₩1,683 billion as of December 31, 2013 to ₩1,082 billion as of December 31, 2014, a 14.1% decrease in loans in foreign currencies from ₩3,055 billion as of December 31, 2013 to ₩2,624 billion as of December 31, 2014 and a 58.1% decrease in call loans from ₩697 billion as of December 31, 2013 to ₩292 billion as of December 31, 2014.

Comparison of 2013 to 2012

Our total assets increased 2.1% from ₩286,070 billion as of December 31, 2012 to ₩292,168 billion as of December 31, 2013, principally due to a 2.5% increase in loans from ₩213,645 billion as of December 31, 2012 to ₩219,001 billion as of December 31, 2013 and a 39.6% increase in cash and due from financial institutions from ₩10,593 billion as of December 31, 2012 to ₩14,793 billion as of December 31, 2013. The effect of these increases was partially offset by a 4.4% decrease in financial investments from ₩36,467 billion as of December 31, 2012 to ₩34,849 billion as of December 31, 2013 and a 12.2% decrease in other assets from ₩10,604 billion as of December 31, 2012 to ₩9,316 billion as of December 31, 2013.

Liabilities and Equity

The following table sets forth, as of the dates indicated, the principal components of our liabilities and our equity:

	As of December 31,			Percentage Change	
	2012	2013	2014	2013/2012	2014/2013
	(in billions of Won)			(%)	
Liabilities:					
Financial liabilities at fair value through profit or loss	₩ 1,851	₩ 1,115	₩ 1,819	(39.8)%	63.1%
Deposits	197,346	200,882	211,549	1.8	5.3
Debts	15,965	14,101	15,865	(11.7)	12.5
Debentures	24,270	27,040	29,201	11.4	8.0
Provisions	670	678	614	1.2	(9.4)
Other liabilities (1)	20,886	22,369	21,795	7.1	(2.6)
Total liabilities	260,988	266,185	280,843	2.0	5.5
Equity:					
Capital stock	1,932	1,932	1,932	—	—
Capital surplus	15,840	15,855	15,855	0.1	—
Accumulated other comprehensive income	295	336	461	13.9	37.2
Retained earnings (2)	6,820	7,860	9,067	15.2	15.4
Equity attributable to stockholders	24,887	25,983	27,315	4.4	5.1
Non-controlling interests	195	—	198	(100.0)	N/M (3)
Total equity	25,082	25,983	27,513	3.6	5.9
Total liabilities and equity	₩286,070	₩292,168	₩308,356	2.1	5.5

(1) Includes derivative financial liabilities, current income tax liabilities, deferred income tax liabilities, defined benefit liabilities and other liabilities.

(2) The amount as of December 31, 2014 reflects a change in our accounting policy with respect to uncertain tax positions in 2014. Corresponding amounts as of December 31, 2012 and 2013 have been restated to retroactively apply such change. See "—Overview—Changes in Accounting Policies" and Note 2.1 of the notes to our consolidated financial statements included elsewhere in this annual report.

(3) "N/M" means not meaningful.

Comparison of 2014 to 2013

Our total liabilities increased 5.5% from ₩266,185 billion as of December 31, 2013 to ₩280,843 billion as of December 31, 2014. The increase was primarily due to a 5.3% increase in deposits from ₩200,882 billion as of December 31, 2013 to ₩211,549 billion as of December 31, 2014. Our deposits increased mainly as a result of an increase in demand deposits.

Our total equity increased 5.9% from ₩25,983 billion as of December 31, 2013 to ₩27,513 billion as of December 31, 2014. This increase resulted principally from an increase in our retained earnings, which was attributable to the profit we generated in 2014.

Comparison of 2013 to 2012

Our total liabilities increased 2.0% from ₩260,988 billion as of December 31, 2012 to ₩266,185 billion as of December 31, 2013. The increase was primarily due to increases in deposits and debentures. Our deposits increased 1.8% from ₩197,346 billion as of December 31, 2012 to ₩200,882 billion as of December 31, 2013, mainly as a result of an increase in demand deposits. Our debentures increased 11.4% from ₩24,270 billion as of December 31, 2012 to ₩27,040 billion as of December 31, 2013, principally due to an increase in our debentures in Won and an increase in discount or premium on debentures in Won.

Our total equity increased by 3.6% from ₩25,082 billion as of December 31, 2012 to ₩25,983 billion as of December 31, 2013. This increase resulted principally from an increase in our retained earnings, which was attributable to the profit we generated in 2013.

Liquidity

Our primary source of funding has historically been and continues to be deposits. Deposits amounted to ₩197,346 billion, ₩200,882 billion and ₩211,549 billion as of December 31, 2012, 2013 and 2014, which represented approximately 83.1%, 83.0% and 82.4% of our total funding, respectively. We have been able to use customer deposits to finance our operations generally, including meeting a portion of our liquidity requirements. Although the majority of deposits are short-term, it has been our experience that the majority of our depositors generally roll over their deposits at maturity, thus providing us with a stable source of funding. However, in the event that a substantial number of our depositors do not roll over their deposits or otherwise decide to withdraw their deposited funds, we would need to place increased reliance on alternative sources of funding, some of which may be more expensive than customer deposits, in order to finance our operations. See "Item 3.D. Risk Factors—Risks relating to liquidity and capital management—Our funding is highly dependent on short-term deposits, which dependence may adversely affect our operations." In particular, we may increase our utilization of alternative funding sources such as short-term borrowings and cash and cash equivalents (including funds from maturing loans), as well as liquidating our positions in financial assets and using the proceeds to fund parts of our operations, as necessary.

We also obtain funding through debentures and debts to meet our liquidity needs. Debentures represented 10.2%, 11.2% and 11.4% of our total funding as of December 31, 2012, 2013 and 2014, respectively. Debts represented 6.7%, 5.8% and 6.2% of our total funding as of December 31, 2012, 2013 and 2014, respectively. For further information on our sources of funding, see "Item 4.B. Business Overview—Assets and Liabilities—Funding."

The Financial Services Commission of Korea requires each financial holding company and bank in Korea to maintain specific Won and foreign currency liquidity ratios. These ratios require us and Kookmin Bank to keep the ratio of liquid assets to liquid liabilities above certain minimum levels. For a description of these requirements, see "Item 4.B. Business Overview—Supervision and Regulation—Principal Regulations Applicable to Financial Holding Companies—Liquidity" and "Item 4.B. Business Overview—Supervision and Regulation—Principal Regulations Applicable to Banks—Liquidity."

We are exposed to liquidity risk arising from withdrawals of deposits and maturities of our debentures and debts, as well as the need to fund our lending, trading and investment activities and the management of our trading positions. The goal of liquidity management is for us to be able, even under adverse conditions, to meet all of our liability repayments on time and fund all investment opportunities. For an explanation of how we manage our liquidity risk, see "Item 11. Quantitative and Qualitative Disclosures about Market Risk—Liquidity Risk Management."

We are a financial holding company, and substantially all of our operations are in our subsidiaries. Accordingly, we rely on distributions from our subsidiaries, direct borrowings and issuances of debt and equity securities to fund our liquidity obligations. We received aggregate dividends of ₩688 billion, ₩282 billion and ₩509 billion from our subsidiaries in 2012, 2013 and 2014, respectively. See "Item 3.D. Risk Factors—Risks relating to our financial holding company structure and strategy."

Contractual Cash Obligations

The following table sets forth our contractual cash obligations (excluding short-term borrowings) as of December 31, 2014.

	Payments Due by Period				
	Total	1 Year or Less	1-3 Years	3-5 Years	More Than 5 Years
	(in billions of Won)				
Long-term borrowing obligations [1][2]	₩ 34,756	₩ 9,552	₩16,776	₩3,806	₩4,622
Operating lease obligations [3]	262	124	82	22	34
Capital lease obligations	25	19	3	2	1
Pension obligations	195	195	—	—	—
Deposits [2][4]	140,225	127,291	8,302	1,365	3,267
Total	₩175,463	₩137,181	₩25,163	₩5,195	₩7,924

(1) Includes debt and debentures with original maturities of one year or more.

(2) Includes estimated future interest payments, which have been estimated using contractual interest rates and scheduled contractual maturities of the outstanding debt obligations and borrowings as of December 31, 2014. In order to calculate future interest payments on debt with floating rates, we used contractual interest rates as of December 31, 2014.

(3) This line item is not included within our consolidated statements of financial position.

(4) Excluding demand deposits.

Commitments and Guarantees

The following table sets forth our commitments and guarantees as of December 31, 2014. These commitments and guarantees are not included within our consolidated statements of financial position.

	Payments Due by Period				
	Total	1 Year or Less	1-3 Years	3-5 Years	More Than 5 Years
	(in billions of Won)				
Financial guarantees [1]	₩ 4,460	₩ 1,055	₩3,283	₩ 58	₩ 64
Confirmed acceptances and guarantees	5,159	3,174	1,664	244	77
Commitments	96,317	94,399	1,117	431	370
Total	₩105,936	₩98,628	₩6,064	₩733	₩511

(1) Includes ₩3,883 billion of irrevocable commitments to provide contingent liquidity credit lines to special purpose entities for which we serve as the administrator. See Note 39 of the notes to our consolidated financial statements.

Capital Adequacy

Kookmin Bank is subject to capital adequacy requirements of the Financial Services Commission applicable to Korean banks. The requirements applicable prior to December 2013 were formulated based on Basel II, which was first published by the Basel Committee on Banking Supervision, Bank for International Settlements in 2004. The requirements applicable commencing in December 2013 pursuant to amended Financial Services Commission regulations promulgated in July 2013 were formulated based on Basel III, which was first introduced by the Basel Committee on Banking Supervision, Bank for International Settlements in December 2009. Under the amended Financial Services Commission regulations, all banks in Korea are required to maintain certain minimum ratios of common equity Tier I capital, total Tier I capital and total Tier I and Tier II capital to risk-weighted assets. See "Item 4.B. Business Overview—Supervision and Regulation—Principal Regulations Applicable to Banks—Capital Adequacy."

As of December 31, 2014, Kookmin Bank's total Tier I and Tier II capital adequacy ratio was 15.97%.

The following table sets forth a summary of Kookmin Bank's capital and capital adequacy ratios as of December 31, 2012 based on Basel II and as of December 31, 2013 and 2014 based on Basel III.

	As of December 31,		
	2012 (1)	2013	2014
	(in billions of Won, except percentages)		
Tier I capital:	₩ 16,141	₩ 18,502	₩ 19,621
Common equity Tier I capital	—	18,502	19,621
Paid-in capital	2,022	2,022	2,022
Capital reserves	5,042	5,220	5,220
Retained earnings	9,622	11,237	12,260
Non-controlling interests in consolidated subsidiaries	1	—	—
Others	(546)	23	119
Additional Tier I capital	—	—	—
Tier II capital:	5,250	4,122	3,801
Revaluation reserves	177	—	—
Allowances for credit losses (2)	987	843	886
Hybrid debt	73	43	31
Subordinated debt	3,611 (3)	3,236	2,884
Valuation gain on investment securities	83	—	—
Others	319	—	—
Total core and supplementary capital	21,391	22,624	23,422
Risk-weighted assets	148,544	146,743	146,690
Credit risk:			
On-balance sheet	127,462	125,044	124,325
Off-balance sheet	6,622	6,787	8,128
Market risk	4,693	4,012	3,445
Operational risk	9,767	10,900	10,792
Total Tier I and Tier II capital adequacy ratio	14.40%	15.42%	15.97%
Tier I capital adequacy ratio	10.87%	12.61%	13.38%
Common equity Tier I capital adequacy ratio	—	12.61%	13.38%
Tier II capital adequacy ratio	3.53%	2.81%	2.59%

(1) With effect from December 1, 2013, the Financial Services Commission adopted amended guidelines that implemented capital adequacy requirements in Korea based on Basel III. Amounts and ratios as of December 31, 2012 were computed in accordance with previously applicable guidelines based on Basel II and therefore are not directly comparable to corresponding amounts and ratios as of December 31, 2013 and 2014.

(2) Under the standardized approach, allowances for credit losses in respect of credits classified as normal or precautionary are used to calculate Tier II capital only to the extent they represent up to 1.25% of credit risk-weighted assets. Under the internal ratings-based approach, allowances for credit losses, less estimated losses, are used to calculate Tier II capital only to the extent they represent up to 0.6% of credit risk-weighted assets.

(3) Subordinated debt up to an amount equal to 50% of Tier I capital may be used in the calculation of Tier II capital.

In addition, we, as a bank holding company, are required to maintain certain minimum capital adequacy ratios pursuant to applicable regulations of the Financial Services Commission. See "Item 4.B. Business Overview—Supervision and Regulation—Principal Regulations Applicable to Financial Holding Companies—Capital Adequacy."

The following table sets forth a summary of our consolidated capital adequacy ratio as of December 31, 2013 and 2014, based on IFRS and applicable regulatory reporting standards:

	As of December 31,	
	2013	2014
	(in billions of Won, except percentages)	
Tier I capital		
Common equity Tier I capital	₩ 22,694	₩ 24,062
Additional Tier I capital	—	186
Total Tier I capital	₩ 22,694	₩ 24,248
Tier II capital	4,603	4,099
Risk-weighted assets	₩177,514	₩182,486
Total Tier I and Tier II capital adequacy ratio	15.38%	15.53%
Tier I capital adequacy ratio	12.78%	13.29%
Common equity Tier I capital adequacy ratio	12.78%	13.19%
Tier II capital adequacy ratio	2.60%	2.24%

Recent Accounting Pronouncements

See Note 2 of the notes to our consolidated financial statements included elsewhere in this annual report for a description of recent accounting pronouncements under IFRS as issued by the IASB that have been issued but are not yet effective.

Item 5.C. *Research and Development, Patents and Licenses, etc.*

Not applicable.

Item 5.D. *Trend Information*

These matters are discussed under Item 5.A. and Item 5.B. above where relevant.

Item 5.E. *Off-Balance Sheet Arrangements*

See "Item 5B. Liquidity and Capital Resources—Financial Condition—Contractual Cash Obligations" and "Item 5B. Liquidity and Capital Resources—Financial Condition—Commitments and Guarantees."

Item 5.F. *Tabular Disclosure of Contractual Obligations*

See "Item 5B. Liquidity and Capital Resources—Financial Condition—Contractual Cash Obligations."

Item 5.G. *Safe Harbor*

See "Forward-Looking Statements."

Item 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

Item 6.A. *Directors and Senior Management*

Board of Directors

Our board of directors, currently consisting of one executive director, one non-standing director and seven non-executive directors, has the ultimate responsibility for the management of our affairs.

Our articles of incorporation provide that:

- we may have no more than 30 directors;
- the number of executive directors must be less than 50% of the total number of directors; and
- we have five or more non-executive directors.

The term of office for each director is renewable and is subject to the Korean Commercial Code, the Financial Holding Company Act and related regulations.

Our board of directors meets on a regular basis to discuss and resolve material corporate matters. Additional extraordinary meetings may also be convened at the request of any director or any committee that serves under the board of directors.

The names and positions of our directors are set forth below. The business address of all of the directors is our registered office at 84, Namdaemoon-ro, Jung-gu, Seoul 100-703, Korea.

Executive Director

The table below identifies our executive director as of the date of this annual report:

Name	Date of Birth	Position	Director Since	End of Term
Jong Kyoo Yoon . .	October 13, 1955	Chairman and Chief Executive Officer	November 21, 2014	November 20, 2017

Our executive director does not have any significant activities outside KB Financial Group.

Jong Kyoo Yoon is our chairman and chief executive officer. He has been an executive director since November 2014. Mr. Yoon also serves as the president and chief executive officer of Kookmin Bank. He previously served as our deputy president, chief financial officer and chief risk officer, a senior advisor of Kim & Chang, a senior executive vice president, chief financial officer and chief strategic officer of Kookmin Bank and a senior partner of Samil PricewaterhouseCoopers Korea. Mr. Yoon received a B.A. in business administration from Sungkyunkwan University, an M.B.A. from Seoul National University and a Ph.D. in business administration from Sungkyunkwan University.

Non-standing Director

The table below identifies our non-standing director as of the date of this annual report:

Name	Date of Birth	Position	Director Since	End of Term
Hong Lee	April 7, 1958	Non-standing director; Senior Executive Vice President of Kookmin Bank	March 27, 2015	March 26, 2017

Hong Lee has been a non-standing director since March 2015. He has also served as a senior executive vice president and the head of the sales group at Kookmin Bank since 2015. Mr. Lee previously served as a senior executive vice president of the corporate banking division at Kookmin Bank. He received a B.A. in linguistics from Seoul National University and an M.B.A. from Helsinki School of Economics.

Non-executive Directors

Our non-executive directors are selected based on the candidates' knowledge and experience in diverse areas, such as financial services, accounting, finance, law and regulation, risk management, human resources and information technology. All seven non-executive directors below were nominated by our Non-executive Director Nominating Committee and approved by our shareholders.

The table below identifies our non-executive directors as of the date of this annual report:

Name	Date of Birth	Position	Director Since	Year Term Ends [1]
Young Hwi Choi	October 28, 1945	Non-executive Director	March 27, 2015	2016
Woon Youl Choi	April 2, 1950	Non-executive Director	March 27, 2015	2016
Suk Ryul Yoo	April 21, 1950	Non-executive Director	March 27, 2015	2016
Michael Byungnam Lee	September 24, 1954	Non-executive Director	March 27, 2015	2016
Jae Ha Park	November 25, 1957	Non-executive Director	March 27, 2015	2016
Eunice Kyonghee Kim	March 29, 1959	Non-executive Director	March 27, 2015	2016
Jong Soo Han	October 16, 1960	Non-executive Director	March 27, 2015	2016

(1) The date on which each term will end will be the date of the general stockholders' meeting in the relevant year unless otherwise specified.

Young Hwi Choi has been a non-executive director since March 2015. He previously served as the president and chief executive officer of Shinhan Financial Group Co., Ltd., a deputy president of Shinhan Bank and a deputy director at the former Ministry of Finance. Mr. Choi received a B.A. in economics from Sungkyunkwan University.

Woon Youl Choi has been a non-executive director since March 2015. He is currently a professor at Sogang University. Mr. Choi previously served as an executive vice president of Sogang University, a member of the Korea Monetary Board, the president of the Korea Money and Finance Association and the president of the Korean Securities Association. He received a B.A. in business administration from Seoul National University and an M.B.A. and a Ph.D. in finance from the University of Georgia.

Suk Ryul Yoo has been a non-executive director since March 2015. He previously served as the chairman of the Credit Finance Association and the president and chief executive officer of Samsung Total Petrochemicals Co., Ltd., Samsung Card Co., Ltd., Samsung Life Insurance Co., Ltd., Samsung Securities Co., Ltd. and Samsung Capital Co., Ltd. Mr. Yoo received a B.A. in business administration from Seoul National University and an M.S. in industrial engineering from Korea Advanced Institute of Science and Technology.

Michael Byungnam Lee has been a non-executive director since March 2015. He is currently the president and chief executive officer of LG Academy. Mr. Lee previously served as an executive vice president of human resources at LG Corporation, a vice president of LG Academy and an assistant professor at Georgia State University and California State University. He received a B.A. in economics from Sogang University, an M.L.H.R. from Ohio Statement University and a Ph.D. in industrial relations from the University of Minnesota.

Jae Ha Park has been a non-executive director since March 2015. He is currently a senior research fellow at the Korea Institute of Finance. Mr. Park previously served as a deputy dean of the Asian Development Bank Institute, a vice president of the Korea Institute of Finance, a vice chairman of the Korea Money and Finance Association and a senior counselor to the Minister of the former Ministry of Finance and Economy. He has also served as a non-executive director of Shinhan Bank, Daewoo Securities Co., Ltd. and Jeonbuk Bank. Mr. Park received a B.A. in economics from Seoul National University and a Ph.D. in economics from Pennsylvania State University.

Eunice Kyonghee Kim has been a non-executive director since March 2015. She is currently a professor at Ewha Law School. Ms. Kim previously served as the deputy chief executive officer and chief compliance officer of Hana

Financial Group Inc., a managing director and chief compliance officer of Citibank Japan Inc., an executive vice president and chief legal officer of Citibank Korea Inc. and a vice-chairperson of the International Association of Korean Lawyers. She received a B.A. in Chinese studies and administrative science from Yale University and a J.D. from Yale Law School.

Jongsoo Han has been a non-executive director since March 2015. He is currently a professor at Ewha Womans University. Mr. Han previously served as a member of the Korea Accounting Deliberating Council of the Financial Services Commission, a vice president of Korea Accounting Association and a member of the Korea Accounting Standards Board. Mr. Han received a B.A. in business administration and an M.B.A. from Yonsei University and a Ph.D. in accounting from Joseph M. Katz Graduate School of Business, University of Pittsburgh.

Any director having an interest in a transaction that is subject to approval by the board of directors may not vote at the meeting during which the board approves the transaction.

Executive Officers

The table below identifies our senior executive officers who are not executive directors as of the date of this annual report:

Name	Date of Birth	Position
Jong-Hee Yang	June 10,1961	Deputy President; Financial Planning Department, Investor Relations Department and Human Resources Department
Jeong Rim Park	November 27, 1963	Deputy President; Risk Management Department
Ki Heon Kim	October 17, 1955	Deputy President; Digital Finance Department
Jae Hong Park	April 10, 1967	Senior Managing Director; Marketing & Synergy Planning Department, Strategic Planning Department and KB Research
Ki Bum Lee	November 24, 1957	Senior Managing Director; Audit Department and Information Security Department
Young-Tae Park	December 24,1961	Managing Director; Marketing & Synergy Planning Department
Kyu Sul Choi	August 16, 1960	Managing Director; Investor Relations Department
Kyung Yup Cho	September 9, 1961	Managing Director; KB Research
Ki Hwan Kim	March 20, 1963	Managing Director; Public Relations Department
Minkyu Chung	February 7, 1970	Managing Director and Chief Compliance Officer

None of the executive officers has any significant activities outside KB Financial Group.

Jong-Hee Yang is a deputy president and oversees the Financial Planning Department, Investor Relations Department and Human Resources Department. He previously served as a managing director, the chief information security officer and the head of our Office of the Board of Directors and Strategic Planning Department. Mr. Yang received a B.A. in Korean history from Seoul National University.

Jeong Rim Park is a deputy president and oversees the Risk Management Department. She also serves as a senior executive vice president of Kookmin Bank and heads its risk management group. Ms. Park previously served as a senior managing director of Kookmin Bank and headed its wealth management division. She received a B.A. in business administration and an M.B.A. from Seoul National University.

Ki Heon Kim is a deputy president and oversees the Digital Finance Department. He also serves as a senior executive vice president of Kookmin Bank and heads its information technology group. Mr. Kim previously served as an expert for the financial services division of Samsung SDS Co., Ltd. and the head of branch offices of Peace Bank of Korea. He received a B.A. in accounting from Hanyang University.

Jae Hong Park is a senior managing director and oversees the Marketing & Synergy Planning Department, Strategic Planning Department and KB Research. He previously served as the head of the future strategy department at Hanwha Life Insurance Co., Ltd., the head of the global business department at Samsung Fire & Marine Insurance Co., Ltd. and a partner at McKinsey & Company. He received a B.A. in economics from Seoul National University and a Ph.D. in economics from Princeton University.

Ki-Bum Lee is a senior managing director and oversees Audit Department and the Information Security Department. He also serves as a non-standing director of KB Kookmin Card Co., Ltd. Mr. Lee previously served as our chief risk officer, the head of Kookmin Bank's audit department, the chief compliance officer of Kookmin Bank and the head of Gyeongseo and Bucheon regional offices of Kookmin Bank. He received a B.A. in German language and literature from Sogang University.

Young-Tae Park is a managing director and heads the Marketing & Synergy Planning Department. He previously served as the head of Kookmin Bank's marketing department and the head of several branch offices of Kookmin Bank. He received a B.A. and an M.S. in economics from Korea University.

Kyu Sul Choi is a managing director and heads the Investor Relations Department. He previously served as the head of Kookmin Bank's investor relations department and asset and liability management department and the head of Korea First Bank's treasury department. He received a B.A. in business administration from Yonsei University.

Kyung Yup Cho is a managing director and heads KB Research. He previously served as a senior editor at MaeKyung Media Group and the head of financial news, political news, social affairs and international news at Maeil Business Newspaper. He received a B.A. in business administration and a Ph.D. in business administration from Yonsei University.

Ki Hwan Kim is a managing director and heads the Public Relations Department. He also serves as a senior managing director of Kookmin Bank and heads its consumer protection group. Mr. Kim previously served as the head of Kookmin Bank's human resource department. He received a B.A. in economics from Seoul National University.

Minkyu Chung is a managing director and our chief compliance officer. He previously served as a vice chief public prosecutor at the Supreme Prosecutors' Office of Korea and a managing partner at the law firm of The Firm. He received a B.A. in law from Seoul National University.

Item 6.B. *Compensation*

The aggregate remuneration paid and benefits-in-kind granted by us to our chairman and chief executive officer, our other executive and non-standing directors, our non-executive directors and our executive officers for the year ended December 31, 2014 was ₩3,578 million. In addition, for the year ended December 31, 2014, we set aside ₩183 million for allowances for severance and retirement benefits for our chairman and chief executive officer, the other executive directors and our executive officers.

The compensation of our directors who received total annual compensation exceeding ₩500 million in 2014 was as follows:

Name	Position	Total Compensation in 2014 (1)	Long-term Incentive Compensation for Payment Subsequent to 2014
		(In millions of Won)	
Young-Rok Lim	Former Chairman and Chief Executive Officer	₩766	None

(1) Includes earned income and performance based short-term incentive payments made in the first quarter of 2014 with respect to services performed in 2013.

Pursuant to a resolution of our board of directors, effective January 7, 2015, Woong-Won Yoon, our former deputy president and chief financial officer, was appointed a business management advisor for a term of one year. We do not have service contracts with any of our other directors or officers providing for benefits upon termination of their employment with us.

Kookmin Bank granted stock options to its president and chief executive officer, other directors and executive officers, as well as employees. In connection with the comprehensive stock transfer in September 2008 pursuant to which we were established, such stock options were converted into stock options with respect to our common stock. See "Item 6.E. Share Ownership—Stock Options." For all of the options granted, upon their exercise, we are required to pay in cash the difference between the exercise price and the market price of our common stock at the date of exercise. Generally, upon vesting, options may be exercised from after three years from the grant date up to eight years after such date, once restrictions on the exercise of options, including continued employment for at least two years from the grant date, lapse.

In 2014, we did not recognize any compensation expense for the stock options granted under our stock option plan. For additional information regarding our compensation expense in connection with our stock option plan, see Note 31 to our consolidated financial statements included elsewhere in this annual report.

In 2008, we also established a stock grant plan. Pursuant to this plan, we have entered into performance share agreements with certain of our directors, executive officers and other senior management, whereby we may grant shares of our common stock (or the equivalent monetary amount based on the market value of such shares at the time of the grant) within specified periods as long-term incentive performance shares in accordance with pre-determined performance targets. See "Item 6.E. Share Ownership—Performance Share Agreements." In 2014, we recognized ₩11,422 million as compensation expense for the disbursements made under such agreements.

Item 6.C. *Board Practices*

See "Item 6.A. Directors and Senior Management" above for information concerning the terms of office and contractual employment arrangements with our directors and executive officers.

Committees of the Board of Directors

We currently have the following committees that serve under the board:

- the Audit Committee;
- the Corporate Governance Committee;
- the Risk Management Committee;
- the Evaluation & Compensation Committee;
- the Non-executive Director Nominating Committee; and
- the Audit Committee Member Nominating Committee.

Each committee member is appointed by the board of directors, except for members of the Audit Committee, who are elected at the general meeting of stockholders.

Audit Committee

The committee currently consists of four non-executive directors, Young Hwi Choi, Woon Youl Choi, Eunice Kyonghee Kim and Jongsoo Han. The chairperson of the Audit Committee is Woon Youl Choi. The committee oversees our financial reporting and approves the appointment of our independent registered public accounting firm. The committee also reviews our financial information, auditor's examinations, key financial statement issues, the plans and evaluation of internal control and the administration of our financial affairs by the board of directors. In connection with the general meetings of stockholders, the committee examines the agenda for, and financial statements and other reports to be submitted by, the board of directors to each general meeting of stockholders. The committee holds regular meetings every quarter.

Corporate Governance Committee

The committee currently consists of one non-standing director, Hong Lee, and three non-executive directors, Young Hwi Choi, Woon Youl Choi and Michael Byungnam Lee, together with our chairman and chief executive officer, Jong Kyoo Yoon. The chairperson of the Corporate Governance Committee is Jong Kyoo Yoon. The committee is responsible for establishing and monitoring procedures for our chairman candidate cultivation and succession program, as well as for candidate cultivation and succession programs for chief executive officers of our subsidiaries. The committee holds regular meetings annually.

Risk Management Committee

The committee currently consists of one non-standing director, Hong Lee, and three non-executive directors, Suk Ryul Yoo, Jae Ha Park and Eunice Kyonghee Kim. The chairperson of the committee is Jae Ha Park. The Risk Management Committee oversees and makes determinations on all issues relating to our comprehensive risk management function. In order to ensure our stable financial condition and to maximize our profits, the committee monitors our overall risk exposure and reviews our compliance with risk policies and risk limits. In addition, the committee reviews risk and control strategies and policies, evaluates whether each risk is at an adequate level, establishes or abolishes risk management divisions and reviews risk-based capital allocations. The committee holds regular meetings every quarter.

Evaluation & Compensation Committee

The committee currently consists of four non-executive directors, Michael Byungnam Lee, Suk Ryul Yoo, Jae Ha Park and Jongsoo Han. The chairperson of the committee is Michael Byungnam Lee. The Evaluation and Compensation Committee reviews compensation schemes and compensation levels of us and our subsidiaries. The committee is also responsible for deliberating and deciding the compensation of directors, evaluating management's performance and implementing management training programs, as well as deciding and supervising the performance-based annual salary of the president and the executive officers of us and our subsidiaries. The committee holds regular meetings every quarter.

Non-executive Director Nominating Committee

The committee currently consists of three non-executive directors, Suk Ryul Yoo, Young Hwi Choi and Woon Youl Choi, together with our chairman and chief executive officer, Jong Kyoo Yoon. The chairperson of the committee is Suk Ryul Yoo. The committee is responsible for the management and evaluation of a pool of non-executive director candidates and recommendation of the non-executive director candidates to be nominated at the annual general meeting of shareholders. The committee holds regular meetings semi-annually.

Audit Committee Member Nominating Committee

The committee currently has no members. The last meeting of the committee was on February 27, 2015 to nominate Young Hwi Choi, Woon Youl Choi, Eunice Kyonghee Kim and Jongsoo Han as new Audit Committee members. The committee oversees the selection of Audit Committee member candidates and recommends them annually sometime prior to the general stockholders meeting. The term of office of its members is from the first meeting of the committee held to nominate the Audit Committee members until the Audit Committee members are appointed.

Item 6.D. *Employees*

As of December 31, 2014, we had a total of 168 full-time employees, excluding seven executive officers, at our financial holding company.

The following table sets forth information regarding our employees at both our financial holding company and our subsidiaries as of the dates indicated:

		As of December 31,		
		2012	2013	2014
KB Financial Group	Full-time employees [1]	157	151	168
	Contractual employees	—	—	—
	Managerial employees	127	116	131
	Members of Korea Financial Industry Union	—	—	—
Kookmin Bank	Full-time employees [1]	16,358	16,617	20,758
	Contractual employees	5,713	5,136	903
	Managerial employees	11,383	11,539	11,561
	Members of Korea Financial Industry Union	17,149	17,123	16,977
Other subsidiaries	Full-time employees [1]	2,724	2,786	3,186
	Contractual employees	541	137	355
	Managerial employees	1,554	1,554	1,765
	Members of Korea Financial Industry Union	1,370	1,509	1,324

(1) Excluding executive officers.

We consider our relations with our employees to be satisfactory. We and our subsidiaries each have a joint labor-management council which serves as a forum for ongoing discussions between our management and employees. At five of our subsidiaries, Kookmin Bank, KB Kookmin Card, KB Capital, KB Real Estate Trust and KB Credit Information, our employees have a labor union. Every year, the unions at Kookmin Bank, KB Kookmin Card, KB Capital, KB Real Estate Trust and KB Credit Information and their respective managements negotiate and enter into new collective bargaining agreements and negotiate annual wage adjustments.

Our compensation packages consist of base salary and base bonuses. We also provide performance-based compensation to employees and management officers, including those of our subsidiaries, depending on level of responsibility of the employee or officer and business of the relevant subsidiary. Typically, executive officers, heads of regional headquarters and employees in positions that require professional skills, such as fund managers and dealers, are compensated depending on their individual annual performance evaluation. Also, Kookmin Bank has implemented a profit-sharing system in order to enhance the performance of Kookmin Bank's employees. Under this system, Kookmin Bank pays bonuses to its employees, in addition to the base salary and depending on Kookmin Bank's annual performance.

We provide a wide range of benefits to our employees, including our executive directors. Specific benefits provided may vary for each of our subsidiaries but generally include medical insurance, employment insurance, workers compensation, employee and spouse life insurance, free medical examinations, child tuition and fee reimbursement, disabled child financial assistance and reimbursement for medical expenses, and other benefits may be provided depending on the subsidiary.

In accordance with the National Pension Act, we contribute an amount equal to 4.5% of employee wages, and each employee contributes 4.5% of his or her wages, into each employee's personal pension account. In addition, in accordance with the Guarantee of Worker's Retirement Benefits Act, we have adopted a retirement pension plan for our employees. Contributions under the retirement pension plan are deposited annually into a financial institution, and an employee may elect to receive a monthly pension or a lump-sum amount upon retirement. Our retirement pension plans are provided in the form of a defined benefit plan and a defined contribution plan. The defined benefit plan guarantees a certain payout at retirement, according to a fixed formula based on the employee's average salary and the number of years for which the employee has been a plan member. The defined contribution plan, in which the employer's contribution is determined in advance based on one twelfth of an employee's total annual pay, is managed directly by the employees. Under Korean law, we may not terminate the employment of full-time employees except under certain limited circumstances.

In June 2009, we established an employee stock ownership plan. All of our employees are eligible to participate in this plan. We are not required to, and do not, make cash contributions to this plan. Members of our employee stock ownership association have pre-emptive rights to acquire up to 20% of our shares issued in public offerings by us pursuant to the Financial Investment Services and Capital Markets Act. In August 2009, we offered to members of our employee stock ownership association 6,000,000 of the 30,000,000 new shares of common stock to be issued in our rights offering to our existing shareholders, and the entire amount was subscribed by members of our employee stock ownership association. The employee stock ownership association held 2,452,081 shares of our common stock as of December 31, 2014.

Employees of Kookmin Bank have been eligible to participate in its employee stock ownership plan, which will be terminated once all of our common stock held by the plan (which the plan received following the transfer of Kookmin Bank shares held by it as a result of the comprehensive stock transfer pursuant to which we were established) have been distributed to the relevant Kookmin Bank employees at the requests of such employees following the expiration of the required holding periods. As of December 31, 2014, Kookmin Bank's employee stock ownership association held 814,050 shares of our common stock.

In order to develop our next generation of leaders and enhance the operational capability of our employees at each of our subsidiaries, we operate various employee training programs. These programs, which are aimed at cultivating financial specialists with higher levels of management and business skills, developing regional experts for increased global capabilities and enhancing employee loyalty, comprise a number of customized programs such as training courses for employees of different positions, domestic and foreign MBA courses and intensive human resources development programs for high performers to cultivate future leaders. For example, Kookmin Bank offers training programs at its employees' worksites to facilitate access to training, as well as a foreign regional expert training program and a global language training course. We also provide financial and other support for our employees to develop their finance-related knowledge and skills by enrolling in training courses or engaging in self-study programs. The broad spectrum of training programs, combined with the state-of-the-art technologies such as cyber training, satellite broadcasting and mobile-learning, maximizes the level of exposure of the trainees to the contents of the programs. We also believe that our training scheme based on classified training courses and a development evaluation system has facilitated systemic development of employee skills and a spontaneous learning environment.

Item 6.E. *Share Ownership*

Common Stock

As of March 31, 2015, the persons who are currently our directors or executive officers, as a group, held an aggregate of 10,592 shares of our common stock, representing approximately 0.003% of the issued shares of our common stock as of such date. None of these persons individually held more than 1% of the outstanding shares of our common stock as of such date. The following table presents information regarding our directors and executive officers who beneficially owned our shares as of March 31, 2015.

Name of Executive Officer or Director[1]	Number of Shares of Common Stock
Jong Kyoo Yoon	5,300
Hong Lee	459
Jong-Hee Yang	914
Jeong Rim Park	540
Ki Bum Lee	600
Young-Tae Park	450
Kyu Sul Choi	1,506
Kyung Yup Cho	500
Ki Hwan Kim	321
Minkyu Chung	2
Total	10,592

(1) On April 7, 2015, Michael Byungnam Lee, our non-executive director, acquired 1,020 share of our common stock on the Korea Exchange.

Stock Options

We have not, following our establishment pursuant to a comprehensive stock transfer in September 2008, granted any stock options with respect to our capital stock to our directors, executive officers and employees. Prior to our establishment, Kookmin Bank granted stock options with respect to its common stock to its directors, executive officers and employees. In connection with the comprehensive stock transfer, in September 2008, such stock options with respect to Kookmin Bank common stock were converted into stock options with respect to our common stock. As of March 31, 2015, all of such stock options granted to Kookmin Bank's directors, executive officers and employees have been exercised and there are no stock options outstanding as of such date. For all of such options granted, upon their exercise, we were required to pay in cash the difference between the exercise price and the market price of our common stock at the date of exercise.

Performance Share Agreements

In March 2009, our shareholders approved at the annual general meeting of shareholders the disbursement of a maximum of 250,000 shares of our common stock (or the equivalent monetary amount based on the market value of such shares at the time of disbursement), between September 29, 2008 and September 28, 2011, to our directors as long-term incentive performance shares over the term of their office in accordance with the performance targets set forth in the performance share agreements between us and such directors. In June 2009, we paid ₩24 million, the equivalent monetary amount for 733 shares of our common stock, to our former non-executive director, Kee Young Chung. In March 2010, our shareholders approved at the annual general meeting of shareholders the disbursement of a maximum of 250,000 shares of our common stock (or the equivalent monetary amount based on the market value of such shares at the time of disbursement), between September 29, 2009 and September 28, 2012, to our directors as long-term incentive performance shares over the term of their office in accordance with the performance targets set forth in the performance share agreements between us and such directors. In April 2010, we paid an aggregate of ₩184 million, the equivalent monetary amount for 3,563 shares of our common stock, to our former non-executive directors, Dam Cho and Bo Kyung Byun. In November 2010, we paid ₩110 million, the equivalent monetary amount for 2,149 shares of our common stock, to our former non-executive director, Chee Joong Kim. In January 2011, we paid ₩133 million, the equivalent monetary amount for 2,323 shares of our common stock, to our former non-executive director, Chan Soo Kang. In April 2011, we paid an aggregate of ₩229 million, the equivalent monetary amount for 4,056 shares of our common stock, to our former non-executive directors, Suk Sig Lim and Jacques Kemp. In April 2013, we paid an aggregate of ₩96 million, the equivalent monetary amount for 2,543 shares of our common stock, to our former non-executive director, Sang Moon Ham. In April 2014, we paid an aggregate of ₩115 million, the equivalent monetary amount for 3,090 shares of our common stock, to our former non-executive director, Jae Mok Cho. Since January 2010, in accordance with the best practice guidelines for outside directors of banking institutions announced by the Korea Federation of Banks, which have been replaced with the Financial Corporate Governance Code issued by the Financial Services Commission in December 2014, we have not entered into any performance share agreements with our non-executive directors.

We have also entered into performance share agreements with certain of our executive officers and senior management who are not directors, pursuant to which we may grant shares of our common stock (or the equivalent monetary amount based on the market value of such shares at the time of the grant) within specified periods as long-term incentive performance shares in accordance with pre-determined performance targets.

We expect that further actual disbursements under the performance share agreements with our senior management and directors other than non-executive directors will generally be in the form of cash disbursements of equivalent monetary amounts based on the market value of our shares at such time.

Item 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

Item 7.A. *Major Shareholders*

The following table presents information regarding the beneficial ownership of our shares at December 31, 2014 by each person or entity known to us to own beneficially more than 5% of our issued and outstanding shares.

Except as otherwise indicated, each stockholder identified by name has:

- sole voting and investment power with respect to its shares; and
- record and beneficial ownership with respect to its shares.

Beneficial Owner	Number of Shares of Common Stock	Percentage of Total Outstanding Shares of Common Stock (%) [(1)]
Korean National Pension Service	36,383,211	9.42%
Bank of New York Mellon [(2)]	32,474,273	8.41%

(1) Calculated based on 386,351,693 shares of our common stock outstanding as of December 31, 2014.
(2) As depositary bank.

Other than as set forth above, no other person or entity known by us to be acting in concert, directly or indirectly, jointly or separately, owned 5.0% or more of the issued shares of our common stock or exercised control or could exercise control over us as of December 31, 2014. None of our major stockholders has different voting rights from our other stockholders.

Item 7.B. *Related Party Transactions*

As of December 31, 2014, we had an aggregate of ₩2,530 million in loans outstanding to our executive officers and directors and Kookmin Bank's executive officers and directors. In addition, as of such date, we had loans outstanding to various companies whose directors or executive officers were serving concurrently as our directors or executive officers. See Note 43 of the notes to our consolidated financial statements included elsewhere in this annual report. All of these loans were made in the ordinary course of business, on substantially the same terms, including interest rate and collateral, as those prevailing at the time for comparable transactions with other persons and did not involve more than the normal risk of collectibility or present other unfavorable features.

None of our directors or officers have or had any interest in any transactions effected by us that are or were unusual in their nature or conditions or significant to our business which were effected during the current or immediately preceding year or were effected during an earlier year and remain in any respect outstanding or unperformed.

Item 7.C. *Interests of Experts and Counsel*

Not applicable.

Item 8. FINANCIAL INFORMATION

Item 8.A. *Consolidated Statements and Other Financial Information*

See "Item 18. Financial Statements" and pages F-1 through F-185.

Legal Proceedings

Excluding the legal proceedings discussed below, we and our subsidiaries are not a party to any legal or administrative proceedings and no proceedings are known by any of us or our subsidiaries to be contemplated by governmental authorities or third parties, which, if adversely determined, may have a material adverse effect on our consolidated financial condition or results of operations.

During the first half of 2007, the National Tax Service of Korea completed a tax audit in respect of Kookmin Bank for the fiscal years 2002, 2003, 2004 and 2005, as a result of which Kookmin Bank was assessed ₩190 billion (including residence tax) for tax deficiencies. In addition, during the second half of 2007, the National Tax Service of Korea assessed additional income taxes for prior years amounting to ₩292 billion (including residence tax) for tax deficiencies. Kookmin Bank paid the entire amount of such additional assessments in 2007, but filed an appeal with the National Tax Tribunal with respect to tax assessments made in 2007 amounting to ₩482 billion (including residence tax), which dismissed the appeal in March 2010. In June 2010, Kookmin Bank filed an appeal with the Seoul Administrative Court, which ruled in favor of Kookmin Bank on April 1, 2011. On April 19, 2011, the National Tax Service of Korea appealed this case to the Seoul High Court, which ruled in favor of Kookmin Bank on January 12, 2012. On January 30, 2012, the National Tax Service of Korea appealed this case to the Supreme Court, which ruled in favor of Kookmin Bank on January 15, 2015.

Since November 2008, certain of Kookmin Bank's customers have filed lawsuits against it in connection with its sales of foreign currency derivatives products known as "KIKO" (which stands for "knock-in knock-out"), which are intended to operate as hedging instruments against fluctuations in the exchange rate between the Won and the U.S. dollar. Due to the significant depreciation of the Won against the U.S. dollar in 2008 and 2009, customers who have purchased KIKO products from Kookmin Bank are required to make large payments to it. Twelve lawsuits were filed against Kookmin Bank alleging that the contracts under which the relevant KIKO products were sold should be invalidated and that Kookmin Bank should return payments received thereunder. Eight of the lawsuits were ruled in favour of Kookmin Bank by the Seoul Central District Court and not appealed. In two of the lawsuits, rulings were issued in favor of Kookmin Bank by the Seoul High Court in February 2013 and November 2014 and not appealed. In one of the lawsuits, the Supreme Court of Korea ruled in favor of Kookmin Bank in May 2014. As of April 3, 2015, the amount of the one remaining claim, which is pending at the Seoul High Court, was approximately ₩0.7 billion. Additional lawsuits, as well as motions for preliminary injunctions, may be filed against Kookmin Bank with respect to KIKO products, and the final outcome of such litigation remains uncertain.

In January 2008, the Korea Fair Trade Commission instituted certain amendments to standard loan policy conditions for mortgage loan agreements to require banks to be responsible for the payment of mortgage registration expenses when issuing mortgage loans. Subsequently, the Korea Federation of Banks and 16 banks, including Kookmin Bank, filed a lawsuit against the Korea Fair Trade Commission to prevent the implementation of such amendments. In August 2010, the Supreme Court ruled in favor of the Korea Fair Trade Commission. Since such ruling in August 2010, certain of Kookmin Bank's customers have filed 133 lawsuits against Kookmin Bank, as of April 3, 2015, alleging that it should return the mortgage registration expenses paid by such customers under mortgage loan agreements that did not reflect the amendments instituted by the Korea Fair Trade Commission in January 2008. As of April 3, 2015, 132 such lawsuits had been concluded and one lawsuit was appealed and pending in the appellate court. The aggregate amount of claimed damages in the one remaining lawsuit, as of April 3, 2015, was approximately ₩0.7 billion. Additional lawsuits may be filed against Kookmin Bank with respect to its mortgage loans, and the final outcome of such litigation remains uncertain.

In July 2010, Fairfield Sentry Limited, or Fairfield, which is currently in liquidation and whose assets were directly or indirectly invested with Bernard L. Madoff Investment Securities LLC, or BLMIS, filed a lawsuit in the Supreme Court of the State of New York against Kookmin Bank, which acted as a trustee bank for its clients who invested in Fairfield. Fairfield seeks restitution of approximately US$42 million paid to Kookmin Bank in connection with share redemptions on the ground that such payments were made by mistake, based on inflated values resulting from BLMIS' fraud. The case is currently pending at such court. Fairfield has filed similar actions against numerous other fund investors to seek recovery of redemption payments.

In May 2012, the trustee appointed for the liquidation of BLMIS filed a lawsuit against Kookmin Bank in the United States Bankruptcy Court for the Southern District of New York. The trustee seeks recovery of approximately US$42 million, which amount is alleged to be equal to the amount of funds that were redeemed from Fairfield between June 2004 and January 2006 by Kookmin Bank. The trustee alleges that Fairfield was a "feeder fund" that invested in BLMIS and redemptions from such BLMIS feeder fund are avoidable and recoverable under the U.S. Bankruptcy Code and New York law. The case is currently pending at such court. The trustee has filed similar clawback actions against numerous other institutions.

In November 2012, Kookmin Bank filed a lawsuit against the Export-Import Bank of Korea and other creditor financial institutions comprising the creditors' committee of a Korean shipbuilding company which is a borrower of Kookmin Bank and is currently in workout. Kookmin Bank voted against extending new credit to such borrower and exercised its appraisal rights. Kookmin Bank is seeking ₩103 billion as compensation for damages and payment of the purchase price of debt held by Kookmin Bank. In November 2012, the Export-Import Bank of Korea and other creditor financial institutions of the borrower filed a counter lawsuit against Kookmin Bank seeking ₩46 billion in damages in connection with the borrower's debt restructuring plan. In August 2014, the Seoul Central District Court ruled partially in favor of Kookmin Bank in its lawsuit against the Export-Import Bank of Korea and other creditor financial institutions of the borrower, but ruled against Kookmin Bank in the counter lawsuit brought against Kookmin Bank. Both cases have been appealed to the Seoul High Court, where they are currently pending.

Commencing in November 2013, Kookmin Bank was subject to a number of investigations by the Financial Supervisory Service and other governmental authorities concerning alleged issues with Kookmin Bank's internal controls and possible legal violations by Kookmin Bank and its employees.

- In November 2013, Kookmin Bank filed a complaint against the former head and two former employees of its Tokyo Branch for allegedly extending illegal loans under borrowed names. Each of the Financial Supervisory Service and the Financial Services Agency of Japan launched an investigation into the allegations.
- The Financial Supervisory Service launched an investigation into alleged embezzlement of funds by employees at Kookmin Bank's headquarters, who have since been dismissed, through the presentation for payment of forged Korean government housing bonds.
- In May 2014, the Financial Supervisory Service launched an investigation into a dispute between Kookmin Bank and us regarding the replacement of Kookmin Bank's main computing system.

In August 2014, the Financial Supervisory Agency of Japan suspended Kookmin Bank from conducting new transactions at its branches in Japan for four months from September 2014 to January 2015. Furthermore, in August 2014, the Financial Supervisory Service imposed disciplinary sanctions on Kookmin Bank and a number of its officers, directors and employees, including the then chief executive officer of Kookmin Bank. In September 2014, the Financial Services Commission imposed a disciplinary sanction on our then chief executive officer. Both the chief executive officer of Kookmin Bank and our chief executive officer, as well as a number of our respective outside directors, subsequently resigned from their posts and have been replaced. In September 2014, the Financial Supervisory Service completed its investigation into Kookmin Bank and us with respect to such allegations.

Furthermore, in February 2014, the Financial Services Commission suspended the new credit card issuance and other related activities of KB Kookmin Card for three months from February to May 2014, in response to an incident involving the misappropriation of the personal information of a large number of its customers by an employee of the Korea Credit Bureau in the first half of 2013. Specifically, during such suspension period, KB Kookmin Card was prohibited from engaging in the following activities:

- adding new subscribers for credit cards, prepaid cards and debit cards or issuing such types of cards (except as permitted by the chairman of the Financial Services Commission for public policy purposes);

- providing new or additional credit lines to credit card customers; and
- providing new services through mail order or telemarketing channels or related to travel or insurance products.

In connection with the misappropriation incident, as of February 28, 2015, certain of KB Kookmin Card's customers have filed a total of 101 lawsuits against KB Kookmin Card with the aggregate amount of claimed damages amounting to approximately ₩52 billion. The final outcome of such lawsuits remains uncertain. In addition, KB Kookmin Card could become subject to additional litigation and regulatory sanctions, and may also incur significant costs relating to the compensation of customers for losses incurred as a result of the fraudulent use of the misappropriated personal information.

Dividends

Dividends must be approved by the stockholders at the annual general meeting of stockholders. Cash dividends may be paid out of retained earnings that have not been appropriated to statutory reserves. See "Item 10.B. Memorandum and Articles of Association—Description of Capital Stock—Dividends and Other Distributions."

The table below sets forth, for the periods indicated, the dividend per share of common stock and the total amount of dividends declared and paid by us in respect of the years ended December 31, 2010, 2011, 2012, 2013 and 2014. The dividends set out for each of the years below were paid within 30 days after our annual stockholders meeting, which is held no later than March of the following year.

Fiscal Year	Dividends per Common Share [(1)]		Dividends per Preferred Share		Total Amount of Cash Dividends Paid
					(in millions of Won)
2010 [(2)]	₩120	US$0.11	—	—	₩ 41,163
2011 [(3)]	720	0.62	—	—	278,173
2012 [(4)]	600	0.56	—	—	231,811
2013 [(5)]	500	0.47	—	—	193,176
2014 [(6)]	780	0.72	—	—	301,354

(1) Won amounts are expressed in U.S. dollars at the noon buying rate in effect at the end of the relevant periods as quoted by the Federal Reserve Bank of New York in the United States.

(2) On February 10, 2011, our board of directors passed a board resolution recommending a cash dividend of ₩120 per common share (before dividend tax), representing 2.4% of the par value of each share, for the fiscal year ended December 31, 2010. This resolution was approved and ratified by our stockholders on March 25, 2011.

(3) On February 9, 2012, our board of directors passed a board resolution recommending a cash dividend of ₩720 per common share (before dividend tax), representing 14.4% of the par value of each share, for the fiscal year ended December 31, 2011. This resolution was approved and ratified by our stockholders on March 23, 2012.

(4) On February 7, 2013, our board of directors passed a board resolution recommending a cash dividend of ₩600 per common share (before dividend tax), representing 12.0% of the par value of each share, for the fiscal year ended December 31, 2012. This resolution was approved and ratified by our stockholders on March 22, 2013.

(5) On February 7, 2014, our board of directors passed a board resolution recommending a cash dividend of ₩500 per common share (before dividend tax), representing 10.0% of the par value of each share, for the fiscal year ended December 31, 2013. This resolution was approved and ratified by our stockholders on March 28, 2014.

(6) On February 5, 2015, our board of directors passed a board resolution recommending a cash dividend of ₩780 per common share (before dividend tax), representing 15.6% of the par value of each share, for the fiscal year ended December 31, 2014. This resolution was approved and ratified by our stockholders on March 27, 2015.

Future dividends will depend upon our revenues, cash flow, financial condition and other factors. As an owner of ADSs, you will be entitled to receive dividends payable in respect of the shares of common stock represented by such ADSs.

For a description of the tax consequences of dividends paid to our stockholders, see "Item 10.E. Taxation—United States Taxation" and "—Korean Taxation—Taxation of Dividends."

Item 8.B. ***Significant Changes***

Not applicable.

Item 9. THE OFFER AND LISTING

Item 9.A. ***Offering and Listing Details***

Market Price Information

The principal trading market for our common stock is the KRX KOSPI Market. Our common stock has been listed on the KRX KOSPI Market since October 10, 2008, and the ADSs have been listed on the New York Stock Exchange under the symbol "KB" since September 29, 2008. The ADSs are identified by the CUSIP number 48241A105.

Kookmin Bank's common stock was listed on the KRX KOSPI Market on November 9, 2001, and was suspended from trading from September 25, 2008 and de-listed on October 10, 2008 in connection with the comprehensive stock transfer pursuant to which we were established. Kookmin Bank ADSs were listed on the New York Stock Exchange from November 1, 2001 to September 26, 2008. The Kookmin Bank ADSs were identified by the CUSIP number 50049M109.

The table below sets forth, for the periods indicated, the high and low closing prices and the average daily volume of trading activity on the KRX KOSPI Market for Kookmin Bank common stock with respect to the periods up to and including the third quarter of 2008 and for our common stock with respect to the subsequent periods, and the high and low closing prices and the average daily volume of trading activity on the New York Stock Exchange for Kookmin Bank ADSs with respect to the periods up to and including the third quarter of 2008 and for our ADSs with respect to the subsequent periods.

	KRX KOSPI Market [(1)]			New York Stock Exchange [(2)]		
	Closing Price Per Common Stock		Average Daily Trading Volume (in thousands of shares)	Closing Price Per ADS		Average Daily Trading Volume (in thousands of shares)
	High	Low		High	Low

Item 9.C. *Markets*

The KRX KOSPI Market

The KRX KOSPI Market (formerly known as the Stock Market Division of the Korea Exchange) began its operations in 1956. It has a single trading floor located in Seoul. The KRX KOSPI Market is a membership organization consisting of most of the Korean financial investment companies with a dealing and/or brokerage license and some Korean branches of foreign financial investment companies with such license.

As of December 31, 2014, the aggregate market value of equity securities listed on the KRX KOSPI Market was approximately ₩1,192 trillion. The average daily trading volume of equity securities for 2014 was approximately 278 million shares and the average daily transaction value was ₩3,984 billion.

The KRX KOSPI Market has the power in some circumstances to suspend trading in the shares of a given company or to de-list a security pursuant to the Listing Regulation of the KRX KOSPI Market. The KRX KOSPI Market also restricts share price movements. All listed companies are required to file accounting reports annually, semiannually and quarterly and to release immediately all information that may affect trading in a security.

The KRX KOSPI Market publishes the KOSPI, which is an index of all equity securities listed on the KRX KOSPI Market, every ten seconds. On January 1, 1983, the method of computing KOSPI was changed from the Dow Jones method to the aggregate value method. In the new method, the market capitalizations of all listed companies are aggregated, subject to certain adjustments, and this aggregate is expressed as a percentage of the aggregate market capitalization of all listed companies as of the base date, January 4, 1980.

The following table sets out movements in KOSPI:

Year	Opening	High	Low	Closing
1985	139.53	163.37	131.40	163.37
1986	161.40	279.67	153.85	272.61
1987	264.82	525.11	264.82	525.11
1988	532.04	922.56	527.89	907.20
1989	919.61	1,007.77	844.75	909.72
1990	908.59	928.82	566.27	696.11
1991	679.75	763.10	586.51	610.92
1992	624.23	691.48	459.07	678.44
1993	697.41	874.10	605.93	866.18

2014	1,967.19	2,082.61	1,886.85	1,915.59
2015 (through April 24)	1,926.44	2,173.41	1,882.45	2,159.80

Source: The KRX KOSPI Market

Shares are quoted "ex-dividend" on the first trading day of the relevant company's accounting period. Since the calendar year is the accounting period for the majority of listed companies, this may account for the drop in KOSPI between its closing level at the end of one calendar year and its opening level at the beginning of the following calendar year.

With certain exceptions, principally to take account of a share being quoted "ex-dividend" and "ex-rights," permitted upward and downward movements in share prices of any category of shares on any day are limited under the rules of the KRX KOSPI Market to 15% of the previous day's closing price of the shares, rounded down as set out below:

Previous Day's Closing Price ₩	Rounded Down to ₩
Less than 1,000	1
1,000 to less than 5,000	5
5,000 to less than 10,000	10
10,000 to less than 50,000	50
50,000 to less than 100,000	100
100,000 to less than 500,000	500
500,000 or more	1,000

As a consequence, if a particular closing price is the same as the price set by the fluctuation limit, the closing price may not reflect the price at which persons would have been prepared, or would be prepared to continue, if so permitted, to buy and sell shares. Orders are executed on an auction system with priority rules to deal with competing bids and offers.

Due to the deregulation of restrictions on brokerage commission rates, the brokerage commission rate on equity securities transactions may be determined by the parties, subject to commission schedules being filed with the KRX KOSPI Market by the financial investment companies with a brokerage license. In addition, a securities transaction tax will generally be imposed on the transfer of shares or certain securities representing rights to subscribe for shares. An agriculture and fishery special surtax of 0.15% of the sales prices will also be imposed on transfer of these shares and securities on the KRX KOSPI Market. See "Item 10.E. Taxation—Korean Taxation."

The following table sets forth the number of companies listed on the KRX KOSPI Market, the corresponding total market capitalization at the end of the periods indicated and the average daily trading volume for those periods:

	Market Capitalization on the Last Day of Each Period			Average Daily Trading Volume, Value		
Year	**Number of Listed Companies**	**(Billions of Won)**	**(Millions of US$)** [(1)]	**Thousands of Shares**	**(Millions of Won)**	**(Thousands of US$)** [(1)]
1985	342	₩ 6,570	US$ 7,921	18,925	₩ 12,315	US$ 14,846
1986	355	11,994	13,439	31,755	32,870	36,830

(1) Converted at the noon buying rate of the Federal Reserve Bank of New York in effect on the last business day of the period indicated.

The Korean securities markets are principally regulated by the Financial Services Commission and the Financial Investment Services and Capital Markets Act, which replaced the Korean Securities Exchange Act in February 2009. The Financial Investment Services and Capital Markets Act imposes restrictions on insider trading, price manipulation and deceptive action (including unfair trading), requires specified information to be made available by listed companies to investors and establishes rules regarding margin trading, proxy solicitation, takeover bids, acquisition of treasury shares and reporting requirements for stockholders holding substantial interests.

Protection of Customer's Interest in Case of Insolvency of Financial Investment Companies with a Brokerage License

Under Korean law, the relationship between a customer and a financial investment company with a brokerage license in connection with a securities sell or buy order is deemed to be consignment and the securities acquired by a consignment agent (i.e., the financial investment company with a brokerage license) through such sell or buy order are regarded as belonging to the customer in so far as the customer and the consignment agent's creditors are concerned. Therefore, in the event of a bankruptcy or reorganization procedure involving a financial investment company with a brokerage license, the customer of such financial investment company is entitled to the proceeds of the securities sold by such financial investment company.

When a customer places a sell order with a financial investment company with a brokerage license which is not a member of the KRX KOSPI Market, and that financial investment company places a sell order with another financial investment company with a brokerage license, which is a member of the KRX KOSPI Market, the customer is still entitled to the proceeds of the securities sold and received by the non-member company from the member company regardless of the bankruptcy or reorganization of the non-member company.

Under the Financial Investment Services and Capital Markets Act, the KRX KOSPI Market is obliged to indemnify any loss or damage incurred by a counterparty as a result of a breach by its members. If a financial investment company with a brokerage license which is a member of the KRX KOSPI Market breaches its obligation in connection with a buy order, the KRX KOSPI Market is obliged to pay the purchase price on behalf of the breaching member. Therefore, the customer can acquire the securities that have been ordered to be purchased by the breaching member.

When a customer places a buy order with a non-member company and the non-member company places a buy order with a member company, the customer has the legal right to the securities received by the non-member company from the member company because the purchased securities are regarded as belonging to the customer in so far as the customer and the non-member company's creditors are concerned.

As the cash deposited with a financial investment company with a brokerage license is regarded as belonging to such financial investment company, which is liable to return the same at the request of its customer, the customer cannot take back deposited cash from such financial investment company if a bankruptcy or reorganization procedure is instituted against such financial investment company and, therefore, can suffer from loss or damage as a result. However, the Depositor Protection Act provides that the Korea Deposit Insurance Corporation will, upon the request of the investors, pay investors an amount equal to the full amount of cash deposited with a financial investment company with a brokerage license prior to August 1, 1998 in case of such financial investment company's bankruptcy, liquidation, cancellation of securities business license or other insolvency events. However, this indemnification was available only until the end of 2000. From 2001, the maximum amount to be paid to each customer is limited to ₩50 million. Pursuant to the Financial Investment Services and Capital Markets Act, financial investment companies with a dealing and/or brokerage license are required to deposit the cash received from its customers to the extent the amount is not covered by the insurance with the Korea Securities Finance Corporation, a special entity established pursuant to the Financial Investment Services and Capital Markets Act. Set-off or attachment of cash deposits by such financial investment companies is prohibited. The premiums related to this insurance are paid by such financial investment companies.

Reporting Requirements for Holders of Substantial Interests

Any person whose direct or beneficial ownership of our common stock with voting rights, whether in the form of shares of common stock or ADSs, certificates representing the rights to subscribe for shares or equity-related debt securities including convertible bonds and bonds with warrants (which we refer to collectively as "Equity Securities"), together with the Equity Securities beneficially owned by certain related persons or by any person acting in concert with the person, accounts for 5% or more of the total issued and outstanding shares (plus Equity Securities of us held by such persons) is required to report the status and purpose (in terms of whether the purpose of the shareholding is to exercise control over our management) of the holdings to the Financial Services Commission and the KRX KOSPI Market within five business days after reaching the 5% ownership interest. In addition, any change in (i) the ownership interest subsequent to the report that equals or exceeds 1% of the total issued and outstanding Equity Securities of us or (ii) the purpose of the shareholding is required to be reported to the Financial Services Commission and the KRX KOSPI Market within five business days from the date of the change.

Violation of these reporting requirements may subject a person to criminal sanctions such as fines or imprisonment, an administrative fine of up to 0.001% of the aggregate market value of the total issued and outstanding stock or ₩500 million, whichever is lower, and/or a loss of voting rights with respect to the ownership of Equity Securities exceeding 5% of the total issued and outstanding Equity Securities with respect to which the reporting requirements were violated. Furthermore, the Financial Services Commission may order the disposal of the unreported Equity Securities.

In addition to the reporting requirements described above, any person whose direct or beneficial ownership of our stock accounts for 10% or more of the total issued and outstanding stock (which we refer to as a "major stockholder") must report the status of his/her shareholding to the Korea Securities and Futures Commission and the KRX KOSPI Market within five days after becoming a major stockholder. In addition, any change in the ownership interest subsequent to the report must be reported to the Korea Securities and Futures Commission and the KRX KOSPI Market within five days of the occurrence of the change. Violation of these reporting requirements may subject a person to criminal sanctions such as fines or imprisonment.

Any single stockholder and persons who stand in a special relationship with that stockholder that acquire more than 4% of the voting stock of a nationwide Korean bank pursuant to the Bank Act will be subject to reporting requirements. In addition, any single stockholder and persons who stand in a special relationship with that stockholder that acquire in excess of 10% of a nationwide bank's total issued and outstanding shares with voting rights must receive approval from the Financial Services Commission to acquire shares in each instance where the total shareholding would exceed 10%, 25% or 33%, respectively, of the bank's total issued and outstanding shares with voting rights. See "Item 4.B. Business Overview—Supervision and Regulation—Principal Regulations Applicable to Banks—Restrictions on Bank Ownership."

Restrictions Applicable to ADSs

No Korean governmental approval is necessary for the sale and purchase of our ADSs in the secondary market outside Korea or for the withdrawal of shares of our common stock underlying the ADSs and the delivery inside Korea of shares in connection with the withdrawal, provided that a foreigner who intends to acquire the shares must obtain an investment registration card from the Financial Supervisory Service as described below. The acquisition of the shares by a foreigner must be immediately reported to the governor of the Financial Supervisory Service, either by the foreigner or by his standing proxy in Korea.

Persons who have acquired shares of our common stock as a result of the withdrawal of shares underlying our ADSs may exercise their preemptive rights for new shares, participate in free distributions and receive dividends on shares without any further Korean governmental approval.

Under current Korean laws and regulations, the depositary is required to obtain our prior consent for the number of shares of our common stock to be deposited in any given proposed deposit that exceeds the difference between:

(1) the aggregate number of shares of our common stock deposited by us for the issuance of our ADSs (including deposits in connection with the initial issuance and all subsequent offerings of our ADSs and stock dividends or other distributions related to these ADSs); and

(2) the number of shares of our common stock on deposit with the depositary at the time of such proposed deposit.

We have agreed to grant such consent to the extent that the total number of shares on deposit with the depositary would not exceed 116,583,985 at any time.

Restrictions Applicable to Shares

As a result of amendments to the Foreign Exchange Transaction Laws and Financial Services Commission regulations (which we refer to collectively as the "Investment Rules") adopted in connection with the stock market opening from January 1992 and after that date, foreigners may invest, with limited exceptions and subject to procedural requirements, in all shares of Korean companies, whether listed on the KRX KOSPI Market or on the KRX KOSDAQ Market, unless prohibited by specific laws. Foreign investors may trade shares listed on the KRX KOSPI Market or on the KRX KOSDAQ Market only through the KRX KOSPI Market or the KRX KOSDAQ Market, except in limited circumstances, including:

- odd-lot trading of shares;
- acquisition of shares (which we refer to as "Converted Shares") by exercise of warrants, conversion rights or exchange rights under bonds with warrants, convertible bonds or exchangeable bonds or withdrawal rights under depositary receipts issued outside of Korea by a Korean company;
- acquisition of shares as a result of inheritance, donation, bequest or exercise of stockholders' rights, including preemptive rights or rights to participate in free distributions and receive dividends;
- over-the-counter transactions between foreigners of a class of shares for which the ceiling on aggregate acquisition by foreigners, as explained below, has been reached or exceeded subject to certain exceptions; and
- sale and purchase of shares at fair value between foreigners who are part of an investor group comprised of foreign companies investing under the control of a common investment manager pursuant to applicable laws or contract.

For over-the-counter transactions of shares between foreigners outside the KRX KOSPI Market or the KRX KOSDAQ Market for shares with respect to which the limit on aggregate foreign ownership has been reached or exceeded, a financial investment company with a brokerage license in Korea must act as an intermediary. Odd-lot trading of shares outside the KRX KOSPI Market or the KRX KOSDAQ Market must involve a financial investment company with a dealing license as the other party. Foreign investors are prohibited from engaging in margin transactions by borrowing shares from a financial investment company with a dealing and/or brokerage license with respect to shares that are subject to a foreign ownership limit.

The Investment Rules require a foreign investor who wishes to invest in shares on the KRX KOSPI Market or the KRX KOSDAQ Market (including Converted Shares and shares being issued for initial listing on the KRX KOSPI Market or on KRX KOSDAQ Market) to register its identity with the Financial Supervisory Service prior to making any such investment. The registration requirement does not, however, apply to foreign investors who acquire Converted Shares with the intention of selling such Converted Shares within three months from the date of acquisition. Upon registration, the Financial Supervisory Service will issue to the foreign investor an investment registration card, which must be presented each time the foreign investor opens a brokerage account with a financial investment company with a brokerage license. Foreigners eligible to obtain an investment registration card include foreign nationals who have not been residing in Korea for a consecutive period of six months or more, foreign governments, foreign municipal authorities, foreign public institutions, international financial institutions or similar international organizations, corporations incorporated under foreign laws and any person in any additional category designated by the Enforcement Decree of the Financial Investment Services and Capital Markets Act. All Korean offices of a foreign corporation as a group are treated as a separate foreigner from the offices of the corporation outside Korea for the purpose of investment registration. However, a foreign corporation or depositary issuing depositary receipts may obtain one or more investment registration cards in its name in certain circumstances as described in the relevant regulations.

Upon a foreign investor's purchase of shares through the KRX KOSPI Market or the KRX KOSDAQ Market, no separate report by the investor is required because the investment registration card system is designed to control and oversee foreign investment through a computer system. However, a foreign investor's acquisition or sale of shares outside the KRX KOSPI Market or the KRX KOSDAQ Market (as discussed above) must be reported by the foreign investor or his standing proxy to the governor of the Financial Supervisory Service at the time of each such acquisition or sale. In particular, if a foreign investor acquires or sells his shares in connection with a tender offer, odd-lot trading of shares or trades of a class of shares for which the aggregate foreign ownership limit has been reached or exceeded, such foreign investor or his standing proxy must ensure that the financial investment company that was engaged to facilitate the transaction reports such transaction to the governor of the Financial Supervisory Service. A foreign investor may appoint a standing proxy from among the Korea Securities Depository, foreign exchange banks (including domestic branches of foreign banks), financial investment companies with a dealing and/or brokerage license (including domestic branches of foreign financial investment companies with such license), financial investment companies with a collective investment license (including domestic branches of foreign financial investment companies with such license) and internationally recognized custodians which will act as a standing proxy to exercise stockholders' rights or perform any matters related to the foregoing activities if the foreign investor does not perform these activities himself. Generally, a foreign investor may not permit any person, other than its standing proxy, to exercise rights relating to his shares or perform any tasks related thereto on his behalf. However, a foreign investor may be exempted from complying with these standing proxy rules with the approval of the governor of the Financial Supervisory Service in cases deemed inevitable, including by reason of conflict between laws of Korea and the home country of the foreign investor.

Certificates evidencing shares of Korean companies must be kept in the custody of an eligible custodian in Korea. The same entities eligible to act as a standing proxy are eligible to act as a custodian of shares for a non-resident or foreign investor. A foreign investor must ensure that its custodian deposits its shares with the Korea Securities Depository. A foreign investor may be exempted from complying with this deposit requirement with the approval of the governor of the Financial Supervisory Service in circumstances where compliance with that requirement is made impracticable, including cases where compliance would contravene the laws of the foreign investors' home country.

Under the Investment Rules, with certain exceptions, foreign investors may acquire shares of a Korean company without being subject to any foreign investment ceiling. As one such exception, designated public corporations are subject to a 40% ceiling on the acquisition of shares by foreigners in the aggregate. In addition, designated public corporations may set a ceiling on the acquisition of shares by a single person in their articles of incorporation. Currently, Korea Electric Power Corporation is the only designated public corporation that has set such a ceiling. Furthermore, an investment by a foreign investor in 10% or more of the issued and outstanding shares with voting rights of a Korean company is defined as a foreign direct investment under the Foreign Investment Promotion Act of Korea. Generally, a foreign direct investment must be reported to the Ministry of Trade, Industry and Energy of Korea. The acquisition of shares of a Korean company by a foreign investor may also be subject to certain foreign or other shareholding restrictions in the event that the restrictions are prescribed in a specific law that regulates the business of the Korean company. For a description of such restrictions applicable to Korean banks, see "Item 4.B. Business Overview—Supervision and Regulation—Principal Regulations Applicable to Banks—Restrictions on Bank Ownership."

Item 10.B. ***Memorandum and Articles of Association***

Description of Capital Stock

Set forth below is information relating to our capital stock, including brief summaries of certain provisions of our articles of incorporation, the Korean Commercial Code, Financial Investment Services and Capital Markets Act and certain related laws of Korea, all as currently in effect. The following summaries do not purport to be complete and are subject to the articles of incorporation and the applicable provisions of the Financial Investment Services and Capital Markets Act, the Korean Commercial Code, and certain other related laws of Korea.

As of December 31, 2014, our authorized share capital is 1,000,000,000 shares. Pursuant to our articles of incorporation, we are authorized to issue shares with preferred dividend, non-voting shares, class shares with conversion rights, class shares with redemption rights and shares with a combination of all or any of the foregoing characteristics (collectively, "Class Shares"), as well as common shares. Subject to applicable laws and regulations, we are authorized to issue Class Shares up to one-half of all of our issued and outstanding shares.

Under our articles of incorporation, dividends on non-voting shares with preferred dividend are required to be at least 1% per annum of the par value and the board of directors must determine at the time of issuance of such shares the dividend rate, type of distributable properties, method of determining the value of distributable properties and conditions on payment of dividends. Also, we may, pursuant to a resolution of the board of directors, issue such non-voting shares with preferred dividend as redeemable shares that may be redeemed with profits at the relevant shareholder's or our discretion, up to one-half of all of our issued and outstanding shares.

In addition, pursuant to a resolution of the board of directors, we may issue shares that are convertible into common shares or Class Shares at the request of the relevant shareholders, up to 20% of all of our issued and outstanding shares. The period during which a relevant shareholder may make a request for conversion may be determined by a resolution of the board of directors and must be a period between one and ten years from the issue date.

Furthermore, through an amendment of the articles of incorporation, we may create new classes of shares, which may be common shares or Class Shares having additional features as prescribed under the Korean Commercial Code. See "—Voting Rights."

As of the date of this annual report, 386,351,693 shares of common stock were issued and 386,351,693 shares of common stock were outstanding. No Class Shares are currently outstanding. All of the issued and outstanding shares are fully-paid and non-assessable, and are in registered form. Our authorized but unissued share capital consists of 613,648,307 shares. We may issue the unissued shares without further stockholder approval, subject to a board resolution as provided in the articles of incorporation. See "—Preemptive Rights and Issuances of Additional Shares" and "—Dividends and Other Distributions—Distribution of Free Shares."

Our articles of incorporation provide that our stockholders may, by special resolution, grant to our and our subsidiaries' officers, directors and employees stock options exercisable for up to 15% of the total number of our issued and outstanding shares. Our board of directors may also grant stock options to non-director officers and employees exercisable for up to 1% of our issued and outstanding shares, provided that such grant must be approved by a resolution of the subsequent general meeting of stockholders. As of March 31, 2015, none of our officers,

directors and employees held options to purchase shares of our common stock. Upon their exercise of such stock options, we are required to pay in cash the difference between the exercise price and the market price of our common stock at the date of exercise. See "Item 6.E. Share Ownership—Stock Options."

Share certificates are issued in denominations of one, five, ten, 50, 100, 500, 1,000 and 10,000 shares.

Organization and Register

We are a financial holding company established under the Financial Holding Company Act. We are registered with the commercial registry office of Seoul Central District Court.

Dividends and Other Distributions

Dividends

Dividends are distributed to stockholders in proportion to the number of shares of the relevant class of capital stock owned by each stockholder following approval by the stockholders at an annual general meeting of stockholders. Subject to the requirements of the Korean Commercial Code and other applicable laws and regulations, we expect to pay full annual dividends on newly issued shares for the year in which the new shares are issued.

We declare our dividend annually at the annual general meeting of stockholders, which are held within three months after the end of each fiscal year. Once declared, the annual dividend must be paid to the stockholders of record as of the end of the preceding fiscal year within one month after the annual general meeting unless otherwise resolved thereby. Annual dividends may be distributed either in cash or in shares provided that shares must be distributed at par value and, if the market price of the shares is less than their par value, dividends in shares may not exceed one-half of the total annual dividend (including dividends in shares).

Under the Korean Commercial Code and our articles of incorporation, we do not have an obligation to pay any annual dividend unclaimed for five years from the payment date.

The Financial Holding Company Act and related regulations require that each time a Korean financial holding company pays an annual dividend, it must set aside in its legal reserve to stated capital an amount equal to at least one-tenth of its net income after tax until the amount set aside reaches at least the aggregate amount of its stated capital. Unless it sets aside this amount, a Korean financial holding company may not pay an annual dividend. We intend to set aside allowances for loan losses and reserves for severance pay in addition to this legal reserve.

For information regarding Korean taxes on dividends, see "Item 10.E. Taxation—Korean Taxation."

Distribution of Free Shares

In addition to permitting dividends in the form of shares to be paid out of retained or current earnings, the Korean Commercial Code permits a company to distribute to its stockholders, in the form of free shares, an amount transferred from the capital surplus or legal reserve to stated capital. These free shares must be distributed pro rata to all stockholders. Our articles of incorporation provide that the types of shares to be distributed to the holders of non-voting shares with preferred dividend will be the same type of non-voting shares with preferred dividend held by such holders.

Preemptive Rights and Issuances of Additional Shares

Unless otherwise provided in the Korean Commercial Code, a company may issue authorized but unissued shares at such times and upon such terms as the board of directors of the company may determine. The company must offer the new shares on uniform terms to all stockholders who have preemptive rights and who are listed on the stockholders' register as of the applicable record date. Our stockholders will be entitled to subscribe for any newly issued shares in proportion to their existing shareholdings. However, as provided in our articles of incorporation, new shares may be issued to persons other than existing stockholders if such shares are:

(1) publicly offered pursuant to the Financial Investment Services and Capital Markets Act, (2) issued to an employee stock ownership association, (3) issued upon exercise of stock options pursuant to the Financial Investment Services and Capital Markets Act, (4) issued for the issuance of our depositary receipts, (5) issued to certain foreign or domestic financial institutions or institutional investors to raise funds to meet urgent needs for our management or operations or (6) issued primarily to a third party who has contributed to the management of our business, including by providing financing, credit, advanced financing technique, know-how or entering into close business alliances, except that, in the case of issuances of new shares under (1), (4), (5) and (6) above, the number of new shares issued to persons other than existing stockholders may not exceed 50% of our total issued and outstanding capital stock.

Public notice of the preemptive rights to new shares and the transferability thereof must be given not less than two weeks (excluding the period during which the stockholders' register is closed) prior to the record date. We will notify the stockholders or persons other than existing stockholders, who are entitled to subscribe for newly issued shares of the deadline for subscription at least two weeks prior to the deadline. If such stockholders or persons fail to subscribe on or before such deadline, their preemptive rights will lapse. Our board of directors may determine how to distribute shares in respect of which preemptive rights have not been exercised or where fractions of shares occur.

Under the Financial Investment Services and Capital Markets Act, members of a company's employee stock ownership association, whether or not they are stockholders, will have a preemptive right, subject to certain exceptions, to subscribe for up to 20% of the shares publicly offered pursuant to the Financial Investment Services and Capital Markets Act. This right is exercisable only to the extent that the total number of shares so acquired and held by such members does not exceed 20% of the total number of shares then issued and outstanding.

Voting Rights

Each outstanding share of our common stock is entitled to one vote per share. However, voting rights with respect to shares of common stock that we hold or any of our subsidiaries holds may not be exercised. Unless stated otherwise in a company's articles of incorporation, the Korean Commercial Code permits holders of an aggregate of 1% or more of the issued and outstanding shares with voting rights to request cumulative voting when electing two or more directors. Our articles of incorporation do not prohibit cumulative voting. The Korean Commercial Code and our articles of incorporation provide that an ordinary resolution may be adopted if approval is obtained from the holders of at least a majority of those shares of common stock present or represented at such meeting and such majority also represents at least one-fourth of the total of our issued and outstanding voting shares. Holders of non-voting shares (other than enfranchised non-voting shares) will not be entitled to vote on any resolution or to receive notice of any general meeting of stockholders unless the agenda of the meeting includes consideration of a resolution on which such holders are entitled to vote. The Korean Commercial Code provides that a company's articles of incorporation may prescribe conditions for the enfranchisement of non-voting shares. For example, if our annual general stockholders' meeting resolves not to pay to holders of non-voting shares with preferred dividend the annual dividend as determined by the board of directors at the time of issuance of such shares, the holders of non-voting shares with preferred dividend will be entitled to exercise voting rights from the general stockholders' meeting following the meeting adopting such resolution to the end of a meeting to declare to pay such dividend with respect to the non-voting shares with preferred dividend. Holders of such enfranchised non-voting shares with preferred dividend will have the same rights as holders of common stock to request, receive notice of, attend and vote at a general meeting of stockholders.

The Korean Commercial Code provides that to amend the articles of incorporation, which is also required for any change to the authorized share capital of the company, and in certain other instances, including removal of a director of a company, dissolution, merger or consolidation of a company, transfer of the whole or a significant part of the business of a company, acquisition of all of the business of any other company, acquisition of a part of the business of any other company having a material effect on the business of the company or issuance of new shares at a price lower than their par value, a special resolution must be adopted by the approval of the holders of at least two-thirds of those shares present or represented at such meeting and such special majority also represents at least one-third of the total issued and outstanding shares with voting rights of the company.

In addition, in the case of amendments to the articles of incorporation or any merger or consolidation of a company or in certain other cases, where the rights or interest of the holders of Class Shares are adversely affected, a resolution must be adopted by a separate meeting of holders of Class Shares. Such a resolution may be adopted if the approval is obtained from stockholders of at least two-thirds of the Class Shares present or represented at such meeting and such shares also represent at least one-third of the total issued and outstanding Class Shares of the company.

A stockholder may exercise his voting rights by proxy given to another stockholder. The proxy must present the power of attorney prior to the start of a meeting of stockholders.

Liquidation Rights

In the event we are liquidated, the assets remaining after the payment of all debts, liquidation expenses and taxes will first be distributed to holders of Class Shares which have a preference right in respect of the distribution of residual properties as determined by our board of directors at the time of their issuance, and the residue thereafter will be distributed to the other stockholders in proportion to the number of shares held by them.

General Meetings of Stockholders

There are two types of general meetings of stockholders: annual general meetings and extraordinary general meetings. We will be required to convene our annual general meeting within three months after the end of each fiscal year. Subject to a board resolution or court approval, an extraordinary general meeting of stockholders may be held when necessary or at the request of the holders of an aggregate of 3% or more of our issued and outstanding shares, or the holders of an aggregate of 1.5% or more of our issued and outstanding stock with voting rights, who have held those shares at least for six months. Under the Korean Commercial Code, an extraordinary general meeting of stockholders may also be convened at the request of our Audit Committee, subject to a board resolution or court approval. Holders of non-voting shares may be entitled to request a general meeting of stockholders only to the extent the non-voting shares have become enfranchised as described under the section entitled "—Voting Rights" above, hereinafter referred to as "enfranchised non-voting shares." Meeting agendas will be determined by the board of directors or proposed by holders of an aggregate of 3% or more of the issued and outstanding shares with voting rights, or by holders of an aggregate of 0.5% or more of our issued and outstanding shares with voting rights, who have held those shares for at least six months, by way of a written proposal to the board of directors at least six weeks prior to the meeting. Written notices or e-mail notices stating the date, place and agenda of the meeting must be given to the stockholders at least two weeks prior to the date of the general meeting of stockholders. Notice may, however, be given to holders of 1% or less of the total number of issued and outstanding shares which are entitled to vote, either by placing at least two public notices at least two weeks in advance of the meeting in at least two daily newspapers or by placing a notice through the electronic disclosure system operated by the Financial Supervisory Service or the Korea Exchange. Stockholders who are not on the stockholders' register as of the record date will not be entitled to receive notice of the general meeting of stockholders, and they will not be entitled to attend or vote at such meeting. Holders of enfranchised non-voting shares who are on the stockholders' register as of the record date will be entitled to receive notice of the general meeting of stockholders and they will be entitled to attend and vote at such meeting. Otherwise, holders of non-voting shares will not be entitled to receive notice of or vote at general meetings of stockholders.

The general meeting of stockholders will be held at our head office, which is our registered head office, or, if necessary, may be held anywhere in the vicinity of our head office.

Rights of Dissenting Stockholders

Pursuant to the Financial Investment Services and Capital Markets Act and the Act on the Improvement of the Structure of the Financial Industry, in certain limited circumstances (including, without limitation, if we transfer all or any significant part of our business, if we acquire a part of the business of any other company and such acquisition has a material effect on our business or if we merge or consolidate with another company), dissenting holders of shares of our common stock and our stock with preferred dividend who acquired such shares prior to the announcement of the relevant resolution of the board of directors (or up to one day after such announcement in the event that such resolution is made by the board of directors pursuant to an Enforcement Decree) will have the right to require us to purchase their shares by providing written notice to us. To exercise such a right, stockholders must submit to us a written notice of their intention to dissent prior to the general meeting of stockholders. Within 20 days (10 days in the case of a merger or consolidation under the Law on Improvement of the Structure of the Financial Industry) after the date on which the relevant resolution is passed at such meeting, such dissenting stockholders must request in writing that we purchase their shares. We are obligated to purchase the shares from dissenting stockholders within one month after the end of such request period (within two months after the receipt of such request in the case of a merger or consolidation under the Law on Improvement of the Structure of Financial Industry) at a price to be determined by negotiation between the stockholder and us. If we cannot agree on a price with the stockholder through such negotiations, the purchase price will be the arithmetic mean of:

- the weighted average of the daily stock prices on the KRX KOSPI Market for the two-month period prior to the date of the adoption of the relevant board of directors' resolution;
- the weighted average of the daily stock prices on the KRX KOSPI Market for the one-month period prior to the date of the adoption of the relevant board of directors' resolution; and
- the weighted average of the daily stock prices on the KRX KOSPI Market for the one-week period prior to the date of the adoption of the relevant board of directors' resolution.

However, any dissenting stockholder who wishes to contest the purchase price may bring a claim in court.

Required Disclosure of Ownership

Under Korean law, stockholders who beneficially hold more than a certain percentage of our common stock, or who are related to or are acting in concert with other holders of certain percentages of our common stock or our other equity securities, must report the status of their holdings to the Financial Services Commission and other relevant governmental authorities. For a description of such required disclosure of ownership, see "Item 4.B. Business Overview—Supervision and Regulation—Principal Regulations Applicable to Financial Holding Companies—Restrictions on Ownership of a Financial Holding Company" and "Item 9.C. Markets—Reporting Requirements for Holders of Substantial Interests."

Other Provisions

Register of Stockholders and Record Dates

We maintain the register of our stockholders at our principal office in Seoul, Korea. We register transfers of shares on the register of stockholders upon presentation of the share certificates.

The record date for annual dividends is December 31. For the purpose of determining the holders of shares entitled to annual dividends, the register of stockholders may be closed for the period beginning from January 1 and ending on January 31. Further, the Korean Commercial Code and our articles of incorporation permit us upon at least two weeks' public notice to set a record date and/or close the register of stockholders for not more than three months for the purpose of determining the stockholders entitled to certain rights pertaining to the shares. However, in the event that the register of stockholders is closed for the period beginning from January 1 and ending on January 31 for the purpose of determining the holders of shares entitled to attend the annual general meeting of stockholders, the Korean Commercial Code and our articles of incorporation waive the requirement to provide at least two weeks' public notice. The trading of shares and the delivery of certificates in respect thereof may continue while the register of stockholders is closed. Also, we may distribute dividends to stockholders on a quarterly basis, and the record dates for these quarterly dividends are the end of March, June and September of each year.

Annual Reports

At least one week before the annual general meeting of stockholders, we must make our management report to shareholders and audited financial statements available for inspection at our head office and at all of our branch offices. Copies of this report, the audited financial statements and any resolutions adopted at the general meeting of stockholders are available to our stockholders.

Under the Financial Investment Services and Capital Markets Act, we must file with the Korean Financial Services Commission and the KRX KOSPI Market an annual business report within 90 days after the end of each fiscal year, a half-year business report within 45 days after the end of the first six months of each fiscal year and quarterly business reports within 45 days after the end of the first three months and nine months of each fiscal year, respectively. Copies of such business reports will be available for public inspection at the Korean Financial Services Commission and the KRX KOSPI Market.

Transfer of Shares

Under the Korean Commercial Code, the transfer of shares is effected by the delivery of share certificates. The Financial Investment Services and Capital Markets Act provides, however, that in case of a company listed on the KRX KOSPI Market such as us, share transfers can be effected by the book-entry method. In order to assert stockholders' rights against us, the transferee must have his name and address registered on the register of stockholders. For this purpose, stockholders are required to file with us their name, address and seal. Non-resident stockholders must notify us of the name of their proxy in Korea to which our notice can be sent.

Under current Korean regulations, the following entities may act as agents and provide related services for foreign stockholders:

- the Korea Securities Depository;
- internationally recognized foreign custodians;
- financial investment companies with a dealing license (including domestic branches of foreign financial investment companies with such license);
- financial investment companies with a brokerage license (including domestic branches of foreign financial investment companies with such license);
- foreign exchange banks (including domestic branches of foreign banks); and
- financial investment companies with a collective investment license (including domestic branches of foreign financial investment companies with such license).

In addition, foreign stockholders may appoint a standing proxy among the foregoing and generally may not allow any person other than the standing proxy to exercise rights to the acquired shares or perform any tasks related thereto on their behalf. Certain foreign exchange controls and securities regulations apply to the transfer of shares by non-residents or non-Koreans. See “Item 9.C. Markets” and “Item 10.D. Exchange Controls.” Except as provided in the Financial Holding Company, the ceiling on the aggregate shareholdings of a single stockholder and persons who stand in a special relationship with such stockholder is 10% of our issued and outstanding voting shares. See “Item 4.B. Business Overview—Supervision and Regulation—Principal Regulations Applicable to Financial Holding Companies—Restrictions on Ownership of a Financial Holding Company.”

Acquisition of Our Shares

Under the Korean Commercial Code, we may acquire our own shares upon a resolution of a general meeting of shareholders by either (i) purchasing them on a stock exchange or (ii) purchasing a number of shares, other than the redeemable shares as set forth in Article 345, Paragraph (1) of the Korean Commercial Code, from each shareholder in proportion to their existing shareholding ratio through the methods set forth in the Presidential Decree, provided that the total purchase price does not exceed the amount of our profit that may be distributed as dividends in respect of the immediately preceding fiscal year.

Additionally, pursuant to the Financial Investment Services and Capital Markets Act and regulations under the Financial Holding Company Act and after submission of certain reports to the Korean Financial Services Commission, we may purchase our own shares on the KRX KOSPI Market or through a tender offer, subject to the restrictions that:

- the aggregate purchase price of such shares may not exceed the total amount available for distribution of dividends at the end of the preceding fiscal year; and
- the purchase of such shares shall meet the risk-adjusted capital ratio requirements prescribed in the regulations under the Financial Holding Company Act based on Bank for International Settlements standards.

Subject to certain limited exceptions, our subsidiaries will not be permitted to acquire our shares pursuant to the Financial Holding Company Act.

Item 10.C. *Material Contracts*

None.

Item 10.D. *Exchange Controls*

General

The Foreign Exchange Transaction Act of Korea and the Enforcement Decree and regulations under that Act and Decree, which we refer to collectively as the “Foreign Exchange Transaction Laws,” regulate investment in Korean securities by non-residents and issuance of securities outside Korea by Korean companies. Non-residents may invest in Korean securities pursuant to the Foreign Exchange Transaction Laws. The Financial Services Commission has also adopted, pursuant to its authority under the Financial Investment Services and Capital Markets Act, regulations that restrict investment by foreigners in Korean securities and regulate issuance of securities outside Korea by Korean companies.

Under the Foreign Exchange Transaction Laws, (1) if the Korean government deems that it is inevitable due to the outbreak of natural calamities, wars, conflict of arms or grave and sudden changes in domestic or foreign economic circumstances or other situations equivalent thereto, the Ministry of Strategy and Finance may temporarily suspend payment, receipt or the whole or part of transactions to which the Foreign Exchange Transaction Laws apply, or impose an obligation to safe-keep, deposit or sell means of payment in or to certain Korean governmental agencies or financial institutions; and (2) if the Korean government deems that international balance of payments and international finance are confronted or are likely to be confronted with serious difficulty or the movement of capital between Korea and abroad brings or is likely to bring about serious obstacles in carrying out its currency policies, exchange rate policies and other macroeconomic policies, the

Ministry of Strategy and Finance may take measures to require any person who intends to perform capital transactions to obtain permission or to require any person who performs capital transactions to deposit part of the payments received in such transactions at certain Korean governmental agencies or financial institutions, in each case subject to certain limitations.

Restrictions Applicable to Shares

Under the Foreign Exchange Transaction Laws, a foreign investor who intends to acquire shares must designate a foreign exchange bank at which he must open a foreign currency account and a Won account exclusively for stock investments. No approval is required for remittance into Korea and deposit of foreign currency funds in the foreign currency account. Foreign currency funds may be transferred from the foreign currency account at the time required to place a deposit for, or settle the purchase price of, a stock purchase transaction to a Won account opened at a financial investment company with a dealing and/or brokerage license. Funds in the foreign currency account may be remitted abroad without any Korean governmental approval.

Dividends on shares of Korean companies are paid in Won. No Korean governmental approval is required for foreign investors to receive dividends on, or the Won proceeds of the sale of, any shares to be paid, received and retained in Korea. Dividends paid on, and the Won proceeds of the sale of, any shares held by a non-resident of Korea must be deposited either in a Won account with the investor's financial investment company with a dealing and/or brokerage license or in his Won account. Funds in the investor's Won account may be transferred to his foreign currency account or withdrawn for local living expenses up to certain limitations. Funds in the Won account may also be used for future investment in shares or for payment of the subscription price of new shares obtained through the exercise of preemptive rights.

Financial investment companies with dealing and/or brokerage licenses are allowed to open foreign currency accounts with foreign exchange banks exclusively for accommodating foreign investors' stock investments in Korea. Through these accounts, such financial investment companies may enter into foreign exchange transactions on a limited basis, such as conversion of foreign currency funds and Won funds, either as a counterparty to or on behalf of foreign investors, without the investors having to open their own accounts with foreign exchange banks.

Item 10.E. *Taxation*

United States Taxation

This summary describes certain material U.S. federal income tax consequences for a U.S. holder (as defined below) of acquiring, owning, and disposing of common shares or ADSs. This summary applies to you only if you hold the common shares or ADSs as capital assets for tax purposes. This summary does not apply to you if you are a member of a class of holders subject to special rules, such as:

- a dealer in securities or currencies;
- a trader in securities that elects to use a mark-to-market method of accounting for securities holdings;
- a bank;
- a life insurance company;
- a tax-exempt organization;
- a person that holds common shares or ADSs that are a hedge or that are hedged against interest rate or currency risks;
- a person that holds common shares or ADSs as part of a straddle or conversion transaction for tax purposes;
- a person whose functional currency for tax purposes is not the U.S. dollar; or
- a person that owns or is deemed to own 5% or more of any class of our stock.

This summary is based on the Internal Revenue Code of 1986, as amended, its legislative history, existing and proposed regulations promulgated thereunder, and published rulings and court decisions, all as currently in effect. These laws are subject to change, possibly on a retroactive basis.

Please consult your own tax advisers concerning the U.S. federal, state, local, and other tax consequences of purchasing, owning, and disposing of common shares or ADSs in your particular circumstances.

For purposes of this summary, you are a "U.S. holder" if you are the beneficial owner of a common share or an ADS and are:

- a citizen or resident of the United States;
- a U.S. domestic corporation; or
- otherwise subject to U.S. federal income tax on a net income basis with respect to income from the common share or ADS.

In general, if you are the beneficial owner of ADSs, you will be treated as the beneficial owner of the common shares represented by those ADSs for U.S. federal income tax purposes, and no gain or loss will be recognized if you exchange an ADS for the common share represented by that ADS.

Dividends

The gross amount of cash dividends that you receive (prior to deduction of Korean taxes) generally will be subject to U.S. federal income taxation as foreign source dividend income and will not be eligible for the dividends received deduction. Dividends paid in Won will be included in your income in a U.S. dollar amount calculated by reference to the exchange rate in effect on the date of your receipt of the dividend, in the case of common shares, or the depositary's receipt, in the case of ADSs, regardless of whether the payment is in fact converted into U.S. dollars. If such a dividend is converted into U.S. dollars on the date of receipt, you generally should not be required to recognize foreign currency gain or loss in respect of the dividend income.

Subject to certain exceptions for short-term and hedged positions, the U.S. dollar amount of dividends received by an individual with respect to the ADSs will be subject to taxation at reduced rates if the dividends are "qualified dividends." Dividends paid on the ADSs will be treated as qualified dividends if (i) the ADSs are readily tradable on an established securities market in the United States and (ii) we were not, in the year prior to the year in which the dividend was paid, and are not, in the year in which the dividend is paid, a passive foreign investment company as defined for U.S. federal income tax purposes ("PFIC"). The ADSs are listed on the New York Stock Exchange, and will qualify as readily tradable on an established securities market in the United States so long as they are so listed. Based on our audited financial statements, we believe that we were not a PFIC in our 2013 or 2014 taxable year. In addition, based on our audited financial statements and current expectations regarding our income, assets and activities, we do not anticipate becoming a PFIC for our 2015 taxable year.

Distributions of additional shares in respect of common shares or ADSs that are made as part of a pro-rata distribution to all of our stockholders generally will not be subject to U.S. federal income tax.

Sale or Other Disposition

For U.S. federal income tax purposes, gain or loss you realize on a sale or other disposition of common shares or ADSs generally will be treated as U.S. source capital gain or loss, and will be long-term capital gain or loss if the common shares or ADSs were held for more than one year. Your ability to offset capital losses against ordinary income is limited. Long-term capital gain recognized by an individual U.S. holder generally is subject to taxation at reduced rates.

Foreign Tax Credit Considerations

You should consult your own tax advisers to determine whether you are subject to any special rules that limit your ability to make effective use of foreign tax credits, including the possible adverse impact of failing to take advantage of benefits under the income tax treaty between the United States and Korea. If no such rules apply, you may claim a credit against your U.S. federal income tax liability for Korean taxes withheld from dividends on the common shares or ADSs, so long as you have owned the common shares or ADSs (and not entered into specified kinds of hedging transactions) for at least a 16-day period that includes the ex-dividend date. Instead of claiming a credit, you may, if you so elect, deduct such Korean taxes in computing your taxable income, subject to generally applicable limitations under U.S. tax law. Korean taxes withheld from a distribution of additional shares that is not subject to U.S. tax may be treated for U.S. federal income tax purposes as imposed on "general category" income. Such treatment could affect your ability to utilize any available foreign tax credit in respect of such taxes.

Any Korean securities transaction tax or agriculture and fishery special surtax that you pay will not be creditable for foreign tax credit purposes.

Foreign tax credits will not be allowed for withholding taxes imposed in respect of certain short-term or hedged positions in securities and may not be allowed in respect of arrangements in which a U.S. holder's expected economic profit is insubstantial.

The calculation of foreign tax credits and, in the case of a U.S. holder that elects to deduct foreign taxes, the availability of deductions involve the application of complex rules that depend on a U.S. holder's particular circumstances. You should consult your own tax advisers regarding the creditability or deductibility of such taxes.

U.S. Information Reporting and Backup Withholding Rules

Payments of dividends and sales proceeds that are made within the United States or through certain U.S.-related financial intermediaries are subject to information reporting and may be subject to backup withholding unless the holder (i) is a corporation or other exempt recipient and demonstrates this when required or (ii) provides a taxpayer identification number and certifies that no loss of exemption from backup withholding has occurred. Holders that are not U.S. persons generally are not subject to information reporting or backup withholding. However, such a holder may be required to provide a certification of its non-U.S. status in connection with payments received within the United States or through a U.S.-related financial intermediary.

Korean Taxation

The following summary of Korean tax considerations applies to you so long as you are not:

- a resident of Korea;
- a corporation with its head office, principal place of business or place of effective management in Korea; or
- engaged in a trade or business in Korea through a permanent establishment or a fixed base to which the relevant income is attributable or with which the relevant income is effectively connected.

Taxation of Dividends on Common Shares or ADSs

We will deduct Korean withholding tax from dividends paid to you (whether payable in cash or in shares) at a rate of 22.0% (inclusive of local income surtax). If you are a qualified resident and a beneficial owner of the dividends in a country that has entered into a tax treaty with Korea, you may qualify for a reduced rate of Korean withholding tax. See "—Tax Treaties" below for a discussion on treaty benefits. If we distribute to you free shares representing a transfer of earning surplus or certain capital reserves into paid-in capital, that distribution may be subject to Korean withholding tax.

Taxation of Capital Gains from Transfer of Common Shares or ADSs

As a general rule, capital gains earned by non-residents upon transfer of our common shares or ADSs are subject to Korean withholding tax at the lower of (1) 11.0% (inclusive of local income surtax) of the gross proceeds realized or (2) subject to the production of satisfactory evidence of acquisition costs and certain direct transaction costs of the common shares or ADSs, 22.0% (inclusive of local income surtax) of the net realized gain, unless exempt from Korean income taxation under the applicable Korean tax treaty with the non-resident's country of tax residence. See "—Tax Treaties" below for a discussion on treaty benefits. Even if you do not qualify for an exemption under a tax treaty, you will not be subject to the foregoing withholding tax on capital gains if you qualify under the relevant Korean domestic tax law exemptions discussed in the following paragraphs.

In regards to the transfer of our common shares through the Korea Exchange, you will not be subject to the withholding tax on capital gains (as described in the preceding paragraph) if you (1) have no permanent establishment in Korea and (2) did not own or have not owned (together with any shares owned by any person with which you have a certain special relationship) 25% or more of the total issued and outstanding shares, which may include the common shares represented by the ADSs, at any time during the calendar year in which the sale occurs and during the five consecutive calendar years prior to the calendar year in which the sale occurs.

Under Korean tax law, ADSs are viewed as shares of common stock for capital gains tax purposes. Accordingly, capital gains from the sale or disposition of ADSs are taxed (if such sale or disposition constitutes a taxable event) as if such gains are from the sale or disposition of the underlying common shares. Capital gains that you earn (regardless of whether you have a permanent establishment in Korea) from a transfer of ADSs outside of Korea will generally be exempt from Korean income taxation by virtue of the Special Tax Treatment Control Law of Korea, or the STTCL, provided that the issuance of the ADSs is deemed to be an overseas issuance under the STTCL. However, if you transfer ADSs after having converted the underlying common shares, such exemption under the STTCL will not apply and you will be required to file a corporate income tax return and pay tax in Korea with respect to any capital gains derived from such transfer unless the purchaser or a financial investment company with a brokerage license, as applicable, withholds and pays such tax.

If you are subject to tax on capital gains with respect to the sale of ADSs, or of our common shares you acquired as a result of a withdrawal, the purchaser or, in the case of the sale of the common shares on the Korea Exchange or through a financial investment company with a brokerage license in Korea, such financial investment company is required to withhold Korean tax from the sales price in an amount equal to the lower of (1) 11.0% (inclusive of local income surtax) of the gross realization proceeds or (2) subject to the production of satisfactory evidence of acquisition costs and certain direct transaction costs of the common shares or ADSs, 22.0% (inclusive of local income surtax) of the net realized gain, and to make payment of these amounts to the Korean tax authority, unless you establish your entitlement to an exemption under an applicable tax treaty or domestic tax law. See the discussion under "—Tax Treaties" below for an additional explanation on claiming treaty benefits.

Tax Treaties

Korea has entered into a number of income tax treaties with other countries (including the United States), which would reduce or exempt Korean withholding tax on dividends on, and capital gains on transfer of, the common shares or ADSs. For example, under the Korea-United States income tax treaty, reduced rates of Korean withholding tax of 16.5% or 11.0% (depending on your shareholding ratio and inclusive of local income surtax) on dividends and an exemption from Korean withholding tax on capital gains are available to residents of the United States that are beneficial owners of the relevant dividend income or capital gains, subject to certain exceptions. However, under Article 17 (Investment or Holding Companies) of the Korea-United States income tax treaty, such reduced rates and exemption do not apply if (i) you are a United States corporation, (ii) by reason of any special measures, the tax imposed on you by the United States with respect to such dividend income or capital gains is substantially less than the tax generally imposed by the United States on corporate profits and (iii) 25% or more of your capital is held of record or is otherwise determined, after consultation between competent authorities of the United States and Korea, to be owned directly or indirectly by one or more persons who are not individual residents of the United States. Also, under Article 16 (Capital Gains) of the Korea-United States income tax treaty, the exemption on capital gains does not apply if (a) you have a permanent establishment in Korea and any shares of common stock in which you hold an interest and which gives rise to capital gains are effectively connected with such permanent establishment, (b) you are an individual and you maintain a fixed base in Korea for an aggregate of 183 days or more during a given taxable year and your ADSs or common shares giving rise to capital gains are effectively connected with such fixed base or (c) you are an individual and you are present in Korea for an aggregate of 183 days or more during a given taxable year.

You should inquire for yourself whether you are entitled to the benefit of a tax treaty between Korea and the country where you are a resident. It is the responsibility of the party claiming the benefits of an income tax treaty in respect of dividend payments or capital gains to submit to us, the purchaser or the financial investment company, as applicable, a certificate as to his tax residence. In the absence of sufficient proof, we, the purchaser or the financial investment company, as applicable, must withhold tax at the normal rates. Furthermore, in order for you to claim the benefit of a tax rate reduction or tax exemption on certain Korean source income (such as dividends or capital gains) under an applicable tax treaty, Korean tax law requires you (or your agent) to submit an application (for reduced withholding tax rate, "application for entitlement to reduced tax rate," and in the case of exemptions from withholding tax, "application for tax exemption," along with a certificate of your tax residency issued by a competent authority of your country of tax residence, subject to certain exceptions) as the beneficial owner of such Korean source income ("BO application"). For example, a U.S. resident would be required to provide Form 6166 as a certificate of tax residency together with the application for entitlement to reduced tax rate or the application for tax exemption. Such application should be submitted to the withholding agent prior to the payment date of the relevant income. Subject to certain exceptions, where the relevant income is paid to an overseas investment vehicle (which is not the beneficial owner of such income) ("OIV"), a beneficial owner claiming the benefit of an applicable tax treaty with respect to such income must submit its BO application to such OIV, which must submit an OIV report and a schedule of beneficial owners to the withholding agent prior to the payment date of such income. In the case of a tax exemption application, the withholding agent is required to submit such application (together with the applicable OIV report in the case of income paid to an OIV) to the relevant district tax office by the ninth day of the month following the date of the payment of such income.

Inheritance Tax and Gift Tax

If you die while holding an ADS or donate an ADS, it is unclear whether, for Korean inheritance and gift tax purposes, you will be treated as the owner of the common shares underlying the ADSs. If the tax authority interprets depositary receipts as the underlying share certificates, you may be treated as the owner of the common shares and your heir or the donee (or in certain circumstances, you as the donor) will be subject to Korean inheritance or gift tax presently at the rate of 10% to 50%, provided that the value of the ADSs or the common shares is greater than a specified amount.

If you die while holding a common share or donate a common share, your heir or donee (or in certain circumstances, you as the donor) will be subject to Korean inheritance or gift tax at the same rate as indicated above.

At present, Korea has not entered into any tax treaty relating to inheritance or gift taxes.

Securities Transaction Tax

If you transfer our common shares on the Korea Exchange, you will be subject to securities transaction tax at the rate of 0.15% and an agriculture and fishery special surtax at the rate of 0.15% of the sale price of the common shares. If your transfer of the common shares is not made on the Korea Exchange, subject to certain exceptions, you will be subject to securities transaction tax at the rate of 0.5% and will not be subject to an agriculture and fishery special surtax.

Under the Securities Transaction Tax Law, depositary receipts (such as American depositary receipts) constitute share certificates subject to the securities transaction tax. However, the transfer of depositary receipts listed on the New York Stock Exchange, the Nasdaq Global Market, or other qualified foreign exchanges is exempt from the securities transaction tax.

In principle, the securities transaction tax, if applicable, must be paid by the transferor of the common shares or ADSs. When the transfer is effected through a securities settlement company, such settlement company is generally required to withhold and pay the tax to the tax authorities. When such transfer is made through a financial investment company only, such financial investment company is required to withhold and pay the tax. Where the transfer is effected by a non-resident without a permanent establishment in Korea, other than through a securities settlement company or a financial investment company, the transferee is required to withhold the securities transaction tax.

Non-reporting or under-reporting of securities transaction tax will generally result in penalties equal to 20% to 60% of the non-reported tax amount or 10% to 60% of under-reported tax amount. Also, a failure to timely pay securities transaction tax will result in a penalty equal to 10.95% per annum of the due but unpaid tax amount. The penalties are imposed on the party responsible for paying the securities transaction tax or, if such tax is required to be withheld, on the party that has the obligation to withhold.

Item 10.H. *Documents on Display*

We are subject to the information requirements of the Exchange Act, and, in accordance therewith, are required to file reports, including annual reports on Form 20-F, and other information with the U.S. Securities and Exchange Commission. These materials, including this annual report and the exhibits thereto, may be inspected and copied at the Commission's public reference rooms in Washington, D.C., New York, New York and Chicago, Illinois. Please call the Commission at 1-800-SEC-0330 for further information on the public reference rooms. As a foreign private issuer, we are also required to make filings with the Commission by electronic means. Any filings we make electronically will be available to the public over the Internet at the Commission's web site at http://www.sec.gov.

Item 10.I. *Subsidiary Information*

Not applicable.

Item 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

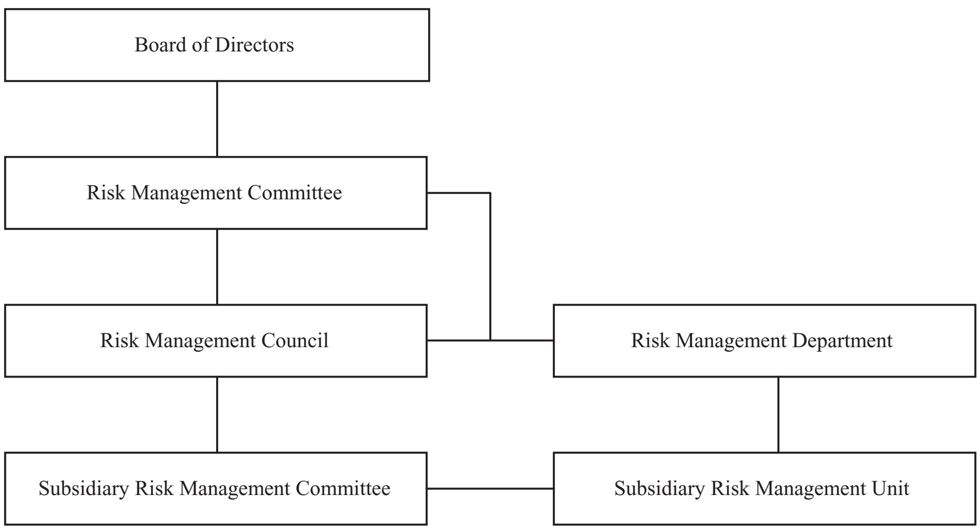
Overview

As a financial services provider, we are exposed to various risks related to our lending and trading businesses, our funding activities and our operating environment, principally through Kookmin Bank, our banking subsidiary. Our goal in risk management is to ensure that we identify, measure, monitor and control the various risks that arise, and that our organization adheres strictly to the policies and procedures which we establish to address these risks. Under our internal regulations pertaining to our consolidated capital adequacy ratio and internal standards for risk appetite and economic capital under Basel III, we identify the following eight separate categories of risk inherent in our business activities: credit risk, market risk, operational risk, interest rate risk, liquidity risk, credit concentration risk, reputation risk and strategic risk. Of these, the principal risks to which we are exposed are credit risk, market risk, liquidity risk and operational risk, and we strive to manage these and other risks within acceptable limits.

Organization

We have a multi-tiered risk management governance structure. Our Risk Management Committee is ultimately responsible for group-wide risk management, and directs our various subordinate risk management entities. The Risk Management Council reports directly to the Risk Management Committee and coordinates the implementation of directives set forth by the Risk Management Committee with the relevant risk management units of our subsidiaries. The Subsidiary Risk Management Committee of each of our subsidiaries, based on the Risk Management Committee's directives, determines risk management strategies and implements risk management policies and guidelines for such subsidiary and directs the activities of the subsidiary's risk management units within the risk guidelines set at the group level. Each Subsidiary Risk Management Committees generally receive inputs from the respective risk management units of such subsidiary, who also report directly to the Risk Management Committee.

The following chart sets out our risk management governance structure as of the date of this annual report:



Risk Management Committee

Our Risk Management Committee is a board-level committee that is responsible for overseeing all risks and advising the board of directors with respect to risk management-related issues. The committee consists of one non-standing director and three non-executive directors (one of whom serves as the chairman of the committee), and its major roles include:

- establishing risk management strategies in accordance with the directives of the board of directors;
- determining our target risk appetite;
- reviewing the level of risks we are exposed to and the appropriateness of our risk management policies, systems and operations; and
- allocating risk capital to each subsidiary and approving our subsidiaries' risk limits.

Risk Management Council

Our Risk Management Council is responsible for coordinating with the risk management units of our subsidiaries to ensure that they implement the policies, guidelines and limits established by the Risk Management Committee. Its responsibilities include:

- analyzing our risk status by using information provided by our subsidiary-level risk management units;
- adjusting the integrated risk capital allocation plan and risk limits for each of our subsidiaries; and
- coordinating issues relating to the group-wide integration of our risk management functions.

The Risk Management Council is comprised of our chief risk management officer and the chief risk management officers of all of our subsidiaries. It operates independently from all business units, and reports directly the Risk Management Committee. Our Risk Management Council convenes on a quarterly basis.

Subsidiary Risk Management Committees

Each of our subsidiaries has delegated risk management authority to its Subsidiary Risk Management Committee. Each Subsidiary Risk Management Committee measures and monitors the various risks faced by the relevant subsidiary and reports to that subsidiary's board of directors regarding decisions that it makes on risk management issues. It also makes certain strategic risk-related decisions regarding the operations of the relevant subsidiary, such as allocating credit risk limits, setting total exposure limits and market risk-related limits and determining which market risk derivatives instruments the subsidiary can trade. The major activities of each Subsidiary Risk Management Committee include:

- determining and monitoring risk policies, guidelines, limits and tolerance levels and the level of subsidiary risk in accordance with group policy;
- reviewing and analyzing the subsidiary's risk profile;
- setting limits for and adjusting the risk capital allocation plan and risk levels for each business unit within the subsidiary; and
- monitoring compliance with our group-wide risk management policies and practices at the business unit and subsidiary level.

Each Subsidiary Risk Management Committee is comprised of the subsidiary's chief executive officer, the non-executive directors on its board of directors and the director of its risk management unit.

Credit Risk Management

Credit risk is the risk of expected and unexpected losses in the event of borrower or counterparty defaults. Credit risk management aims to improve asset quality and generate stable profits while reducing risk through diversified and balanced loan portfolios. We determine the creditworthiness of each type of borrower or counterparty through reviews conducted by our credit experts and through our credit rating systems, and we set a credit limit for each borrower or counterparty.

We assess and manage all credit exposures. We measure expected losses and economic capital on assets (whether on- or off-balance sheet) that are subject to credit risk management and use expected losses and economic capital as management indicators. We manage credit risk by allocating credit risk economic capital limits. In addition, we control credit concentration risk exposure by applying and managing total exposure limits to prevent excessive risk concentration to particular industries or borrowers. Credit exposures that we assess and manage include loans to borrowers and counterparties, investments in securities, letters of credit, bankers' acceptances, derivatives and commitments. Our risk appetite, which is the ratio of our required economic capital to our estimated available book capital, is approved by the Risk Management Committee once a year. Thereafter, Kookmin Bank calculates economic capital every month for its business groups and bank-wide based on attributed economic capital in accordance with the risk appetite as approved by the Risk Management

Committee, and measures and reports profiles of credit risk on a bank-wide level and by business group regularly to its relevant business groups and senior management, including Kookmin Bank's Risk Management Council and Risk Management Committee.

We use expected default rates and recovery rates to determine the expected loss rate of a borrower or counterparty. We use the expected loss rate to make credit related decisions, including pricing, loan approval and establishment of standards to be followed at each level of decision making. These rates are calculated using information gathered from our internal database. With respect to large corporate borrowers, we also use information provided by external credit rating services to calculate default rates and recovery rates.

Our credit risk management processes include:

- establishing credit policy;
- credit evaluation and approval;
- industry assessment;
- total exposure management;
- collateral evaluation and monitoring;
- credit risk assessment;
- early warning and credit review; and
- post-credit extension monitoring.

Credit Evaluation

Kookmin Bank evaluates the ability of all loan applicants to repay their debts before it approves any loans, except for loans fully guaranteed by letters of guarantee issued by the Credit Guarantee Fund and the Korea Technology Credit Guarantee Fund, for loans fully secured by deposits and for other loans similarly guaranteed or secured. Kookmin Bank assigns each borrower or guarantor a credit rating based on the judgment of its experts or scores calculated using the appropriate credit rating system. Factors that Kookmin Bank considers in assigning credit ratings include both financial factors and non-financial factors, such as its perception of a borrower's reliability, management and operational risk and risk relating to the borrower's industry. The credit rating process differs according to the type, size and characteristics of a borrower.

Kookmin Bank uses its internally developed credit rating systems to rate potential borrowers. As the characteristics of each customer segment differ, Kookmin Bank uses several credit rating systems for its customers. The nature of the credit rating system used for a particular borrower depends on whether the borrower is an individual, a "small office/home office" customer, a small- and medium-sized enterprise or a large company. For large companies, Kookmin Bank has 17 credit ratings ranging from AAA to D. For small- and medium-sized enterprises, it has 15 credit ratings ranging from AA to D. For retail customers, it has 13 credit ratings ranging from grade 1 to grade 13.

Based on the credit rating of a borrower, Kookmin Bank applies different credit policies, which affect factors such as credit limit, loan period, loan pricing, loan classification and provisioning. Kookmin Bank also uses these credit ratings in evaluating its bank-wide risk management strategy. Factors Kookmin Bank considers in making this evaluation include the profitability of each company or transaction, performance of each business unit and portfolio management. Kookmin Bank monitors the credit status of borrowers and collect information to adjust its ratings appropriately. If Kookmin Bank changes a borrower's credit rating, it will also change the credit policies relating to that borrower and may also change the policies underlying its loan portfolio.

Retail Loan Approval Process

Mortgage Loans and Secured Retail Loans. Kookmin Bank's processing center staff reviews mortgage loans and retail loans secured by real estate or guarantees. Branch staff employees of Kookmin Bank forward loan applications to processing centers. However, in the case of loans secured by deposits with Kookmin Bank, its branch staff approves such loans. Kookmin Bank makes lending decisions based on its assessment of the value of the collateral, debt service capability and the borrower's score generated from its credit scoring systems.

For mortgage loans and loans secured by real estate, Kookmin Bank evaluates the value of the real estate offered as collateral using a database it has developed that contains information about real estate values throughout Korea. Kookmin Bank also uses information from a third party provider about the real estate market in Korea, which gives it up-to-date market value information for Korean real estate. In addition, Kookmin Bank's processing center staff employees review the value of real estate provided by the evaluation system to ensure there are no significant discrepancies. Kookmin Bank bases decisions regarding the approval of such loans primarily on the results of its credit scoring systems.

For loans secured by deposits, Kookmin Bank will generally grant loans up to 95% of the deposit amount if it holds the deposit.

With respect to mortgage loans and secured retail loans, Kookmin Bank screens customers based on various items on its checklist that indicate whether the customer may have deteriorating credit using internal information and rating information from credit bureaus. Kookmin Bank also evaluates debt service capability for eligible customers pursuant to certain checklist items, such as type of residence, profession, family information, annual income, age, credit card overdue information, transaction history (with both it and other financial institutions) and other relevant credit information.

Kookmin Bank generally decides whether to evaluate a loan application within three to five days after recording the relevant information in its credit scoring systems.

Unsecured Retail Loans. Kookmin Bank reviews applications for unsecured retail loans in accordance with its credit scoring systems. These automated systems evaluate loan applications and determine an appropriate pricing for the loan. The major benefits of using a credit scoring system are that it yields uniform results regardless of the user, that it can be used effectively by employees who do not necessarily have extensive experience in credit evaluation and that it can be updated easily to reflect changing market conditions by adjusting how each factor is weighted. The staff of Kookmin Bank's processing centers reviews the results of the credit scoring system based on information input by its branch staff and, if approved, issues the loan.

Kookmin Bank's credit scoring systems take into account factors including borrower's income, assets, profession, age, transaction history (with both it and other financial institutions) and other relevant credit information. The systems rank each borrower in an appropriate grade, and that grade is used as a factor in deciding whether to approve loans as well as to determine loan amounts.

Kookmin Bank generally bases its decisions on the results of its credit scoring systems to evaluate applications. However, a credit officer may overturn the results of the credit scoring systems, in certain circumstances.

Corporate Loan Approval Process

We approve corporate loans at different levels of our organization depending on the size and type of the loan, the credit risk level assessed by the credit rating system, whether the loan is secured by collateral and, if secured, the value of the collateral. The lowest level of authority is the branch staff employee of Kookmin Bank, who can approve small loans and loans that have the lowest range of credit risk. Larger loans and loans with higher credit risk are approved by higher levels of authority depending on where they fall in a matrix of loan size and credit risk. Depending on the size and terms of any particular loan or the credit risk relating to a particular borrower, more than one entity may review the application, although generally loan applications are reviewed only by the entity having corresponding authority to approve the loan.

Kookmin Bank evaluates all of its corporate borrowers by using credit rating systems, except for applicants whose borrowings are fully secured by deposits or applicants who have obtained third-party guarantees from the government or certain other very highly rated guarantors. See "—Credit Evaluation."

For owner-operated enterprises (which we refer to as SOHOs) with total outstanding loans of ₩1 billion or less, Kookmin Bank has put in place a retail SOHO credit rating system, which adopts simplified credit evaluation modeling procedures and has the same structure and process as the credit rating system for individual retail borrowers. This system consists of a scoring model and a preliminary examination checklist. The scoring model analyzes information with respect to the customer's personal information and bank transaction history, as well as information from credit bureaus. The preliminary examination checklist is based on information regarding the customer's credit delinquencies and history of write-offs. This system classifies customers into 13 possible credit ratings.

For SOHOs with total outstanding loans of more than ₩1 billion, Kookmin Bank has put in place a separate credit rating system known as "SOHO CRS." For other small- and medium-sized enterprises, Kookmin Bank has put in place a similar credit rating system known as CRS. For large corporations, Kookmin Bank has put in place a similar credit rating system known as LCRS. For financial institutions, certain non-profit organizations and public institutions, Kookmin Bank has put in place a similar credit rating system known as FNP CRS. The SOHO CRS, the CRS, the LCRS and the FNP CRS models consist of the following three parts:

- *Financial Model*. The financial model uses the borrower's current status and trend of financial ratios calculated using its financial statements. The financial model classifies potential borrowers into one of three size categories and one of five types of industry. This model incorporates logistic regression and statistical methods, which use financial ratios such as stability ratio, cash flow ratio, profitability ratio and turnover ratio to make credit determinations.
- *Non-financial Model*. The Non-financial model uses various qualitative and quantitative factors, such as future repayment capability, market prospects, management capability and business capability, to evaluate borrowers. The factors that are evaluated and the weighting given to each factor vary by type of industry and size of company.
- *Default Signal Check Model*. The default signal check model checks the consistency of the preliminary rating. This model checks various factors, including financial ratios with low scores, any non-quantitative factors that may cause a corporate default and any information arising from past experience, to determine the likelihood of a future default. The results of the default signal check model may be used to cap a borrower's credit grade.

In addition to the three parts outlined above, the SOHO CRS also includes a "CEO Evaluation Model," which analyzes information with respect to personal information and bank transaction history of the individual owner of such SOHO.

We often refer to corporate information gathered or ratings assigned by external credit rating agencies, such as Korea Information Service, National Information & Credit Evaluation Inc. and Korea Management Consulting & Credit Rating Corporation, in order to improve the accuracy of our credit ratings.

Credit Card Approval Process

We make decisions on all credit card approvals based on the Financial Supervisory Service standard of review for payment ability (such as the occupation and income of the applicant), as well as a combination of KB Kookmin Card's internal application scoring system and a credit scoring system developed by independent credit bureaus.

KB Kookmin Card's application scoring system reflects various credit information, including basic customer information (such as credit history), transaction history with it, if any, delinquency and transaction history with other card companies and financial institutions and credit information provided by the Korea

Federation of Banks and other credit bureaus. KB Kookmin Card also considers repayment ability, total assets, total outstanding debts and the length of the applicant's relationship, if any, and past contribution to our profitability, if any.

The credit scoring system developed by credit bureaus, reflects various sources of information regarding the credit risk of customers, including delinquency and transaction history with other credit card companies and financial institutions.

On the basis of the standard of review for payment ability and the combination of the scores from our application scoring system and the credit scoring system developed by independent credit bureaus, KB Kookmin Card establishes, among other things, the term of any new approvals, initial limits and differentiation of fee rates with respect to its credit cards. KB Kookmin Card's systems allow it to differentiate applicants into groups that receive immediate credit card approval or rejection, or that may require it to further investigate that applicant's credit qualifications. The initial limits of new applicants are based on their estimated disposable income, which is based on their occupation and the value of their personal assets. KB Kookmin Card applies its fee rates to applicants differently according to risk premium and profitability.

Total Exposure Management

We establish and manage total exposure limits for corporations, *chaebols* and industries, as well as certain small- and medium-sized enterprises, in order to optimize the use of credit availability and avoid excessive risk concentration. We establish total exposure limits for large corporations to which we have exposures (in the form of securities or loans) of over ₩30 billion, small- and medium-sized enterprises to which we have exposures (in the form of securities or loans) of over ₩20 billion and *chaebols* designated by the Financial Supervisory Service or by Kookmin Bank, by reviewing factors such as their industry, size, cash flows, financial ratios and credit ratings, while establishing exposure limits for industries by peer group, as defined by us, by reviewing the sales growth rate and risk concentration for each industry. The guidelines used to set these total exposure limits are approved by Kookmin Bank's Risk Management Council after review by the Credit Risk Management Subcommittee.

Kookmin Bank's maximum exposure limit is within 25% of its Tier I and Tier II capital for a single *chaebol*, and within 10% of its Tier I and Tier II capital for an individual large corporation.

We manage and control exposure limits on a daily basis. The principal system that we use for this purpose is the Total Exposure Management System. This system allows us to monitor and control our total exposure to large corporations, *chaebols* and industries. We monitor our exposure to large corporations to which we have an exposure of ₩30 billion or more, individual corporations to which we have an exposure of more than ₩20 billion, and also our exposure to the 65 *chaebols*, which are comprised of the 42 largest *chaebols* in Korea designated as such by the Financial Supervisory Service based on their outstanding exposures as well as 23 *chaebols* selected for monitoring by the Senior Executive Vice President of Kookmin Bank's Risk Management Division. We also monitor our exposure to industries by peer groups. Our Total Exposure Management System integrates all of our credit-related risk including credit extended by our overseas branches and affiliates. The assets subject to the system include all Won-denominated and foreign currency-denominated loans, all assets in trust accounts except specified money trusts, guarantees, trade-related credits, commercial paper, corporate bonds and other securities and derivatives.

Collateral Evaluation and Monitoring System

Kookmin Bank uses the Collateral Evaluation and Monitoring System to manage the liquidation value of collateral it holds. The Collateral Evaluation and Monitoring System is a computerized collateral management system that can be accessed from Kookmin Bank's headquarters and its branches. Using this system, Kookmin Bank can more accurately assess the actual liquidation value of collateral, determine the recovery rate on its loans and use this information in setting its credit risk management and loan policies. Kookmin Bank can monitor the value of all the collateral a borrower provides and the value of that collateral based on its liquidation value. When appraising the value of real estate collateral, which makes up the largest part of Kookmin Bank's collateral, Kookmin Bank consults a regularly updated database provided by a third party that tracks the prices at which various types of real estate in various regions of Korea are sold. Kookmin Bank appraises the value of collateral when it makes a loan, when the loan is due for renewal and when events occur that may change the value of the collateral.

Credit Risk Management and Monitoring

Kookmin Bank's Credit Risk Department manages and regulates our loan portfolio policies. It also analyzes and monitors our loan portfolios and monitors our compliance with the applicable limits for credit risk. Moreover, it separately manages high-risk products, such as real estate project financing loans and over-the-counter derivative products, by setting appropriate limits.

Credit Review

Kookmin Bank's credit review function is independent of the business groups which manage our assets. Its Credit Review Department:

- reviews internal credit regulations, policies and systems;
- analyzes the credit status of selected loan assets and verifies the appropriateness of the credit evaluations/approvals made by branches and headquarters; and
- evaluates the corporate credit risk of potentially insolvent companies.

More specifically, Kookmin Bank's Credit Review Department continuously reviews the financial condition of selected borrowers with respect to their current debt, collateral, business, transactions with related parties and debt service capability. Based on such review, Kookmin Bank may adjust the borrower's credit rating, lending policy or asset quality classification of the loan provided to the borrower, depending on the applicable circumstances. Kookmin Bank also regularly reviews other aspects of the lending process, including industries and regions in which its borrowers operate and the quality of its domestic and overseas assets. Kookmin Bank's industry reviews focus on growth, stability, competition and ability to adapt to a changing environment. Based on the results of a particular industry review, Kookmin Bank may revise the total exposure limit assigned to that industry and lending policy for each company within that industry. When a review takes place, Kookmin Bank may adjust not only credit ratings of its borrowers based on a variety of factors, but also asset quality classification, credit limits and applied interest rates or its credit policies. Credit review results are reported to Kookmin Bank's chief risk officer and its Risk Management Committee on a quarterly basis.

Kookmin Bank's Credit Review Department also conducts on-site reviews of selected branches and related credit analysis centers which are experiencing increasing delinquency ratios and bad debts. During these visits Kookmin Bank examines the loan processes and recommend improvement plans and appropriate follow-up measures.

Also, based on guidelines provided by the Financial Supervisory Service to all Korean banks, Kookmin Bank operates a corporate credit risk assessment program to facilitate the identification of weak companies and possible commencement of corporate restructuring. Through this program, Kookmin Bank, together with other banks, is able to detect symptoms of financially troubled companies at an early stage, assess related credit risk and support the normalization of companies that are likely to turnaround through a workout process, or seek to liquidate those companies that are not likely to recover.

Kookmin Bank's Credit Review Department also analyzes issues related to credit risk and provides information necessary for the formulation of effective credit policies and strategies and for effective credit risk management.

Market Risk Management

The major risk to which we are exposed is interest rate risk on debt instruments and interest bearing securities and, to a lesser extent, stock price risk and foreign exchange risk. The financial instruments that expose us to these risks are securities and financial derivatives. We are not exposed to commodity risk, the other recognized form of market risk, as we currently do not engage in commodities trading. We are also exposed to interest rate risk and liquidity risk in Kookmin Bank's banking book. We divide market risk into risks arising from trading activities and risks arising from non-trading activities.

Kookmin Bank's Risk Management Council establishes overall market risk management principles. It has delegated the responsibility for the market risk management for trading activities to the Market Risk Management Subcommittee of Kookmin Bank, which is chaired by Kookmin Bank's chief risk officer. This subcommittee meets on a regular basis each month and as required to respond to developments in the market and the economy. Based on the policies approved by Kookmin Bank's Risk Management Council, the Market Risk Management Subcommittee reviews and approves reports as required that include trading profits and losses, position reports, limit utilization, sensitivity analysis and VaR results for our trading activities.

Kookmin Bank's Risk Management Council is responsible for interest rate and liquidity risk management for its non-trading activities. The council meets on a regular basis and as required to respond to developments in the market and the economy. Members of the Risk Management Council, acting through Kookmin Bank's Risk Management Department, review Kookmin Bank's interest rate and liquidity gap position monthly, formulate a view on interest rates, establishing strategies with respect to deposit and lending rates and review the business profile and its impact on asset and liability management.

To ensure adequate interest rate and liquidity risk management, we have assigned the responsibilities for our asset and liability risk management to Kookmin Bank's Risk Management Department in Kookmin Bank's Risk Management Group, which monitors and reviews the asset and liability operating procedures and activities of Kookmin Bank's Financial Planning Department, and independently reports to the management on the related issues.

Market Risk Management for Trading Activities

Our trading activities consist of:

- trading activities for our own account to realize short-term trading profits in Won-denominated debt and equities markets and foreign exchange markets based on our short-term forecast of changes in the market situation; and
- trading activities involving derivatives, such as swaps, forwards, futures and option transactions, to realize profits primarily from selling derivative products to our customers and to hedge market risk incurred from those activities. In addition, certain derivative products that we use to hedge our own market risk are classified as trading activities as they do not qualify for hedge accounting treatment under IFRS. We believe, however, that certain of these products are effective as economic hedges.

We use derivative instruments to hedge our market risk and, to a limited extent, to make profits by trading derivative products within acceptable risk limits. The principal objective of our hedging strategy is to manage our market risk within established limits. We use the following hedging instruments to manage relevant risks:

- to hedge interest rate risk arising from its trading activities, the Trading Department of Kookmin Bank occasionally uses interest rate futures (Korea Treasury Bond Futures) and interest rate swaps;
- to hedge stock price risk arising from its trading activities, the Trading Department of Kookmin Bank selectively uses stock index futures;
- to hedge interest rate risk and foreign exchange risk arising from our foreign currency-denominated asset and liability positions as well as our trading activities, the Trading Department and the Fund Management Department of Kookmin Bank use interest rate swaps, cross-currency interest rate swaps, foreign exchange forwards and futures, Euro-dollar futures and currency options; and

- to change the interest rate characteristics of certain assets and liabilities after the original investment or funding, we use swaps. For example, depending on the market situation, we may choose to obtain fixed rate funding instead of floating rate funding if we believe that the terms are more favorable, which we can achieve by entering into interest rate swaps.

We generally manage our market risk at the portfolio level. To control our exposure to market risk, we use EC limits set by Kookmin Bank's Risk Management Council for Kookmin Bank and at the group level within Kookmin Bank, VaR, position and stop loss limits set by Kookmin Bank's Risk Management Council for Kookmin Bank and at the group level within Kookmin Bank, and VaR, position, stop loss and sensitivity limits (PVBP, Delta, Gamma, Vega) set by Kookmin Bank's Market Risk Management Subcommittee at the department level within Kookmin Bank. We prepared our risk control and management guidelines for derivative trading based on the regulations and guidelines promulgated by the Financial Supervisory Service.

In addition, we have implemented internal processes which include a number of key controls designed to ensure that fair value is measured appropriately, particularly where a fair value model is internally developed and used to price a significant product. See "Item 5.A. Operating Results—Critical Accounting Policies—Valuation of Financial Instruments" and Notes 3.3 and 6 of the notes to our consolidated financial statements. For example, each year, Kookmin Bank's Risk Management Department reviews the existing pricing and valuation models, with a focus on their underlying modeling assumptions and restrictions, to assess the appropriateness of their continued use. In consultation with Kookmin Bank's Trading Department, the Risk Management Department recommends potential valuation models to Kookmin Bank's Fair Value Evaluation Committee. Upon approval by Kookmin Bank's Fair Value Evaluation Committee, the selected valuation models are reported to its Market Risk Management Subcommittee.

We monitor market risk arising from trading activities of our business groups and departments. The market risk measurement model we use for both our Won-denominated trading operations and foreign currency-denominated trading operations is implemented through our integrated market risk management system called Adaptiv, which enables us to generate consistent VaR numbers for all trading activities.

Value at Risk analysis. We use VaR to measure market risk. VaR is a statistically estimated maximum amount of loss that could occur over a given period of time at a given level of confidence. VaR is a commonly used market risk management technique. However, this approach does have some shortcomings. VaR estimates possible losses over a certain period at a particular confidence level using past market movement data. Past market movement, however, is not necessarily a good indicator of future events, as there may be conditions and circumstances in the future that the model does not anticipate. As a result, the timing and magnitude of the actual losses can be different depending on the assumptions made at the time of calculation. In addition, the time periods used for the model, generally one or ten days, are assumed to be a sufficient holding period before liquidating the relevant underlying positions. If these holding periods are not sufficient, or too long, the VaR results may understate or overstate the potential loss. Different VaR methodologies and distributional assumptions could produce a materially different VaR. VaR is most appropriate as a risk measure for trading positions in liquid capital markets and will understate the risk associated with severe events, such as a period of extreme illiquidity.

We use a 99% single tail confidence level to measure VaR, which means the actual amount of loss may exceed the VaR, on average, once out of 100 business days. Until 2011, we used the "variance-covariance method" or parametric VaR ("PVaR") methodology to measure our daily VaR, which took into account the diversification effects among different risk categories as well as within the same risk category. In 2012, we received authorization from the Financial Services Commission to use a historical simulation VaR ("HSVaR") methodology, which we believe to be more accurate and responsive in reflecting market volatilities, to measure market risk. Our ten-day HSVaR method, which is computed using a full valuation and is computationally intensive, uses an archive of historic price data and the VaR for a portfolio is estimated by creating a hypothetical time series of returns on that portfolio, obtained by running the portfolio through actual ten-day historical data and computing the changes that would have occurred in each ten-day period.

The following table shows the volume and types of positions held by Kookmin Bank for which the VaR method is used to measure market risk as of December 31, 2012, 2013 and 2014.

	As of December 31,		
	2012	2013	2014
	(in millions of Won)		
Securities—Bond(1)	₩ 6,181,712	₩ 6,918,051	₩ 7,393,643
Securities— Equity(1)	173,757	93,122	60,122
Spot exchanges(2)	271,500	1,569,768	1,192,918
Derivatives(3)	4,091,473	3,465,130	3,808,515
Total	₩10,718,442	₩12,046,071	₩12,455,198

(1) Represents amounts marked to market.

(2) Represents the overall net open currency position in each currency, which is the greater of (i) the sum of the absolute value of all short positions and (ii) the sum of the absolute value of all long positions.

(3) For over-the-counter derivatives, represents the absolute value of over-the-counter derivatives measured at fair value at year end for monitoring purposes. For exchange-traded derivatives, includes the amount of deposits and the collateral posted for such derivatives.

The following table shows Kookmin Bank's ten-day HSVaRs (at a 99% confidence level for a ten-day holding period) as of December 31, 2012, 2013 and 2014 for interest risk, stock price risk and foreign exchange risk relating to its trading activities. The following figures were calculated on a consolidated basis.

	As of December 31,		
	2012	2013	2014
	(in billions of Won)		
Risk categories:			
Interest risk	₩ 8.3	₩17.0	₩10.1
Stock price risk	4.9	1.1	0.9
Foreign exchange risk	11.2	5.3	10.8
Less: diversification	(12.7)	(7.0)	(8.8)
Diversified VaR for overall trading activities	₩ 11.7	₩16.4	₩13.0

In 2014, the average, high, low and ending amounts of ten-day HSVaR (at a 99% confidence level for a ten-day holding period) for Kookmin Bank relating to its trading activities were as follows.

	Trading activities VaR for 2014			
	Average	Minimum	Maximum	As of December 31, 2014
	(in billions of Won)			
Interest risk	₩12.9	₩ 7.7	₩19.8	₩10.1
Stock price risk	1.6	0.7	3.9	0.9
Foreign exchange risk	12.0	5.1	14.7	10.8
Less: diversification				(8.8)
Diversified VaR for overall trading activities	15.4	10.1	23.6	₩13.0

In 2013, the average, high, low and ending amounts of ten-day HSVaR (at a 99% confidence level for a ten-day holding period) for Kookmin Bank relating to its trading activities were as follows.

	Trading activities VaR for 2013			
	Average	Minimum	Maximum	As of December 31, 2013
	(in billions of Won)			
Interest risk	₩16.3	₩ 7.4	₩24.9	₩17.0
Stock price risk	3.5	0.9	7.1	1.1
Foreign exchange risk	9.3	5.3	13.6	5.3
Less: diversification				(7.0)
Diversified VaR for overall trading activities	17.3	10.9	22.2	₩16.4

In 2012, the average, high, low and ending amounts of ten-day HSVaR (at a 99% confidence level for a ten-day holding period) for Kookmin Bank relating to its trading activities were as follows.

	Trading activities VaR for 2012			
	Average	Minimum	Maximum	As of December 31, 2012
	(in billions of Won)			
Interest risk	₩20.1	₩ 8.3	₩29.3	₩ 8.3
Stock price risk	4.2	0.5	8.7	4.9
Foreign exchange risk	26.6	9.6	39.2	11.2
Less: diversification				(12.7)
Diversified VaR for overall trading activities	20.6	10.6	28.7	₩ 11.7

Standardized Method. Market risk for positions not measured by VaR are measured using the standardized method for measuring market risk-based required equity capital specified by the Financial Supervisory Service, which takes into account certain risk factors. Under the standardized method, the required equity capital is measured using the risk-weighted values for each risk factor. The method used to measure the market risk-based required equity capital for each risk factor is as follows:

- Interest rate risk:
  - General market risk: General market risk relates to the risk of losses from macroscopic events which could have an impact on interest rates, stock prices, exchange rates, and market prices of general commodities. General market interest rate risk of a debt security is calculated on its net position, taking into consideration the remaining maturity and coupon rate.
  - Specific risk: Specific risk relates to the risk of loss from changes in credit risk of issuers of debt securities or equities, excluding changes in general market prices. Specific interest rate risk of a debt security is measured by multiplying the interest rate position appraised based on the market price of such security by the risk-weighted value applicable to the type of debt security, credit rating and the remaining maturity.
- Equity risk: General and specific equity risk are calculated by multiplying the bought or sold position by the relevant risk-weighted values.
- Foreign exchange risk: Foreign exchange risk is measured by multiplying the larger of the absolute values among the net bought or sold positions of each currency by the relevant risk-weighted values.
- Option risk: Option risk is measured using the delta, gamma and vega of the option.

The standardized method is used to measure the market risk of the positions for which the Financial Supervisory Service has not approved the use of the VaR method. In addition, we use the standardized method for positions which are held by certain subsidiaries or for which measuring VaR is difficult due to the lack of daily position data. See Note 4.4.2 of the notes to our consolidated financial statements included elsewhere in this annual report.

The following table shows the volume and types of instruments held by Kookmin Bank for which the standardized method is used to measure its required equity capital as of December 31, 2012, 2013 and 2014.

	As of December 31,		
	2012	2013	2014
	(in millions of Won)		
30-year government bonds[1]	₩ —	₩ —	₩ 7,913
Currency rate swaps and foreign exchange positions[2]	131,723	122,537	117,334
Options embedded in convertible bonds[3]	17,459	2,328	2,383
Total	₩149,182	₩124,865	₩127,630

(1) Represents amounts marked to market.

(2) Represents the overall net open currency position in each currency held by Kookmin Bank (China) Ltd. and a special purpose vehicle with respect to Kookmin Bank's covered bond program. The overall net open currency position is the greater of (i) the sum of the absolute value of all short positions and (ii) the sum of the absolute value of all long positions.

(3) Represents the absolute value of over-the-counter derivatives measured at fair value at year end for monitoring purposes.

The following table shows Kookmin Bank's required equity capital measured using the standardized method as of December 31, 2012, 2013 and 2014.

	As of December 31,		
	2012	2013	2014
	(in millions of Won)		
Risk categories:			
Interest risk	₩ 1,673	₩ 921	₩ 792
Stock price risk	4,567	2	1,101
Foreign exchange risk	9,081	9,214	9,387
Total	₩15,321	₩10,137	₩11,280

Back-Testing. We conduct back testing on a daily basis to validate the adequacy of our market risk model. In back testing, we compare both the actual and hypothetical profit and loss with the VaR calculations and analyze any results that fall outside our predetermined confidence interval of 99%. The number of times the actual changes in fair values, earnings or cash flows from the market risk sensitive instruments exceeded the VaR amounts in 2012, 2013 and 2014 was nil, 4 and 1, respectively.

Stress testing. In addition to VaR, which assumes normal market situations, we use stress testing to assess our market risk exposure to abnormal market fluctuations. Abnormal market fluctuations include significant declines in the stock market and significant increases in the general level of interest rates. This is an important way to supplement VaR, as VaR is a statistical expression of possible loss under a given confidence level and holding period. It does not cover potential loss if the market moves in a manner that is outside our normal expectations. Stress testing projects the anticipated change in value of holding positions under certain scenarios assuming that no action is taken during a stress event to change the risk profile of a portfolio. According to Kookmin Bank's stress testing, we estimate that as of December 31, 2014, Kookmin Bank's trading portfolio could have lost ₩299 billion for an assumed short-term extreme decline of approximately 25% in the equity market and an approximate 77 basis point increase in the Korean treasury bond rates under an abnormal stress environment.

We monitor the impact of market turmoil or any abnormality by conducting stress tests and confirming that the results are within our market risk limits. If the impact is large, Kookmin Bank's chief risk officer may request that our portfolio be restructured or other appropriate action be taken.

Interest Risk

Interest risk from trading activities arises mainly from our trading of Won-denominated debt securities. Our trading strategy is to benefit from short-term movements in the prices of debt securities arising from changes in interest rates. As our trading accounts are marked-to-market daily, we manage the interest risk related to our trading accounts using market value-based tools such as VaR and sensitivity analysis. As of December 31, 2014, the VaR of Kookmin Bank's interest risk from trading was ₩10.1 billion and the weighted average duration, or weighted average maturity, of its Won-denominated debt securities at fair value through profit or loss was approximately 2.1 years.

Foreign Exchange Risk

Foreign exchange risk arises because we have assets and liabilities that are denominated in currencies other than Won, as well as off-balance sheet items such as foreign exchange forwards and currency swaps.

Prior to August 2010, assets and liabilities denominated in U.S. dollars, Japanese yen, and Euro typically accounted for the majority of our foreign currency assets and liabilities. Beginning in August 2010, the Kazakhstan tenge has accounted for a large portion of our foreign currency assets and liabilities, although its impact has decreased since 2013 due to impairment losses on our equity stake in JSC Bank CenterCredit, a Kazakhstan Bank. Until August 2010, our investment in JSC Bank CenterCredit was fully hedged against currency risk. See "Item 4.B. Business Overview—Capital Markets Activities and International Banking—International Banking." However, in August 2010, we decided to discontinue such currency hedge as the value of the Won had remained relatively stable against the Kazakhstan tenge for a prolonged period of time.

The difference between our foreign currency assets and liabilities is offset against forward foreign exchange positions, currency options and currency swaps to obtain our net foreign currency open position. Kookmin Bank's Risk Management Council and Market Risk Management Subcommittee oversee Kookmin Bank's foreign exchange exposure for both trading and non-trading purposes by establishing a limit for this net foreign currency open position, together with stop loss limits. VaR limits are established on a combined basis for our domestic operations and foreign branches.

The following table shows Kookmin Bank's non-consolidated net open positions at the end of 2012, 2013 and 2014. Positive amounts represent long positions and negative amounts represent short positions. The net open positions held by subsidiaries other than Kookmin Bank are not significant.

	As of December 31,[1]		
	2012	2013	2014
	(in millions of US$)		
Currency:			
U.S. dollars	US$ (72.0)	US$(135.0)	US$(174.7)
Japanese yen	(8.3)	(17.3)	(1.8)
Euro	(4.8)	(5.5)	(1.1)
Kazakhstan tenge	314.5	82.5	56.5
Others	25.4	22.9	34.6
Total	US$ 254.8	US$ (52.4)	US$ (86.5)

(1) Amounts prepared on a non-consolidated basis.

Equity Price Risk

Equity price risk results from our equity derivatives trading portfolio in Won since we do not have any trading exposure to shares denominated in foreign currencies other than foreign equity index futures.

The equity derivatives trading portfolio in Won consists of exchange-traded stocks and equity derivatives under strict limits on diversification as well as position limits and stop loss limits.

Kookmin Bank's Risk Management Council and Market Risk Management Subcommittee set annual and monthly stop loss limits that are monitored by Kookmin Bank's Risk Management Department. In order to ensure timely action, the stop loss limit of individual securities is monitored by the relevant middle office.

As of December 31, 2014, Kookmin Bank's equity trading position was ₩60.1 billion.

Derivative Market Risk

Our derivative trading includes interest rate and cross-currency swaps, foreign exchange forwards, stock index and interest rate futures and currency options. These activities consist primarily of the following:

- sales of tailor-made derivative products that meet various needs of our corporate customers and related transactions to reduce our exposure resulting from those sales;
- taking positions in limited cases when we expect short-swing profits based on our market forecasts; and
- trading to hedge our interest rate and foreign currency risk exposure as described above.

Market risk from trading derivatives is not significant since our derivative trading activities are primarily driven by customer deals with very limited open trading positions.

Market Risk Management for Non-Trading Activities

Interest Rate Risk

Our principal market risk from non-trading activities is interest rate risk. Interest rate risk arises due to mismatches in the maturities or re-pricing periods of these rate-sensitive assets and liabilities. We measure interest rate risk for Won and foreign currency assets and liabilities in our bank accounts (including derivatives) and our principal guaranteed trust accounts. Most of our interest earning assets and interest bearing liabilities are denominated in Won and our foreign currency-denominated assets and liabilities are mostly denominated in U.S. dollars.

Our principal interest rate risk management objectives are to generate stable net interest revenues and to protect our asset value against interest rate fluctuations. We principally manage this risk for our non-trading activities by analyzing and managing maturity and duration gaps between our interest earning assets and interest bearing liabilities. Although we have used hedging instruments only on a limited basis for interest rate risk management for our non-trading assets and liabilities, to date the Korean financial market has not been sufficiently developed for this purpose. We expect to increase our use of derivatives to hedge this risk in the near future as the Korean financial market becomes more sophisticated.

Interest rate gap analysis measures expected changes in net interest revenues by calculating the difference in the amounts of interest earning assets and interest bearing liabilities at each maturity and interest resetting date. We perform interest rate gap analysis for Won-denominated and foreign currency-denominated assets and trust assets on a monthly basis or more frequently when deemed necessary.

Interest Rate Gap Analysis. We perform interest rate gap analysis based on interest rate repricing maturities of assets and liabilities. However, for some of our assets and liabilities with either no maturities or unique characteristics, we use or assume certain maturities, including the following examples:

- With respect to asset maturities, we assume remaining maturities of prime rate-linked loans with remaining maturities of over one year to be one year and use the actual maturities for prime rate-linked loans with remaining maturities of less than one year.
- With respect to liability maturities, we use last 36 months' average balance to segregate "non-core" and "core" demand deposits. We assume "non-core" deposits to have remaining maturities of one month or less, and we assume "core" demand deposits to have remaining maturities between one month and five years.

The following table shows Kookmin Bank's interest rate gap for Won-denominated accounts and foreign currency-denominated accounts as of December 31, 2014.

	As of December 31, 2014					
	0-3 Months	3-6 Months	6-12 Months	1-3 Years	Over 3 Years	Total
	(in billions of Won, except percentages)					
Won-denominated Interest earning assets:						
Loans	₩ 68,691	₩55,961	₩43,967	₩11,881	₩12,885	₩193,384
Securities	3,291	2,140	4,959	13,258	3,052	26,701
Others	9,429	262	275	703	105	10,774
Total	₩ 81,411	₩58,363	₩49,201	₩25,842	₩16,042	₩230,859
Interest bearing liabilities:						
Deposits	₩ 76,842	₩37,206	₩51,233	₩21,161	₩16,554	₩202,995
Borrowings	5,050	0	2	0	150	5,202
Others	10,126	1,310	1,762	4,677	3,188	21,063
Total	₩ 92,018	₩38,516	₩52,996	₩25,838	₩19,892	₩229,260
Sensitivity gap	(10,607)	19,847	(3,795)	3	(3,849)	1,599
Cumulative gap	(10,607)	9,240	5,445	5,448	1,599	
% of total assets	(4.6)%	4.0%	2.4%	2.4%	0.7%	
Foreign currency-denominated Interest earning assets:						
Due from banks	₩ 8,893	₩ 1,925	₩ 1,054	₩ 260	₩ 11	₩ 12,144
Loans	212	33	79	367	107	797
Securities	870	330	335	879	0	2,415
Total	₩ 9,976	₩ 2,287	₩ 1,469	₩ 1,506	₩ 117	₩ 15,356
Interest bearing liabilities:						
Deposits	₩ 1,856	₩ 2,400	₩ 354	₩ 124	₩ 38	₩ 4,772
Borrowings	3,995	1,311	824	83	13	6,226
Others	3,471	0	297	1,209	0	4,977
Total	₩ 9,322	₩ 3,711	₩ 1,476	₩ 1,416	₩ 51	₩ 15,975
Sensitivity gap	654	(1,423)	(7)	90	66	(620)
Cumulative gap	654	(769)	(776)	(686)	(620)	
% of total assets	4.3%	(5.0)%	(5.1)%	(4.5)%	(4.0)%	

Duration Gap Analysis. We also perform duration gap analysis to measure and manage interest rate risk. Duration gap analysis is a more long-term risk indicator than interest rate gap analysis, as interest rate gap analysis focuses more on accounting income as opposed to the market value of the assets and liabilities. We emphasize duration gap analysis because, in the long run, our principal concern with respect to interest rate fluctuations is the net asset value rather than net interest revenue changes. In 2014, our asset and liability duration gap was negative and it moved between (-)0.035 years and (-)0.044 years. Accordingly, our net asset value would have declined between ₩78 billion and ₩102 billion if interest rates had decreased by one percentage point.

For duration gap analysis we use or assume the same maturities for different assets and liabilities that we use or assume for our interest rate gap analysis.

The following table shows Kookmin Bank's duration gaps and net asset value changes when interest rates decrease by one percentage point as of the specified dates, on a non-consolidated basis.

Won-denominated	**Asset Duration**	**Liability Duration**	**Duration Gap**	**Net Asset Value Change**
Date	**(in years)**	**(in years)**	**(in years)**	**(in billions of Won)**
June 30, 2014	0.733	0.801	(0.035)	(78)
December 31, 2014	0.762	0.838	(0.044)	(102)

Foreign currency-denominated	**Asset Duration**	**Liability Duration**	**Duration Gap**	**Net Asset Value Change**
Date	**(in years)**	**(in years)**	**(in years)**	**(in billions of Won)**
June 30, 2014	0.298	0.341	(0.066)	(9)
December 31, 2014	0.303	0.307	(0.033)	(4)

We set interest rate risk limits using historical interest rate volatility of financial bonds and duration gaps with respect to expected asset and liability positions based on our annual business plans. The Risk Management Department in Kookmin Bank's Risk Management Group submits interest rate gap analysis reports, duration gap analysis reports and interest rate risk limit compliance reports monthly to Kookmin Bank's Risk Management Council and quarterly to Kookmin Bank's Risk Management Committee.

The following table summarizes Kookmin Bank's interest rate risk, taking into account asset and liability durations as of December 31, 2014.

	As of December 31, 2014					
	3 Months or Less	**3-6 Months**	**6-12 Months**	**1-3 Years**	**Over 3 Years**	**Total**
	(in billions of Won, except percentages and maturities in years)					
Won-denominated:						
Asset position	₩ 81,411	₩58,363	₩49,201	₩25,842	₩16,042	₩230,859
Liability position	92,018	38,516	52,996	25,838	19,892	229,260
Gap	(10,607)	19,847	(3,795)	3	(3,849)	1,599
Average maturity	0.242	0.482	0.956	2.753	5.123	
Interest rate volatility	(0.97)%	(0.83)%	(0.47)%	0.12%	0.37%

Gap	654	(1,423)	(7)	90	66	(620)
Average maturity	0.249	0.496	0.982	2.859	5.445	
Interest rate volatility	0.24%	0.40%	0.46%	0.33%	0.27%	
Amount at risk	(0)	3	(0)	(0)	(1)	2

Interest Rate VaR Analysis. Interest rate VaR is the estimated maximum possible loss on net non-trading assets due to unfavorable changes in interest rates. We calculate interest rate VaR based on interest earning assets and interest bearing liabilities, excluding trading positions, at a 99.94% confidence level. In 2012, we changed our method of calculating the interest rate impact from the previous internal simulation method of applying probable interest rate scenarios to a historical simulation method which uses actual historical price, volatility and yield changes in comparison with the current position to generate hypothetical portfolios and calculate a distribution of position and portfolio market value changes. The previous internal simulation method used extreme values in applying hypothetical interest rates to each maturity period, which we believe may result in exaggerated interest rate VaR values. Accordingly, we believe that the change in our interest rate VaR methodology to a historical simulation method will allow us to benefit from more sophisticated risk measurements using practical scenarios. Using the historical simulation method, Kookmin Bank's interest rate VaR was ₩203 billion as of December 31, 2013 and ₩112 billion as of December 31, 2014. See Note 4.4.3 of the notes to our consolidated financial statements included elsewhere in this annual report.

Foreign Exchange Risk

We manage foreign exchange rate risk arising from our non-trading operations together with such risks arising from our trading operations. See "—Market Risk Management for Trading Activities—Foreign Exchange Risk" above.

Liquidity Risk Management

Liquidity risk is the risk of insolvency or loss due to a disparity between the inflow and outflow of funds resulting from, for example, maturity mismatches, obtaining funds at a high price or disposing of securities at an unfavorable price due to lack of available funds. We manage our liquidity in order to meet our financial liabilities from withdrawals of deposits, redemption of matured debentures and repayments at maturity of borrowed funds. We also require sufficient liquidity to fund loans, to extend other credits and to invest in securities. Our liquidity management goal is to meet all our liability repayments on time and fund all investment opportunities even under adverse conditions. To date, we have not experienced significant liquidity risk.

We maintain liquidity by holding sufficient quantities of assets that can be liquidated to meet actual or potential demands for funds from depositors and others. We also manage liquidity by ensuring that the excess of maturing liabilities over maturing assets in any period is kept to manageable levels relative to the amount of funds we believe we could raise by issuing securities. We seek to minimize our liquidity costs by managing our liquidity position on a daily basis and by limiting the amount of cash at any time that is not invested in interest earning assets or securities.

We maintain diverse sources of liquidity to facilitate flexibility in meeting our funding requirements. We fund our operations principally by accepting deposits from retail and corporate depositors, accessing the call loan market (a short-term market for loans with maturities of less than 90 days), issuing debentures and borrowing from the Bank of Korea. We use the majority of funds we raise to extend loans or purchase securities. Generally, deposits are of shorter average maturity than loans or investments.

For Won-denominated assets and liabilities, we manage liquidity using a cash flow structure based on holding short-term liabilities and long-term assets. Generally, the average initial contract maturity of our new Won-denominated time deposits was less than one year, while during the same period most of our new loans and securities had maturities over one year.

We manage liquidity risk within the limits set on Won and foreign currency accounts in accordance with the regulations of the Financial Services Commission. The Financial Services Commission requires Korean banks, including Kookmin Bank, to maintain a liquidity coverage ratio of not less than 80% from January 1, 2015 to December 31, 2015, with such minimum liquidity coverage ratio to increase in increments of 5% per annum to

100% by 2019, and a foreign currency liquidity ratio of not less than 85%. The Financial Services Commission defines the liquidity coverage ratio as the ratio of highly liquid assets to total net cash outflows over a one-month period. The highly liquid assets and total net cash outflows included in the calculation of the liquid coverage ratio are determined in accordance with the "Standards for Calculation of Liquidity Coverage Ratio" under the "Detailed Regulations on Supervision of Banking Business."

Kookmin Bank's Treasury Department is responsible for daily liquidity risk management of its Won and foreign currency exposure. It reports monthly plans for funding and operations to the Asset Liability Management Committee of Kookmin Bank, which discusses factors such as interest rate movements and maturity structures of its deposits, loans and securities.

The following table shows Kookmin Bank's liquidity status and limits for Won and foreign currency accounts as of December 31, 2014 in accordance with Financial Services Commission regulations:

Won accounts:	1 Month or Less
	(in billions of Won, except percentages)
Assets (A)	₩54,476
Liabilities (B)	44,991
Liquidity gap	9,485
Liquidity ratio (A/B)	121.08%
Limit	100%

	7 Days or Less	1 Month or Less	3 Months or Less
	(in millions of US$, except percentages)		
Foreign currency assets (A)	US$ 5,135	US$ 9,670	US$15,703
Foreign currency liabilities (B)	4,122	8,060	13,501
Maturity gap (C)	1,013	1,609	2,202
Cumulative gap	1,013	2,622	4,824
Total assets (D)	34,830	34,830	34,830
Liquidity gap ratio (C/D)	2.91%	4.62%	116.31%(1)
Limits	(3.00)%	(10.00)%	85.00%

(1) Liquidity ratio (A/B).

The Risk Management Department in Kookmin Bank's Risk Management Group reports whether it is complying with these limits monthly to Kookmin Bank's Risk Management Council and quarterly to Kookmin Bank's Risk Management Committee.

Operational Risk Management

Overall Status

There is no complete consensus on the definition of operational risk in the banking industry. We define operational risk broadly to include all financial and non-financial risks, other than credit risk, market risk, interest rate risk and liquidity risk, that may arise from our operations that could negatively impact our capital, including the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events as defined under Basel II. Our operational risk management objectives include not only satisfying regulatory requirements, but also providing internal support through the growth of a strong risk management culture, reinforcement of internal controls, improvement of work processes and provision of timely feedback to management members and staff throughout the bank.

We manage our operational risk primarily through Kookmin Bank, our banking subsidiary. Kookmin Bank uses an operational risk management framework meeting the Basel II Advanced Measurement Approach, or AMA, under which Kookmin Bank:

- calculates its operational risk VaR on a quarterly basis using the "loss distribution approach VaR" and "scenario based VaR" methodology, and monitors operational risk in terms of Key Risk Indicators, or KRI, using tolerance levels for each indicator;
- executes integrated compliance and operational risk Control Self Assessments, or CSAs, that enhance the effect on internal controls, which Kookmin Bank employees are able to access and use for process improvement;
- collects and analyzes internal and external loss data;
- conducts scenario analyses to evaluate exposure to high-severity events;
- manages certain insurance-related activities relating to insurance strategies established to mitigate operational risk;
- examines operational risks arising in connection with the development of, changes in or discontinuance of products, policies or systems;
- uses a detailed business continuity plan covering all of its operations and locations to prepare against unexpected events, including an alternate back-up site for use in disaster events as well as annual full-scale testing of such site.
- refines bank-wide operational risk policies and procedures;
- provides appropriate training and support to business line operational risk managers; and
- reports overall operational risk status to our senior management.

Each of Kookmin Bank's relevant business units has primary responsibility for the management of its own operational risk. In addition, the Operational Risk Unit, which is part of Kookmin Bank's Risk Management Department, monitors bank-wide operational risk. Kookmin Bank also has internal control managers in all of its subsidiaries, departments and branches who periodically conduct CSAs and monitor KRIs. Through this method, Kookmin Bank is able to ensure proper monitoring and measurement of operational risk in each of its business groups.

Internal Control

To monitor and control operational risks, we maintain a system of comprehensive policies and have put in place a control framework designed to provide a stable and well-managed operational environment throughout our organization. Each of our subsidiaries establishes its own internal control system in accordance with the group-level internal control principles. Our Compliance Supporting Department is responsible for monitoring and advising our subsidiaries regarding their internal control systems. Our Audit Committee, which consists of four non-executive directors, is an independent authority that evaluates the effectiveness and efficiency of our group-wide internal control systems and business processes and monitors our subsidiaries' compliance with such systems and processes, as well as reviews the reliability of our financial statements to secure the transparency and stability of our management (including through the activities of our independent auditors). In particular, we have established group-wide internal guidelines with respect to our subsidiaries' reporting requirements. Our subsidiaries review their operations and their level of compliance with internal control systems and business processes on a periodic basis and, as part of this process, they are required to report any problems discovered and any remedial actions taken to our chief compliance officer, who is responsible for reporting to our Audit Committee. Based on the results of these reports, or on an ad hoc basis in response to any problem or potential problem that it identifies, the Audit Committee may direct a subsidiary to conduct an audit of its operations or, if it chooses to do so, conduct its own audit of those operations. The Audit Committee interacts on a regular basis with our Audit Department, Compliance Supporting Department and our independent auditors. In carrying out these duties, the Audit Committee ultimately protects our property for the benefit of our shareholders, investors and customers by independently monitoring our management.

Our Audit Department supports our Audit Committee in monitoring our accounting and business operations and overseeing the management of our subsidiaries' internal control systems by performing the following activities:

- general audits, which include full-scale audits of the overall operations performed according to an annual audit plan, and sectional audits of selected operations; and
- special audits of troubled or weak operations, which are performed when our Audit Committee or executive officer responsible for audits deems it necessary or pursuant to requests by our board, executive officers or supervisory authorities, such as the Financial Supervisory Service.

The Financial Supervisory Service periodically conducts a general examination of our operations. It also performs specific audits on particular aspects of our operations, such as risk management, credit monitoring and liquidity, as the need arises.

Kookmin Bank's audit division consists of two departments, the Channel Audit Department and the Management Audit Department, and they are the execution bodies for its audit committee and support Kookmin Bank's management objectives by auditing the operations of its branches using a risk analysis system and reviewing the operations of its headquarters and subsidiaries through the use of "risk-based audit" in accordance with the "business measurement process" audit methodology, which requires that its Management Audit Department evaluate the risk and process of its business units and concentrate their audit capacity with respect to high risk areas.

As a result of recent regulatory trends, Kookmin Bank's audit division is continuing its efforts to establish an advanced audit system and value-added internal audit by introducing risk-based audit techniques.

Our Compliance Supporting Department operates a compliance system to ensure that all of our employees comply with the relevant laws and regulations. This system's main function is to establish and manage our compliance program, educate employees and management and improve our internal control process.

Legal Risk

We consider legal risk as a part of our operational risk. The uncertainty of the enforceability of the obligations of our customers and counterparties creates legal risk. Changes in laws and regulations could also adversely affect us. Legal risk is higher in new areas of business where the law is often untested in the courts, although legal risk can also increase in our traditional business to the extent that the legal and regulatory landscape in Korea is changing and many new laws and regulations governing the financial industry remain untested. Our Compliance Supporting Department seeks to minimize legal risk by using stringent legal documentation, employing procedures designed to ensure that transactions are properly authorized and consulting legal advisers.

IT System Operational Risk

The integrity of our IT systems, and their ability to withstand potential catastrophic events, are crucial to our continuing operations. Accordingly, we are continuing to strengthen our disaster recovery capabilities. In order to minimize operational risks relating to our IT systems, we have implemented a multi-CPU system that runs multiple CPUs simultaneously on-site and ensures system continuity in case any of the CPUs fails. This system backs up our data systems at an off-site location on a real-time basis to ensure that our operations can be carried out normally and without material interruption in the event of CPU failure. Also, in order to protect our Internet banking services from system failures and cyber attacks, we process our Internet transactions through three separate data processing centers.

We currently test our disaster recovery systems on a quarterly basis, with the comprehensive testing including our branches and the main IT center's disaster recovery system. Our disaster recovery capabilities involve a number of operations other than our core banking operations, including credit card and call center transactions. Internally, our IT Operations Department monitors all of our computerized network processes and IT systems. This department monitors and reports on any unusual delays or irregularities reported by our branches. In addition, Kookmin Bank's Information Security Department is responsible for the daily monitoring of its information security system. Our business operations, other than our core banking and credit card operations, regularly conduct joint IT security assessments with respect to such operations and have implemented measures to identify and respond collectively to security breach attempts, such as hacking attempts.

In 2009, Kookmin Bank obtained ISO 27001 certification, which relates to information security. In 2011, Kookmin Bank also obtained ISO 20000 certification, which relates to IT service management, and BS 25999 certification, which relates to business continuity management. Kookmin Bank is the first Korean bank to have obtained all three such international certifications.

Item 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

Fees and Charges

Under the terms of the deposit agreement, as a holder of our ADSs, you are required to pay the following service fees to the depositary:

Services	Fees
Issuance of ADSs	Up to $5.00 per 100 ADSs (or portion thereof) issued
Delivery of deposited shares against surrender of ADSs	Up to $5.00 per 100 ADSs (or portion thereof) surrendered
Distribution of cash dividends or other cash distributions	Up to $0.02 per ADS (or portion thereof) held
Distribution of ADSs pursuant to stock dividends, free stock distributions or exercise of rights.	Up to $5.00 per 100 ADSs (or portion thereof) held
Distribution of securities other than ADSs or rights to purchase additional ADSs	A fee equivalent to the fee that would be payable if securities distributed had been shares and such shares had been deposited for issuance of ADSs.
Depositary Services	Up to $0.02 per ADS (or portion thereof) held on the applicable record date(s) established by the depositary

As a holder of our ADSs, you are also responsible for paying certain fees and expenses incurred by the depositary and certain taxes and governmental charges such as:

- Fees for the transfer and registration of shares charged by the registrar and transfer agent for the shares in Korea (*i.e.*, upon deposit and withdrawal of shares).
- Expenses incurred for converting foreign currency into U.S. dollars.
- Expenses for cable, telex and fax transmissions and for delivery of securities.
- Taxes and duties upon the transfer of securities (*i.e.*, when shares are deposited or withdrawn from deposit).
- Fees and expenses incurred in connection with the delivery or servicing of shares on deposit or other deposited securities.

Depositary fees payable upon the issuance and surrender of ADSs are typically paid to the depositary by the brokers (on behalf of their clients) receiving the newly issued ADSs from the depositary and by the brokers (on behalf of their clients) delivering the ADSs to the depositary for surrender. The brokers in turn charge these fees to their clients. Depositary fees payable in connection with distributions of cash or securities to ADS holders and the depositary services fee are charged by the depositary to the holders of record of ADSs as of the applicable ADS record date.

The depositary fees payable for cash distributions are generally deducted from the cash being distributed. In the case of distributions other than cash (i.e., stock dividend, rights), the depositary charges the applicable fee to the ADS record date holders concurrent with the distribution. In the case of ADSs registered in the name of the investor (whether certificated or uncertificated in direct registration), the depositary sends invoices to the applicable record date ADS holders. In the case of ADSs held in brokerage and custodian accounts (via the Depository Trust Company, or DTC), the depositary generally collects its fees through the systems provided by DTC (whose nominee is the registered holder of the ADSs held in DTC) from the brokers and custodians holding ADSs in their DTC accounts. The brokers and custodians who hold their clients' ADSs in DTC accounts in turn charge their clients' accounts the amount of the fees paid to the depositary.

In the event of refusal to pay the depositary fees, the depositary may, under the terms of the deposit agreement, refuse the requested service until payment is received or may set off the amount of the depositary fees from any distribution to be made to such holder of ADSs.

Note that the fees and charges you may be required to pay may vary over time and may be changed by us and by the depositary. You will receive prior notice of such changes.

Fees and Payments from the Depositary to Us

In 2014, we received the following payments from the depositary:

Reimbursement of listing fees:	$ 42,000
Reimbursement of SEC filing fees:	$ 34,430
Reimbursement of expenses related to proxy process (printing, postage and distribution) and ADS holders identification:	$ 45,648
Reimbursement of legal fees:	$345,154
Reimbursement of expenses related to our investor relations activities (investor conferences and investor relations agency fees, etc.):	$126,832

In addition, as part of its service to us, the depositary waives its fees for the standard costs and operating expenses associated with the administration of the ADS facility.

Item 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES

Not applicable.

Item 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

Not applicable.

Item 15. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

We have evaluated, with the participation of our chief executive officer and chief financial officer, the effectiveness of our disclosure controls and procedures as of December 31, 2014. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. Based upon our evaluation, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures as of December 31, 2014 were effective to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the applicable rules and forms, and that it is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

Management's Annual Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. Under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control – Integrated Framework 2013 issued by the Committee of Sponsoring Organizations of the Treadway Commission. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS as issued by the IASB. Our internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with IFRS as issued by the IASB, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements. Because of its inherent limitations, internal control over financial reporting is not intended to provide absolute assurance that a misstatement of our financial statements would be prevented or detected. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Based on our evaluation, our management concluded that our internal control over financial reporting was effective as of December 31, 2014. The effectiveness of our internal control over financial reporting as of December 31, 2014 has been audited by Samil PricewaterhouseCoopers, an independent registered public accounting firm, as stated in its report included herein which expressed an unqualified opinion on the effectiveness of our internal control over financial reporting as of December 31, 2014.

Attestation Report of the Registered Public Accounting Firm

The attestation report of our independent registered public accounting firm is furnished in Item 18 of this Form 20-F.

Changes in Internal Control Over Financial Reporting

There has been no change in our internal control over financial reporting during 2014 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 16. [RESERVED]

Item 16A. AUDIT COMMITTEE FINANCIAL EXPERT

Our board of directors has determined that each of Woon Youl Choi and Jongsoo Han, our non-executive directors and members of our Audit Committee, qualifies as an "audit committee financial expert" and is independent within the meaning of this Item 16A.

Item 16B. CODE OF ETHICS

We have adopted a code of ethics, as defined in Item 16B of Form 20-F under the Exchange Act. Our code of ethics applies to our chief executive officer and chief financial officer, as well as to our non-executive directors, non-standing directors and other officers and employees. Our code of ethics is available on our website at *http://www.kbfg.com*. If we amend the provisions of our code of ethics that apply to our chief executive officer and chief financial officer and persons performing similar functions, or if we grant any waiver of such provisions, we will disclose such amendment or waiver on our website at the same address.

Item 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Audit and Non-audit Fees

The following table sets forth the fees billed to us by independent registered public accounting firm Samil PricewaterhouseCoopers during the fiscal years ended December 31, 2013 and 2014:

	Year Ended December 31,	
	2013	2014
	(in millions of Won)	
Audit fees	₩5,524	₩5,517
Audit-related fees	35	—
Tax fees	16	—
Total fees	₩5,575	₩5,517

Audit fees in the above table are the aggregate fees billed by Samil PricewaterhouseCoopers in connection with:

- the audits of our annual financial statements and the review of our interim financial statements;
- the audits of our special purpose entities in connection with the Korean Securities Exchange Act or the Financial Investment Services and Capital Markets Act; and
- our financial debenture offering services.

Audit-related fees in the above table are fees billed by Samil PricewaterhouseCoopers in connection with attestation of our financial statements under IFRS. Tax fees in the above table are fees billed by Samil PricewaterhouseCoopers in connection with tax filing services for our subsidiaries.

Audit Committee Pre-Approval Policies and Procedures

Our Audit Committee pre-approves the engagement of our independent auditors for audit services with respect to our financial statements. Our Audit Committee has implemented a policy regarding pre-approval of certain other services provided by our independent auditors to our subsidiaries that the Audit Committee has deemed as not affecting their independence. Under this policy, pre-approvals for the following services to our subsidiaries have been granted by our Audit Committee to each of our subsidiaries' audit committees: (i) services related to the audit of financial statements prepared in accordance with IFRS as adopted by Korea and internal controls under Korean laws and regulations; (ii) general tax advisory services; (iii) due diligence services; (iv) issuance of comfort letters in connection with offering of securities; and (v) educational services provided to employees.

Any other audit or permitted non-audit service must be pre-approved by the Audit Committee on a case-by-case basis. Our Audit Committee did not pre-approve any non-audit services under the *de minimis* exception of Rule 2.01(c)(7)(i)(C) of Regulation S-X as promulgated by the Securities and Exchange Commission.

Item 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES

Not applicable.

Item 16E. PURCHASE OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS

Neither we nor any "affiliated purchaser," as defined in Rule 10b-18(a)(3) of the Exchange Act, purchased any of our equity securities during the period covered by this annual report.

Item 16F. CHANGE IN REGISTRANT'S CERTIFYING ACCOUNTANT

Not applicable.

Item 16G. CORPORATE GOVERNANCE

Differences in Corporate Governance Practices

Pursuant to the rules of the New York Stock Exchange applicable to foreign private issuers like us that are listed on the New York Stock Exchange, we are required to disclose significant differences between the New York Stock Exchange's corporate governance standards and those that we follow under Korean law and in accordance with our own internal procedures. The following is a summary of such significant differences:

NYSE Corporate Governance Standards	KB Financial Group
Director Independence	
Listed companies must have a majority of independent directors.	The majority of our board of directors is independent (as defined in accordance with the New York Stock Exchange's standards), as seven out of nine directors are non-executive directors.
Executive Session	
Non-management directors must meet in regularly scheduled executive sessions without management. Independent directors should meet alone in an executive session at least once a year.	Our non-executive directors hold executive sessions as needed in accordance with the Regulation of the Board of Directors.
Nomination/Corporate Governance Committee	
A nomination/corporate governance committee of independent directors is required. The committee must have a charter that addresses the purpose, responsibilities (including development of corporate governance guidelines) and annual performance evaluation of the committee.	We maintain a Non-executive Director Nominating Committee composed of three non-executive directors and our chief executive officer. We maintain a Corporate Governance Committee composed of three non-executive directors, one non-standing director and our chief executive officer.
Compensation Committee	
A compensation committee of independent directors is required. The committee must have a charter that addresses the purpose, responsibilities and annual performance evaluation of the committee. The charter must be made available on the company's website. In addition, in accordance with the U.S. Securities and Exchange Commission rules adopted pursuant to Section 952 of the Dodd-Frank Act, the New York Stock Exchange listing standards were amended to expand the factors relevant in determining whether a committee member has a relationship with the company that will materially affect that member's duties to the compensation committee.	We maintain an Evaluation and Compensation Committee composed of four non-executive directors.

NYSE Corporate Governance Standards	KB Financial Group
Additionally, the committee may obtain or retain the advice of a compensation adviser only after taking into consideration all factors relevant to determining that adviser's independence from management.	
Audit Committee Listed companies must have an audit committee that satisfies the independence and other requirements of Rule 10A-3 under the Exchange Act. All members must be independent. The committee must have a charter addressing the committee's purpose, an annual performance evaluation of the committee, and the duties and responsibilities of the committee. The charter must be made available on the company's website.	We maintain an Audit Committee composed of four non-executive directors. Accordingly, we are in compliance with Rule 10A-3 under the Exchange Act.
Audit Committee Additional Requirements Listed companies must have an audit committee that is composed of at least three directors.	Our Audit Committee has four members, as described above.
Shareholder Approval of Equity Compensation Plan Listed companies must allow its shareholders to exercise their voting rights with respect to any material revision to the company's equity compensation plan.	We currently have three equity compensation plans: one providing for the grant of stock options to officers and directors; performance share agreements with certain of our directors; and an employee stock ownership plan, or ESOP. All material matters related to our stock option plan are provided in our Articles of Incorporation, and any amendments to the Articles of Incorporation are subject to shareholders' approval. Matters related to the performance share agreements or ESOP are not subject to shareholders' approval under Korean law.
Corporate Governance Guidelines Listed companies must adopt and disclose corporate governance guidelines.	We have adopted, but have not disclosed, corporate governance guidelines.

Item 16H. MINE SAFETY DISCLOSURE

Not applicable.

Item 17. FINANCIAL STATEMENTS

Not Applicable.

Item 18. FINANCIAL STATEMENTS

Reference is made to Item 19(a) for a list of all financial statements filed as part of this annual report.

Item 19. EXHIBITS

(a) List of Financial Statements:

(b) Exhibits

Pursuant to the rules and regulations of the U.S. Securities and Exchange Commission, KB Financial Group has filed certain agreements as exhibits to this Annual Report on Form 20-F. These agreements may contain representations and warranties made by the parties. These representations and warranties have been made solely for the benefit of the other party or parties to such agreements and (i) may be intended not as statements of fact, but rather as a way of allocating the risk to one of the parties to such agreements if those statements turn out to be inaccurate, (ii) may have been qualified by disclosures that were made to such other party or parties and that either have been reflected in the company's filings or are not required to be disclosed in those filings, (iii) may apply materiality standards different from what may be viewed as material to investors and (iv) were made only as of the date of such agreements or such other date(s) as may be specified in such agreements and are subject to more recent developments. Accordingly, these representations and warranties may not describe KB Financial Group's actual state of affairs at the date of this annual report.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of KB Financial Group Inc.:

In our opinion, the accompanying consolidated statements of financial position and the related consolidated statements of comprehensive income, of changes in equity and of cash flows present fairly, in all material respects, the financial position of KB Financial Group Inc. (the “Company”) and subsidiaries as of December 31, 2014 and 2013, and January 1, 2013, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2014 in conformity with International Financial Reporting Standards (IFRSs) as issued by the International Accounting Standards Board. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control—Integrated Framework 2013 issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company’s management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying “Management’s Annual Report on Internal Control over Financial Reporting.” Our responsibility is to express opinions on these financial statements and on the Company’s internal control over financial reporting based on our integrated audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Net cash provided by (used in) investing activities	(2,532,234)	4,178,817	(1,684,297)	(1,543,966)
Cash flows from financing activities:				
Net cash flows from derivative financial instrument for hedging purposes	75,761	10,977	(204,563)	(187,519)
Net increase (decrease) in debts	(796,842)	(1,990,258)	1,129,837	1,035,702
Increase in debentures	10,282,920	10,758,948	43,135,390	39,541,466
Decrease in debentures	(12,945,650)	(7,924,609)	(43,816,790)	(40,166,094)
Increase in other payables to trust accounts	456,449	414,279	124,904	114,497
Dividends paid to shareholders of the parent company	(278,173)	(231,811)	(193,176)	(177,081)
Changes in interest in subsidiaries	(8,048)	(168,293)	(95)	(87)
Others	(38,680)	837,906	(930,573)	(853,040)
Net cash provided by (used in) financing activities	(3,252,263)	1,707,139	(755,066)	(692,156)
Effect of exchange rate changes on cash and cash equivalents	(13,560)	41,452	12,227	11,208
Net increase (decrease) in cash and cash equivalents	1,846,501	(418,119)	849,610	778,823
Cash and cash equivalents at the beginning of the year	4,740,804	6,587,305	6,169,186	5,655,186
Cash and cash equivalents at the end of the year	₩ 6,587,305	₩ 6,169,186	₩ 7,018,796	US$ 6,434,009

The accompanying notes are an integral part of these consolidated financial statements.

1. The Parent Company

KB Financial Group Inc. (the "Parent Company") was incorporated on September 29, 2008, under the Financial Holding Companies Act of Korea. KB Financial Group Inc. and its subsidiaries (the "Group") derive substantially all of their revenue and income from providing a broad range of banking and related financial services to consumers and corporations primarily in Korea and in selected international markets. The Parent Company's principal business includes ownership and management of subsidiaries and associated companies that are engaged in financial services or activities. In 2011, Kookmin Bank spun off its credit card business segment and established a new separate credit card company, KB Kookmin Card Co., Ltd., and KB Investment & Securities Co., Ltd. merged with KB Futures Co., Ltd. The Group established KB Savings Bank Co., Ltd. in January 2012, acquired Yehansoul Savings Bank Co., Ltd. in September 2013 and KB Savings Bank Co., Ltd. merged with Yehansoul Savings Bank Co., Ltd. in January 2014. In addition, the Group acquired Woori Financial Co., Ltd. and changed the name to KB Capital Co., Ltd. in March 2014.

The Parent Company's share capital as of December 31, 2014, is ₩1,931,758 million. The Parent Company is authorized to issue up to 1 billion shares. The Parent Company has been listed on the Korea Exchange ("KRX") since October 10, 2008, and on the New York Stock Exchange ("NYSE") for its American Depositary Shares ("ADS") since September 29, 2008. Number of shares authorized on its Articles of Incorporation is 1,000 million.

2. Basis of Preparation

2.1 Application of IFRS

The Group's consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"). IFRS are the standards and related interpretations issued by the International Accounting Standards Board ("IASB").

The preparation of consolidated financial statements requires the use of certain critical accounting estimates. It also requires management to exercise judgment in the process of applying the Group's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 2.4.

The Group has applied the following accounting policy for the financial year beginning on January 1, 2014

Amendment to IAS 32, *Financial Instruments: Presentation*

According to Amendment to IAS 32, *Financial Instruments: Presentation*, provides that the right to offset must not be contingent on a future event and must be legally enforceable in all of circumstances; and if an entity can settle amounts in a manner such that outcome is, in effect, equivalent to net settlement, the entity will meet the net settlement criterion. The application of this amendment does not have a material impact on the consolidated financial statements.

Amendment to IAS 36, *Impairment of Assets*

Amendment to IAS 36, *Impairment of Assets*, removed certain disclosures of the recoverable amount of cash-generating units which had been included in this amendment by the issuance of IFRS 13. The application of this amendment does not have a material impact on the consolidated financial statements.

Amendment to IAS 39, *Financial Instruments: Recognition and Measurement*

Amendment to IAS 39, *Financial Instruments: Recognition and Measurement*, allows the continuation of hedge accounting for a derivative that has been designated as a hedging instrument in a circumstance in which that derivative is novated to a central counterparty (CCP) as a consequence of laws or regulations. The application of this amendment does not have a material impact on the consolidated financial statements.

Amendment to IFRS 2*, Share-based payment*

IFRS 2, *Share-based payment*, clarifies the definition of 'vesting conditions' such as 'performance condition', 'service condition' and others. This amendment is applied to share-based payment transactions for which the grant date is on or after July 1, 2014. The application of this amendment does not have a material impact on the consolidated financial statements.

Enactment of IFRIC 2121, *Levies*

IFRIC 2121, *Levies*, is applied to a liability to pay a levy imposed by a government in accordance with the legislation. The interpretation requires that the liability to pay a levy is recognized when the activity that triggers the payment of the levy occurs, as identified by the legislation (the obligating event). The interpretation does not have a significant impact on the consolidated financial statements.

Changes in accounting policy with respect to uncertain tax position

For the periods prior to the year ended December 31, 2014, pursuant to IAS 37 if an uncertain tax position satisfied the criteria for provisions, the Group measured the best estimate of expenditures for the uncertain tax position. Group's claims of refund of the amounts levied by the tax authority were then treated as contingent assets. However, in 2014, the Group retrospectively applied the accounting policy in accordance with the IAS 12, which allows recognition of the tax payment as income tax assets when it is probable to receive a tax refund. The restated comparative consolidated financial statements reflect adjustments resulting from the retrospective application.

The effect of these changes in accounting policy to financial position as of January 1, 2013, December 31, 2013, 2014, and to comprehensive income for the years ended December 31, 2012, 2013 and 2014, are as follows:

Effect on Consolidated Statements of Financial Position

	Jan. 1, 2013	Dec. 31, 2013	Dec. 31, 2014
	(In millions of Korean won)		
Increase in current income tax assets	₩318,450	₩ 329,443	₩ 306,313
Increase in retained earnings	318,450	329,443	306,313

Effect on Consolidated Statements of Comprehensive Income

	2012	2013	2014
	(In millions of Korean won)		
Decrease(increase) in income tax	₩ 38,534	₩ 10,993	₩ (23,130)
	(In Korean won)		
Increase(decrease) in earnings per share	100	28	(60)
Increase(decrease) in diluted earnings per share	100	28	(60)

A number of new standards and amendments to standards and interpretations are effective for annual periods beginning after 1 January 2014, and have not been applied in preparing these consolidated financial statement. None of these is expected to have a significant effect on the consolidated financial statements of the Group, except the following set out below:

IFRS 9, ‘Financial instruments’, addresses the classification, measurement and recognition of financial assets and financial liabilities. The complete version of IFRS 9 was issued in July 2014. It replaces the guidance in IAS 39 that relates to the classification and measurement of financial instruments. IFRS 9 retains but simplifies the mixed measurement model and establishes three primary measurement categories for financial assets: amortised cost, fair value through OCI and fair value through P&L. The basis of classification depends on the entity’s business model and the contractual cash flow characteristics of the financial asset. Investments in equity instruments are required to be measured at fair value through profit or loss with the irrevocable option at inception to present changes in fair value in OCI not recycling. There is now a new expected credit losses model that replaces the incurred loss impairment model used in IAS 39. For financial liabilities there were no changes to classification and measurement except for the recognition of changes in own credit risk in other comprehensive income, for liabilities designated at fair value through profit or loss. IFRS 9 relaxes the requirements for hedge effectiveness by replacing the bright line hedge effectiveness tests. It requires an economic relationship between the hedged item and hedging instrument and for the ‘hedged ratio’ to be the same as the one management actually use for risk management purposes. Contemporaneous documentation is still required but is different to that currently prepared under IAS 39. The standard is effective for accounting periods beginning on or after 1 January 2018. Early adoption is permitted. The group is yet to assess IFRS 9’s full impact.

IFRS 15, ‘Revenue from contracts with customers’ deals with revenue recognition and establishes principles for reporting useful information to users of financial statements about the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity’s contracts with customers. Revenue is recognised when a customer obtains control of a good or service and thus has the ability to direct the use and obtain the benefits from the good or service. The standard replaces IAS 18 ‘Revenue’ and IAS 11 ‘Construction contracts’ and related interpretations. The standard is effective for annual periods beginning on or after 1 January 2017 and earlier application is permitted. The group is assessing the impact of IFRS 15.

2.2 Measurement Basis

The consolidated financial statements have been prepared under the historical cost convention unless otherwise specified.

2.3 Functional and Presentation Currency

Items included in the financial statements of each entity of the Group are measured using the currency of the primary economic environment in which the entity operates (“the functional currency”). The consolidated financial statements are presented in Korean won, which is the Parent Company’s functional and presentation currency. Refer to Notes 3.2.1 and 3.2.2.

2.4 Significant Estimates

The preparation of consolidated financial statements requires the application of accounting policies, certain critical accounting estimates and assumptions that may have a significant impact on the assets (liabilities) and income (expenses). Management’s estimates of outcomes may differ from actual outcomes if management’s estimates and assumptions based on management’s best judgment at the reporting date are different from the actual environment.

Estimates and assumptions are continually evaluated and any change in an accounting estimate is recognized prospectively by including it in profit or loss in the period of the change, if the change affects that period only. Alternatively if the change in accounting estimate affects both the period of change and future periods, that change is recognized in the profit or loss of all those periods.

Uncertainty in estimates and assumptions with significant risk that may result in material adjustment to the consolidated financial statements are as follows:

2.4.1 Deferred income taxes

The recognition of a deferred tax asset relies on an assessment of the probability and sufficiency of future taxable profits, future reversals of existing taxable temporary differences and ongoing tax planning strategies.

2.4.2 Fair value of financial instruments

The fair value of financial instruments where no active market exists or where quoted prices are not otherwise available is determined by using valuation techniques. Financial instruments, which are not actively traded in the market and those with less transparent market prices, will have less objective fair values and require broad judgment on liquidity, concentration, uncertainty in market factors and assumptions in price determination and other risks.

As described in the significant accounting policies in Note 3.3, 'Recognition and Measurement of Financial Instruments', diverse valuation techniques are used to determine the fair value of financial instruments, from generally accepted market valuation models to internally developed valuation models that incorporate various types of assumptions and variables.

2.4.3 Provisions for credit losses (allowances for loan losses, provisions for acceptances and guarantees, and unused loan commitments)

The Group determines and recognizes allowances for losses on loans through impairment testing and recognizes provisions for guarantees, and unused loan commitments. The accuracy of provisions for credit losses is determined by the methodology and assumptions used for estimating expected cash flows of the borrower for individually assessed allowances of loans, collectively assessed allowances for groups of loans, guarantees and unused loan commitments.

2.4.4 Measurements of net defined benefit liabilities

The present value of net defined benefit liability depends on a number of factors that are determined on an actuarial basis using a number of assumptions (Note 24).

2.4.5 Estimated impairment of goodwill

The Group tests annually whether goodwill has suffered any impairment. The recoverable amounts of cash-generating units have been determined based on value-in-use calculations (Note 15).

3. Significant Accounting Policies

The significant accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all years presented, unless otherwise stated.

3.1 Consolidation

3.1.1 Subsidiaries

Subsidiaries are companies that are controlled by the Group. The Group controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. The existence and effects of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity. Subsidiaries are fully consolidated from the date when control is transferred to the Group and de-consolidated from the date when control is lost.

If a subsidiary uses accounting policies other than those adopted in the consolidated financial statements for like transactions and events in similar circumstances, appropriate adjustments are made to make the subsidiary's accounting policies conform to those of the Group when the subsidiary's financial statements are used by the Group in preparing the consolidated financial statements.

Profit or loss and each component of other comprehensive income are attributed to the owners of the parent and to the non-controlling interests, if any. Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Transactions with non-controlling interests that do not result in loss of control are accounted for as equity transactions; that is, as transactions with the owners in their capacity as owners. The difference between fair value of any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

When the Group ceases to have control, any retained interest in the entity is re-measured to its fair value at the date when control is lost, with the change in carrying amount recognized in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognized in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognized in other comprehensive income are reclassified to profit or loss.

The Group applies the acquisition method to account for business combinations. The consideration transferred is measured at the fair values of the assets transferred, and identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are initially measured at their fair values at the acquisition date. The Group recognizes any non-controlling interest in the acquiree on an acquisition-by-acquisition basis in the event of liquidation, either at fair value or at the non-controlling interest's proportionate share of the recognized amounts of acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred.

3.1.2 Associates

Associates are entities over which the Group has significant influence in the financial and operating policy decisions. If the Group holds 20% or more of the voting power of the investee, it is presumed that the Group has significant influence.

Under the equity method, investments in associates are initially recognized at cost and the carrying amount is increased or decreased to recognize the Group's share of the profit or loss of the investee and changes in the investee's equity after the date of acquisition. The Group's share of the profit or loss of the investee is recognized in the Group's profit or loss. Distributions received from an investee reduce the carrying amount of the investment. Profit and losses resulting from 'upstream' and 'downstream' transactions between the Group and associates are eliminated to the extent of the Group's interest in associates.

If associates use accounting policies other than those adopted in the consolidated financial statements for like transactions and events in similar circumstances, appropriate adjustments are made to make the associate's accounting policies conform to those of the Group when the associate's financial statements are used by the Group in applying equity method.

After the carrying amount of the investment is reduced to zero, additional losses are provided for, and a liability is recognized, only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the investee.

The Group determines at each reporting date whether there is any objective evidence that the investments in the associates are impaired. If this is the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the associates and its carrying value and recognizes the amount as 'share of profit or loss of associates' in the statements of comprehensive income.

3.1.3 Structured entity

A structured entity is an entity that has been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity. When the Group decides whether it has power to the structured entities in which the Group has interests, it considers factors such as the purpose, the form, the practical ability to direct the relevant activities of a structured entity, the nature of its relationship with a structured entity and the amount of exposure to variable returns.

3.1.4 Management of Funds

The Group provides management services for trust assets, collective investment and other funds. These trusts and funds are not consolidated in the Group's consolidated financial statements, except for trusts and funds over which the Group has control.

3.1.5 Intra-group transactions

All intra-group balances and transactions, and any unrealized gains arising on intra-group transactions, are eliminated in preparing the consolidated financial statements. Unrealized losses are eliminated in the same way as unrealized gains except that they are only eliminated to the extent that there is no evidence of impairment.

3.2 Foreign Currency

3.2.1 Foreign currency transactions and balances

A foreign currency transaction is recorded, on initial recognition in the functional currency, by applying the spot exchange rate between the functional currency and the foreign currency at the date of the transaction. At the end of each reporting period foreign currency monetary items are translated using the closing rate which is the spot exchange rate at the end of the reporting period. Non-monetary items that are measured at fair value in a foreign currency are translated using the spot exchange rates at the date when the fair value was determined and non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the spot exchange rate at the date of the transaction.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous financial statements are recognized in profit or loss in the year in which they arise. When gains or losses on a non-monetary item are recognized in other comprehensive income, any exchange component of those gains or losses are also recognized in other comprehensive income. Conversely, when gains or losses on a non-monetary item are recognized in profit or loss, any exchange component of those gains or losses are also recognized in profit or loss.

3.2.2 Foreign Operations

The financial performance and financial position of all foreign operations, whose functional currencies differ from the Group's presentation currency, are translated into the Group's presentation currency using the following procedures:

Assets and liabilities for each statement of financial position presented are translated at the closing rate at the end of the reporting period. Income and expenses in the statement of comprehensive income presented are translated at average exchange rates for the period. All resulting exchange differences are recognized in other comprehensive income.

Any goodwill arising from the acquisition of a foreign operation and any fair value adjustments to the carrying amounts of assets and liabilities arising from the acquisition of that foreign operation are treated as assets and liabilities of the foreign operation. Thus they are expressed in the functional currency of the foreign operation and are translated into the presentation currency at the closing rate.

On the disposal of a foreign operation, the cumulative amount of the exchange differences relating to that foreign operation, recognized in other comprehensive income and accumulated in the separate component of equity, are reclassified from equity to profit or loss (as a reclassification adjustment) when the gains or losses on disposal are recognized. On the partial disposal of a subsidiary that includes a foreign operation, the Group re-attributes the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income to the non-controlling interests in that foreign operation. In any other partial disposal of a foreign operation, the Group reclassifies to profit or loss only the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income.

3.3 Recognition and Measurement of Financial Instruments

3.3.1 Initial recognition

The Group recognizes a financial asset or a financial liability in its statement of financial position when, the Group becomes a party to the contractual provisions of the instrument. A regular way purchase or sale of financial assets (a purchase or sale of a financial asset under a contract whose terms require delivery of the financial instruments within the time frame established generally by market regulation or practice) is recognized and derecognized using trade date accounting.

The Group classifies financial assets as financial assets at fair value through profit or loss, held-to-maturity financial assets, available-for-sale financial assets, or loans and receivables. The Group classifies financial liabilities as financial liabilities at fair value through profit or loss or other financial liabilities. The classification depends on the nature and holding purpose of the financial instrument at initial recognition in the financial statements.

At initial recognition, a financial asset or financial liability is measured at its fair value plus or minus, in the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability. The fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. The fair value of a financial instrument on initial recognition is normally the transaction price (that is, the fair value of the consideration given or received) in an arm's length transaction.

3.3.2 Subsequent measurement

After initial recognition, financial instruments are measured at amortized cost or fair value based on classification at initial recognition.

Amortized cost

The amortized cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition and adjusted to reflect principal repayments, cumulative amortization using the effective interest method and any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

Fair value

Fair values, which the Group primarily uses for the measurement of financial instruments, are the published price quotations based on market prices or dealer price quotations of financial instruments traded in an active market where available. These are the best evidence of fair value. A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, an entity in the same industry, pricing service or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

If the market for a financial instrument is not active, fair value is determined either by using a valuation technique or independent third-party valuation service. Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, referencing to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models.

The Group uses valuation models that are commonly used by market participants and customized for the Group to determine fair values of common over-the-counter (OTC) derivatives such as options, interest rate swaps and currency swaps which are based on the inputs observable in markets. For more complex instruments, the Group uses internally developed models, which are usually based on valuation methods and techniques generally recognized as standard within the industry, or a value measured by an independent external valuation institution as the fair values if all or some of the inputs to the valuation models are not market observable and therefore it is necessary to estimate fair value based on certain assumptions.

The Group's Fair Value Evaluation Committee, which consists of the risk management department, trading department and accounting department, reviews the appropriateness of internally developed valuation models, and approves the selection and changing of the external valuation institution and other considerations related to fair value measurement. The review results on the fair valuation models are reported to the Market Risk Management subcommittee by the Fair Value Evaluation Committee on a regular basis.

If the valuation technique does not reflect all factors which market participants would consider in setting a price, the fair value is adjusted to reflect those factors. These factors include counterparty credit risk, bid-ask spread, liquidity risk and others.

The chosen valuation technique makes maximum use of market inputs and relies as little as possible on entity-specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Periodically, the Group calibrates the valuation technique and tests it for validity using prices from observable current market transactions of the same instrument or based on other relevant observable market data.

3.3.3 Derecognition

Derecognition is the removal of a previously recognized financial asset or financial liability from the statement of financial position. The Group derecognizes a financial asset or a financial liability when, and only when:

Derecognition of financial assets

Financial assets are derecognized when the contractual rights to the cash flows from the financial assets expire or the financial assets have been transferred and substantially all the risks and rewards of ownership of the financial assets are also transferred, or all the risks and rewards of ownership of the financial assets are neither substantially transferred nor retained and the Group has not retained control. If the Group neither transfers nor disposes of substantially all the risks and rewards of ownership of the financial assets, the Group continues to recognize the financial asset to the extent of its continuing involvement in the financial asset.

If the Group transfers the contractual rights to receive the cash flows of the financial asset, but retains substantially all the risks and rewards of ownership of the financial asset, the Group continues to recognize the transferred asset in its entirely and recognize a financial liability for the consideration received.

Derecognition of financial liabilities

Financial liabilities are derecognized from the statement of financial position when the obligation specified in the contract is discharged, cancelled or expires.

3.3.4 Offsetting

Financial assets and liabilities are offset and the net amount reported in the consolidated statements of financial position where there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the assets and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Group or the counterparty.

3.4 Cash and cash equivalents

Cash and cash equivalents include cash on hand, foreign currency, and short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.5 Non-derivative financial assets

3.5.1 Financial assets at fair value through profit or loss

This category comprises two sub-categories: financial assets classified as held for trading, and financial assets designated by the Group as at fair value through profit or loss upon initial recognition.

A non-derivative financial asset is classified as held for trading if either:

- It is acquired for the purpose of selling in the near term, or
- It is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking.

The Group may designate certain financial assets, other than held for trading, upon initial recognition as at fair value through profit or loss when one of the following conditions is met:

- It eliminates or significantly reduces a measurement or recognition inconsistency (sometimes referred to as 'an accounting mismatch') that would otherwise arise from measuring assets or liabilities or recognizing the gains and losses on them on different bases.
- A group of financial assets is managed and its performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and information about the group is provided internally on that basis to the Group's key management personnel.
- A contract contains one or more embedded derivatives; the Group may designate the entire hybrid (combined) contract as a financial asset at fair value through profit or loss if allowed by IAS 39, *Financial Instruments: Recognition and measurement.*

After initial recognition, a financial asset at fair value through profit or loss is measured at fair value and gains or losses arising from a change in the fair value are recognized in profit or loss. Interest income, dividend income, and gains or losses from sale and repayment from financial assets at fair value through profit or loss are recognized in the statement of comprehensive income as net gains on financial instruments at fair value through profit or loss.

3.5.2 Financial Investments

Available-for-sale and held-to-maturity financial assets are presented as financial investments.

Available-for-sale financial assets

Profit or loss of financial assets classified as available for sale, except for impairment loss and foreign exchange gains and losses resulting from changes in amortized cost of debt securities, is recognized as other comprehensive income, and cumulative profit or loss is reclassified from equity to current profit or loss at the derecognition of the financial asset, and it is recognized as part of other operating profit or loss in the statement of comprehensive income.

However, interest revenue measured using the effective interest method is recognized in current profit or loss, and dividends of financial assets classified as available-for-sale are recognized when the right to receive payment is established.

Available-for-sale financial assets denominated in foreign currencies are translated at the closing rate. For available-for-sale debt securities denominated in foreign currency, exchange differences resulting from changes in amortized cost are recognized in profit or loss as part of other operating income and expenses. For available-for-sale equity securities denominated in foreign currency, the entire change in fair value including any exchange component is recognized in other comprehensive income.

Held-to-maturity financial assets

Held-to-maturity financial assets are non-derivative financial assets with fixed or determinable payments and fixed maturity that the Group's management has the positive intention and ability to hold to maturity. Held-to-maturity financial assets are subsequently measured at amortized cost using the effective interest method after initial recognition and interest income is recognized using the effective interest method.

3.5.3 Loans and receivables

Non-derivative financial assets which meet the following conditions are classified as loans and receivables:

- Those with fixed or determinable payments.
- Those that are not quoted in an active market.
- Those that the Group does not intend to sell immediately or in the near term.
- Those that the Group, upon initial recognition, does not designate as available-for-sale or as at fair value through profit or loss.

After initial recognition, these are subsequently measured at amortized cost using the effective interest method.

If the financial asset is purchased under an agreement to resale the asset at a fixed price or at a price that provides a lender's return on the purchase price, the consideration paid is recognized as loans and receivables.

3.6 Impairment of financial assets

The Group assesses at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets except for financial assets at fair value through profit or loss is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred, if and only if, there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. However, losses expected as a result of future events, no matter how likely, are not recognized.

Objective evidence that a financial asset or group of assets is impaired includes observable data that comes to the attention of the holder of the asset about the following loss events:

- Significant financial difficulty of the issuer or obligor.
- A breach of contract, such as a default or delinquency in interest or principal payments.
- The lender, for economic or legal reasons relating to the borrower's financial difficulty, granting to the borrower a concession that the lender would not otherwise consider.
- It becomes probable that the borrower will declare bankruptcy or undergo financial reorganization.
- The disappearance of an active market for that financial asset because of financial difficulties.
- Observable data indicating that there is a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial assets in the portfolio.

In addition to the types of events in the preceding paragraphs, objective evidence of impairment for an investment in an equity instrument classified as an available-for-sale financial asset includes a significant or prolonged decline in the fair value below its cost. Accordingly, the Group considers the decline in the fair value of over 30% against the original cost as a "significant decline" and a six-month decline in the fair value below its cost for an equity instrument as a "prolonged decline".

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured and recognized in profit or loss as either provisions for credit loss or other operating income and expenses.

3.6.1 Loans and receivables

If there is objective evidence that an impairment loss on loans and receivables carried at amortized cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate.

The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant (individual assessment of impairment), and individually or collectively for financial assets that are not individually significant. If the Group determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment (collective assessment of impairment).

Individual assessment of impairment

Individual assessment of impairment losses are calculated by discounting the expected future cash flows of a loan at its original effective interest rate and comparing the resultant present value with the loan's current carrying amount. This process normally encompasses management's best estimate, such as operating cash flow of the borrower and net realizable value of any collateral held.

Collective assessment of impairment

A methodology based on historical loss experience is used to estimate inherent incurred loss on groups of assets for collective assessment of impairment. Such methodology incorporates factors such as type of collateral, product and borrowers, credit rating, loss emergence period, recovery period and applies probability of default on a group of assets and loss given default by type of recovery method. Also, consistent assumptions are applied to form a formula-based model in estimating inherent loss and to determine factors on the basis of historical loss experience and current condition. The methodology and assumptions used for collective assessment of impairment are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

Impairment loss on loans reduces the carrying amount of the asset through use of an allowance account, and when a loan becomes uncollectable, it is written off against the related allowance account. If, in a subsequent period, the amount of the impairment loss decreases and is objectively related to the subsequent event after recognition of impairment, the previously recognized impairment loss is reversed by adjusting the allowance account. The amount of the reversal is recognized in profit or loss.

3.6.2 Available-for-sale financial assets

When a decline in the fair value of an available-for-sale financial asset has been recognized in other comprehensive income and there is objective evidence that the asset is impaired, the cumulative loss (the difference between the acquisition cost and current fair value, less any impairment loss on that financial asset previously recognized in profit or loss) that had been recognized in other comprehensive income is reclassified from equity to profit or loss as part of other operating income and expenses. The impairment loss on available-for-sale financial assets is directly deducted from the carrying amount.

If, in a subsequent period, the fair value of a debt instrument classified as available-for-sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in profit or loss, a portion of the impairment loss is reversed up to but not exceeding the previously recorded impairment loss, with the amount of the reversal recognized in profit or loss as part of other operating income and expenses in the statement of comprehensive income. However, impairment losses recognized in profit or loss for an available-for-sale equity instrument classified as available for sale are not reversed through profit or loss.

3.6.3 Held-to-maturity financial assets

If there is objective evidence that an impairment loss on held-to-maturity financial assets carried at amortized cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate. The amount of the loss is recognized in profit or loss as part of other operating income and expenses. The impairment loss on held-to-maturity financial assets is directly deducted from the carrying amount.

In the case of a financial asset classified as held to maturity, if, in a subsequent period, the amount of the impairment loss decreases and it is objectively related to an event occurring after the impairment is recognized, a portion of the previously recognized impairment loss is reversed up to but not exceeding the amortized cost at the date of recovery. The amount of reversal is recognized in profit or loss as part of other operating income and expenses in the statement of comprehensive income.

3.7 Derivative Financial Instruments

The Group enters into numerous derivative financial instrument contracts such as currency forwards, interest rate swaps, currency swaps and others for trading purposes or to manage its exposures to fluctuations in interest rates and currency exchange, amongst others. These derivative financial instruments are presented as derivative financial instruments within the financial statements irrespective of transaction purpose and subsequent measurement requirement.

The Group designates certain derivatives as hedging instruments to hedge the risk of changes in fair value of a recognized asset or liability or of an unrecognized firm commitment (fair value hedge) and the risk of changes in cash flow (cash flow hedge).

At the inception of the hedge there is formal designation and documentation of the hedging relationship and the Group's risk management objective and strategy for undertaking the hedge. That documentation includes identification of the hedging instrument, the hedged item or transaction, the nature of the risk being hedged and how the entity will assess the hedging instrument's effectiveness in offsetting the exposure to changes in the hedged item's fair value attributable to the hedged risk.

3.7.1 Derivative financial instruments held for trading

All derivative financial instruments, except for derivatives that are designated and qualify for hedge accounting, are classified as financial instruments held for trading and are measured at fair value. Gains or losses arising from a change in fair value are recognized in profit or loss as part of net gains or losses on financial instruments at fair value through profit or loss.

3.7.2 Fair value hedges

If derivatives qualify for a fair value hedge, the change in fair value of the hedging instrument and the change in fair value of the hedged item attributable to the hedged risk are recognized in profit or loss as part of other operating income and expenses. Fair value hedge accounting is discontinued prospectively if the hedging instrument expires or is sold, terminated or exercised, or the hedge no longer meets the criteria for hedge accounting or the Group revokes the designation. Once fair value hedge accounting is discontinued, the adjustment to the carrying amount of a hedged item is fully amortized to profit or loss by the maturity of the financial instrument using the effective interest method.

3.7.3 Cash flow hedges

The portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is recognized directly in other comprehensive income and the ineffective portion of the gain or loss on the hedging instrument is recognized in profit or loss. The associated gains or losses that were previously recognized in other comprehensive income are reclassified from equity to profit or loss as a reclassification adjustment in the same period or periods during which the hedged forecast cash flows affects profit or loss. Cash flow hedge accounting is discontinued prospectively if the hedging instrument expires or is sold, terminated or exercised, or the hedge no longer meets the criteria for hedge accounting or the Group revokes the designation. When the cash flow hedge accounting is discontinued, the cumulative gains or losses on the hedging instrument that have been recognized in other comprehensive income are reclassified to profit or loss over the year in which the forecast transaction occurs. If the forecast transaction is no longer expected to occur, the cumulative gains or losses that had been recognized in other comprehensive income are immediately reclassified to profit or loss.

3.7.4 Embedded derivatives

An embedded derivative is separated from the host contract and accounted for as a derivative if, and only if the economic characteristics and risks of the embedded derivative are not closely related to those of the host contract and a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative and the hybrid (combined) instrument is not measured at fair value with changes in fair value recognized in profit or loss. Gains or losses arising from a change in the fair value of an embedded derivative separated from the host contract are recognized in profit or loss as part of net gains or losses on financial instruments at fair value through profit or loss.

3.7.5 Day one gain and loss

If the Group uses a valuation technique that incorporates data not obtained from observable markets for the fair value at initial recognition of the financial instrument, there may be a difference between the transaction price and the amount determined using that valuation technique. In these circumstances, the difference is deferred and not recognized in profit or loss, and is amortized by using the straight-line method over the life of the financial instrument. If the fair value of the financial instrument is subsequently determined using observable market inputs, the remaining deferred amount is recognized in profit or loss as part of net gains or losses on financial instruments at fair value through profit or loss or other operating income and expenses.

3.8 Property and equipment

3.8.1 Recognition and Measurement

All property and equipment that qualify for recognition as an asset are measured at cost and subsequently carried at cost less any accumulated depreciation and any accumulated impairment losses.

The cost of property and equipment includes any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management and the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located.

Subsequent expenditures are capitalized only when they prolong the useful life or enhance values of the assets but the costs of the day-to-day servicing of the assets such as repair and maintenance costs are recognized in profit or loss as incurred. When part of an item of an asset has a useful life different from that of the entire asset, it is recognized as a separate asset.

3.8.2 Depreciation

Land is not depreciated, whereas other property and equipment are depreciated using the method that reflects the pattern in which the asset's future economic benefits are expected to be consumed by the Group. The depreciable amount of an asset is determined after deducting its residual value. As for leased assets, if there is no reasonable certainty that the Group will obtain ownership by the end of the lease term, the asset is fully depreciated over the shorter of the lease term and its useful life.

Each part of an item of property and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation method and estimated useful lives of the assets are as follows:

Property and equipment	Depreciation method	Estimated useful lives
Buildings and structures	Straight-line	40 years
Leasehold improvements	Declining-balance	4 years
Equipment and vehicles	Declining-balance	4 years
Finance leased assets	Declining-balance	8 months ~ 5 years and 8 months

The residual value, the useful life and the depreciation method applied to an asset are reviewed at least at each financial year end, if expectations differ from previous estimates, the changes are accounted for as a change in an accounting estimate.

3.9 Investment properties

3.9.1 Recognition and Measurement

Properties held to earn rentals or for capital appreciation or both are classified as investment properties. Investment properties are measured initially at their cost and subsequently the cost model is used.

3.9.2 Depreciation

Land is not depreciated, whereas other investment properties are depreciated using the method that reflects the pattern in which the asset's future economic benefits are expected to be consumed by the Group. The depreciable amount of an asset is determined after deducting its residual value.

The depreciation method and estimated useful lives of the assets are as follows:

Property and equipment	Depreciation method	Estimated useful lives
Buildings	Straight-line	40 years

The residual value, the useful life and the depreciation method applied to an asset are reviewed at least at each financial year end and, if expectations differ from previous estimates or if there has been a significant change in the expected pattern of consumption of the future economic benefits embodied in the asset, the changes are accounted for as a change in an accounting estimate.

3.10 Intangible assets

Intangible assets are measured initially at cost and subsequently carried at their cost less any accumulated amortization and any accumulated impairment losses.

Intangible assets, except for goodwill and membership rights, are amortized using the straight-line method with no residual value over their estimated useful economic life since the asset is available for use.

Intangible assets	Amortization method	Estimated useful lives
Industrial property rights	Straight-line	3~10 years
Software	Straight-line	3~5 years
Finance leased assets	Straight-line	8 months ~ 5 years and 8 months
Others	Straight-line	4~30 years

The amortization period and the amortization method for intangible assets with a finite useful life are reviewed at least at each financial year end. Where an intangible asset is not being amortized because its useful life is considered to be indefinite, the Group carries out a review in each accounting period to confirm whether or not events and circumstances still support the assumption of an indefinite useful life. If they do not, the change from the indefinite to finite useful life is accounted for as a change in an accounting estimate.

3.10.1 Goodwill

Recognition and measurement

Goodwill acquired from business combinations before January 1, 2010, is stated at its carrying amount which was recognized under the Group's previous accounting policy, prior to the transition to IFRS.

Goodwill acquired from business combinations is initially measured as the excess of the aggregate of the consideration transferred, fair value of non-controlling interest and the acquisition-date fair value of the acquirer's previously held equity interest in the acquiree over the net identifiable assets acquired and liabilities assumed. If this consideration is lower than the fair value of the net assets of the business acquired, the difference is recognized in profit or loss.

For each business combination, the Group decides whether the non-controlling interest in the acquiree is initially measured at fair value or at the non-controlling interest's proportionate share of the acquiree's identifiable net assets at the acquisition date.

Acquisition-related costs incurred to effect a business combination are charged to expenses in the periods in which the costs are incurred and the services are received, except for the costs to issue debt or equity securities.

Additional acquisitions of non-controlling interest

Additional acquisitions of non-controlling interests are accounted for as equity transactions. Therefore, no additional goodwill is recognized.

Subsequent measurement

Goodwill is not amortized and is stated at cost less accumulated impairment losses. However, goodwill that forms part of the carrying amount of an investment in associates is not separately recognized and an impairment loss recognized is not allocated to any asset, including goodwill, which forms part of the carrying amount of the investment in the associates.

3.10.2 Subsequent expenditure

Subsequent expenditure is capitalized only when it enhances values of the assets. Internally generated intangible assets, such as goodwill and trade name, are not recognized as assets but expensed as incurred.

3.11 Leases

3.11.1 Finance lease

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. At the commencement of the lease term, the Group recognizes finance leases as assets and liabilities in its statements of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments, each determined at the inception of the lease. Any initial direct costs of the lessee are added to the amount recognized as an asset.

Minimum lease payments are apportioned between the finance charge and the reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability. Contingent rents are charged as expenses in the periods in which they are incurred.

The depreciable amount of a leased asset is allocated to each accounting period during the period of expected use on a systematic basis consistent with the depreciation policy the Group adopts for depreciable assets that are owned. If there is reasonable certainty that the lessee will obtain ownership by the end of the lease term, the period of expected use is the useful life of the asset; otherwise, the asset is fully depreciated over the shorter of the lease term and its useful life.

3.11.2 Operating lease

A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

Leases in the financial statements of lessors

Lease income from operating leases are recognized in income on a straight-line basis over the lease term, unless another systematic basis is more representative of the time pattern in which use benefit derived from the leased asset is diminished. Initial direct costs incurred by lessors in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized as an expense over the lease term on the same basis as the lease income.

Leases in the financial statements of lessees

Lease payments under an operating lease (net of any incentives received from the lessor) are recognized as an expense on a straight-line basis over the lease term unless another systematic basis is more representative of the time pattern of the asset's benefit.

3.12 Impairment of non-financial assets

The Group assesses at the end of each reporting period whether there is any indication that a non-financial asset, except for (i) deferred income tax assets, (ii) assets arising from employee benefits and (iii) non-current assets (or group of assets to be sold) classified as held for sale, may be impaired. If any such indication exists, the Group estimates the recoverable amount of the asset. However, irrespective of whether there is any indication of impairment, the Group tests (i) goodwill acquired in a business combination, (ii) intangible assets with an indefinite useful life and (iii) intangible assets not yet available for use for impairment annually by comparing their carrying amount with their recoverable amount.

The recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the Group determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit). A cash-generating unit is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets. The recoverable amount of an asset is the higher of its fair value less costs to sell and its value in use. Value in use is the present value of the future cash flows expected to be derived from an asset or cash-generating unit that are discounted by a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. That reduction is an impairment loss and recognized immediately in profit or loss. For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the cash-generating units that are expected to benefit from the synergies of the combination. The impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the cash-generating unit and then to the other assets of the unit pro rata on the basis of the carrying amount of each asset in the unit.

An impairment loss recognized for goodwill is not reversed in a subsequent period. The Group assesses at the end of each reporting period whether there is any indication that an impairment loss recognized in prior periods for an asset, other than goodwill, may no longer exist or may have decreased, and an impairment loss recognized in prior periods for an asset other than goodwill shall be reversed if, and only if, there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. The increased carrying amount of an asset other than goodwill attributable to a reversal of an impairment loss cannot exceed the carrying amount that would have been determined (net of amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

3.13 Non-current assets held for sale

A non-current asset or disposal group is classified as held for sale if its carrying amount will be recovered principally through a sale transaction rather than through continuing use. For this to be the case, the asset (or disposal group) must be available for immediate sale in its present condition and its sale must be highly probable. A non-current asset (or disposal group) classified as held for sale is measured at the lower of its carrying amount and fair value less costs to sell which is measured in accordance with the applicable IFRS, immediately before the initial classification of the asset (or disposal group) as held for sale.

A non-current asset while it is classified as held for sale or while it is part of a disposal group classified as held for sale is not depreciated (or amortized).

Impairment loss is recognized for any initial or subsequent write-down of the asset (or disposal group) to fair value less costs to sell. Gains are recognized for any subsequent increase in fair value less costs to sell of an asset, but not in excess of the cumulative impairment loss that has been recognized.

3.14 Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss are financial liabilities held for trading. After initial recognition, financial liabilities at fair value through profit or loss are measured at fair value and gains or losses arising from changes in the fair value, and gains or losses from sale and repayment of financial liabilities at fair value through profit or loss are recognized as net gains on financial instruments at fair value through profit or loss in the statement of comprehensive income.

3.15 Insurance Contracts

KB Life Insurance Co., Ltd., one of the subsidiaries of the Group, issues insurance contracts.

Insurance contracts are defined as "a contract under which one party (the insurer) accepts significant insurance risk from another party by agreeing to compensate the policyholder if a specified uncertain future event adversely affects the policyholder”. A contract that qualifies as an insurance contract remains an insurance contract until all rights and obligations are extinguished or expire. Such a contract that does not contain significant insurance risk is classified as an investment contract and is within the scope of IAS 39, *Financial Instruments: Recognition and measurement* to the extent that it gives rise to a financial asset or financial liability, except if the investment contract contains a Discretionary Participation Features (DPF). If the contract has a DPF, the contract is subject to IFRS 4, *Insurance Contracts*. The Group recognizes assets (liabilities) and gains (losses) relating to insurance contracts as other assets (liabilities) in the statements of financial position, and as other operating income (expenses) in the statements of comprehensive income, respectively.

3.15.1 Insurance premiums

The Group recognizes collected premiums as revenue when a due date of collection of premiums from insurance contracts comes and the collected premium which is unmatured at the end of the reporting period is recognized as unearned premium.

3.15.2 Insurance liabilities

The Group recognizes a liability for future claims, refunds, policyholders’ dividends and related expenses as follows:

Premium reserve

A premium reserve refers to an amount based on the net premium method for payment of future claims with respect to events covered by insurance policies which have not yet occurred as of the reporting date.

Reserve for outstanding claims

A reserve for outstanding claims refers to the amount not yet paid, out of an amount to be paid or expected to be paid with respect to the insured events which have arisen as of the end of each fiscal year.

Unearned premium reserve

Unearned premium refers to the portion of the premium that has been paid in advance for insurance that has not yet been provided. An unearned premium reserve refers to the amount maintained by the insurer to refund in the event of either party cancelling the contract.

Policyholders’ dividends reserve

Policyholders’ dividends reserve including an interest rate guarantee reserve, a mortality dividend reserve and an interest rate difference dividend reserve is recognized for the purpose of provisioning for policyholders’ dividends in the future in accordance with statutes or insurance terms and conditions.

3.15.3 Liability adequacy test

The Group assesses at each reporting date whether its insurance liabilities are adequate, using current estimates of all future contractual cash flows and related cash flow such as claims handling cost, as well as cash flows resulting from embedded options and guarantees under its insurance contracts in accordance with IFRS 4. If the assessment shows that the carrying amount of its insurance liabilities is inadequate in light of the estimated future cash flows, the entire deficiency is recognized in profit or loss and reserved as insurance liabilities. Future cash flows from long-term insurance are discounted at a future rate of return on operating assets, whereas future cash flows from general insurance are not discounted to present value. For liability adequacy tests of premium and unearned premium reserves, the Group considers all cash flow factors such as future insurance premium, deferred acquisition costs, operating expenses and operating premiums. In relation to the reserve for outstanding claims, the Group elects a model that best reflects the trend of paid claims among several statistical methods to perform the adequacy test.

3.15.4 Deferred acquisition costs

Acquisition cost is deferred in an amount actually spent for an insurance contract and equally amortized over the premium payment period or the period in which acquisition costs are charged for the relevant insurance contract. Acquisition costs are amortized over the shorter of seven years or premium payment period; if there is any unamortized acquisition costs remaining as of the date of surrender or lapse, such remainder shall be amortized in the period in which the contract is surrendered or lapsed.

3.16 Provisions

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The risks and uncertainties that inevitably surround many events and circumstances are taken into account in reaching the best estimate of provisions, and where the effect of the time value of money is material, the amount of provisions are the present value of the expenditures expected to be required to settle the obligation.

Provisions on confirmed and unconfirmed acceptances and guarantees, unfunded commitments of credit cards and unused credit lines of consumer and corporate loans are recognized using a valuation model that applies the credit conversion factor, probability of default, and loss given default.

Provisions are reviewed at the end of each reporting period and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provisions are reversed.

If the Group has a contract that is onerous, the present obligation under the contract is recognized and measured as provisions. An onerous contract is a contract in which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it. The unavoidable costs under a contract reflect the minimum net cost to exit from the contract, which is the lower of the cost of fulfilling it and any compensation or penalties arising from failure to fulfill it.

3.17 Financial guarantee contracts

A financial guarantee contract is a contract that requires the issuer (the Group) to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the original or modified terms of a debt instrument.

Financial guarantee contracts are initially recognized at fair value. After initial recognition, financial guarantee contracts are measured at the higher of:

- The amount determined in accordance with IAS 37, *Provisions, Contingent Liabilities and Contingent Assets and*
- The initial amount recognized, less, when appropriate, cumulative amortization recognized in accordance with IAS 18, *Revenue*

3.18 Equity instruments issued by the Group

An equity instrument is any contract or agreement that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

3.18.1 Ordinary shares

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are deducted, net of tax, from the equity.

3.18.2 Treasury shares

If entities of the Group reacquire the Parent Company's equity instruments, those instruments ('treasury shares') are deducted from equity. No gains or losses are recognized in profit or loss on the purchase, sale, issue or cancellation of own equity instruments.

3.19 Revenue recognition

3.19.1 Interest income and expense

Interest income and expense are recognized using the effective interest method. The effective interest method is a method of calculating the amortized cost of a financial asset or a financial liability (or groups of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period.

The effective interest rate is the rate that exactly discounts estimated future cash receipts or payments through the expected life of the financial instrument or, where appropriate, a shorter period, to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Group estimates cash flows considering all contractual terms of the financial instrument but does not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts. In those rare cases when it is not possible to estimate reliably the cash flows or the expected life of a financial instrument (or group of financial instruments), the Group uses the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Interest on impaired financial assets is recognized using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

3.19.2 Fee and commission income

The Group recognizes financial service fees in accordance with the accounting standard of the financial instrument related to the fees earned.

Fees that are an integral part of the effective interest of a financial instrument

Such fees are generally treated as adjustments of effective interest. Such fees may include compensation for activities such as evaluating the borrower's financial condition, evaluating and recording guarantees, collateral and other security arrangements, negotiating the terms of the instrument, preparing and processing documents and closing the transaction and origination fees received on issuing financial liabilities measured at amortized cost. However, fees relating to the creation or acquisition of a financial instrument at fair value through profit or loss are recognized as revenue immediately.

Fees earned as services are provided

Such fees are recognized as revenue as the services are provided. The fees include fees charged for servicing a financial instrument and charged for managing investments.

Fees that are earned on the execution of a significant act

Such fees are recognized as revenue when the significant act has been completed.

Commission on the allotment of shares to a client is recognized as revenue when the shares have been allotted and placement fees for arranging a loan between a borrower and an investor is recognized as revenue when the loan has been arranged.

A syndication fee received by the Group that arranges a loan and retains no part of the loan package for itself (or retains a part at the same effective interest rate for comparable risk as other participants) is compensation for the service of syndication. Such a fee is recognized as revenue when the syndication has been completed.

3.19.3 Dividend income

Dividend income is recognized in profit or loss when the right to receive payment is established. Dividend income from financial assets at fair value through profit or loss and financial investment is recognized in profit or loss as part of net gains on financial assets at fair value through profit or loss and other operating income and expenses, respectively.

3.20 Employee compensation and benefits

3.20.1 Post-employment benefits:

Defined benefit plans

All post-employment benefits, other than defined contribution plans, are classified as defined benefit plans. The amount recognized as a defined benefit liability is the present value of the defined benefit obligation less the fair value of plan assets at the end of the reporting period.

The present value of the defined benefit obligation is calculated annually by independent actuaries using the Projected Unit Credit method. The rate used to discount post-employment benefit obligations is determined by reference to market yields at the end of the reporting period on high quality corporate bonds. The currency and term of the corporate bonds are consistent with the currency and estimated term of the post-employment benefit obligations. Actuarial gains and losses including experience adjustments and the effects of changes in actuarial assumptions are recognized in other comprehensive income (loss).

When the total of the present value of the defined benefit obligation minus the fair value of plan assets results in an asset, it is recognized to the extent of the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

Past service cost is the change in the present value of the defined benefit obligation, which arises when the Group introduces a defined benefit plan or changes the benefits of an existing defined benefit plan. Such past service cost is immediately recognized as an expense for the year.

Defined contribution plans

The contributions are recognized as employee benefit expense when they are incurred.

3.20.2 Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within 12 months after the end of the period in which the employees render the related service. The undiscounted amount of short-term employee benefits expected to be paid in exchange for that service is recognized as a liability (accrued expense), after deducting any amount already paid.

The expected cost of profit-sharing and bonus payments are recognized as liabilities when the Group has a present legal or constructive obligation to make such payments as a result of past events rendered by employees and a reliable estimate of the obligation can be made.

3.20.3 Share-based payment

The Group operates share-based payment arrangements granting awards to directors and employees of the Group. The Group has a choice of whether to settle the awards in cash or by issuing equity instruments of the parent company at the date of settlement.

For a share-based payment transaction in which the terms of the arrangement provide the Group with the choice of whether to settle in cash or by issuing equity instruments, the Group determined that it has a present obligation to settle in cash because the Group has a past practice and a stated policy of settling in cash. Therefore, the Group accounts for the transaction in accordance with the requirements of cash-settled share-based payment transactions.

The Group measures the services acquired and the liability incurred at fair value. Until the liability is settled, the Group remeasures the fair value of the liability at the end of each reporting period and at the date of settlement, with any changes in fair value recognized in profit or loss for the year.

3.20.4 Termination benefits

Termination benefits are payable when employment is terminated by the Group before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. An entity shall recognize a liability and expense for termination benefits at the earlier of the following dates: when the entity can no longer withdraw the offer of those benefits and when the entity recognizes costs for a restructuring that is within the scope of IAS 37 and involves the payment of termination benefits. Termination benefits are measured by considering the number of employees expected to accept the offer in the case of a voluntary early retirement. Termination benefits over 12 months after the reporting period are discounted to present value.

3.21 Income tax expenses

Income tax expense (tax income) comprises current tax expense (current tax income) and deferred income tax expense (deferred income tax income). Current and deferred income tax are recognized as income or expense and included in profit or loss for the year, except to the extent that the tax arises from (a) a transaction or an event which is recognized, in the same or a different period outside profit or loss, either in other comprehensive income or directly in equity and (b) a business combination.

3.21.1 Current income tax

Current income tax is the amount of income taxes payable (recoverable) in respect of the taxable profit (tax loss) for a period. A difference between the taxable profit and accounting profit may arise when income or expense is included in accounting profit in one period, but is included in taxable profit in a different period. Differences may also arise if there is revenue that is exempt from taxation, or expense that is not deductible in determining taxable profit (tax loss). Current income tax liabilities (assets) for the current and prior periods are measured at the amount expected to be paid to (recovered from) the taxation authorities, using the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The Group offsets current income tax assets and current income tax liabilities if, and only if, the Group (a) has a legally enforceable right to offset the recognized amounts and (b) intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

3.21.2 Deferred income tax

Deferred income tax is recognized, using the asset-liability method, on temporary differences arising between the tax based amount of assets and liabilities and their carrying amount in the financial statements. Deferred income tax liabilities are recognized for all taxable temporary differences and deferred income tax assets are recognized for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilized. However, deferred income tax liabilities are not recognized if they arise from the initial recognition of goodwill; deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except for deferred income tax liabilities for which the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying amount of a deferred income tax asset is reviewed at the end of each reporting period. The Group reduces the carrying amount of a deferred income tax asset to the extent that it is no longer probable that sufficient taxable profit will be available to allow the benefit of part or all of that deferred income tax asset to be utilized.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred income tax liabilities and deferred income tax assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

The Group offsets deferred income tax assets and deferred income tax liabilities when the Group has a legally enforceable right to offset current income tax assets against current income tax liabilities; and the deferred income tax assets and the deferred income tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity; or different taxable entities which intend either to settle current income tax liabilities and assets on a net basis, or to realize the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred income tax liabilities or assets are expected to be settled or recovered.

3.21.3 Uncertain tax positions

Uncertain tax positions arise from a claim for rectification brought by the Group, an appeal for a refund of tax levied by the tax authorities, or others due to different interpretation of tax laws or others. The Group recognizes its uncertain tax positions in the consolidated financial statements based on the guidance in IAS 12. The income tax asset is recognized if a tax refund is probable for taxes paid and levied by the tax authority. However, interest and penalties related to income tax are recognized in accordance with IAS 37.

3.22 Earnings per share

The Group calculates basic earnings per share amounts and diluted earnings per share amounts for profit or loss attributable to ordinary equity holders of the parent entity and presents them in the statement of comprehensive income. Basic earnings per share is calculated by dividing profit or loss attributable to ordinary equity holders of the Parent Company by the weighted average number of ordinary shares outstanding during the period. For the purpose of calculating diluted earnings per share, the Group adjusts profit or loss attributable to ordinary equity holders of the Parent Company and the weighted average number of shares outstanding for the effects of all dilutive potential ordinary shares including convertible bonds and share options.

3.23 Operating segments

Operating segments are components of the Group where separate financial information is available and is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance.

Segment information includes items which are directly attributable and reasonably allocated to the segment.

3.24 United States dollar amounts

The Group operates primarily in Korea and its official accounting records are maintained in Korean won. The U.S. dollar amounts are provided herein as supplementary information solely for the convenience of the reader. Korean won amounts are expressed in U.S. dollars at the rate of ₩1,090.89 to U.S. $1.00, the U.S. Federal Reserve Bank of New York buying exchange rate in effect at noon, December 31, 2014. Such convenience translation into US dollars should not be construed as representations that the Korean won amounts have been, could have been, or could in the future be, converted at this or any other rate of exchange.

4. Financial risk management

4.1 Summary

4.1.1 Overview of Financial Risk Management Policy

The financial risks that the Group is exposed to are credit risk, market risk, liquidity risk, operational risk and others.

The note regarding financial risk management provides information about the risks that the Group is exposed to, including the objectives, policies and processes for managing the risks, the methods used to measure the risks, and capital adequacy. Additional quantitative information is disclosed throughout the consolidated financial statements.

The Group's risk management system focuses on increasing transparency, developing the risk management environment, preventing transmission of risk to other related subsidiaries, and the preemptive response to risk due to rapid changes in the financial environment to support the Group's long-term strategy and business decisions efficiently. Credit risk, market risk, liquidity risk, and operational risk have been recognized as the Group's key risks. These risks are measured in Economic Capital or VaR (Value at Risk) and are managed using a statistical method.

4.1.2 Risk Management Organization

Risk Management Committee

The Risk Management Committee establishes risk management strategies in accordance with the directives of the Board of Directors and determines the Group's target risk appetite, approves significant risk matters and reviews the level of risks that the Group is exposed to and the appropriateness of the Group's risk management operations as an ultimate decision-making authority.

Risk Management Council

The Risk Management Council is a consultative group which reviews and makes decisions on matters delegated by the Risk Management Committee and discusses the detailed issues relating to the Group's risk management.

Risk Management Department

The Risk Management Department is responsible for monitoring and managing the Group's economic capital limit and managing specific policies, procedures and work processes relating to the Group's risk management.

4.2 Credit Risk

4.2.1 Overview of Credit Risk

Credit risk is the risk of possible losses in an asset portfolio in the event of a counterparty's default, breach of contract and deterioration in the credit quality of the counterparty. For risk management reporting purposes, the individual borrower's default risk, country risk, specific risks and other credit risk exposure components are considered as a whole.

4.2.2 Credit Risk Management

The Group measures expected losses and economic capital on assets that are subject to credit risk management whether on- or off-balance sheet and uses expected losses and economic capital as a management indicator. The Group manages credit risk by allocating credit risk economic capital limits.

In addition, the Group controls the credit concentration risk exposure by applying and managing total exposure limits to prevent an excessive risk concentration to each industry and borrower.

The Group has organized a credit risk management team that focuses on credit risk management in accordance with the Group's credit risk management policy. For Kookmin Bank, which is the main subsidiary, its loan analysis department which is independent from the sales department is responsible for loan policy, loan limit, loan review, credit evaluation, restructuring and subsequent events. Kookmin Bank's risk management group is also responsible for planning risk management policy, applying limits of credit lines, measuring the credit risk economic capital, adjusting credit limits, reviewing credit and verifying credit evaluation models.

4.2.3 Maximum exposure to credit risk

The Group's maximum exposures of financial instruments, excluding equity securities, to credit risk without consideration of collateral values as of December 31, 2013 and 2014, are as follows:

	2013	2014
	(In millions of Korean won)	
Financial assets		
Due from financial institutions	₩ 12,094,103	₩ 12,878,430
Financial assets at fair value through profit or loss		
Financial assets held for trading[1]	7,866,037	9,763,553
Financial assets designated at fair value through profit or loss	210,805	442,960
Derivatives	1,819,409	1,968,190
Loans[2]	219,001,356	231,449,653
Financial investments		
Available-for-sale financial assets	18,933,288	19,359,822
Held-to-maturity financial assets	13,016,991	12,569,154
Other financial assets[2]	6,251,679	7,559,631
Total financial assets	279,193,668	295,991,393
Off-balance sheet items		
Acceptances and guarantees contracts	9,804,692	9,045,824
Financial guarantee contracts	3,097,372	4,459,645
Commitments	95,422,032	96,316,581
Total off-balance sheet items	108,324,096	109,822,050
Total	₩387,517,764	₩405,813,443

(1) The amounts of ₩40,252 million and ₩51,345 million as of December 31, 2013 and 2014, respectively, related to financial instruments indexed to the price of gold are included.

(2) Loans and other financial assets are net of allowance.

4.2.4 Credit risk of loans

The Group maintains an allowance for loan losses associated with credit risk on loans to manage its credit risk.

The Group recognizes an impairment loss on loans carried at amortized cost when there is any objective indication of impairment. Under IFRS, an impairment loss is based on losses incurred at the end of the reporting year. Therefore, the Group does not recognize losses expected as a result of future events. The Group measures inherent incurred losses on loans and presents them in the financial statements through the use of an allowance account which is offset against the related loans.

Loans are classified as follows:

	2013							
	Retail		Corporate		Credit card		Total	
	Amount	%	Amount	%	Amount	%	Amount	%
	(In millions of Korean won)							
Neither past due nor impaired	₩104,751,607	97.22	₩ 98,939,364	96.68	₩11,253,836	95.50	₩214,944,807	96.88
Past due but not impaired	1,967,127	1.83	538,571	0.53	321,978	2.73	2,827,676	1.27
Impaired	1,024,480	0.95	2,856,933	2.79	208,644	1.77	4,090,057	1.85
Sub-total	107,743,214	100.00	102,334,868	100.00	11,784,458	100.00	221,862,540	100.00
Allowances[(1)]	(580,510)	0.54	(1,870,874)	1.83	(409,800)	3.48	(2,861,184)	1.29
Carrying amount	₩107,162,704		₩100,463,994		₩11,374,658		₩219,001,356	

	2014							
	Retail		Corporate		Credit card		Total	
	Amount	%	Amount	%	Amount	%	Amount	%
	(In millions of Korean won)							
Neither past due nor impaired	₩116,956,042	98.04	₩100,542,430	97.64	₩11,155,710	95.90	₩228,654,182	97.76
Past due but not impaired	1,576,365	1.32	331,780	0.32	276,875	2.38	2,185,020	0.93
Impaired	765,751	0.64	2,097,041	2.04	199,711	1.72	3,062,503	1.31
Sub-total	119,298,158	100.00	102,971,251	100.00	11,632,296	100.00	233,901,705	100.00
Allowances[(1)]	(536,959)	0.45	(1,525,152)	1.48	(389,941)	3.35	(2,452,052)	1.05
Carrying amount	₩118,761,199		₩101,446,099		₩11,242,355		₩231,449,653	

(1) Collectively assessed allowances for loans are included as they are not impaired individually.

Credit quality of loans that are neither past due nor impaired are as follows:

	2013			
	Retail	Corporate	Credit card	Total
	(In millions of Korean won)			
Grade 1	₩ 88,331,532	₩40,950,125	₩ 5,670,689	₩134,952,346
Grade 2	12,320,960	43,497,358	3,806,194	59,624,512
Grade 3	3,195,119	11,993,854	1,438,491	16,627,464
Grade 4	637,556	2,237,288	184,110	3,058,954
Grade 5	266,440	260,739	154,352	681,531
Total	₩104,751,607	₩98,939,364	₩11,253,836	₩214,944,807

	2014			
	Retail	Corporate	Credit card	Total
	(In millions of Korean won)			
Grade 1	₩ 99,314,075	₩ 43,166,076	₩ 5,705,083	₩148,185,234
Grade 2	12,557,654	43,913,621	3,788,572	60,259,847
Grade 3	4,057,239	11,014,410	1,342,891	16,414,540
Grade 4	775,407	1,984,073	163,279	2,922,759
Grade 5	251,667	464,250	155,885	871,802
Total	₩116,956,042	₩100,542,430	₩11,155,710	₩228,654,182

Credit quality of loans graded according to internal credit ratings are as follows:

	Range of PD (%) (Probability of Default)	Retail	Corporate
Grade 1	0.0 ~ 1.0	1 ~5 grade	AAA ~ BBB+
Grade 2	1.0 ~ 5.0	6 ~ 8 grade	BBB ~ BB
Grade 3	5.0 ~ 15.0	9 ~ 10 grade	BB- ~ B
Grade 4	15.0 ~ 30.0	11 grade	B- ~ CCC
Grade 5	30.0 ~	12 grade or under	CC or under

Loans that are past due but not impaired are as follows:

	2013				
	1 ~ 29 days	30 ~ 59 days	60 ~ 89 days	90 days or more	Total
	(In millions of Korean won)				
Retail	₩1,729,091	₩169,341	₩ 68,629	₩ 66	₩1,967,127

Total	₩298,610	₩740,324	₩1,522,802	₩166,261,193	₩168,822,929

4.2.5 Credit quality of securities

The financial assets at fair value through profit or loss and financial investments excluding equity securities that are exposed to credit risk are as follows:

	2013	2014
	(In millions of Korean won)	
Securities that are neither past due nor impaired	₩39,977,309	₩42,077,873
Impaired securities	9,560	6,271
Total	₩39,986,869	₩42,084,144

The credit quality of securities (excluding equity securities) that are neither past due nor impaired as of December 31, 2013 and 2014, are as follows:

	2013					
	Grade 1	Grade 2	Grade 3	Grade 4	Grade 5	Total
	(In millions of Korean won)					
Financial assets held for trading	₩ 6,634,168	₩1,172,476	₩19,141	₩ —	₩ —	₩ 7,825,785
Financial assets designated at fair value through profit or loss	89,527	119,489	—	1,789	—	210,805
Available-for-sale financial assets	18,078,177	785,216	60,335	—	—	18,923,728
Held-to-maturity financial assets	13,016,991	—	—	—	—	13,016,991
Total	₩37,818,863	₩2,077,181	₩79,476	₩1,789	₩ —	₩39,977,309

	2014					
	Grade 1	Grade 2	Grade 3	Grade 4	Grade 5	Total
	(In millions of Korean won)					
Financial assets held for trading	₩ 8,464,038	₩1,248,170	₩ —	₩ —	₩ —	₩ 9,712,208
Financial assets designated at fair value through profit or loss	76,893	366,067	—	—	—	442,960
Available-for-sale financial assets	18,442,055	847,565	63,931	—	—	19,353,551
Held-to-maturity financial assets	12,569,154	—	—	—	—	12,569,154
Total	₩39,552,140	₩2,461,802	₩63,931	₩ —	₩ —	₩42,077,873

The credit qualities of securities (excluding equity securities) according to the credit ratings by external rating agencies are as follows:

	Domestic			Foreign		
Credit quality	KAP	KIS	NICE	S&P	Fitch-IBCA	Moody's
Grade 1	AA0 to AAA	AA0 to AAA	AA0 to AAA	A- to AAA	A- to AAA	A3 to Aaa
Grade 2	A- to AA-	A- to AA-	A- to AA-	BBB- to BBB+	BBB- to BBB+	Baa3 to Baa1
Grade 3	BBB0 to BBB+	BBB0 to BBB+	BBB0 to BBB+	BB to BB+	BB to BB+	Ba2 to Ba1
Grade 4	BB0 to BBB-	BB0 to BBB-	BB0 to BBB-	B+ to BB-	B+ to BB-	B1 to Ba3
Grade 5	BB- or under	BB- or under	BB- or under	B or under	B or under	B2 or under

Debt securities' credit qualities denominated in Korean won are based on the lowest credit rating by the three domestic credit rating agencies above, and those denominated in foreign currencies are based on the lowest credit rating by the three foreign credit rating agencies above.

4.2.6 Credit risk mitigation of derivative financial instruments

A quantification of the extent to which collateral and other credit enhancements mitigate credit risk of derivative financial instruments as of December 31, 2013 and 2014, are as follows:

	2013	2014
	(In millions of Korean won)	
Deposits and savings, securities and others	₩ 271,380	₩ 329,482
Total	₩ 271,380	₩ 329,482

4.2.7 Credit risk concentration analysis

The details of the Group's loans by country as of December 31, 2013 and 2014, are as follows:

	2013						
	Retail	Corporate	Credit card	Total	%	Allowances	Carrying amount
	(In millions of Korean won)						
Korea	₩107,644,600	₩100,533,577	₩11,782,169	₩219,960,346	99.14	₩(2,797,651)	₩217,162,695

The counterparties to the financial assets under due from financial institutions and financial instruments indexed to the price of gold within financial assets held for trading are in the banking and insurance industries and have high credit ratings.

4.3 Liquidity risk

4.3.1 Overview of liquidity risk

Liquidity risk is the risk of insolvency or loss due to a disparity between the inflow and outflow of funds, unexpected outflow of funds, and obtaining funds at a high price or disposing of securities at an unfavorable price due to lack of available funds. The Group manages its liquidity risk through analysis of the contractual maturity of interest-bearing assets and liabilities, assets and liabilities related to the other in and outflows, and off-balance sheet related to in and outflows of currency derivative instruments and others.

Cash flows disclosed for the maturity analysis are undiscounted contractual principal and interest to be received (paid) and, thus, differ from the amount in the financial statements which are based on the present value of expected cash flows in some cases. The amount of interest to be received or paid on floating rate assets and liabilities is measured on the assumption that the current interest rate would be the same through maturity.

4.3.2 Liquidity risk management and indicator

The liquidity risk is managed by ALM ('Asset Liability Management') and related guidelines which are applied to the risk management policies and procedures that address all the possible risks that arise from the overall business of the Group.

For the purpose of liquidity management, the liquidity ratio and accumulated liquidity gap ratio on all transactions affecting the in and outflows of funds and transactions of off-balance items are measured, managed and reported to the Risk Planning Council and Risk Management Committee on a regular basis.

As the main subsidiary, Kookmin Bank regularly reports the liquidity gap ratio, liquidity ratio, maturity gap ratio and the results of the stress testing related to liquidity risk to the Asset-Liability Management Committee ('ALCO') which establishes and monitors the liquidity risk management strategy.

4.3.3 Analysis of remaining contractual maturity of financial assets and liabilities

Cash flows disclosed below are undiscounted contractual principal and interest to be received (paid) and, thus, differ from the amount in the consolidated financial statements which are based on the present value of expected cash flows. The amount of interest to be received or paid on floating rate assets and liabilities is measured on the assumption that the current interest rate would be the same through maturity.

The remaining contractual maturity of financial assets and liabilities, excluding derivatives held for cash flow hedging, as of December 31, 2013 and 2014, are as follows:

(1) The amounts of ₩7,671,914 million and ₩7,136,623 million which are restricted amounts due from the financial institutions as of December 31, 2013 and 2014, respectively, are excluded.

(2) Financial instruments held for trading, financial instruments designated at fair value through profit or loss and derivatives held for trading are not managed by contractual maturity because they are expected to be traded or redeemed before maturity. Therefore, the carrying amounts of those financial instruments are classified as 'On demand' category. However, hybrid capital instruments classified as financial instruments designated at fair value through profit or loss are included in the 'Over 5 years' category which they can be redeemed, owing to uncertain point of sale.

(3) Cash flows of derivative instruments held for fair value hedging are shown at net amounts of cash inflows and outflows by remaining contractual maturity.

(4) In the case of equity investments restricted for sale, they are shown in the period in which the restriction is expected to be expired.

(5) Deposits that are contractually repayable on demand or on short notice are classified under the 'On demand' cate

(6) Commitments are included under the 'On demand' category because payments can be required upon request.

(7) The financial guarantee contracts are included under the 'On demand' category as payments can be required upon request.

The contractual cash flows of derivatives held for cash flow hedging as of December 31, 2013 and 2014, are as follows:

	2013					
	Up to 1 month	1-3 months	3-12 months	1-5 years	Over 5 years	Total

4.4 Market risk

4.4.1 Overview of market risk

Definition of market risk

Market risk is the risk of possible losses which arise from changes in market factors, such as interest rate, stock price, foreign exchange rate and other market factors that affect the fair value or future cash flows of financial instruments, such as securities and derivatives amongst others. The most significant risks associated with trading positions are interest rate risks and currency risks and other risks include stock price risks. In addition, the Group is exposed to interest rate risks and currency risks associated with non-trading positions. The Group classifies exposures to market risk into either trading or non-trading positions. The Group measures and manages market risk separately for each subsidiary in the Group.

Market risk management group

The Group sets economic capital limits for market risk and interest rate risk and monitors the risks to manage the risk of trading and non-trading positions. The Group maintains risk management systems and procedures, such as trading policies and procedures, and market risk management guidelines for trading positions, and interest rate risk management guidelines for non-trading positions in order to manage market risk efficiently. The procedures mentioned are implemented with approval from the Risk Management Committee and Risk Management Council.

As the main subsidiary, Kookmin Bank establishes market risk management policy, sets position limits, loss limits and VaR limits of each business group and approves newly developed derivative instruments, through its Risk Management Council. The Risk Management Council has delegated the responsibility for market risk management of individual business departments to the Market Risk Management Committee which is chaired by a Chief Risk Officer (CRO). The Market Risk Management Committee sets position limits, loss limits, VaR limits, sensitivity limits and scenario loss limits for each division, at the level of each individual business department.

The ALCO of Kookmin Bank determines the operational standards of interest and commission, the details of the establishment and prosecution of the Asset Liability Management (ALM) policies and enacts and amends relevant guidelines. The Risk Management Committee and Risk Management Council monitor the establishment and enforcement of ALM risk management policies and enact and amend ALM risk management guidelines. The interest rate risk limit is set based on the future assets/liabilities position and interest rate volatility estimation reflects the annual work plan. The Financial Planning Department and Risk Management Department measures and monitors the interest risk status and limits on a regular basis. The status and limits of interest rate risks, such as interest rate gap, duration gap and sensitivity, are reported to the ALCO and Risk Management Council on a monthly basis and to the Risk Management Committee on a quarterly basis. To ensure adequacy of interest rate and liquidity risk management, the Risk Management Department assigns the limits, monitors and reviews the risk management procedures and tasks conducted by the Financial Planning Department. Also, the Risk Management Department independently reports related information to management.

4.4.2 Trading Position

Definition of a trading position

Trading positions subject to market risk management are defined under the Trading Policy and Guideline, and the basic requirements are as follows:

- The trading position is not restricted for sale, is measured daily at fair value, and its significant inherent risks are able to be hedged in the market.
- The criteria for classification as a trading position are clearly defined in the Trading Policy and Guideline, and separately managed by the trading department.
- The trading position is operated in accordance with the documented trading strategy and managed through position limits.
- The operating department or professional dealers have an authority to enforce a deal on the trading position within predetermined limits without pre-approval.
- The trading position is reported periodically to management for the purpose of the Group's risk management.

Observation method on market risk arising from trading positions

The Group calculates VaR to measure the market risk by using market risk management systems on the entire trading portfolio. Generally, the Group manages market risk on the trading portfolio. In addition, the Group controls and manages the risk of derivative trading based on the regulations and guidelines formulated by the Financial Supervisory Service.

VaR (Value at Risk)

i. VaR (Value at Risk)

The Group uses the value-at-risk methodology to measure the market risk of trading positions. The Group uses the 10-day VaR, which estimates the maximum amount of loss that could occur in ten days under an historical simulation model which is considered to be a full valuation method. The distributions of portfolio's value changes are estimated based on the data over the previous 250 business days, and ten-day VaR is calculated by subtracting net present market value from the value measured at a 99% confident level of portfolio's value distribution results. However, the KB Investment & Securities Co., Ltd. calculates ten-day VaR using the variance-covariance method and a 99% single tail confidence level based on historical data for the previous 250 business days calculated by the equal-weighted average method. It means the maximum amount of loss for the 10 days that could occur under normal distribution of financial changes.

VaR is a commonly used market risk measurement technique. However, the method has some shortcomings. VaR estimates possible losses over a certain period at a particular confidence level using past market movement data. Past market movements are, however, not necessarily a good indicator of future events, as there may be conditions and circumstances in the future that the model does not anticipate. As a result, the timing and magnitude of the actual losses may vary depending on the assumptions made at the time of the calculation. In addition, the time periods used for the model, generally one or ten days, are assumed to be a sufficient holding period before liquidating the relevant underlying positions. If these holding periods are not sufficient, or too long, the VaR results may understate or overstate the potential loss.

The Group uses an internal model (VaR) to measure general risk, and a standard method to measure each individual risk. Also, general and individual risks in some positions included in the consolidated financial statements in adoption of IFRS, are measured using a standard method. Therefore, the market risk VaR may not reflect the market risk of each individual risk and some specific positions.

ii. Back-Testing

Back-testing is conducted on a daily basis to validate the adequacy of the market risk model. In back-testing, the Group compares both the actual and hypothetical profit and loss with the VaR calculations.

iii. Stress Testing

Stress testing is carried out to analyze the impact of abnormal market situations on the trading and available-for-sale portfolio. It reflects changes in interest rates, stock prices, foreign exchange rates, implied volatilities of derivatives and other risk factors that have significant influence on the value of the portfolio. The Group mainly uses an historical scenario tool and also uses a hypothetical scenario tool for the analysis of abnormal market situations. Stress testing is performed at least once every quarter.

VaR at a 99% confidence level of interest rate, stock price and foreign exchange rate risk for trading positions with a ten-day holding period by a subsidiary as of December 31, 2013 and 2014, are as follows:

Details of risk factors

i. Interest rate risk

Trading position interest rate risk usually arises from debt securities in Korean won. The Group's trading strategy is to benefit from short-term movements in the prices of debt securities arising from changes in interest rates. The Group manages interest rate risk on trading positions using market value-based tools such as VaR and sensitivity analysis (Price Value of a Basis Point: PVBP).

ii. Stock price risk

Stock price risk only arises from trading securities denominated in Korean won as the Group does not have any trading exposure to shares denominated in foreign currencies. The trading securities portfolio in Korean won are composed of exchange-traded stocks and derivative instruments linked to stock with strict limits on diversification.

iii. Foreign exchange rate risk

Foreign exchange rate risk arises from holding assets and liabilities denominated in foreign currency. Net foreign currency exposure mostly occurs from the foreign assets and liabilities which are denominated in US dollars and Kazakhstan Tenge, and the remainder in Japanese Yen or Euro. The Group sets both loss limits and net foreign currency exposure limits and manages comprehensive net foreign exchange exposures which consider both trading and non-trading portfolios.

4.4.3 Non-trading position

Definition of non-trading position

The most critical market risk that arises in non-trading portfolios is interest rate risk. Interest rate risk occurs due to mismatches on maturities and interest rate change periods between interest sensitive assets and liabilities. The Group measures interest rate risk arising from assets and liabilities denominated in Korean won and foreign currencies including derivative financial instruments held for hedging. Most interest-bearing assets and interest-bearing liabilities are denominated in Korean won. Most foreign currency assets and liabilities are denominated in US Dollars and the remainder in Japanese Yen or Euro.

Observation method on market risk arising from non-trading position

The main objective of interest rate risk management is to generate stable net interest income and to protect asset values against interest rate fluctuations. The Group manages the risk through interest rate gap analysis on interest rate maturities between interest-bearing assets and interest-bearing liabilities and measuring interest rate VaR.

Disclosure of results from each observation method

i. Interest rate gap analysis

Interest rate gap analysis is based on the interest rates repricing dates for interest-bearing assets and interest-bearing liabilities. It measures expected changes in net interest income by calculating the difference in the amounts of interest-bearing assets and interest-bearing liabilities in each maturity bucket. The Group conducts interest gap analysis on assets denominated in Korean won and foreign currencies on a monthly basis. However, where there is no contractual maturity for a particular instrument, then a maturity date is set according to internal liquidity risk management guidelines, determined by ALM.

The results of the interest rate gap analysis by subsidiary as of December 31, 2013 and 2014, are as follows:

4.5 Operational Risk

4.5.1 Concept

The Group defines operational risk broadly to include all financial and non-financial risks that may arise from operating activities and could cause a negative effect on capital.

4.5.2 Risk management

The purpose of operational risk management is not only to comply with supervisory and regulatory requirements but also to promote a risk management culture, strengthen internal controls, innovate processes and provide timely feedback to management and employees. In addition, Kookmin Bank established Business Continuity Plans (BCP) to ensure critical business functions can be maintained, or restored, in the event of material disruptions arising from internal or external events. It has constructed replacement facilities as well as has carried out exercise drills for head office and IT departments to test its BCPs.

4.6. Capital Adequacy

The Group complies with the capital adequacy standard established by the Financial Services Commission. The capital adequacy standard is based on Basel III published by Basel Committee on Banking Supervision in Bank of International Settlements in June 2011, and was implemented in Korea in December 2013. The Group is required to maintain a minimum Common Equity Tier 1 ratio of at least 4.0%(3.5%,2013), a minimum Tier 1 ratio of 5.5%(4.5%,2013) and a minimum Total Regulatory Capital of 8.0%(8.0%,2013) as of December 31, 2014.

The Group's equity capital is classified into three categories in accordance with the Supervisory Regulations and Detailed Supervisory Regulations on Financial Holding Companies:

- Common Equity Tier 1 Capital: Common equity Tier 1 Capital represents the issued capital that takes the first and proportionately greatest share of any losses and represents the most subordinated claim in liquidation of the Group, and not repaid outside of liquidation. It includes common shares issued, capital surplus, retained earnings, non-controlling interests of consolidated subsidiaries, accumulated other comprehensive income, other capital surplus and others.
- Additional Tier 1 Capital: Additional Tier 1 Capital includes (i) perpetual instruments issued by the Group that meet the criteria for inclusion in Additional Tier 1 capital, and (ii) stock surplus resulting from the issue of instruments included in Additional Tier 1 capital and others.
- Tier 2 Capital: Tier 2 Capital represents the capital that takes the proportionate share of losses in the liquidation of the Group. Tier 2 Capital includes a fund raised by issuing subordinated debentures maturing in not less than 5 years that meet the criteria for inclusion in Additional Tier 2 capital, and the allowance for loan losses which are accumulated for assets classified as normal or precautionary as a result of classification of asset soundness in accordance with Regulation on Supervision of Financial Holding Companies and others.

Risk weighted asset means the inherent risks in the total assets held by the Group. The Group calculates risk weighted asset by each risk (credit risk, market risk, and operational risk) based on the Supervisory Regulations and Detailed Supervisory Regulations on Financial Holding Companies and uses it for BIS ratio calculation.

The Group assesses and monitors its adequacy of capital by using the internal assessment and management policy of the capital adequacy. The assessment of the capital adequacy is conducted by comparing available capital (actual amount of available capital) and economic capital (amount of capital enough to cover all significant risks under target credit rate set by the Group). The Group monitors the soundness of finance and provides risk adjusted basis for performance review using the assessment of the capital adequacy.

Economic Capital is the amount of capital to prevent the inability of payment due to unexpected loss in the future. The Group measures, allocates and monitors economic capital by risk type and subsidiaries.

The Risk Management Council of the Group determines the Group's risk appetite and allocates economic capital by risk type and subsidiary. Each subsidiary efficiently operates its capital within a range of allocated economic capital. The Risk Management Department of the Group monitors the limit on economic capital and reports the results to management and the Risk Management Council. The Group maintains the adequacy of capital through proactive review and approval of the Risk Management Committee when the economic capital is expected to exceed the limits due to new business or business expansion. The Group and its subsidiaries comply with external capital adequacy requirements as of December 31, 2013 and 2014.

The details of the Group's capital adequacy calculation in line with Basel III requirements as of December 31, 2013 and 2014, are as follows:

	2013	2014
	(In millions of Korean won)	
Equity Capital:	₩ 27,296,535	₩ 28,347,675
Tier 1 Capital	22,693,836	24,248,598
Common Equity Tier 1 Capital	22,693,836	24,062,475
Additional Tier 1 Capital	—	186,123
Tier 2 Capital	4,602,699	4,099,077
Risk-weighted assets:	177,514,060	182,485,957
Equity Capital (%):	15.38	15.53
Tier 1 Capital (%)	12.78	13.29
Common Equity Tier 1 Capital (%)	12.78	13.19

5. Segment Information

5.1 Overall Segment Information and Business Segments

The Group is organized into the following business segments. These business divisions are based on the nature of the products and services provided, the type or class of customer, and the Group's management organization.

Banking business	**Corporate Banking**	The activities within this segment include providing credit, deposit products and other related financial services to large, small-and medium-sized enterprises and SOHOs.
	Retail Banking	The activities within this segment include providing credit, deposit products and other related financial services to individuals and households.
	Other Banking services	The activities within this segment include trading activities in securities and derivatives, funding and other supporting activities.
Credit Card business		The activities within this segment include credit sale, cash service, card loan and other supporting activities.
Investment & Securities business		The activities within this segment include investment banking and brokerage services and other supporting activities.
Life Insurance business		The activities within this segment include life insurance and other supporting activities.

Financial information by business segment for the year ended December 31, 2012, is as follows:

The fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. For each class of financial assets and financial liabilities, the Group discloses the fair value of that class of assets and liabilities in a way that permits it to be compared with its carrying amount at the end of each reporting period. The best evidence of fair value of financial instruments is a quoted price in an active market.

Methods of determining fair value for financial instruments are as follows:

Cash and due from financial institutions	The carrying amounts of cash and demand due from financial institutions and payment due from financial institutions are a reasonable approximation of fair values. These financial instruments do not have a fixed maturity and are receivable on demand. Fair value of ordinary due from financial institutions is measured using a DCF model.
Investment securities	The fair value of financial instruments that are quoted in active markets is determined using the quoted prices. Fair value is determined through the use of independent third-party pricing services where quoted prices are not available. Pricing services use one or more of the following valuation techniques including Discounted Cash Flow (DCF) Model, Imputed Market Value Model, Free Cash Flow to Equity Model, Dividend Discount Model, Risk Adjusted Discount Rate Method, and Net Asset Value Method.
Loans	DCF model is used to determine the fair value of loans. Fair value is determined by discounting the expected cash flows, which are contractual cash flows adjusted by the expected prepayment rate, at appropriate discount rate.
Derivatives	For exchange traded derivatives, quoted price in an active market is used to determine fair value and for OTC derivatives, fair value is determined using valuation techniques. The Group uses internally developed valuation models that are widely used by market participants to determine fair values of plain vanilla OTC derivatives including options, interest rate swaps, and currency swaps, based on observable market parameters. However, some complex financial instruments are valued using appropriate models developed from generally accepted market valuation models including the Finite Difference Method and the Monte Carlo Simulation or independent third-party valuation service.
Deposits	Carrying amount of demand deposits is regarded as representative of fair value because they do not have a fixed maturity and are payable on demand. Fair value of time deposits is determined using a DCF model. Fair value is determined by discounting the expected cash flows, which are contractual cash flows adjusted by the expected prepayment rate, at an appropriate discount rate.
Debts	Carrying amount of overdraft in foreign currency is regarded as representative of fair value because they do not have a fixed maturity and are payable on demand. Fair value of other debts is determined using a DCF model discounting contractual future cash flows at an appropriate discount rate.
Debentures	Fair value is determined by using the valuations of independent third-party pricing services, which are calculated using market inputs.
Other financial assets and liabilities	The carrying amounts are reasonable approximation of fair values. These financial instruments are temporary accounts used for other various transactions and their maturities are relatively short or not defined. However, fair value of finance lease liabilities is measured using a DCF model.

Fair value hierarchy

The Group believes that valuation methods used for measuring the fair values of financial instruments are reasonable and that the fair values recognized in the statements of financial position are appropriate. However, the fair values of the financial instruments recognized in the statements of financial position may be different if other valuation methods or assumptions are used. Additionally, as there is a variety of valuation techniques and assumptions used in measuring fair value, it may be difficult to reasonably compare the fair value with that of other financial institutions.

The Group classifies and discloses fair value of the financial instruments into the following three-level hierarchy:

- Level 1: The fair values are based on quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.
- Level 2: The fair values are based on inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: The fair values are based on unobservable inputs for the asset or liability.

The level in the fair value hierarchy within which the fair value measurement is categorized in its entirety shall be determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement.

Fair value hierarchy of financial assets and liabilities measured at fair value

The fair value hierarchy of financial assets and liabilities measured at fair value in the statements of financial position as of December 31, 2013 and 2014, is as follows:

	2013

Total	₩ 837,688	₩ 1,771,385	₩1,007,285	₩ 3,616,358

(1) The amounts of equity securities carried at cost in "Level 3" which do not have a quoted market price in an active market and cannot be measured reliably at fair value are ₩117,750 million and ₩93,435 million as of December 31, 2013 and 2014, respectively. These equity securities are carried at cost because it is practically difficult to quantify the intrinsic values of the equity securities issued by unlisted public and non-profit entities. In addition, probabilities and range of estimated cash flows of the unlisted equity securities which are issued by project financing companies cannot be reasonably assessed. Therefore, these equity securities are carried at cost. The Group has no plan to sell these instruments in the near future.

Valuation techniques and the inputs used in the fair value measurement classified as Level 2

Valuation techniques and inputs of financial assets and liabilities measured at fair value in the statement of financial position and classified as Level 2 as of December 31, 2013 and 2014, are as follows:

	Fair value 2013	Fair value 2014	Valuation techniques	Inputs

Total	₩ —	₩112,014,999	₩157,547,646	₩269,562,645

(1) The amounts included in Level 2 are the carrying amounts which are reasonable approximation of the fair values.

(2) The ₩6,251,679 million and ₩7,559,631 million of other financial assets included in Level 3 are the carrying amounts which are reasonable approximation of fair values as of December 31, 2013 and 2014.

(3) The ₩13,261,041 million and ₩11,905,579 million of other financial liabilities included in Level 3 are the carrying amounts which are reasonable approximation of fair values as of December 31, 2013 and 2014.

Valuation techniques and the inputs used in the fair value measurement

The valuation techniques and the inputs of financial assets and liabilities which are disclosed by the carrying amounts because it is a reasonable approximation of fair value are not subject to be disclosed.

The valuation techniques and the inputs of financial assets and liabilities whose the fair values are disclosed and classified as Level 2 as of December 31, 2013 and 2014, are as follows:

	Fair value 2013	Fair value 2014	Valuation technique	Inputs
	(In millions of Korean won)			
Financial assets				
Held-to-maturity financial assets	₩ 9,851,745	₩10,411,022	DCF Model	Discount rate
Financial liabilities				
Debentures	₩27,752,493	₩29,256,810	DCF Model	Discount rate

The valuation techniques and the inputs of financial assets and liabilities whose the fair values are disclosed and classified as Level 3 as of December 31, 2013 and 2014, are as follows:

	Fair value 2013	Fair value 2014	Valuation technique	Inputs	Unobservable Inputs
	(In millions of Korean won)

6.2 Level 3 of the fair value hierarchy disclosure

6.2.1 Valuation policy and process of Level 3 Fair value

The Group uses external, independent and qualified independent third-party valuation service in addition to internal valuation models to determine the fair value of the Group's assets at the end of every reporting period.

Where a reclassification between the levels of the fair value hierarchy occurs for a financial asset or liability, the Group's policy is to recognize such transfers as having occurred at the beginning of the reporting period.

6.2.2 Changes in fair value (Level 3) measured using valuation technique based on unobservable in market

Changes in Level 3 of the fair value hierarchy for the years ended December 31, 2013 and 2014, are as follows:

	2013				
	Financial assets at fair value through profit or loss	Financial investments	Financial liabilities at fair value through profit or loss	Net derivatives	
	Designate at fair value through profit or loss	Available-for-sale financial assets	Designate at fair value through profit or loss	Derivatives held for trading	Derivatives held for hedging
	(In millions of Korean won)				
Beginning balance	₩ 177,624	₩ 1,478,339	₩ (469,138)	₩ (1,158)	₩ (6,535)
Total gains or losses

Sensitivity analysis of changes in unobservable inputs

Sensitivity analysis of financial instruments is performed, to measure favorable and unfavorable changes in the fair value of financial instruments which are affected by the unobservable parameters, using a statistical technique. When the fair value is affected by more than two input parameters, the amounts represent the most favorable or most unfavorable. Amongst Level 3 financial instruments subject to sensitivity analysis are equity-related derivatives, currency-related derivatives and interest rate-related derivatives whose fair value changes are recognized in profit or loss as well as debt securities and unlisted equity securities (including private equity funds) whose fair value changes are recognized in profit or loss or other comprehensive income and loss.

Sensitivity analyses by type of instrument as a result of varying input parameters are as follows:

	2013			
	Recognition in profit or loss		Other comprehensive income or loss	
	Favorable changes	Unfavorable changes	Favorable changes	Unfavorable changes

(1) For financial assets designated at fair value through profit or loss, the changes in fair value are calculated by shifting principal unobservable input parameters such as stock price fluctuation range of underlying assets by +/- 10%.

(2) For equity-related derivatives, the changes in fair value are calculated by shifting principal unobservable input parameters such as correlation between the stock price and volatility by +/- 10%. For currency-related derivatives, the changes in fair value are calculated by shifting principal unobservable input parameters such as loss given default by ± 1%. For interest rate-related derivatives, coefficient of correlation between long-term and short-term interest rates or the volatilities of the underlying assets are shifted by +/- 10% to calculate the fair value changes.

(3) For debt securities**,** the changes in fair value are calculated by shifting principal unobservable input parameters such as discount rate by +/- 1%.

(4) For equity securities, the changes in fair value are calculated by shifting principal unobservable input parameters such as correlation between growth rate (0~0.5%) and discount rate, liquidation value (-1~1%) and discount rate, or recovery rate of receivables' acquisition cost (-1~1%). Sensitivity of fair values to unobservable parameters of private equity fund is practically impossible, but in the case of equity fund composed of real estates, the changes in fair value are calculated by shifting correlation between discount rate (-1~1%) and volatilities of real estate price (-1~1%)

6.2.4 Day one gain or loss

If the Group uses a valuation technique that incorporates data not obtained from observable markets for the fair value at initial recognition of financial instruments, there could be a difference between the transaction price and the amount determined using that valuation technique. In these circumstances, the fair value of financial instruments is recognized as the transaction price and the difference is deferred and not recognized in profit or loss, and is amortized by using the straight-line method over the life of the financial instrument. If the fair value of the financial instruments is subsequently determined using observable market inputs, the remaining deferred amount is recognized in profit or loss.

The aggregate difference yet to be recognized in profit or loss at the beginning and end of the period and a reconciliation of changes in the balance of this difference, are as follows:

	2013	2014
	(In millions of Korean won)	
Balance at the beginning of the year	₩ 8,652	₩ 4,190
New transactions	3,449	(853)
Amounts recognized in profit or loss during the year		
Amortization	(3,484)	(891)
Settlement	(4,427)	(1,070)
Balance at the end of the year	₩ 4,190	₩ 1,376

6.3 Carrying amounts of financial instruments by category

Financial assets and liabilities are measured at fair value or amortized cost. Measurement policies for each class of financial assets and liabilities are disclosed in Note 3, 'Significant accounting policies'.

The carrying amounts of financial assets and liabilities by category as of December 31, 2013 and 2014, are as follows:

	2013						
	Financial assets at fair value through profit or loss						
	Held for trading	Designated at fair value through profit or loss	Loans and receivables	Available-for-sale financial assets	Held-to-Maturity financial assets	Derivatives held for hedging	Total

6.4 Transfer of financial assets

Transferred financial assets that are derecognized in their entirety

The Group transferred loans and other financial assets that are derecognized in their entirety to SPEs, while the maximum exposure to loss (carrying amount) from its continuing involvement in the derecognized financial assets as of December 31, 2013 and 2014, are as follows:

	2013			
	Type of continuing involvement	Classification of financial instruments	Carrying amount of continuing involvement in statement of financial position	Fair value of continuing involvement
			(In millions of Korean won)	
KR ABS Co., Ltd.	Mezzanine/ subordinate debt	Available-for-sale financial assets	₩ 11,434	₩ 11,434
KR ABS Second Co., Ltd.(1)	Senior debt	Loans and receivables	26,065	26,227
	Subordinate debt	Available-for-sale financial assets	33,017	33,017
EAK ABS Co., Ltd.(2)	Subordinate debt	Available-for-sale financial assets	35,020	35,020
AP ABS First Co., Ltd.(3)	Senior debt	Loans and receivables	67,326	67,353
	Subordinate debt	Available-for-sale financial assets	16,669	16,669
Discovery ABS First Co., Ltd.(4)	Senior debt	Loans and receivables	23,494	23,547
	Subordinate debt	Available-for-sale financial assets	21,454	21,454
		Total	₩ 234,479	₩ 234,721

(1) Recognized net loss from transferring loans to the SPEs amounts to ₩24,589 million.

(2) Recognized net loss from transferring loans to the SPEs amounts to ₩2,480 million.

(3) Recognized net loss from transferring loans to the SPEs amounts to ₩18,556 million.

(4) Recognized net loss from transferring loans to the SPEs amounts to ₩37,975 million.

(5) In addition to the above, there were gains from the transfer of non-performing loans to the National Happiness Fund (‘the Fund’) amounting to ₩57,826 million. According to the agreement with the Fund, where the recovered amounts exceed the consideration paid by the Fund for the non-performing loans, the excess amount is to be reimbursed to the Group.

	2014			
	Type of continuing involvement	Classification of financial instruments	Carrying amount of continuing involvement in statement of financial position	Fair value of continuing involvement
			(In millions of Korean won)	
KR ABS Co., Ltd.	Subordinate debt	Available-for-sale financial assets	₩ 4,921	₩ 4,921

	Subordinate debt	Available-for-sale financial assets	47,600	47,600
		Total	₩ 239,804	₩ 240,074

(1) Recognized net loss from transferring loans to the SPEs amounts to ₩6,924 million.

(2) Recognized net loss from transferring loans to the SPEs amounts to ₩27,365 million.

(3) In addition to the above, there were gains on sale of loans attributable to true-up adjustments based on the transfer agreement with the National Happiness Fund ('the Fund') amounting to ₩3,762 million.

Transferred financial assets that are not derecognized in their entirety

The Group securitized the loans and received the subordinated debts as part of consideration related to the securitization to provide credit enhancements to other senior debtors, and this transaction was recognized by the Group as collateralized debts. The liabilities and related securitized assets as of December 31, 2013 and 2014, are as follows:

	2013				
			Liabilities arising from asset-backed securities

(1) They have the obligation to early redeem the asset-backed debentures upon occurrence of an event specified in the agreement as trust type asset securitization. To avoid such early redemption, they entrust supplementary card accounts, deposits and others. Accordingly, as asset-backed debenture holders' recourse is not limited to the underlying assets, the fair value is not disclosed.

(2) If the Special Purpose Companies (SPC) could not redeem the senior debentures by collection of underlying assets, the SPC should be redeem by borrowings from the credit facilities. Accordingly, as senior debenture holders' recourse is not limited to the underlying assets, the fair value is not disclosed.

(3) Pursuant to the Purchase Agreement of the liabilities, the fair value is not disclosed as the counterparty has both a right of recourse for the securitized assets and a right to request to purchase the liabilities.

Securities under repurchase agreements and loaned securities

The Group continues to recognize the financial assets related to repurchase agreements and securities lending transactions on the statements of financial position since those transactions are not qualified for derecognition even though the Group transfers the financial assets. A financial asset is sold under an agreement to repurchase the same asset at a fixed price, or loaned under a securities lending agreement to be returned as the same asset. Thus, the Group retains substantially all the risks and rewards of ownership of the financial asset. The amounts of transferred assets and related liabilities as of December 31, 2013 and 2014, are as follows:

	2013	
	Carrying amount of transferred assets	Carrying amount of related liabilities
	(In millions of Korean won)	
Securities under repurchase agreements	₩ 649,309	₩ 608,156
Loaned securities

Loaned securities		
Government bond	162,408	—
Stock	2,378	—
Total	₩ 1,245,590	₩ 1,019,071

6.5 Offsetting financial assets and financial liabilities

The Group enters into International Derivatives Swaps and Dealers Association (“ISDA”) master netting agreements and other arrangements with the Group’s derivative and spot exchange counterparties. Similar netting agreements are also entered into with the Group’s reverse repurchase, securities and others. Pursuant to these agreements, in the event of default by one party, contracts are to be terminated and receivables and payables are to be offset. Further, as the law allows for the right to offset, domestic uncollected receivables balances and domestic accrued liabilities balances are shown in its net settlement balance in the statement of consolidated financial position.

The details of financial assets subject to offsetting, enforceable master netting arrangements or similar agreements as of December 31, 2013 and 2014, are as follows:

	2013					
	Gross amounts of recognized financial assets	Gross amounts of recognized financial liabilities offset in the statement of financial position	Net amounts of financial assets presented in the statement of financial position	Non-offsetting amount		Net amount

Total	₩ 3,601,032	₩ —	₩3,601,032

9. Derivative financial instruments and hedge accounting

The Group's derivative operations focus on addressing the needs of the Group's corporate clients to hedge their risk exposure and to hedge the Group's risk exposure that results from such client contracts. The Group also engages in derivative trading activities to hedge the interest rate and foreign currency risk exposures that arise from the Group's own assets and liabilities. In addition, the Group engages in proprietary trading of derivatives within the Group's regulated open position limits.

The Group provides and trades a range of derivatives products, including:

- Interest rate swaps, relating to interest rate risks in Korean won;
- Cross-currency swaps, forwards and options relating to foreign exchange rate risks,
- Stock price index options linked with the KOSPI index.

In particular, the Group uses cross currency swaps, interest rate swaps and others to hedge the risk of changes in fair values and in cash flows due to changes in interest rates and foreign exchange rates of subordinated debts in Korean won, structured debts and financial debentures in foreign currencies.

The details of derivative financial instruments for trading as of December 31, 2013 and 2014, are as follows:

	2013		
	Notional amount	Assets	Liabilities

(1) As of December 31, 2013 and 2014, the Group is represented in the governing bodies of its associates. Therefore, the Group has significant influence over the decision-making process relating to their financial and business policies.

(2) The Group determined that ordinary shares and convertible preference shares issued by JSC Bank CenterCredit are the same in economic substance except for the voting rights, and therefore, the equity method of accounting is applied on the basis of single ownership ratio of 41.93%, calculated based on ordinary and convertible preference shares held by the Group against the total outstanding ordinary and convertible preference shares issued by JSC Bank CenterCredit.

(3) Fair value of ordinary shares of JSC Bank CenterCredit, reflecting the published market price, as of December 31, 2013 and 2014, are ₩57,476 million and ₩42,945 million.

(4) The fair value of KB No.3 Special Purpose Acquisition Company, reflecting the quoted market price as of December 31, 2014, amounts to ₩40 million.

(5) The fair value of KB No.4 Special Purpose Acquisition Company, reflecting the quoted market price as of December 31, 2014, amounts to ₩40 million.

(6) The fair value of KB No.5 Special Purpose Acquisition Company, reflecting the quoted market price as of December 31, 2014, amounts to ₩20 million.

(7) The fair value of KB No.6 Special Purpose Acquisition Company, reflecting the quoted market price as of December 31, 2014, amounts to ₩84 million.

(8) Where the Group has acquired shares of entities through debt-for-equity swaps, the Group is represented in the creditor council. Therefore, the Group has significant influence over the decision-making process relating to their financial and business policies.

Land	₩229,437	₩ —	₩ (738)	₩228,699
Buildings	157,885	(9,040)	—	148,845
Total	₩387,322	₩ (9,040)	₩ (738)	₩377,544

The valuation technique and input variables that are used to measure the fair value of investment property as of December 31, 2014, are as follows:

	2014		
	Fair value	Valuation technique	Inputs
	(In millions of Korean won)		
Land and buildings	₩379,812	Cost Approach Method	- Price per square meter - Replacement cost

As of December 31, 2013 and 2014, fair values of the investment properties amount to ₩189,534 million and ₩379,812 million, respectively. The investment properties were measured by qualified independent appraisers with experience in valuing similar properties in the same area. In addition, per the fair value hierarchy on Note 6.1, the fair value hierarchy of all investment properties has been categorized and classified as Level 3.

Rental income from the above investment properties for the years ended December 31, 2013 and 2014, amounts to ₩4,889 million and ₩7,107 million, respectively.

The changes in investment property for the years ended December 31, 2013 and 2014, are as follows:

	2013				
	Beginning	Acquisition	Transfers	Depreciation	Ending

Total	₩252,098	₩205,565	₩331,707	₩262,392

The changes in accumulated impairment losses of goodwill for the years ended December 31, 2013 and 2014, are as follows:

2013			
Beginning	Impairment	Others	Ending
(In millions of Korean won)			
₩ 35,157	₩ 11,376	₩ —	₩ 46,533

2014			
Beginning	Impairment	Others	Ending
(In millions of Korean won)			
₩ 46,533	₩ 22,782	₩ —	₩ 69,315

The details of allocating goodwill to cash-generating units and related information for impairment testing as of December 31, 2014, are as follows:

	Housing & Commercial Bank						
	Retail Banking	Corporate Banking	KB Cambodia Bank	KB Investment Securities	KB Capital Co., Ltd.	KB Savings Bank Co., Ltd. and Yehansoul Savings Bank Co., Ltd.	Total
	(In millions of Korean won)						
Carrying amounts	₩ 49,315	₩ 15,973	₩ 1,202	₩58,889	₩ 79,609	₩ 57,404	₩ 262,392
Recoverable amount exceeded carrying amount	1,090,789	1,058,505	735	38,772	210,379	—	2,399,180
Discount rate (%)	17.13	17.49	33.45	16.53	13.67	17.01	
Permanent growth rate (%)	2.00	2.00	2.00	2.00	2.00	2.00	

Goodwill is allocated to cash-generating units, based on management's analysis, that are expected to benefit from the synergies of the combination for impairment testing, and cash-generating units consist of an operating segment or units which are not larger than an operating segment. The Group recognized the amount of ₩65,288 million related to goodwill acquired in the merger of Housing & Commercial Bank. Of those respective amounts, the amounts of ₩49,315 million and ₩15,973 million were allocated to the Retail Banking and Corporate Banking, respectively. Cash-generating units to which goodwill has been allocated is tested for impairment annually, and whenever there is an indication that the unit may be impaired, by comparing the carrying amount of the unit, including the goodwill, with the recoverable amount of the unit.

The recoverable amount of a cash-generating unit is measured at the higher of its fair value less costs to sell and its value in use. The fair value less costs to sell is the amount obtainable from the sale in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal. If it is difficult to measure the amount obtainable from the sale, the Group measures the fair value less costs to sell by reflecting the characteristics of the measured cash-generating unit. If it is not possible to obtain reliable information to measure the fair value less costs to sell, the Group uses the asset's value in use as its recoverable amount. Value in use is the present value of the future cash flows expected to be derived from an asset or cash-generating unit. The projections of the future cash flows are based on the most recent financial budget approved by management and generally cover a period of five years. The future cash flows after projection period are estimated on the assumption that the future cash flows will increase 2.0% for every year. The key assumptions used for the estimation of the future cash flows are the market size and the Group's market share. The discount rate is a pre-tax rate that reflects assumptions regarding risk-free interest rate, market risk premium and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

The details of intangible assets, excluding goodwill, as of December 31, 2013 and 2014, are as follows:

	2013			
	Acquisition cost	Accumulated amortization	Accumulated impairment losses	Carrying amount
	(In millions of Korean won)

Total	₩ 15,562	₩ (93,211)	₩ (77,649)

Unrecognized deferred income tax assets

No deferred income tax assets have been recognized for the deductible temporary difference of ₩563,040 million associated with investments in subsidiaries and others as of December 31, 2014, because it is not probable that the temporary differences will be reversed in the foreseeable future.

No deferred income tax assets have been recognized for deductible temporary differences of ₩199 million, ₩80,204million and ₩172,199million associated with loss on other provisions, SPE repurchase and others, respectively, as of December 31, 2014, due to the uncertainty that these will be realized in the future.

Unrecognized deferred income tax liabilities

No deferred income tax liabilities have been recognized for the taxable temporary difference of ₩27,367 million associated with investment in subsidiaries and associates as of December 31, 2014, due to the following reasons:

- The Group is able to control the timing of the reversal of the temporary difference.
- It is probable that the temporary difference will not be reversed in the foreseeable future.

No deferred income tax liabilities have been recognized as of December 31, 2014, for the taxable temporary difference of ₩65,288 million arising from the initial recognition of goodwill from the merger of Housing and Commercial Bank.

The changes in cumulative temporary differences for the years ended December 31, 2013 and 2014, are as follows:

	2013

17. Assets held for sale

The details of assets held for sale as of December 31, 2013 and 2014, are as follows:

	2013			
	Acquisition cost[1]	Accumulated impairment	Carrying amount	Fair value less costs to sell
	(In millions of Korean won)			
Land	₩ 21,380	₩ (5,109)	₩16,271	₩ 16,271
Buildings	39,777	(18,330)	21,447	21,447
Total	₩ 61,157	₩ (23,439)	₩37,718	₩ 37,718

	2014			
	Acquisition cost[1]	Accumulated impairment	Carrying amount	Fair value less costs to sell
	(In millions of Korean won)			
Land	₩ 47,418	₩ (9,442)	₩37,976	₩ 40,530
Buildings	57,005	(24,624)	32,381	33,752
Total	₩104,423	₩ (34,066)	₩70,357	₩ 74,282

(1) Acquisition cost of buildings held for sale is net of accumulated depreciation.

The valuation technique and input variables that are used to measure the fair value of assets held for sale as of December 31, 2014, are as follows:

	2014				
	Fair value	Valuation technique[1]	Unobservable input[2]	Range of unobservable inputs (%)	Relationship of unobservable inputs to fair value
	(In millions of Korean won)				
	₩57,982	Market comparison approach model	Adjustment index	0.17~2.00	Fair value increases as the adjustment index rises.
			Adjustment ratio	-20.00~0.00	Fair value decreases as the absolute value of adjustment index rises.
Land and buildings	16,323	Market comparison approach model	Unit price per area of exclusive possession, Time point adjustment, Individual factor and others	Unit price per area of exclusive possession: About ₩4.9 million Time point adjustment: 0.9987 Individual factor: 0.85	Fair value increases as the unit price per area of exclusive possess and others rise.
Total	₩74,305				

(1) The Group adjusted the appraisal value by the adjustment ratio in the event the public sale is unsuccessful.

(2) Adjustment index is calculated using the real estate index or the producer price index, or land price volatility.

The fair values of assets held for sale were measured by qualified independent appraisers with experience in valuing similar properties in the same area. In addition, per the fair value hierarchy on Note 6.1, the fair value hierarchy of all investment properties has been categorized and classified as Level 3.

The changes in accumulated impairment losses of assets held for sale for the years ended December 31, 2013 and 2014, are as follows:

2013				
Beginning	Provision	Reversal	Others	Ending
(In millions of Korean won)				
₩ (5,759)	₩ (22,365)	₩ —	₩ 4,685	₩ (23,439)

2014				
Beginning	Provision	Reversal	Others	Ending
(In millions of Korean won)				
₩ (23,439)	₩ (16,592)	₩ —	₩ 5,965	₩ (34,066)

As of December 31, 2014, buildings and land classified as assets held for sale consist of 15 pieces of real estate of closed branches and KB Wellyan Private Equity Real Estate Fund No. 6 and 7, which were acquired from the litigation of KB Asset Management Co., Ltd. The management of the Group decided to sell the assets, and accordingly, the assets were classified as assets held for sale. As of December 31, 2014, three assets out of above assets held for sale are under negotiation for sale and the remaining assets are also being actively marketed.

18. Other Assets

The changes in provisions for unused loan commitments, acceptances and guarantees for the years ended December 31, 2013 and 2014, are as follows:

	2013		
	Provisions for unused loan commitments	Provisions for acceptances and guarantees	Total
	(In millions of Korean won)		
Beginning	₩ 236,026	₩ 208,753	₩444,779
Effects of changes in foreign exchange rate	(164)	(961)	(1,125)
Provision(reversal)	(9,752)	1,326	(8,426)
Ending	₩ 226,110	₩ 209,118	₩435,228

	2014		
	Provisions for unused loan commitments	Provisions for acceptances and guarantees	Total
	(In millions of Korean won)		
Beginning	₩ 226,110	₩ 209,118	₩435,228
Effects of changes in foreign exchange rate	548	3,358	3,906
Provision(reversal)	(16,694)	(4,549)	(21,243)
Ending	₩ 209,964	₩ 207,927	₩417,891

The changes in provisions for financial guarantee contracts for the years ended December 31, 2013 and 2014, are as follows:

	2013	2014
	(In millions of Korean won)	
Beginning	₩ 7,383	₩ 2,699
Provision(reversal)	(4,684)	19
Ending	₩ 2,699	₩ 2,718

The changes in provisions for asset retirement obligation for the years ended December 31, 2013 and 2014, are as follows:

	2013	2014
	(In millions of Korean won)	
Beginning	₩ 65,226	₩ 76,608
Provision	3,334	5,231
Reversal	(226)	(6,047)
Used	(2,475)	(5,701)
Unwinding of discount	2,203	2,936
Effects of changes in discount rate	7,908	70
Business combination	638	345
Ending	₩ 76,608	₩ 73,442

Provisions for asset retirement obligations are the present value of estimated costs to be incurred for the restoration of the leased properties. Actual expenses are expected to be incurred at the end of each lease contract. Three-year historical data of expired leases were used to estimate the average lease period. Also, the average restoration expense based on actual three-year historical data and the three-year historical average inflation rate were used to estimate the present value of estimated costs.

The details of other provisions as of December 31, 2013 and 2014, are as follows:

	2013	2014
	(In millions of Korean won)	
Membership rewards program	₩ 5,402	₩ 11,274
Dormant accounts	16,839	33,996
Litigations	23,455	24,506
Others	117,842	50,520
Total	₩163,538	₩120,296

The changes in other provisions for the years ended December 31, 2013 and 2014, are as follows:

	2013				
	Membership rewards program	Dormant accounts	Litigations	Others	Total
	(In millions of Korean won)				
Beginning	₩ 11,108	₩ 16,028	₩21,215	₩103,990	₩ 152,341

Ending	₩ 11,274	₩ 33,996	₩24,506	₩ 50,520	₩ 120,296

24. Net Defined benefit liabilities

Defined benefit plan

The Group operates defined benefit plans which have the following characteristics:

- The Group has the obligation to pay the agreed benefits to all its current and former employees.
- Actuarial risk (that benefits will cost more than expected) and investment risk fall, in substance, on the Group.

The defined benefit liability recognized in the statements of financial position is calculated annually by independent actuaries in accordance with actuarial valuation methods.

The defined benefit obligation is calculated using the Projected Unit Credit method (the 'PUC'). Data used in the PUC such as interest rates, future salary increase rate, mortality rate and consumer price index are based on observable market data and historical data which are updated annually.

Actuarial assumptions may differ from actual results, due to changes in the market, economic trends and mortality trends which may impact defined benefit liabilities and future payments. Actuarial gains and losses arising from changes in actuarial assumptions are recognized in the period incurred through other comprehensive income (loss).

The changes in the net defined benefit liabilities for the years ended December 31, 2013 and 2014, are as follows:

	2013		
	Present value of defined benefit obligation	Fair value of plan assets	Net defined benefit liabilities
	(In millions of Korean won)		
Beginning	₩ 942,333	₩ (858,610)	₩ 83,723
Current service cost	172,857	—	172,857
Interest cost(income)	33,282	(30,321)	2,961
Past service cost	1,005	—	1,005
Gain or loss on settlement	(4,244)	—	(4,244)

Payments from plans (settlement)	(65,493)	65,212	(281)
Payments from plans (benefit payments)	(34,814)	34,772	(42)
Payments from the Group	(4,590)	—	(4,590)
Transfer in	2,551	(2,315)	236
Transfers out	(2,551)	2,314	(237)
Effect of exchange rate changes	(94)	—	(94)
Business combination	117	—	117
Ending	₩ 985,195	₩ (920,722)	₩ 64,473

	2014		
	Present value of defined benefit obligation	Fair value of plan assets	Net defined benefit liabilities
	(In millions of Korean won)		
Beginning	₩ 985,195	₩ (920,722)	₩ 64,473
Current service cost	163,997	—	163,997
Interest cost(income)	39,208	(36,545)	2,663
Past service cost	11	—	11
Remeasurements			
Actuarial gains and losses by changes in demographic assumptions	(36)	—	(36)
Actuarial gains and losses by changes in financial assumptions	112,550	—	112,550
Actuarial gains and losses by experience adjustments	6,303	—	6,303
Return on plan assets (excluding amounts included in interest income)	—	12,576	12,576
Contributions	—	(288,212)	(288,212)
Payments from plans (settlement)	(43,108)	43,054	(54)
Payments from the Group	(3,567)	—	(3,567)
Transfer in	3,788	(3,788)	—
Transfers out	(3,788)	3,661	(127)
Effect of exchange rate changes	(27)	—	(27)
Business combination	10,552	(5,418)	5,134
Ending	₩ 1,271,078	₩ (1,195,394)	₩ 75,684

The details of the net defined benefit liabilities as of December 31, 2013 and 2014, are as follows:

	2013	2014
	(In millions of Korean won)	
Present value of defined benefit obligation	₩ 985,195	₩ 1,271,078
Fair value of plan assets	(920,722)	(1,195,394)
Net Defined benefit liabilities	₩ 64,473	₩ 75,684

The details of post-employment benefits recognized in profit or loss as employee compensation and benefits for the years ended December 31, 2012, 2013 and 2014, are as follows:

	2012	2013	2014
	(In millions of Korean won)		
Current service cost	₩154,552	₩172,857	₩163,997
Past service cost	12,855	1,005	11
Gain or loss on settlement	(389)	(4,244)	—
Net interest expenses of net defined benefit liabilities	5,373	2,961	2,663
Post-employment benefits[1]	₩172,391	₩172,579	₩166,671

(1) Post-employment benefits amounting to ₩883 million, ₩1,471 million and ₩971 million for the years ended December 31, 2012, 2013 and 2014, respectively, are recognized as other operating expense in the statements of comprehensive income.

Remeasurements of the net defined benefit liabilities recognized as other comprehensive income for the years ended December 31, 2012, 2013 and 2014, are as follows:

	2012	2013	2014
	(In millions of Korean won)		
Remeasurements			
Return on plan assets (excluding amounts included in interest income)	₩ 1,243	₩ (1,096)	₩ (12,576)
Actuarial gains and losses	(41,184)	55,165	(118,817)
Income tax effects	9,669	(13,085)	31,799
Remeasurements after income tax	₩(30,272)	₩ 40,984	₩ (99,594)

The details of fair value of plan assets as of December 31, 2013 and 2014, are as follows:

	2013		
	Assets quoted in an active market	Assets not quoted in an active market	Total
	(In millions of Korean won)		
Cash and due from financial institutions	₩ —	₩ 915,584	₩ 915,584
Repurchase agreements	—	5,138	5,138
Total	₩ —	₩ 920,722	₩ 920,722

	2014		
	Assets quoted in an active market	Assets not quoted in an active market	Total
	(In millions of Korean won)		
Cash and due from financial institutions	₩ —	₩1,195,394	₩1,195,394
Total	₩ —	₩1,195,394	₩1,195,394

Key actuarial assumptions used as of December 31, 2013 and 2014, are as follows:

	2013	2014
Discount rate (%)	2.90 ~ 4.00	2.20 ~ 3.10
Salary increase rate (%)	0.00 ~ 8.90	0.00 ~ 8.50
Turnover (%)	0.00 ~ 32.00	0.00 ~ 32.00

Mortality assumptions are based on the 7th experience-based mortality table (retirement pension) of Korea Insurance Development Institute of 2012.

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions as of December 31, 2014, is as follows:

		Effect on net defined benefit obligation	
	Changes in principal assumption	Increase in principal assumption	Decrease in principal assumption
Discount rate (%)	0.5 p.	4.49 decrease	4.77 increase
Salary increase rate (%)	0.5 p.	4.39 increase	4.27 decrease
Turnover (%)	0.5 p.	0.53 decrease	0.42 increase

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. The sensitivity of the defined benefit obligation to changes in principal actuarial assumptions is calculated using the projected unit credit method, the same method applied when calculating the defined benefit obligations recognized on the statement of financial position.

Expected maturity analysis of undiscounted pension benefits as of December 31, 2014, is as follows:

	Up to 1 year	1~2 years	2~5 years	5~10 years	Over 10 years	Total
			(In millions of Korean won)			
Pension benefits	₩26,981	₩87,525	₩326,571	₩902,146	₩1,188,644	₩2,531,867

The weighted average duration of the defined benefit obligation is 1.0 ~ 14.4 years.

Expected contribution to plan assets for periods after December 31, 2014, is estimated to be 195,236 million.

25. Other liabilities

The details of other liabilities as of December 31, 2013 and 2014, are as follows:

	2013	2014
	(In millions of Korean won)	
Other financial liabilities		
Other payables	₩ 4,582,344	₩ 4,712,587
Prepaid card and debit card	18,527	19,578
Accrued expenses	4,053,809	3,123,144
Financial guarantee liabilities	11,797	13,237
Deposits for letter of guarantees and others	108,786	351,041
Domestic exchange settlement credits	998,928	128,739
Foreign exchanges settlement credits	83,237	69,440
Borrowings from other business account	7,911	40,383
Other payables from trust accounts	2,423,675	2,548,577
Liability Incurred by agency relationship	532,157	505,664
Account for agency businesses	384,921	340,062
Dividend payables	485	477
Other payables from factored receivables	42,924	37,734
Others	13,413	28,157
Sub-total	13,262,914	11,918,820
Other non-financial liabilities		
Other payables	44,982	72,370
Unearned revenue	123,033	154,066
Accrued expenses	191,513	208,226
Deferred revenue on credit card points	117,659	115,658
Withholding taxes	111,975	106,291
Insurance liabilities	5,599,043	6,265,198
Separate account liabilities	702,757	698,832
Others	82,353	57,741
Sub-total	6,973,315	7,678,382
Total	₩20,236,229	₩19,597,202

26. Equity

26.1 Capital Stock

The details of outstanding shares of the Parent Company as of December 31, 2013 and 2014, are as follows:

	Ordinary shares	
	2013	2014
Number of shares authorized	1,000,000,000	1,000,000,000
Number of shares	386,351,693	386,351,693
Par value per share	₩ 5,000	₩ 5,000
Share capital stock[1]	₩ 1,931,758	₩ 1,931,758

(1) In millions of Korean won.

26.2 Capital surplus

The details of capital surplus as of December 31, 2013 and 2014, are as follows:

	2013	2014
	(In millions of Korean won)	
Share premium	₩12,226,596	₩12,226,596
Loss on sale of treasury shares	(568,544)	(568,544)
Other capital surplus	4,196,553	4,196,458
Total	₩15,854,605	₩15,854,510

26.3 Accumulated other comprehensive income

The details of accumulated other comprehensive income as of December 31, 2013 and 2014, are as follows:

	2013	2014
	(In millions of Korean won)	
Remeasurements of net defined benefit liabilities	₩ (12,523)	₩(110,814)
Exchange differences on translating foreign operations	(29,433)	(12,153)
Change in value of available-for-sale financial assets	430,976	680,900
Change in value of held-to-maturity financial assets	4,904	3,823
Shares of other comprehensive income of associates	(57,097)	(89,303)
Cash flow hedges	(515)	(10,774)
Total	₩336,312	₩ 461,679

26.4 Retained earnings

The details of retained earnings as of December 31, 2013 and 2014, consist of:

	2013	2014
	(In millions of Korean won)	
Legal reserves[(1)]	₩ 188,638	₩ 208,221
Voluntary reserves	982,000	982,000
Unappropriated retained earnings[(2)]	6,688,961	7,876,924
Total	₩7,859,599	₩9,067,145

(1) With respect to the allocation of net profit earned in a fiscal term, the Parent Company must set aside in its legal reserve an amount equal to at least 10% of its net income after tax as reported in the separate statement of comprehensive income each time it pays dividends on its net profits earned until its legal reserve reaches at least the aggregate amount of its share capital in accordance with Article 53 of the Financial Holding Company Act. The reserve is not available for the payment of cash dividends, but may be transferred to share capital, or used to reduce accumulated deficit.

(2) Retained earnings restricted for dividend at subsidiaries level pursuant to law and regulations amounts to ₩2,456,352 million as of December 31, 2014.

27. Net Interest Income

The details of interest income and interest expense for the years ended December 31, 2012, 2013 and 2014, are as follows:

	2012	2013	2014
	(In millions of Korean won)		
Interest income			
Due from financial institutions	₩ 160,400	₩ 146,105	₩ 190,302
Loans	12,310,713	10,778,258	10,168,304
Financial investments			
Available-for-sale financial assets	799,020	694,218	571,755
Held-to-maturity financial assets	626,763	574,586	548,361
Other	313,210	163,763	156,574
Sub-total	14,210,106	12,356,930	11,635,296
Interest expenses			
Deposits	5,450,781	4,279,153	3,845,468
Debts	394,812	289,652	265,773
Debentures	1,261,542	1,190,446	1,032,111
Other	65,188	74,847	76,169
Sub-total	7,172,323	5,834,098	5,219,521
Net interest income	₩ 7,037,783	₩ 6,522,832	₩ 6,415,775

Interest income recognized on impaired loans and financial investments amounts to ₩108,968 million (2013: ₩127,120 million, 2012: ₩124,183 million) and ₩242 million (2013: ₩569 million, 2012: ₩200 million), respectively, for the year ended December 31, 2012, 2013 and 2014.

28. Net Fee and Commission income

The details of fee and commission income, and fee and commission expense for the years ended December 31, 2012, 2013 and 2014, are as follows:

	2012	2013	2014
	(In millions of Korean won)		
Fee and commission income			
Banking activity fees	₩ 169,244	₩ 167,507	₩ 167,452
Lending activity fees	89,964	90,413	74,133
Credit card related fees and commissions	1,179,618	1,126,944	1,106,601
Debit card related fees and commissions	217,870	255,742	291,723
Agent activity fees	285,183	207,036	158,022
Trust and other fiduciary fees	148,672	160,521	230,839
Fund management related fees	81,477	93,494	89,264
Guarantee fees	33,594	34,173	29,811
Foreign currency related fees	108,611	102,047	96,018
Commissions from transfer agent services	174,829	177,793	148,583
Other business account commission on consignment	30,354	29,799	25,311
Securities brokerage fees	67,858	68,158	68,249
Lease fee	—	—	16,050
Other	166,602	143,738	164,129
Sub-total	2,753,876	2,657,365	2,666,185
Fee and commission expense			
Trading activity related fees[1]	14,963	9,358	7,938
Lending activity fees	20,466	18,791	9,958
Credit card and debit card related fees and commissions	997,368	934,114	979,913
Outsourcing related fees	62,546	74,516	76,604
Foreign currency related fees	11,638	12,561	12,812
Management fees of written-off loans	3,284	4,065	9,853
Other	76,905	124,721	186,378
Sub-total	1,187,170	1,178,126	1,283,456
Net fee and commission income	₩1,566,706	₩1,479,239	₩1,382,729

(1) The fees from financial assets/liabilities at fair value through profit or loss.

29. Net gains or losses on financial assets/liabilities at fair value through profit or loss

29.1 Net gains or losses on financial instruments held for trading

Net gain or loss from financial instruments held for trading includes interest income, dividend income and gains or losses arising from changes in the fair values, sales and redemptions. The details for the years ended December 31, 2012, 2013 and 2014, are as follows:

	2012	2013	2014
	(In millions of Korean won)		
Gains related to financial instruments held for trading			
Financial assets held for trading			
Debt securities	₩ 462,456	₩ 340,601	₩ 471,048

Sub-total	1,075,058	1,163,170	1,155,142
Total	₩3,845,610	₩3,983,564	₩4,009,694

31.2 Share-based payments

31.2.1 Share options

The details of the share options as of December 31, 2014, are as follows:

	Grant date	Exercise period	Granted shares[1]	Vesting conditions
		(Years)	(In number of shares)	
Series 22	2007.02.08	8	855,000	Service period: 1, 3 years
Series 23	2007.03.23	8	30,000	Service period: 3 years
Total			885,000	

(1) Granted shares represent the total number of shares initially granted to directors and employees whose options have not been exercised at the end of the reporting period.

The changes in the number of granted share options and the weighted average exercise price for the years ended December 31, 2013 and 2014, are as follows:

	2013					
	Number of granted shares			Number of exercisable shares	Exercise price per share	Remaining contractual life(Years)
	Beginning	Expired	Ending			
	(In Korean won, except shares)					
Series 15-1	125,362	125,362	—	—	—	—
Series 15-2	440,928	440,928	—	—	—	—
Series 17	29,441	29,441	—	—	—	—
Series 18	7,212	7,212	—	—	—	—
Series 19	751,651	—	751,651	751,651	77,063	0.23
Series 20	25,613	—	25,613	25,613	81,900	0.32
Series 21	18,987	—	18,987	18,987	76,600	0.82
Series 22	657,498	—	657,498	657,498	77,100	1.11
Series 23	15,246	—	15,246	15,246	84,500	1.22
Total	2,071,938	602,943	1,468,995	1,468,995		
Weighted average exercise price	₩ 68,909	₩ 48,625	₩ 77,235	₩ 77,235		

	2014					
	Number of granted shares			Number of exercisable shares	Exercise price per share	Remaining contractual life(Years)
	Beginning	Expired	Ending			
	(In Korean won, except shares)					
Series 19	751,651	751,651	—	—	—	—
Series 20	25,613	25,613	—	—	—	—
Series 21	18,987	18,987	—	—	—	—
Series 22	657,498	—	657,498	657,498	77,100	0.11
Series 23	15,246	—	15,246	15,246	84,500	0.22
Total	1,468,995	796,251	672,744	672,744		
Weighted average exercise price	₩ 77,235	₩ 77,207	₩ 77,268	₩77,268		

The fair value of each option granted is estimated using a Black-Scholes option pricing model based on the assumptions in the table below:

	Share price	Weighted average exercise price	Expected volatility (%)	Option's expected life (Years)	Expected dividends	Risk free interest rate (%)	Fair value
	(In Korean won)						
Series 22 (Directors)	₩38,200	₩77,100	11.15	0.05	₩ 32	2.07	—
Series 22 (Employees)	38,200	77,100	11.15	0.05	32	2.07	—
Series 23 (Non-executive directors)	38,200	84,500	8.01	0.11	67	2.07	—

The option's expected life is separately estimated for employees and directors using actual historical behavior and projected future behavior to reflect the effects of expected early exercise. Expected volatility is based on the historical volatility of the share price over the most recent period that is generally commensurate with the expected term of the option. To reflect the changes in exercise price which is indexed to the sum of the major competitors' total market capitalization, cross volatility is used in calculating the expected volatility.

31.2.2 Share Grants

The Group changed the scheme of share-based payment from share options to share grants in November 2007. The share grant award program is an incentive plan that sets, on grant date, the maximum amount of shares that can be awarded. Actual shares granted at the end of the vesting period is determined in accordance with achievement of pre-specified targets over the vesting period.

The details of the share grants as of December 31, 2014, are as follows:

	Grant date	Number of granted shares[1]	Vesting conditions
		(In number of shares)	
(KB Financial Group Inc.)			
Series 4	2010.07.13	180,707	Services fulfillment, Achievements of targets on the basis of market and non-market performance [2],[3]

Deferred grant in 2013	—	92,316	Satisfied
Sub-total		836,579	

Grant date	Number of granted shares[1]	Vesting conditions
	(In number of shares)	
(Other subsidiaries)		
Share granted in 2010	3,485	Services fulfillment, Achievements of targets on the basis of market and non-market performance [9]
Share granted in 2011	7,648	Services fulfillment, Achievements of targets on the basis of market and non-market performance [9]
Share granted in 2012	63,976	Services fulfillment, Achievements of targets on the basis of market and non-market performance [9]
Share granted in 2013	104,394	Services fulfillment, Achievements of targets on the basis of market and non-market performance [9]
Share granted in 2014	82,759	Services fulfillment, Achievements of targets on the basis of market and non-market performance [9]
Sub-total	262,262	
Total	1,501,952	

(1) Granted shares represent the total number of shares initially granted to directors and employees at the end of reporting period.

(2) Certain portion of the granted shares is compensated over a maximum period of three years.

(3) The 37.5%, 37.5% and 25% of the number of certain granted shares to be compensated are determined based on the accomplishment of targeted relative TSR, targeted EPS and qualitative indicators, respectively. The 30%, 30% and 40% of the number of other granted shares to be compensated are determined based on the accomplishment of the targeted Value-up Index, targeted financial results of the Company and its subsidiaries (Group) and targeted relative TSR, respectively. The 40%, 40% and 20% of the number of the remaining granted shares to be compensated are determined based on the accomplishment of the targeted relative TSR, the targeted EPS and qualitative indicators, respectively.

(4) The 30%, 30% and 40% of the number of granted shares to be compensated are determined upon the accomplishment of the targeted Value-up Index, targeted financial results of the Company and its subsidiaries (Group) and the targeted relative TSR, respectively. However, 50% and 50% of certain granted shares will be compensated based on the accomplishment of the targeted Value-up Index and the accomplishment of targeted relative TSR.

(5) The 40%, 30% and 30% of the number of granted shares to be compensated are determined based on the accomplishment of the targeted relative TSR, the targeted Value-up Index and the targeted financial results of the Bank, respectively.

(6) The 30%, 30% and 40% of the number of granted shares to be compensated are determined upon the accomplishment of the targeted financial results of the Bank, the targeted relative TSR and the targeted Value-up Index, respectively. However, as for certain number of shares, half of the number of granted shares to be compensated is determined based on the accomplishment of the targeted relative TSR, while the other half is determined by the targeted Value-up Index.

(7) The 30%, 45% and 25% of the number of granted shares to be compensated are determined based on the accomplishment of the targeted relative TSR, the ROA and the growth rate of total assets, respectively.

(8) The number of granted shares to be compensated is not linked to performance, but fixed.

(9) The 30%, 30% and 40% of the number of granted shares to be compensated are determined based on the accomplishment of the targeted Value-up Index, the respective subsidiaries' performance and the targeted relative TSR, respectively. The 60% and 40% of the number of certain granted shares to be compensated is determined based on the accomplishment of the respective subsidiaries' performance and the accomplishment of the targeted relative TSR, respectively. The 40%, 30% and 30% of the number of certain granted shares to be compensated is determined based on the accomplishment of the targeted Value-up Index, the respective subsidiaries' performance and the targeted relative TSR, respectively.

The share grant award program is an incentive plan that sets, on grant date, the maximum amount of shares that can be awarded. Actual shares granted at the end of the vesting period is determined in accordance with achievement of pre-specified targets over the vesting period.

The details of share grants linked to short-term performance as of December 31, 2014, are as follows:

	Grant date	Number of vested shares[1]	Vesting Conditions
(KB Financial Group Inc.)			
Share granted in 2010	2010.01.01	322	Satisfied
Share granted in 2011	2011.01.01	7,295	Satisfied
Share granted in 2012	2012.01.01	15,782	Satisfied
Share granted in 2013	2013.01.01	16,560	Satisfied

Share granted in 2011	2011.01.01	46,845	Satisfied
Share granted in 2012	2012.01.01	103,177	Satisfied
Share granted in 2013	2013.01.01	102,343	Satisfied
Share granted in 2014	2014.01.01	173,132	Proportion to service period
(Other subsidiaries)			
Share granted in 2013	2013.01.01	9,823	Satisfied
Share granted in 2014	2014.01.01	28,149	Proportion to service period

(1) The number of shares, which are exercisable, is determined by the results of performance. The share grants are settled over three years.

Share grants are measured at fair value using the Monte Carlo Simulation Model and assumptions used in determining the fair value as of December 31, 2014, are as follows:

	Expected exercise period (Years)	Risk free rate (%)	Fair value (Market performance condition)	Fair value (Non-market performance condition)
Linked to long term performance				
(KB Financial Group Inc.)

Expected volatility is based on the historical volatility of the share price over the most recent period that is generally commensurate with the expected term of the grant. And the current stock price of December 31, 2014, was used for the underlying asset price. Additionally, the average three-year historical dividend rate was used as the expected dividend rate.

As of December 31, 2013 and 2014, the accrued expenses related to share-based payments including share options and share grants amounted to ₩48,423 million and ₩48,734 million, respectively, and the compensation costs from share options and share grants amounting to ₩17,289 million and ₩11,422 million were incurred during the years ended December 31, 2013 and 2014, respectively. There is no intrinsic value of the vested share options as of December 31, 2013 and 2014.

32. Other non-operating income and expenses

The details of other non-operating income and expenses for the years ended December 31, 2012, 2013 and 2014, are as follows:

	2012	2013	2014
	(In millions of Korean won)		
Other non-operating income			
Gains of disposal in property and equipment	₩ 5,840	₩ 819	₩ 491
Rent received	4,349	8,615	10,035
Others	50,666	101,848	62,041
Sub-total	60,855	111,282	72,567
Other non-operating expenses			
Losses of disposal in property and equipment	426	928	1,297
Donation	80,446	59,760	52,330
Restoration cost	945	909	2,242
Others	97,310	61,994	87,824
Sub-total	179,127	123,591	143,693
Net other non-operating income(expense)	₩(118,272)	₩ (12,309)	₩ (71,126)

33. Income tax expenses

Income tax expense for the years ended December 31, 2012, 2013 and 2014, consist of:

	2012	2013	2014
	(In millions of Korean won)		
Tax payable			
Current tax expense	₩695,135	₩569,449	₩512,536
Adjustments recognized in the period for current tax of prior years	(20,517)	75,938	(11,721)
Changes in deferred income tax assets (liabilities)	(87,494)	(89,477)	31,255
Income tax recognized directly in equity			
Remeasurements of net defined benefit liabilities	9,663	(13,085)	31,386
Change in value of available-for-sale financial assets	(77,956)	7,942	(79,473)
Change in value of held-to-maturity financial assets	(240)	(1,787)	198
Share of other comprehensive income of associates	390	9	(6)
Cash flow hedges	1,025	(618)	2,619
Others	(29)	—	—
Others	—	(7,778)	(480)
Tax expense	₩519,977	₩540,593	₩486,314

An analysis of the net profit before income tax and income tax expense for the years ended December 31, 2012, 2013 and 2014, follows:

	2012	2013	2014
	(In millions of Korean won)		
Net profit before income tax	₩2,298,644	₩1,815,291	₩1,901,425
Tax at the applicable tax rate[1]	555,810	438,838	459,683
Non-taxable income	(6,291)	(17,716)	(11,171)
Non-deductible expense	13,263	33,489	14,916
Tax credit and tax exemption	(187)	(1,417)	(1,192)
Temporary difference for which no deferred tax is recognized	1,633	47,138	24,682
Deferred tax relating to changes in recognition and measurement	(7,289)	2,828	(1,593)
Income tax refund for tax of prior years	(58,404)	30,329	(6,654)
Income tax expense of overseas branch	16,929	4,796	6,202
Effects from change in tax rate	941	(871)	1,642
Others	3,572	3,179	(201)
Tax expense	₩ 519,977	₩ 540,593	₩ 486,314
Average effective tax rate (Income tax expense / Profit before tax) (%)	22.62	29.78	25.58

(1) Applicable income tax rate for ₩200 million and below is 11%, for ₩200 million to ₩20 billion is 22% and for over ₩20 billion is 24.2% as of December 31, 2012, 2013 and 2014.

The details of current tax assets (income tax refund receivables) and current tax liabilities (income tax payables), as of December 31, 2013 and 2014, are as follows:

	2013		
	Tax payables (receivables) before offsetting	Offsetting	Tax payables (receivables) after offsetting
	(In millions of Korean won)		
Income tax refund receivables[1], [2]	₩ (99,524)	₩ 82,057	₩ (17,467)
Income tax payables	293,320	(82,057)	211,263

	2014		
	Tax payables (receivables) before offsetting	Offsetting	Tax payables (receivables) after offsetting
	(In millions of Korean won)		
Income tax refund receivables[1]	₩(693,018)	₩ 693,018	₩ —
Income tax payables	924,925	(693,018)	231,907

(1) Excludes current tax assets of ₩306,313 million (2013: ₩329,443 million) by uncertain tax position, which do not qualify for offsetting.

(2) Prepaid income tax expenses amounting to ₩17,467 million for KB Life Insurance Co., Ltd, which separately paid tax in 2013, were reclassified from other assets into current income tax assets.

34. Dividends

The dividends paid to the shareholders of the Parent Company in 2013 and 2014 were ₩231,811 million (₩600 per share) and ₩193,176 million (₩500 per share), respectively. The dividends to the shareholders of the Parent Company in respect of the year ended December 31, 2014, of ₩780 per share, amounting to total dividends of ₩301,354 million, is to be proposed at the annual general shareholders' meeting on March 27, 2015. The Group's consolidated financial statements as of December 31, 2014, do not reflect this dividend payable.

35. Accumulated other comprehensive income

The details of accumulated other comprehensive income for the years ended December 31, 2013 and 2014, are as follows:

	2013				
	Beginning	Changes except for reclassification	Reclassification to profit or loss	Tax effect	Ending
	(In millions of Korean won)				
Remeasurements of net defined benefit liabilities	₩ (53,507)	₩ 54,069	₩ —	₩(13,085)	₩ (12,523)
Exchange differences on translating foreign operations	(27,061)	(2,372)	—	—	(29,433)
Change in value of available-for-sale financial assets	426,354	198,798	(202,118)	7,942	430,976
Change in value of held-to-maturity financial assets	(1,225)	1,005	6,911	(1,787)	4,904
Shares of other comprehensive income of associates	(47,286)	(9,765)	(55)	9	(57,097)
Cash flow hedges	(2,133)	(2,991)	5,227	(618)	(515)
Total	₩295,142	₩ 238,744	₩ (190,035)	₩ (7,539)	₩336,312

	2014				
	Beginning	Changes except for reclassification	Reclassification to profit or loss	Tax effect	Ending
	(In millions of Korean won)				
Remeasurements of net defined benefit liabilities	₩ (12,523)	₩ (129,677)	₩ —	₩ 31,386	₩(110,814)
Exchange differences on translating foreign operations	(29,433)	17,280	—	—	(12,153)
Change in value of available-for-sale financial assets	430,976	403,828	(74,431)	(79,473)	680,900
Change in value of held-to-maturity financial assets	4,904	(1,276)	(3)	198	3,823
Shares of other comprehensive income of associates	(57,097)	(32,448)	248	(6)	(89,303)
Cash flow hedges	(515)	(7,452)	(5,426)	2,619	(10,774)
Total	₩336,312	₩ 250,255	₩ (79,612)	₩(45,276)	₩ 461,679

36. Earnings per share

36.1 Basic earnings per share

Basic earnings per share is calculated by dividing profit and loss attributable to ordinary equity holders of the Parent Company by the weighted average number of ordinary shares outstanding, during the years ended December 31, 2012, 2013 and 2014.

Weighted average number of ordinary shares outstanding:

	2012		
	Number of shares (a)	Days outstanding (b)	Total outstanding shares [(a) x (b)]
	(In number of shares)		
Beginning (A)	386,351,693	366	141,404,719,638
Weighted average number of ordinary shares outstanding [(B) =(A)/366]			386,351,693

	2013		
	Number of shares (a)	Days outstanding (b)	Total outstanding shares [(a) x (b)]
	(In number of shares)		
Beginning (A)	386,351,693	365	141,018,367,945
Weighted average number of ordinary shares outstanding [(B) =(A)/365]			386,351,693

	2014		
	Number of shares (a)	Days outstanding (b)	Total outstanding shares [(a) x (b)]
	(In number of shares)		
Beginning (A)	386,351,693	365	141,018,367,945
Weighted average number of ordinary shares outstanding [(B) =(A)/365]			386,351,693

Basic earnings per share:

	2012	
	(in Korean won and in number of shares)	
Profit attributable to ordinary shares (C)	₩	1,769,566,917,759
Weighted average number of ordinary shares outstanding (D)		386,351,693
Basic earnings per share [(E)=(C)/(D)]	₩	4,580

	2013	
	(in Korean won and in number of shares)	
Profit attributable to ordinary shares (C)	₩	1,271,502,597,550
Weighted average number of ordinary shares outstanding (D)		386,351,693
Basic earnings per share [(E)=(C)/(D)]	₩	3,291

	2014	
	(in Korean won and in number of shares)	
Profit attributable to ordinary shares (C)	₩	1,400,722,065,239
Weighted average number of ordinary shares outstanding (D)		386,351,693
Basic earnings per share [(E)=(C)/(D)]	₩	3,626

36.2 Diluted earnings per share

Diluted earnings per share is calculated using the weighted average number of ordinary shares outstanding which is adjusted by the weighted average number of additional ordinary shares that would have been outstanding assuming the conversion of all dilutive potential ordinary shares. The Group's dilutive potential ordinary shares include share grants.

A calculation is done to determine the number of shares that could have been acquired at fair value (determined as the average market share price of the Group's outstanding shares for the period) based on the monetary value of the subscription rights attached to the share options. The number of shares calculated above is compared with the number of shares that would have been issued assuming the exercise of share grants.

Adjusted profit for diluted earnings per share:

	2012
	(In Korean won)
Profit attributable to ordinary shares	₩1,769,566,917,759
Adjustment	—
Adjusted profit for diluted earnings per share	₩1,769,566,917,759

	2013
	(In Korean won)
Profit attributable to ordinary shares	₩1,271,502,597,550
Adjustment	—
Adjusted profit for diluted earnings per share	₩1,271,502,597,550

	2014
	(In Korean won)
Profit attributable to ordinary shares	₩1,400,722,065,239
Adjustment	—
Adjusted profit for diluted earnings per share	₩1,400,722,065,239

Adjusted weighted average number of ordinary shares outstanding to calculate diluted earnings per share:

	2012	2013	2014
	(in number of shares)		
Weighted average number of ordinary shares outstanding	386,351,693	386,351,693	386,351,693
Adjustment			
Share grants	1,193,606	1,639,306	1,589,706
Adjusted weighted average number of ordinary shares outstanding for diluted earnings per share	387,545,299	387,990,999	387,941,399

Diluted earnings per share:

		2012
	(in Korean won and in number of shares)	
Adjusted profit for diluted earnings per share	₩	1,769,566,917,759
Adjusted weighted average number of ordinary shares outstanding for diluted earnings per share		387,545,299
Diluted earnings per share	₩	4,567

		2013
	(in Korean won and in number of shares)	
Adjusted profit for diluted earnings per share	₩	1,271,502,597,550
Adjusted weighted average number of ordinary shares outstanding for diluted earnings per share		387,990,999
Diluted earnings per share	₩	3,277

		2014
	(in Korean won and in number of shares)	
Adjusted profit for diluted earnings per share	₩	1,400,722,065,239
Adjusted weighted average number of ordinary shares outstanding for diluted earnings per share		387,941,399
Diluted earnings per share	₩	3,611

37. Insurance Contracts

37.1 Insurance liabilities

The details of insurance liabilities presented within other liabilities as of December 31, 2013 and 2014, are as follows:

	2013	2014
	(In millions of Korean won)	
Individual insurance		
Pure Endowment insurance	₩3,861,364	₩4,334,823
Death insurance	85,123	112,858
Joint insurance	1,634,590	1,800,468
Group insurance	1,339	1,417
Other	16,627	15,632
Total	₩5,599,043	₩6,265,198

The changes in insurance liabilities for the years ended December 31, 2013 and 2014, are as follows:

	2013					
	Individual insurance					
	Pure Endowment insurance	Death insurance	Joint insurance	Group insurance	Others[1]	Total
	(In millions of Korean won)					
Beginning	₩ 3,281,701	₩63,821	₩1,470,755	₩1,285	₩19,604	₩4,837,166
Provision (Reversal)	579,663	21,302	163,835	54	(2,977)	761,877
Ending	₩ 3,861,364	₩85,123	₩1,634,590	₩1,339	₩16,627	₩5,599,043

	2014					
	Individual insurance					
	Pure Endowment insurance	Death insurance	Joint insurance	Group insurance	Others[1]	Total
	(In millions of Korean won)					
Beginning	₩ 3,861,364	₩ 85,123	₩1,634,590	₩1,339	₩16,627	₩5,599,043
Provision (Reversal)	473,459	27,735	165,878	78	(995)	666,155
Ending	₩ 4,334,823	₩112,858	₩1,800,468	₩1,417	₩15,632	₩6,265,198

(1) Consists of policyholders' profit dividend reserve, reserve for compensation for losses on dividend-paying insurance contracts and others.

37.2 Insurance assets

The details of insurance assets presented within other assets as of December 31, 2013 and 2014, are as follows:

	2013	2014
	(In millions of Korean won)	
Reinsurance assets	₩ 5,245	₩ 4,482
Deferred acquisition costs	151,909	123,011
Total	₩ 157,154	₩ 127,493

The changes in reinsurance assets for the years ended December 31, 2013 and 2014, are as follows:

	2013	2014
	(In millions of Korean won)	
Beginning	₩ 3,751	₩ 5,245
Increase (decrease)	1,494	(763)
Ending	₩ 5,245	₩ 4,482

The changes in deferred acquisition costs for the years ended December 31, 2013 and 2014, are as follows:

	2013	2014
	(In millions of Korean won)	
Beginning	₩ 151,925	₩ 151,909
Increase	102,702	52,386
Amortization	(102,718)	(81,284)
Ending	₩ 151,909	₩ 123,011

37.3 Insurance premiums and reinsurance

The details of insurance premiums for the years ended December 31, 2012, 2013 and 2014, are as follows:

	2012					
	Pure endowment insurance	Death insurance	Joint insurance	Group insurance	Others	Total
	(In millions of Korean won)					
Insurance premiums earned	₩ 1,307,974	₩19,547	₩352,482	₩3,967	₩39,081	₩1,723,051
Reinsurance premiums paid	(196)	(2,637)	(133)	(892)	(8,354)	(12,212)
Net premiums earned	₩ 1,307,778	₩16,910	₩352,349	₩3,075	₩30,727	₩1,710,839

	2013					
	Pure endowment insurance	Death insurance	Joint insurance	Group insurance	Others	Total
	(In millions of Korean won)					
Insurance premiums earned	₩ 795,031	₩41,389	₩336,540	₩5,019	₩42,474	₩1,220,453
Reinsurance premiums paid	(480)	(3,854)	(278)	(2,177)	(7,302)	(14,091)
Net premiums earned	₩ 794,551	₩37,535	₩336,262	₩2,842	₩35,172	₩1,206,362

	2014					
	Pure endowment insurance	Death insurance	Joint insurance	Group insurance	Others	Total
	(In millions of Korean won)					
Insurance premiums earned	₩ 756,697	₩55,035	₩350,076	₩5,271	₩37,481	₩1,204,560
Reinsurance premiums paid	(502)	(2,674)	(306)	(2,366)	(7,072)	(12,920)
Net premiums earned	₩ 756,195	₩52,361	₩349,770	₩2,905	₩30,409	₩1,191,640

The details of reinsurance transactions for the years ended December 31, 2012, 2013 and 2014, are as follows:

	2012			
	Reinsurance expense	Reinsurance revenue		
	Reinsurance premium paid	Reinsurance claims	Reinsurance commission	Total
	(In millions of Korean won)

37.4 Insurance risk

Summary of insurance risk

Insurance risk is the risk of loss arising from the actual risk at the time of claims exceeding the estimated risk at the time of underwriting. Insurance risk is classified by insurance price risk and policy reserve risk.

Insurance price risk is the risk of loss arising from differences between premiums from policyholders and actual claims paid.

Policy reserve risk is the risk of loss arising from differences between policy reserves the Group holds and actual claims to be paid.

Concentration of insurance risk and reinsurance policy

The Group uses reinsurance with the intent to expand the ability of underwriting insurance contracts through mitigating the exposure to insurance risk, and generates synergy by joint development of products, management discipline and collecting information on foreign markets.

The Group cedes reinsurance for mortality, illness and other risks arising from insurance contracts where the Group has little experience for a necessary period of time required to accumulate experience.

The Group's Reinsurance is ceded through the following process:

i. In the decision-making process of launching a new product, the Group makes a decision on ceding reinsurance. Subsequently, a reinsurer is selected through bidding, agreements with the relevant departments and final approval by the executive management.

ii. The reinsurance department analyzes the object of reinsurance, the maximum limit of reinsurance and the loss ratio with the relevant departments.

The characteristic and exposure of insurance price risk

The insurance risk of a life insurance company is measured by insurance price risk. As the life insurance coverage is in the form of a fixed payment, the fluctuation of policy reserve is small and the period from insured event to claims payment is not long. The policy reserve risk is managed by assessments of adequacy of the policy reserve.

The Group measures the exposure of insurance price risk as the shortfall of the risk premiums received compared to the claims paid on all insurance contracts for the last one year preceding the reporting date.

The maximum exposure of premium risk as of December 31, 2013 and 2014, follows:

	2013	
	Before reinsurance mitigation	After reinsurance mitigation
	(In millions of Korean won)	
Mortality	₩ 10,969	₩ 5,430
Disability	660	370
Hospitalization	861	600
Operation and diagnosis	1,731	1,164
Actual losses for medical expense	243	132
Others	89	21
Total	₩ 14,553	₩ 7,717

	2014	
	Before reinsurance mitigation	After reinsurance mitigation
	(In millions of Korean won)	
Mortality	₩ 10,736	₩ 6,321
Disability	950	545
Hospitalization	767	490
Operation and diagnosis	1,516	998
Actual losses for medical expense	279	89
Others	232	189
Total	₩ 14,480	₩ 8,632

Average ratios of claims paid per risk premium received on the basis of exposure before mitigation for the past three years as of December 31, 2013 and 2014, were 69% and 70%, respectively.

The exposure of market risk arising from embedded derivatives included in host insurance contracts as of December 31, 2013 and 2014, are as follows:

	2013		2014	
	Policy holders reserve	Guarantee reserve	Policy holders reserve	Guarantee reserve
	(In millions of Korean won)			
Variable annuity	₩540,797	₩ 4,058	₩535,749	₩ 5,153
Variable universal	132,413	135	110,766	458
Others	1,443	—	26,573	118
Total	₩674,653	₩ 4,193	₩673,088	₩ 5,729

Premium reserves and unearned premium reserves classified based on each residual maturity as of December 31, 2013 and 2014, are as follows:

	2013						
	Less than 3 years	3-5 years	5-10 years	10-15 years	15-20 years	20 years or more	Total
	(In millions of Korean won)

Total	₩98,094,956	₩100,199,559

Other Matters (including litigation)

a) The Group has filed 122 lawsuits (excluding minor lawsuits in relation to the collection or management of loans), involving aggregate claims of ₩834,440 million, and faces 374 lawsuits (as the defendant) (excluding minor lawsuits in relation to the collection or management of loans) involving aggregate damages of ₩523,099 million, which arose in the normal course of the business and are still pending as of December 31, 2014.

Meanwhile, certain customers of Kookmin Bank have filed lawsuits against Kookmin Bank in connection with fees paid for the registration of fixed collateral. The first and second trials are in progress as of December 31, 2014. The Court ruled in favor and partially in favor of Kookmin Bank in the first trial and ruled in favor of Kookmin Bank in the second and third trials. There is a low probability of potential losses related to the aforementioned lawsuits.

b) According to the shareholders' agreement on September 25, 2009, between Kookmin Bank, the International Finance Corporation ("IFC") and the remaining shareholders, Kookmin Bank granted a put option to IFC with the right to sell shares of JSC Bank Center Credit to itself or its designee. The exercise price is determined at its fair value by mutual agreement between Kookmin Bank and IFC. If the price is not agreed by the designated date, it is determined by the value measured by the selected independent external valuation institution. The put option may be exercised by IFC at any time from February 24, 2013, to February 24, 2017.

c) The face value of the securities which Kookmin Bank sold to general customers through tellers amounts to ₩57,159 million and ₩26,487 million as of December 31, 2013 and 2014, respectively.

d) Kookmin Bank underwent a tax investigation by the Seoul Regional Tax Office and in early 2007 was assessed additional corporate tax including local income tax of ₩482,755 million. Kookmin Bank paid this amount to the tax authorities. Subsequently, Kookmin Bank filed a claim for adjudication in August 2007 for repayment of the amount of ₩482,643 million. The case was closed with a favorable final judgment by the Supreme Court in January 2015.

e) For the year ended December 31, 2013, Kookmin Bank underwent a tax investigation for the fiscal years 2008 to 2012 by the Seoul Regional Tax Office. As a result, Kookmin Bank was fined a total of ₩124,357 million for income taxes (including local income taxes) and paid ₩123,330 million, excluding local income tax amounting to ₩1,027 million, and recognized as non-trade payable as of December 31, 2014. Meanwhile, the appeal to the tax tribunal over the ₩114,283 million is currently pending as of December 31, 2014.

f) While setting up a fraud detection system, a computer contractor employed by the personal credit ratings firm Korea Credit Bureau caused a widespread data breach in June 2013, resulting in the theft of cardholders' personal information. As a result of the leakage of customer personal information, the KB Kookmin Card received a notification from the Financial Services Commission that the KB Kookmin Card is subject to a temporary three-month operating suspension. In respect of the incident, the Group faces 101 legal claims filed as the defendant, with an aggregate claim of ₩52,421 million as of December 31, 2014. In addition, the Group may be subject to additional fines, penalties or judgments, reimbursement to affected clients. Meanwhile, the final outcome of the cases cannot be reasonably ascertained.

g) In relation to a tax credit for research and human resource development expenses, Kookmin Bank filed an administrative litigation (the aggregate amount in 2007 and 2008) and received a refund in the amount of ₩16,371 million from National Tax Service based on a recent Supreme Court precedent. However, the appeal to the tax tribunal (the aggregate amount in 2009 is ₩13,827 million) is currently pending as of December 31, 2014.

h) The Group entered into a purchase agreement to acquire 11,682,580 common shares of LIG Insurance Co., Ltd. (19.47% of outstanding shares with an expected price of ₩685,000 million) in June 2014. The Financial Services Commission approved LIG Insurance Co., Ltd. to be included as a subsidiary of the Group in December 2014.

(1) The Group controls the trust because it has power that determines the management performance over the trust and is exposed to variable returns to absorb losses through the guarantees of payment of principal or payment of principal and fixed rate of return.

(2) The Group controls these investees because it is exposed to variable returns from its involvement with the investees and has ability to affect those returns through its power, even though it holds less than a majority of the voting rights of the investees.

(3) Although the Group holds less than a majority of the investee's voting rights, the Group controls the investee as it has power over relevant activities by managing the fund; has significant percentage of ownership that is over 40%; is significantly exposed to variable returns which is affected by the performance of the investees, and has ability to affect those performance through its power.

(4) Boyoung Construction is included in the consolidation scope, since KB Wellyan Private Equity Real Estate Fund No. 7 is included in the consolidation scope.

(5) Although the Group holds less than a majority of the investee's voting rights, the Group controls the investee as it has power over relevant activities by taking the role of an operating manager and it is significantly exposed to variable returns which is affected by the performance of the investees, and has ability to affect those performance through its power.

(6) KB Star Retail Real Estate Feeder Fund 1st is included in the consolidation scope, since KB Wise Star Private Real Estate Feeder Fund 1st is included in the consolidation scope.

(7) Although the Group holds less than a majority of the investee's voting rights, the Group controls KB Private Real Estate Securities Fund1 (NPL) and Woori KA First Asset Securitization Specialty Co., Ltd. as it has power over relevant activities by taking the role of an operating manager; has significant percentage of ownership that is over 40%; is significantly exposed to variable returns which is affected by the performance of the investees; and has ability to affect those performance through its power. In accordance with the IFRS 10, KB Private Real Estate Securities Fund1 (NPL) and Woori KA First Asset Securitization Specialty Co., Ltd. were included in the consolidation scope. However, KB Private Real Estate Securities Fund1 (NPL) and Woori KA First Asset Securitization Specialty Co., Ltd. have been excluded from the consolidation scope due to the loss of control from changes in terms of the contract as of December 31, 2013.

The details of subsidiaries as of December 31, 2014, are as follows:

Investor	Investee	Ownership interests(%)	Location	Date of financial information	Industry

(1) The Group controls the trust because it has power that determines the management performance over the trust and is exposed to variable returns to absorb losses through the guarantees of payment of principal or payment of principal and fixed rate of return.

(2) The Group controls these investees because it is exposed to variable returns from its involvement with the investees and has ability to affect those returns through its power, even though it holds less than a majority of the voting rights of the investees.

(3) Although the Group holds less than a majority of the investee's voting rights, the Group controls the investee as it has power over relevant activities by managing the fund; has significant percentage of ownership that is over 40%; is significantly exposed to variable returns which is affected by the performance of the investees, and has ability to affect those performance through its power.

(4) Boyoung Construction is included in the consolidation scope, since KB Wellyan Private Equity Real Estate Fund No. 7 is included in the consolidation scope.

(5) Although the Group holds less than a majority of the investee's voting rights, the Group controls the investee as it has power over relevant activities by taking the role of an operating manager and it is significantly exposed to variable returns which is affected by the performance of the investees, and has ability to affect those performance through its power.

(6) KB Star Retail Private Master Real Estate 1 and KB Star Office Private Real Estate Investment Trust 2nd are included in the consolidation scope, since KB Wise Star Private Real Estate Feeder Fund 1st is included in the consolidation scope.

(1) Financial information is based on its consolidated financial statements.

(2) The amount includes the fair value adjustments due to the merger.

Nature of the risks associated with interests in consolidated structured entities

The terms of contractual arrangements require to provide financial support to a consolidated structured entity

- The Group has provided acceptances and guarantees obligation of ₩68,000 million to Ashley Investment First Co., Ltd. and Growth Investment First Co., Ltd., the Group's subsidiary, that had issued debentures.

The Group provides capital commitment to KB Wise Star Private Real Estate Feeder Fund 1st. and nine other subsidiaries. The unexecuted amount of the investment agreement is ₩478,741 million. Based on the capital commitment, the Group is subject to increase its investment by the request from the asset management company or the additional agreement among investors.

- The Group provides the guarantees of payment of principal or principal and fixed rate of return in case the operating results of the trusts are less than the guaranteed principal or principal and fixed rate of return.

Changes in subsidiaries

KB Capital Co., Ltd., Ashley Investment First Co., Ltd., Growth Investment First Co., Ltd., KB Mezzanine Private Securities Fund 2nd, KB Star Office Private Real Estate Investment Trust No.2, KB Evergreen Private Securities 99(Bond) and 106 other private equity funds, KB Kookmin Card Second Securitization Co., Ltd. and Wise Mobile 8th ~12th Securitization were newly consolidated during the year ended December 31, 2014. KB Evergreen Private Securities 82(Bond) and 95 other private equity funds, Global Logistics Infra Private Fund 1st, 2nd, KB Covered Bond 1st Trust, KH First Co., Ltd., KB Mortgage Loan First Securitization Specialty Co., Ltd., KB Covered Bond First Securitization Specialty Co., Ltd and KB07-5, KB06-1,KB08-1 Venture Partnership Fund have been excluded from consolidation due to their liquidation. Also, Yehansoul Savings Bank Co., Ltd. has been excluded from consolidation due to its merger with KB Savings Bank Co., Ltd.

Yehansoul Savings Bank Co., Ltd., KB Startup Investment, KB Evergreen Private Securities 63 and 46 other private equity funds, and Wise Mobile Second, Third, Fourth, Fifth, Sixth, Seventh Securitization and KB Star Retail Private Real Estate Feeder Fund First were newly consolidated during the year ended December 31, 2013. Yurie Select Private Securities Investment Trust 32 and 44 other private equity funds, KB K-Alpha private equity trust and New Star First Ltd. have been excluded from consolidation due to their liquidation. Also, KB Private Real Estate Securities Fund1 (NPL) and Woori KA First Asset Securitization Specialty Co., Ltd. have been excluded from consolidation due to the loss of control.

In accordance with the enactment of IFRS 10, the activities of KB-Glenwood Private Equity Fund, NPS KBIC Private Equity Fund No. 1 and KBIC Private Equity Fund No. 3 represent management and performance services and the terms of the contracts are the same as those in the ordinary service contracts between independent parties. These entities have been excluded from the consolidation scope since interests held are not material and therefore were considered as agents. In addition, Chungkang Co., Ltd. and Powernet Technologies Co., Ltd. have been excluded from the consolidation scope, since KB-Glenwood Private Equity Fund, the Parent Company, have been excluded from the consolidation scope.

For the year ended December 31, 2014, the following table summarizes the information relating to the Group's subsidiaries that have material non-controlling interests, before any intra-group eliminations, are as follows:

		2014

(1) Not considered to be the Group's related party as at December 31, 2014.

In accordance with IAS 24, the Group includes parent, parent's subsidiaries, associates, associates of parent's subsidiaries, key management (including family members), and post-employment benefit plans of the Group and entities regarded as its related parties in the scope of its related parties. Additionally, the Group discloses balances (receivables and payables) and other amounts arising from the related party transactions in the notes to the consolidated financial statements. Refer to Note 13 for details on investments in associates.

Key management includes the directors of the parent company and the executive directors (vice-presidents and above) of Kookmin Bank and companies where the directors and /or their close family members have control or joint control.

Significant loan transactions with related parties for the years ended December 31, 2013 and 2014, are as follows:

Key management	Time deposits and others	207	296
	Real estate	7,381	3,583

[1] Deemed not to be related as of December 31, 2014; therefore, 2014 balances are not presented.

As of December 31, 2014, Incheon Bridge Co., Ltd, a related party, provides fund management account, civil engineering completed risk insurance, shares and management rights as unsubordinated collaterals in respect to collateralized amount of ₩816,400 million to a financial syndicate consisting of the Group and four other institutions, and as subordinated collateral in respect to collateralized amount of ₩201,100 million to subordinated debt holders consisting of the Group and two other institutions.

44. Business combination

The Group obtained control of Woori Financial Co., Ltd. from the Woori Financial Group Inc. for ₩279,870 million (11,180,630 shares, 52.02%) on March 20, 2014. Woori Financial Co., Ltd. operates rental of facilities, installment financial business, factoring business and others. Woori Financial Co., Ltd. has changed its name to KB Capital Co., Ltd.

The Group expects synergies from diversification of business portfolio through reinforcement of non-banking services, diversification of profit structure through expansion of customer range, vitalization of connected business between financial subsidiaries, reinforcement of retail banking business marketing, financing cheap money through the financial group and others.

The goodwill of business combination consists of expected synergies through business combination, the value of unrecognized assets and others.

The consideration transferred and the assets and liabilities arising from the M&A deal are as follows:

		Amounts
		(In millions of Korean won)
Total consideration	₩	279,870
Recognized amounts of identifiable assets acquired and liabilities assumed		
Cash and due from financial institutions		17,572
Available-for-sale financial assets		6,872
Loans		3,888,468
Equipment / intangible assets		16,828
Other assets		59,055
Total assets		3,988,795
Debts		580,000
Debentures		2,751,344
Other liabilities		272,495
Total liabilities		3,603,839
Total identifiable net assets	₩	384,956
Ratio of shareholding acquired (%)		52.02
Relevant amount of shares	₩	200,261
Goodwill		79,609
Acquisition-related costs(1)		2,094

(1) Recorded as fee and commission expense in the statement of comprehensive income.

The receivables including loans from the M&A deal at the acquisition date are as follows:

		Amounts
		(In millions of Korean won)
Fair value		
Due from financial institutions	₩	4,601
Loans		3,893,069
Others		25,321
Total fair value	₩	3,922,991
Contractual cash flow		
Due from financial institutions	₩	4,601
Loans		3,900,760
Others		26,478
Total contractual cash flow	₩	3,931,839
Estimate of the contractual cash flows not expected to be collected		
Loans	₩	82,640
Others		1,085
Total estimate of the contractual cash flows not expected to be collected	₩	83,725

The Group measured non-controlling interests in KB Capital Co., Ltd.'s net asset fair value as of the date of acquisition. As a result, non-controlling interest amounting to ₩184,695 million is recognized as of the date of acquisition.

Due to the business combination, the net operating income and profit for the period from March 20, 2014 to December 31, 2014, included in the consolidated statement of comprehensive income were ₩39,666 million and ₩29,990 million (profit attributable to shareholders of the parent company is ₩15,601 million), respectively.

Assuming the date of acquisition is the beginning of the reporting period, the income from operations and net profit for the period would have increased by ₩6,137 million and ₩4,649 million, respectively. In calculating the pro forma information, the operating results of the acquired companies for the period before acquisition have been adjusted to reflect the Group's accounting policies and the fair value adjustments made upon acquisition.

45. Approval of Issuance of the Financial Statements

The issuance of the Group's consolidated financial statements as of and for the year ended December 31, 2014, was approved by the Board of Directors on February 5, 2015.

46. Parent Company Information

The following tables present the Parent Company Only financial information:

Exhibit 1.1

ARTICLES OF INCORPORATION OF KB FINANCIAL GROUP INC.

CHAPTER I
GENERAL PROVISIONS

Article 1 (Corporate Name)

The name of this company shall be "*KB Geumyung Jijoo*", which shall be expressed in English as "KB Financial Group Inc." (the "Company").

Article 2 (Objective)

The objective of the Company shall be to engage in the following business activities:

1. Control over or management of companies engaged in financial businesses or other companies related closely to the operations of financial businesses;
2. Financial support for subsidiaries, etc. (as defined in Article 4, Paragraph 1, Sub-paragraph 2 of the Financial Holding Company Act, including subsidiaries, subsidiaries of such subsidiaries (a "Sub-subsidiary") and other companies controlled by a Sub-Subsidiary, hereinafter the same).;
3. Financing for investment in subsidiaries or providing financial support to subsidiaries, etc.;
4. Provision of resources necessary for the business operations of Subsidiaries, etc. , including **administrative** support for the joint development and sale of products with subsidiaries, etc.;
5. Functions entrusted by subsidiaries, etc. to support the business operations of subsidiaries, etc. including IT, legal and accounting functions;
6. Provision of intellectual property rights, including trademarks, patents, etc. to subsidiaries, etc.;
7. Other businesses permitted by laws and regulations; and
8. Any other businesses incidental or related to those in Items 1 through 7 of this Paragraph.

Article 3 (Location of Head Office and Establishment of Branches)

(1) The Company shall have its head office in Seoul.

(2) The Company may establish branches, liaison offices, representative offices or subsidiaries within or outside Korea, as it deems necessary, by the resolution of the Board of Directors.

Article 4 (Method of Public Notices)

Public notices of the Company shall be made in the Seoul Shinmun and Dong-a Ilbo, daily newspapers published in Seoul. However, if the Seoul Shinmun or Dong-a Ilbo is not available due to circumstances beyond the Company's control, the public notices of the Company shall be made in Chosun Ilbo and/or Joong-ang Ilbo in such order of preference.

CHAPTER II
SHARES

Article 5 (Total Number of Authorized Shares)

The total number of shares to be issued by the Company shall be one billion (1,000,000,000) shares.

Article 6 (Par Value per Share)

The par value per share to be issued by the Company shall be five thousand (5,000) Won.

Article 7 (Number of Shares Issued at the Time of Incorporation)

The total number of shares issued at the time of incorporation of the Company shall be three hundred and fifty six million, three hundred and fifty one thousand, six hundred and ninety three (356,351,693) shares of common stock.

Article 8 (Types of Shares)

(1) The shares to be issued by the Company shall be shares in registered form. The shares shall be issued by a resolution of the Board of Directors.

(2) The Company may issue common shares, shares with preferred dividend, non-voting shares, class shares with conversion rights ("convertible shares"), class shares with redemption rights ("redeemable shares") and shares with combination of all or any of the above classes (the foregoing shares, except common shares, shall be referred to as "class shares") in accordance with the terms of the Articles of Incorporation.

Article 9 (Share Certificates)

(1) The share certificates of the Company shall be issued in the following eight (8) denominations: one (1), five (5), ten (10), fifty (50), one hundred (100), five hundred (500), one thousand (1,000) and ten thousand (10,000) shares.

(2) The Company may split or consolidate share certificates at the request of shareholders.

(3) The Company shall not issue share certificates in whole or in part of shares owned by a shareholder if such shareholder does not desire to receive share certificates corresponding to such shares.

Article 10 (Non-Voting Shares with Preferred Dividend)

(1) The Company may issue non-voting shares with preferred dividend, and the number thereof shall not exceed one half (1/2) of the total number of issued and outstanding shares.

(2) The dividends on non-voting shares with preferred dividend shall be no less than one percent (1%) per annum of the par value and the rate thereof shall be determined by the Board of Directors at the time of issuance, together with the type of the distributed properties and method of determination of the value of distributed properties and conditions on payment of dividends to the extent permitted under Articles 58 and 59 hereof; *provided, that* in the case of issuance of non-voting shares with preferred dividend whereby the rate of preferred dividends is adjustable, the Board of Directors shall determine the fact that the rate of preferred dividends are adjustable, the reasons for the adjustability, the base date for the adjustment and the method of adjustment at the time of issuance of such shares.

(3) Non-voting shares with preferred dividend to be issued by the Company may be participating or non-participating, and accumulating or non- accumulating by the resolution of the Board of Directors.

(4) Non-voting shares with preferred dividend have no voting rights. However, if a resolution not to distribute dividends on such shares is adopted, then the such shares shall be deemed to have voting rights from the next General Meeting of Shareholders immediately following the General Meeting of Shareholders at which such resolution not to distribute dividends on such shares is adopted, to the end of the General Meeting of the Shareholders at which a resolution to distribute dividends on such shares is adopted.

(5) If the Company increases its capital by a shares offering or a bonus issue, the new shares to be assigned to non-voting shares with preferred dividend shall be common shares in the case of a shares offering and shall be the shares of same type in the case of a bonus issue.

(6) Whether or not to specify the duration of non-voting shares with preferred dividend shall be determined by the resolution of the Board of Directors. If there is any duration of non-voting shares with preferred

dividend, such duration shall be no less than one (1) year and no more than ten (10) years from the date of issuance, and such period of duration shall be determined by the Board of Directors at the time of issuance. If there is any duration of non-voting shares with preferred dividend, such shares shall be converted into common shares upon the expiration of the duration period. However, if the holders of such shares do not receive dividends entitled to them during the duration period, then the duration period shall be extended until such holders receive in full the dividends to which they are entitled. In such a case, Article 15 shall apply *mutatis mutandis* with respect to the distribution of dividends for new shares issued upon conversion.

Article 11 (Convertible Shares)

(1) The Company may, pursuant to a resolution of the Board of Directors, issue shares that are convertible into common shares or class shares at the request of shareholders, in an amount not exceeding 20% of the total number of issued and outstanding shares of the Company.

(2) The issue price of the new shares issued upon conversion shall be equal to the issue price of shares prior to conversion, and the number of shares to be issued upon conversion shall be equal to the number of shares prior to conversion.

(3) The period during which a shareholder may request for conversion shall be determined by a resolution of the Board of Directors and shall be a period that commences not earlier than one (1) year, and ends no later than ten (10) years, from the issue date.

(4) Article 15 shall apply *mutatis mutandis* with respect to the distribution of dividends for new shares issued upon conversion.

Article 12 (Redeemable Shares)

(1) In case of issuance of non-voting shares with preferred dividend, the Company may, pursuant to a resolution of the Board of Directors, issue such non-voting shares with preferred dividend as redeemable shares that may be redeemed with profits at the discretion of the Company or such shareholder, in an amount not exceeding one half (1/2) of the total number of issued and outstanding shares of the Company.

(2) The redemption price shall be the "issue price + additional amount", where the additional amount shall be determined by a resolution of the Board of Directors at the time of issuance of such redeemable shares, considering various factors such as the dividend rate, market condition and general circumstances related to the issuance of such redeemable shares.

(3) The redemption period for the redeemable shares shall be a period falling between (x) the day immediately following the close of the Ordinary General Meeting of Shareholders for the fiscal year in which the redeemable shares were issued and (y) one month after the close of the Ordinary General Meeting of Shareholders for the fiscal year in which the 20^{th} anniversary of the issue date falls, as determined by a resolution of the Board of Directors; *provided, however, that* in the case of redeemable shares which are required to be redeemed by the Company upon the expiration of the redemption period, to the extent that any of the conditions listed below have occurred and remain outstanding, the redemption period shall be extended until such conditions have been resolved:

1. The holders of the redeemable shares did not receive the preferred dividends to which they are entitled; or

2. The Company is unable to redeem the redeemable shares during the redemption period due to a lack of sufficient profits.

(4) The Company may redeem the redeemable shares in whole at once or in part; *provided that*, in the case of partial redemption, the Company may select the shares to be redeemed by lottery, or proportionally among each holder. Fractional shares resulting from proportional redemption shall not be redeemed.

(5) In case of redeemable shares which the Company may redeem at its discretion, if the Company wishes to redeem the redeemable shares, the Company shall provide public notice specifying its intention to redeem,

the redeemable shares to be redeemed and the fact that the share certificates must be presented to the Company within a period of no less than one (1) month. The Company must separately provide notice to the shareholders registered in the Company's registry of shareholders and the registered pledgees. Upon the expiration of the period mentioned above, the Company shall mandatorily redeem the redeemable shares. In case of redeemable shares which the Company may redeem at the request of shareholders, the shareholder requesting for redemption shall provide to the Company a notice specifying its intention to redeem and the redeemable shares to be redeemed within a period of no less than one(1) month.

(6) At the time of issuance of redeemable shares, the Company may, pursuant to a resolution of the Board of Directors and to the extent permitted by the relevant laws and regulations, issue the redeemable shares as convertible shares as provided for in Article 11 hereof.

Article 13 (Preemptive Rights)

(1) The shareholders of the Company shall have pre-emptive rights to subscribe for new shares to be issued by the Company in proportion to their respective shareholdings.

(2) Notwithstanding the provision of Paragraph (1) above, the Company may allocate new shares to persons other than existing shareholders of the Company by the resolution of the Board of Directors, in any of the following instances:

1. If the Company issues new shares for its capital increase by way of a general public offering, to the extent not exceeding 50/100 of the total number of issued and outstanding shares of the Company in accordance with the provisions of the Financial Investment Services and Capital Market Act (the "FSCMA");
2. If the Company preferentially allocates new shares to members of the Employee Stock Ownership Association in accordance with the provisions of the FSCMA;
3. If the Company issues new shares upon the exercise of stock options in accordance with the provisions of the Commercial Code, etc.;
4. If the Company issues new shares for the issuance of depositary receipts ("DR"), to the extent not exceeding 50/100 of the total number of issued and outstanding shares of the Company in accordance with the relevant provisions of the FSCMA, etc.;
5. If the Company issues new shares to foreign or domestic financial institutions or institutional investors, to the extent not exceeding 50/100 of the total number of issued and outstanding shares of the Company, where such investment is deemed to be necessary for the management or operations of the Company; or
6. If the Company issues new shares to a third party who has provided money, loan, advanced financial technology or know-how to the Company, has close, cooperative business relations with the Company, or has contributed to the management of the Company, to the extent not exceeding 50/100 of the total number of issued and outstanding shares of the Company.

(3) If the Company allocates new shares to persons other than existing shareholders of the Company pursuant to Paragraph (2) above, it shall give the notice to the shareholders or provide the public with respect to the matters set forth in Article 416, Items 1, 2, 2-2, 3 and 4 of the Korean Commercial Code no later than two (2) weeks before the payment date of such shares.

(4) In the case of issuance of new shares pursuant to each item under Paragraph (2) above, the type and total number of shares to be issued and the issue price, etc. shall be determined by a resolution of the Board of Directors.

(5) In the case a shareholder waives or loses the pre-emptive right to subscribe new shares, those shares not subscribed due to such waiver or loss of the pre-emptive right shall be disposed by a resolution of the Board of Directors. If fractional shares result from the allocation of new shares, such shares shall also be disposed of by a resolution of the Board of Directors.

Article 14 (Stock Options)

(1) The Company may grant stock options to the officers and employees (including officers and employees of related companies as prescribed under Article 9 of the Enforcement Decree of the Commercial Code, hereinafter, the same) pursuant to the provisions of the Commercial Code and other relevant laws, by a special resolution of the General Meeting of Shareholders, to the extent not exceeding 15/100 of the total number of issued and outstanding shares of the Company; provided, however, that the Company may grant stock options to the officers and employees other than directors, by a resolution of the Board of Directors, to the extent not exceeding one percent (1%) of the total number of issued and outstanding shares, in case of such the Company must obtain the approval of shareholders at the nearest forthcoming General Meeting of Shareholders.

(2) The persons who are entitled to receive such stock options shall be officers and employees of the Company prescribed under Paragraph (1) above who have contributed, or are capable of contributing, to the management or technical innovation of the Company, except for officers or employees in any of the following cases:

1. The Largest Shareholder of the Company (as defined in Article 542-8, Paragraph 2 (5) of the Commercial Code, hereinafter, the same) and Specially Related Persons thereof (as defined in Article 13, Paragraph 4 of the Enforcement Decree of the Commercial Code, hereinafter, the same), except for such persons who are deemed Specially Related Persons upon becoming officers (including an officer who is a non-standing officer of any affiliate company) of the Company;

2. Major Shareholders (as defined in Article 542-8, Paragraph 2 (6) of the Commercial Code, hereinafter, the same) of the Company, and Specially Related Persons thereof, except for such persons who are deemed Specially Related Persons upon becoming officers (including an officer who is a non-standing officer of any affiliate company) of the Company; and

3. Persons who become Major Shareholders of the Company through exercise of their stock options.

(3) The shares to be issued upon the exercise of stock options shall be common shares or class shares.

(4) The total number of shares to be given to one (1) officer or employee pursuant to the stock option shall not exceed 1/100 of the total number of shares issued and outstanding.

(5) The exercise price per share for the stock option shall be determined in accordance with the relevant laws, such as the Commercial Code, etc. Adjustment of exercise price shall be determined likewise.

(6) Stock options may be exercised during the period as decided by a resolution of the General Meeting of Shareholders or Board of Directors, at the time that the stock options are granted. Such exercise period shall fall between the date commencing from the 2nd anniversary of the date that a resolution was made to grant such stock options (as provided in Paragraph (1) above) until a date not later than the 7th anniversary of such resolution date.

(7) A stock option is exercisable by a person who has served the Company for two (2) years or more from the date specified in Paragraph (1) above at which a resolution to grant such stock option was adopted. If the grantee's continuous service terminates by reason of the grantee's death, attainment of mandatory retirement age or for reasons other than by the fault of the grantee within two (2) years from the said date of resolution, the option may be exercisable within the exercise period.

(8) In the case of granting the stock options, the Company may condition the exercise of the stock options upon achieving a detailed set of performance goals, and may cancel all or a portion of the stock options or postpone the exercise of stock options if such condition is not satisfied.

(9) In the following instances, the Company may, by a resolution of the Board of Directors, cancel the stock options:

1. When the relevant officer or employee voluntarily resigns or retires from his or her position at the Company after receiving the stock option;

2. When the relevant officer or employee inflicts material damage or losses on the Company due to his or her willful misconduct or negligence;
3. When the Company cannot respond to the exercise of stock options due to its bankruptcy, dissolution, etc.; or
4. When there occurs any other event for cancellation of the stock option pursuant to the stock option agreement.

Article 15 (Issuance Date of New Shares for the Purpose of Dividends)

In case the Company issues new shares through a share offering, bonus issue, stock options and/or stock dividend, the new shares shall be deemed to have been issued at the end of the fiscal year immediately prior to the fiscal year during which the new shares are issued for the purpose of distribution of dividends for such new shares.

Article 16 (Transfer Agent)

(1) The Company shall designate a transfer agent for shares.

(2) The transfer agent, its place of business and the scope of its agency business shall be determined by a resolution of the Board of Directors.

(3) The shareholders registry or duplicates thereof shall be kept at the business place of the transfer agent and the alterations in the registry of shareholders, registration of creation and cancellation of pledges over shares, indication of trust assets and cancellation thereof with respect to shares, issuance of share certificates, receipt of reports and other related activities shall be conducted by the transfer agent.

(4) The procedure provided for in Paragraph (3) above shall be regulated by the Regulation on Securities [*jeung kweon in Korean*] Transfer Agency Business of Transfer Agent, etc.

Article 17 (Report of Addresses, Names and Seals or Signatures of Shareholders and Others)

(1) Shareholders and registered pledgees shall file their names, addresses, and seals or signatures with the transfer agent under Article 16 above.

(2) Shareholders and registered pledgees who reside in a foreign country should report to the Company appointed agents and the addresses in Korea to which notices are to be sent.

(3) The same shall apply in case of any changes in the matters referred to in Paragraphs (1) and (2) above.

Article 18 (Close of Shareholders' Registry and Record Date)

(1) The Company shall suspend entries of alteration of the shareholders' registry from the 1st to the 31st of January of each year.

(2) The shareholders registered in the shareholders' registry as of December 31 of each fiscal year shall be entitled to exercise the rights as shareholders at the Ordinary General Meeting of Shareholders convened for such fiscal year.

(3) The Company may, if necessary for convening of an Extraordinary General Meeting of Shareholders or any other necessary cases, suspend any entry into the shareholders' registry with respect to shareholders' rights for a period not exceeding three (3) months as determined by a resolution of the Board of Directors, or cause the shareholders whose names appear in the shareholders' registry on a record date set by a resolution of the

Board of Directors to exercise their rights as shareholders. If the Board of Directors deems it necessary, the Company may suspend any entry into the shareholders' registry and set the record date at the same time. The Company shall give at least two (2) weeks prior notice to the public.

(4) Notwithstanding the provision of the last sentence of Paragraph (3) above, if prescribed otherwise by the Financial Holding Companies Act and other relevant laws and regulations, such laws may prevail.

CHAPTER III
BONDS

Article 19 (Issuance of Bonds)

(1) The Company may, pursuant to a resolution of the Board of Directors, issue bonds.

(2) The Board of Directors may delegate the Representative Director to issue bonds in such amount and type as determined by the Board of Directors no later than one (1) year from the date of delegation.

Article 19-2 (Issuance of Convertible Bonds)

(1) The Company may issue to persons other than existing shareholders of the Company convertible bonds, by the resolution of the Board of Directors, to the extent that the total face value of the bonds shall not exceed two trillion five hundred billion (2,500,000,000,000) Won, in the following cases:

1. If the Company issues convertible bonds through a general public offering;
2. If the Company issues convertible bonds to domestic or foreign financial institutions or institutional investors in order to raise the fund to meet urgent need; or
3. If the Company issues convertible bonds to a third party who has provided money, loan, advanced financial technology or know-how to the Company, has close, cooperative business relations with the Company, or has contributed to the management of the Company.

(2) The Board of Directors may determine that the convertible bonds referred to in Paragraph (1) may be issued on the condition that conversion rights will be attached to only a portion of the convertible bonds.

(3) The shares to be issued upon conversion shall be common shares or class shares. The conversion price, which shall be equal to or more than the face value of the shares, shall be determined by the Board of Directors at the time of issuance of convertible bonds.

(4) The conversion period shall commence on the date following three (3) months from the issue date of the convertible bonds and end on the date immediately preceding the redemption date thereof. However, the conversion period may be adjusted within the above period by a resolution of the Board of Directors.

(5) For the purpose of any distribution of dividends on the shares issued upon conversion and any payment of accrued interest on the convertible bonds, Article 15 hereof shall apply *mutatis mutandis*.

Article 20 (Bonds with Warrants)

(1) The Company may issue to persons other than existing shareholders of the Company bonds with warrants, by the resolution of the Board of Directors, to the extent that the total face value of the bonds shall not exceed two trillion five hundred billion (2,500,000,000,000) Won, in the following cases:

1. If the Company issues bonds with warrants through a general public offering;
2. If the Company issues bonds with warrants to domestic or foreign financial institutions or institutional investors in order to raise the fund to meet urgent need; or
3. If the Company issues bonds with warrants to a third party who has provided money, loan, advanced financial technology or know-how to the Company, has close, cooperative business relations with the Company, or has contributed to the management of the Company.

(2) The amount of new shares which can be subscribed for by the holders of the bonds with warrants shall be determined by the Board of Directors to the extent that the maximum amount of such new shares shall not exceed the face value of the bonds with warrants.

(3) The shares to be issued upon exercise of warrants shall be common shares or class shares. The issue price, which shall be equal to or more than the face value of the shares, shall be determined by the Board of Directors at the time of issuance of bonds with warrants.

(4) The warrant exercise period shall commence on the date following three (3) months from the issue date of the relevant bonds and end on the date immediately preceding the redemption date thereof. However, the warrant period may be adjusted within the above period by resolution of the Board of Directors.

(5) For the purpose of any distribution of dividends on the shares issued upon exercise of warrants, Article 15 hereof shall apply *mutatis mutandis*.

Article 20-2 (Issuance of Write-down Contingent Convertible Bonds)

(1) The Company may issue bonds by a resolution of the Board of Directors, which are a different type of bonds from those under Article 469, Paragraph (2), Article 513 and Article 516-2 of the Korean Commercial Code and are exempted from the obligation to repay the bonds and pay interest thereon if an event predetermined in accordance with objective and reasonable standards at the time of the issuance of the bonds occurs (the "Write-down Contingent Convertible Bonds").

(2) The Company may issue the Write-down Contingent Convertible Bonds in the preceding Paragraph to the extent the aggregate par value thereof does not exceed twenty trillion (20,000,000,000,000) Won by a resolution of the Board of Directors.

(3) The Company may issue the Write-down Contingent Convertible Bonds on the condition that if either one of the following conditions are satisfied, the obligations to repay the Write-down Contingent Convertible Bonds issued by the Company and to pay interest thereon shall be reduced or exempted (the "Debt Restructuring"):

1. The Company received a measure of managerial improvement order from the Financial Services Commission pursuant to the Act on the Structural Improvement of the Financial Industry; or
2. The Company is designated as a non-performing financial institution pursuant to the Act on the Structural Improvement of the Financial Industry.

(4) The Board of Directors of the Company may determine such terms and conditions to be amended following the Debt Restructuring, to the extent permitted under the relevant laws and regulations, at the time of the issuance of the Write-down Contingent Convertible Bonds.

Article 21 (Issuance of Participating Bonds)

(1) The Company may issue participating bonds to persons other than existing shareholders by the resolution of Board of Directors; to the extent that the total face value of the bonds shall not exceed one trillion (1,000,000,000,000) Won, in the following cases:

1. If the Company issues participating bonds through a general public offering;
2. If the Company issues participating bonds to domestic or foreign financial institutions or institutional investors in order to raise the fund to meet urgent need; or
3. If the Company issues participating bonds to a third party who has provided money, loan, advanced financial technology or know-how to the Company, has close, cooperative business relations with the Company, or has contributed to the management of the Company.

(2) The matters about participation in any distribution of dividends on bonds issued pursuant to Article (1) above shall be determined by the resolution of the Board of Directors on the basis of the distribution of dividends on common shares at the time of issuance.

Article 22 (Applicable Provisions for the Issuance of Bonds)

The provisions of Articles 16 and 17 hereof shall be applicable to the issuance of bonds.

CHAPTER IV
GENERAL MEETINGS OF SHAREHOLDERS

Article 23 (Convening of General Meetings of Shareholders)

(1) General Meetings of Shareholders of the Company shall be of two types: (i) Ordinary and (ii) Extraordinary.

(2) The Ordinary General Meeting of Shareholders shall be held within three (3) months after the end of each fiscal year and the Extraordinary General Meeting of Shareholders may be convened whenever deemed necessary.

Article 24 (Authority to Convene)

(1) The Representative Director shall convene the General Meeting of Shareholders in accordance with a resolution by the Board of Directors, unless otherwise prescribed by other laws and ordinances.

(2) If the Representative Director is unable to perform his/her duties, Article 41, Paragraph (2) shall apply *mutatis mutandis*.

Article 25 (Personal or Public Notices for Convening)

(1) Written or electronic notice of the General Meeting of Shareholders of the Company shall state the date, time, place of the Meeting, the purposes for which the Meeting has been called. The written or (with the consent of each shareholder) electronic notice shall be sent to all shareholders at least two (2) weeks prior to the date set for such Meeting.

(2) The written or electronic notice of a General Meeting of Shareholders under Paragraph (1) above to be given to shareholders holding one-hundredth (1/100) or less of the total issued and outstanding voting shares may be substituted by either giving public notice of the convening of the General Meeting of Shareholders in the Seoul Shinmun and the Dong-a Ilbo, which are published in the city of Seoul and at least two (2) notices are made in the said publications two (2) weeks prior to the date set for such Meeting or by giving such public notice through the electronic disclosure system operated by the Financial Supervisory Commission or the Korea Exchange; provided that, if the Seoul Shinmun and the Dong-a Ilbo are not available due to circumstances beyond the Company's control, the public notices may be given in the Chosun Ilbo and the Joongang Ilbo, in such order.

Article 26 (Place of Meeting)

The General Meeting of Shareholders shall be held in the city where the head office is located or any other places adjacent thereto as required.

Article 27 (Chairman of the General Meeting of Shareholders)

The person who has the authority to convene the General Meeting of Shareholders under Article 24 above shall be the Chairman of the General Meeting of Shareholders.

Article 28 (Chairman's Authority to Maintain Order)

(1) The Chairman of the General Meeting of Shareholders may order persons who purposely speak or act in a manner that disrupts or inhibits the deliberations of the General Meeting of Shareholders or who otherwise disturb the public order of the General Meeting of Shareholders to desist, retract his/her remarks, or to leave the place of meeting.

(2) The Chairman of the General Meeting of Shareholders may restrict the length and frequency of the speech of shareholders if it is necessary for the orderly conduct of the General Meeting of Shareholders.

Article 29 (Voting Rights)

(1) Each shareholder shall have one (1) vote for each share he/she owns.

(2) If the Company, any of its parent company and subsidiary or subsidiaries hold shares exceeding one tenth (1/10) of the total number of issued and outstanding shares of another company, the shares of the Company held by such other company shall not have voting rights.

Article 30 (Split Voting)

(1) If any shareholder who holds two (2) or more votes wishes to split his/her votes, he/she shall give written or electronic notice to the Company of such intent and the reasons therefor no later than three (3) days before the date set for the General Meeting of Shareholders.

(2) The Company may refuse to allow the shareholder to split his/her votes unless the shareholder acquired the shares in trust or otherwise holds the shares for and on behalf of some other person.

Article 31 (Voting by Proxy)

(1) A shareholder may exercise his/her voting rights by proxy.

(2) In the case of Paragraph (1) above, the proxy holder shall file with the Company the documents (power of attorney) evidencing the authority to act as a proxy before the General Meeting of Shareholders.

Article 32 (Method of Resolution of the General Meeting of Shareholders)

Except as otherwise provided in the applicable laws and regulations, all resolutions of the General Meeting of Shareholders shall be adopted by the affirmative vote of a majority of the shareholders present; provided that such votes shall, in any event, represent not less than 1/4 of the total number of issued and outstanding shares.

Article 33 (Exercise of Voting Rights in Writing)

(1) If the method of written resolutions at the General Meeting of Shareholders is adopted by the resolution of the Board of Directors, at which the convening of the General Meeting of Shareholders is determined, the shareholders may exercise their voting rights in writing without attending the meeting.

(2) In the case of Paragraph (1), the Company shall send the documents and references necessary for the exercise of the voting rights, together with the convening notice of the General Meeting of Shareholders.

(3) If a shareholder intends to exercise his/her voting rights in writing, the shareholder shall fill in and submit to the Company the documents referred to in Paragraph (2) one day before the date set for the General Meeting of Shareholders.

Article 34 (Minutes of the General Meetings of Shareholders)

The substance of the course of the proceedings of the General Meeting of Shareholders and the results thereof shall be recorded in the minutes and shall be preserved at the head office and branches of the Company, after being affixed with the names and seal impressions or signatures of the Chairman and the Directors present.

CHAPTER V
DIRECTORS AND BOARD OF DIRECTORS

Article 35 (The Number of Directors)

(1) The Company shall have not more than thirty (30) Directors.

(2) The number of Non-executive Directors shall be more than one half (1/2) of the total number of Directors and five (5) or more.

Article 36 (Election of Director)

(1) The Directors shall be elected at the General Meeting of Shareholders.

(2) Non-executive Directors shall be recommended by the Non-executive Directors Candidate Nomination Committee pursuant to Article 47 and elected at the General Meeting of Shareholders.

Article 37 (Qualifications of Non-executive Directors)

(1) Any person falling within the scope of any of the following cannot become a non-executive director of this Company and such person shall, if found to fall within the scope of any of the following after becoming a non-executive director, lose his/her office as non-executive director:

1. Any person to whom any sub-paragraph of Article 40, Paragraph 4 of the Financial Holding Company Act applies.; or
2. Any person serving as a non-executive director of any other company that is not a Subsidiary, etc. of the Company.

(2) The Company shall appoint a non-executive director who has expertise and knowledge by considering the following; provided, however, that this Paragraph is not applicable to a person who is appointed as non-executive director after being nominated as a candidate therefor pursuant to Article 542-8, Paragraph (5) of the Korean Commercial Code.

1. Whether he or she is sufficiently well-informed or experienced in a related field, including finance, economics, management, accounting and law, as required for his or her performance of duty as a non-executive director;
2. Whether he or she may fairly perform his or her duty for the benefit of the entire shareholders and financial consumers without being bound by certain interests;
3. Whether he or she has reasonable sense of morals and responsibility to perform his or her duty as a non-executive director; or
4. Whether he or she is able to dedicate sufficient time and effort to fully perform his or her duty as a non-executive director of a financial company.

Article 38 (Term of Director)

(1) A Director shall be appointed to a term of office of three (3) years, and may be re-appointed; provided, that such term may be otherwise determined at the General Meeting of Shareholders to the extent it does not exceed three (3) years.

(2) If the term of office as set forth in Paragraphs (1) and (4) expires after the end of a fiscal year but before the Ordinary General Meeting of Shareholders convened in respect of such fiscal year, the term of office shall be extended up to the close of such General Meeting of Shareholders.

(3) Unless otherwise prescribed by General Meeting of Shareholders, the term of office of the Director shall commence from the date of appointment.

(4) Notwithstanding Paragraph (1), the term of office of a non-executive director shall be two (2) years and shall be one (1) year if the non-executive director is being re-appointed; provided, however, that the length of such term may be otherwise determined at the General Meeting of Shareholders so long as such term does not exceed two (2) years (or one (1) year in the case of re-appointment).

(5) A non-executive director cannot serve a term of office for more than five (5) years on a consecutive basis except in the case where the term of office is extended pursuant to Paragraph (2) above.

(6) If a non-executive director is re-appointed within two (2) years from the expiry of the term of office, the non-executive director shall be deemed to serve the position on a consecutive basis.

(7) The term of office set forth in above Paragraph (5) shall be calculated by taking into consideration the term of office served as a non-executive director for Subsidiaries, etc. of this Company (but only with respect to such non-executive director of a Subsidiary, etc. who is appointed as a non-executive director of this Company within two (2) years from the expiry of the term of office), except for the term of office served as a non-executive director for a company that is not an affiliate of this Company. However, the terms of office of non-executive directors of companies that became subsidiaries, etc. of the Company at the time the Company was approved to become a financial holding company pursuant to Article 3 of the Financial Holding Company Act shall be counted for the calculation of the terms of office hereunder.

Article 39 (By-election of Directors)

(1) In the event of any interim vacancy in the office of the Director, a substitute Director shall be elected at the General Meeting of Shareholders; *provided, however, that* the foregoing shall not apply if the number of remaining Directors satisfies the requirement Article 35 hereof and such vacancy does not cause any difficulties in business operation of the Company.

(2) If the number of Non-executive Directors does not satisfy the requirement referred to in Article 35 due to the death or resignation of Non-executive Directors, etc., Non-executive Directors shall be elected to fill the vacancy at the first General Meeting of Shareholders to be held after such occurrence so as to cause the number of Non-executive Directors to be such prescribed number.

Article 40 (Appointment of Representative Director, et al.)

The Company may appoint several Representative Directors, including one appointed as the Chairman, by the resolution of the Board of Directors.

Article 41 (Duties of Directors)

(1) The Representative Director shall represent the Company and shall perform the matters resolved by the Board of Directors and oversee the business of the Company as determined by the Board of Directors.

(2) Directors who are not Non-executive Directors shall assist the Representative Director, and divide and perform their respective duties as may be determined by the Representative Director. In the case of an absence of, or an accident caused to, the Representative Director, the Directors shall take his/her place as the Representative Director in accordance with their order of priority as determined by the Board of Directors.

Article 42 (Director's Obligation)

(1) Directors shall attend the meeting of the Board of Directors and shall perform their respective duties faithfully. During his/her service period and after his/her retirement, Directors shall not disclose trade secrets of the Company obtained in the course of his/her performance of duties.

(2) If any Director finds any facts which may cause substantial losses to the Company, such Director shall promptly report to the Audit Committee thereof.

Article 43 (Composition and Convening of the Meeting of Board of Directors)

(1) The Board of Directors shall consist of Directors, and shall resolve important matters regarding the business affairs of the Company.

(2) The Chairman of the Board of Directors shall be elected from among the non-executive directors in accordance with the resolution of the Board of Directors on an annual basis.

(3) The Meeting of the Board of Directors shall be convened at least once per fiscal quarter.

(4) The Meeting of the Board of Directors shall be convened by giving notice to each Director at least three (3) days prior to the scheduled date of such Meeting. In the absence of or if accidents are caused to the Chairman of the Board of Directors, the Director(s) as determined by the Board of Directors shall take his/her place as the Representative Director. However, the said notice period may be shortened in urgent cases and the said procedures may be omitted with the consent thereon of all Directors.

(5) The Company shall organize the Board of Directors so that persons from various fields with appropriate experience and knowledge required for the performance of duties as directors of a financial company may be included therein, and shall put its effort so that the Board of Directors may not be comprised of directors with certain common background in their expertise nor be weighted towards certain occupations or some groups by representing the interest thereof, etc

(6) Matters to be resolved by the Board of Directors, and other matters regarding the operation of the Board of Directors shall be determined in accordance with the resolution of the Board of Directors.

Article 44 (Method of Resolution)

(1) The quorum for the Board of Directors shall be the presence of at least more than one half (1/2) of the Directors, and all resolutions of the Board of Directors shall require the affirmative votes of a majority of the Directors present at the meeting of the Board of Directors; provided that amendment of the Articles of Incorporation, appointment of the Representative Director and other matters requiring the resolution of General Meeting of Shareholders shall be adopted by the affirmative vote of a majority of the Directors in office; provided, further, that any matter falling under Articles 397-2 (Prohibition on Usurpation of Corporate Opportunity) and 398 (Prohibition on Transaction between Director and Company) of the Korean Commercial Code shall be adopted by the affirmative vote of equal to or more than two-thirds(2/3) of the Directors in office.

(2) The Board meetings may be held by means of an audio conference that can simultaneously transmit and receive sound, whereby all or part of the Directors may participate in the meeting and vote on matters at the same time. In such case, a Director participating in the meeting by such arrangement shall be considered present at the meeting.

(3) Any Director who has an interest in the matters to be resolved at the Meeting of the Board of Directors shall not be entitled to vote at such Meeting.

Article 45 (Minutes of the Meeting of Board of Directors)

(1) The proceedings of a Board meeting shall be recorded in the minutes.

(2) The agenda, proceedings, resolutions, dissenting director (if any) and his/her reasons for dissenting of a Board meeting shall be recorded in the minutes on which the names and seals of the Directors present at the meeting shall be affixed or signed by them.

Article 46 (Power and Obligation of the Board of Directors to the Wholly-Owned Subsidiary, etc.)

(1) The Board of Directors shall retain the power to give advice, corrective recommendation and request for submission of materials with respect to the matters of management of the subsidiary of which the total

issued and outstanding shares are owned by the Company ("Wholly-Owned Subsidiary"), and the Sub-subsidiary company of which the total issued and outstanding shares are owned by the Wholly-Owned Subsidiary ("Wholly-Owned Sub-subsidiary", and "Wholly-Owned Subsidiary, etc." together with Wholly-Owned Subsidiary).

(2) When exercising the power under Paragraph (1) above, the Board of Directors shall be liable for the followings:

1. The Board of Directors shall not hinder the soundness of management, consumer's right and the sound order of financial transactions;

2. During his/her service period and after his/her retirement, Directors shall not disclose trade secrets of the Wholly-Owned Subsidiary, etc. obtained in the course of his/her performance of duties; and

3. The Board of Directors shall not violate the relevant laws and regulations.

(3) The Board of Directors shall set up the standards of internal compliance in accordance with the relevant laws and regulations such as Financial Holding Companies Act in order to supervise direct and indirect subsidiaries of the Company, and may appoint the compliance officer to inspect compliance of such standards.

Article 47 (Committees)

(1) The Company may establish various committees including following committees within the Board of Directors as determined by the resolution of the Board of Directors for the purposes of smooth operation of the Board of Directors and effective management of the Company:

1. Risk Management Committee;

2. Evaluation and Compensation Committee;

3. Non-executive Director Nominating Committee;

4. Audit Committee Member Nominating Committee; and

5. Corporate Governance Committee.

(2) Matters regarding the composition, power, operation, etc. of each committee shall be determined by the resolution of the Board of Directors.

(3) Article 43, Paragraph (4), Article 44 and Article 45 shall apply *mutatis mutandis* with respect to the committees.

Article 48 (Remuneration for Directors, etc.)

The remuneration and severance pay for the Directors shall be determined by a resolution of the General Meeting of Shareholders.

Article 49 (Group Management Control Committee, Etc.)

(1) The Company shall establish the Group Management Control Committee in order to effectuate strategic managerial decision-making for the Company, its Subsidiaries, etc., and the matters regarding the operation of the Group Management Control Committee shall be determined by the Board of Directors.

(2) The Company may retain consultants, honorary directors, advisors, etc. by a resolution of the Board of Directors.

CHAPTER VI
AUDIT COMMITTEE

Article 50 (Constitution of Audit Committee)

(1) The Company shall establish an Audit Committee, as prescribed by the Financial Holding Companies Act and other applicable laws and regulations instead of an auditor.

(2) The Audit Committee of the Company shall consist of three (3) or more Non-executive Directors, who are recommended by the Audit Committee Member Nominating Committee, which is composed of all Non-executive Directors under Article 41-2 of the Financial Holding Companies Act.

(3) Two-thirds (2/3) of the members of the Audit Committee shall be elected from the Non-executive Directors. The members of the Audit Committee who are not Non-executive Directors shall satisfy the requirements of Article 41, Paragraph (3) of the Financial Holding Companies Act.

(4) The Members of the Audit Committee shall have any of the following qualifications and not less than one of the members of the Audit Committee shall be a professional in financial affairs pursuant to the relevant laws:

1. A licensed person such as lawyer, CPA with at least 5-year work experience in the licensed business;
2. A person who has been a researcher in the institutions or a full-time instructor in colleges, having a master's degree in law or economics-business with at least 5-year work experience;
3. A person who has been served as a professional in accounting, internal compliance, audit, Information Technology (IT) and so on with at least 10-year work experience in finance related organizations;
4. A person who has served as an executive official for at least 5-year, or as an employee who has a specific and practical knowledge in economics, business, law, accounts and the like for at least 10-year in Stock listed corporations; or
5. A person who is recognized as being equivalently qualified as those listed in items 1 through 4 by the Board of Directors or General Meeting of the Shareholders.

(5) The Chairman of the Audit Committee shall be elected among the members who are Non-executive Directors by a resolution of the Audit Committee.

(6) If the number of members of the Audit Committee does not satisfy the requirement referred to Paragraph (3) due to the death or resignation of members or any other reason, the members shall be elected to fill the vacancy at the first General Meeting of Shareholders to be held after such occurrence so as to cause the number of members to be such prescribed number.

Article 51 (Duties of Audit Committee)

(1) The Audit Committee shall audit Directors' performance of their duties and may request business reports from any Director, or investigate the business and status of property of the Company.

(2) The Audit Committee may, if necessary, request to call the Board meeting by submitting, in writing, a purpose and reason for such meeting to a person authorized to convene the Meeting of the Board of Directors.

(3) The Audit Committee may convene the Meeting of the Board of Directors in the event a person authorized to convene the Meeting of the Board of Directors fails to convene such meeting without delay according to Paragraph (2) above.

(4) The Audit Committee shall inspect the matters listed in the agenda of, and documents submitted to, a General Meeting of Shareholders to investigate whether there is any event violating the laws or these Articles of Incorporation and the Chairman of the Audit Committee shall express his/her opinion to the General Meeting of Shareholders.

(5) The Audit Committee may request the Board of Directors to convene the Extraordinary General Meeting of Shareholders by submitting documents stating the agenda and reasons for convening such meeting.

(6) The Audit Committee may request business reports from any subsidiary of the Company when it is necessary to perform its duties. In this case, if such subsidiary does not report to the Audit Committee immediately or the Audit Committee needs to verify the contents of the reports, it may investigate the status of business and the financial condition of the subsidiary.

(7) The Audit Committee shall retain the power to audit the status of the operation and property and to request the submission of materials in relation to the managerial matters of the Wholly-Owned Subsidiary, etc. and with respect to the exercise of such power Article 46 Paragraph (2) shall apply *mutatis mutandis* to the liability of the Audit Committee.

(8) In the selection and appointment of an external auditor, the Audit Committee shall approve it.

(9) In addition to the matters referred to in Paragraphs (1) through (8), the Audit Committee shall carry out the matters delegated by the Board of Directors.

(10) The Board of Directors shall not overrule the decisions of the Audit Committee.

(11) The Audit Committee may request professional support at the Company's expenses.

Article 52 (Audit Committee's Record)

The Audit Committee shall record the substance and results of its audit in the Audit Committee's record, on which the name and seal of the Audit Committee Member who has performed such audit shall be affixed or shall be signed by such Audit Committee Member.

CHAPTER VII
ACCOUNTING

Article 53 (Fiscal Year)

The fiscal year of the Company shall begin on January 1 and end on December 31 of each year.

Article 54 (Preparation and Maintenance of Financial Statements and Business Report, etc.)

(1) The Representative Director of the Company shall prepare the following documents to be submitted to the Ordinary General Meeting of Shareholders, together with supplementary data for items 1 through 3 and business reports, and have such documents audited by the Audit Committee no later than six (6) weeks before the date of the Ordinary General Meeting of Shareholders:

1. balance sheet(statements of financial position referred to in Article 1-2 of the Act on the External Audit of Stock Companies);
2. statements of profit and loss; and
3. other documents which record the Company's financial condition and business performance as set forth by the Enforcement Decree of the Korean Commercial Code; and
4. consolidated financial statements for items 1 through 3 as set forth by the Enforcement Decree of the Korean Commercial Code.

(2) The Audit Committee shall submit an audit report to the Representative Director no later than one (1) week before the date of the Ordinary General Meeting of Shareholders.

(3) The Representative Director shall keep on file copies of the documents described in Paragraph (1) above, together with the business report and Audit Committee's audit report thereon, at the head office of the Company for five (5) years, and certified copies of all of such documents at the branches of the Company for three (3) years, beginning from one (1) week before the date of the Ordinary General Meeting of Shareholders.

(4) Upon obtaining approval for the documents mentioned in Paragraph (1) above from the General Meeting of Shareholders, within three (3) months from the end of the relevant fiscal year, the Representative Director shall make a public notice of the balance sheet(statements of financial position referred to in Article 1-2 of the Act on the External Audit of Stock Companies), income statement, consolidated financial statements pursuant to the Act on External Audit of Stock Companies which are designated by the FSC and the opinion of an external auditor. In doing so, notwithstanding the provisions of Article 4, the Company may use the means of electronic document as prescribed by Article 55-2 of the Financial Holding Companies Act.

Article 55 (Appointment of External Auditor)

The Company shall appoint the external auditor with the approval of the Audit Committee, and shall report such appointment to the Ordinary General Meeting of Shareholders to be held during the fiscal year in which he/she is appointed or to the shareholders as of the latest closing date of the shareholders' registry in writing or in electronic form, or shall give a public notice regarding such appointment via the Company's website and make such notice available until the end of the relevant fiscal year with respect to which the audit is conducted.

Article 56 (Disposal of Profits)

The Company shall dispose of the unappropriated retained earnings as of the end of each fiscal year as follows:

1. earned surplus reserves;
2. other statutory reserves;
3. dividends;
4. temporary reserves; and
5. other appropriations of earned surplus.

Article 57 (Retirement of Shares)

(1) The Company may retire the shares within the scope of profits attributable to the shareholders by the resolution of the Board of Directors.

(2) In order to retire the shares pursuant to Paragraph (1), the Board of Directors shall adopt the following resolutions:

1. Types and the total number of shares to be retired;
2. The total amount of shares to be acquired for retirement; and
3. Acquisition period or retirement date (the acquisition period or retirement date shall be before the Ordinary General Meeting of Shareholders to be held first after the resolution of such retirement).

(3) In case of acquisition of shares for the purpose of retirement pursuant to Paragraph (1), the following criteria shall be followed:

1. In the case of acquisition of shares for the purpose of retirement, such acquisition shall be made in accordance with the method and criteria as prescribed in the relevant laws, such as the FSCMA, etc.
2. Total price of the shares to be acquired for the purpose of retirement shall not be more than the amount as prescribed in the relevant laws, such as the FSCMA, etc. within the scope available for dividend as at the end of such fiscal year pursuant to Article 462, Paragraph (1) of the Commercial Code**.**

(4) When the shares are retired pursuant to Paragraph (1), the matters referred to in each Subparagraph of Paragraph (2) and the results of retirement shall be reported to the Ordinary General Meeting of Shareholders to be held first after the resolution of such retirement.

Article 58 (Dividends)

(1) Dividends may be distributed in cash or stock.

(2) In case the dividends are to be distributed in stock and the Company has class shares, the stock dividend distribution may be made in shares of different types by a resolution of the General Meeting of Shareholders.

(3) Dividends of Paragraph (1) above shall be paid to the shareholders registered in the Company's registry of shareholders or the registered pledgees as of the last day of each fiscal year.

Article 59 (Quarterly Dividends)

(1) The Company may distribute cash dividends to the shareholders as of the end of March, June or September by resolution of the Board of Directors.

(2) Quarterly Dividends provided under Paragraph (1) shall be decided by a resolution of the Board of Directors, provided that the specific method and limit, etc. of quarterly dividends shall satisfy the relevant laws and regulations including the FSCMA, etc..

(3) In case the Company issues new shares through a shares offering, bonus issue, stock dividend, conversion of convertible bonds, exercise of warrant of bond with warrants or stock options, the new shares shall be deemed to have been issued at the end of the fiscal year immediately prior to the fiscal year during which the new shares are issued with respect to distribution of dividends for such new shares.

(4) In case of distributing quarterly dividends, the same dividend rate as that of common shares of the Company shall be applied to non-voting shares with preferred dividend under Article 10 unless otherwise determined at the time of issuance.

Article 60 (Expiration of Right to Payment of Dividends)

(1) The right to demand payment of dividends shall extinguish by prescription if not exercised within five (5) years.

(2) The dividends, for which the right has been extinguished under Paragraph (1) above, shall be kept by the Company.

Article 61 (Supplementary Provision)

Matters not specified in these Articles of Incorporation shall be determined by the resolution of the Board of Directors or the General Meeting of Shareholders, or in accordance with the Commercial Code or other laws.

ADDENDUM (2008.9.29)

Article 1 (Effective Date)

These Articles of Incorporation shall become effective from the date of registration of incorporation.

Article 2 (Initial Fiscal Year after Incorporation)

Notwithstanding the provision of Article 53, the initial fiscal year of the Company after incorporation shall be from the date of incorporation to December 31, 2008.

Article 3 (Initial Transfer Agent after Incorporation)

The initial transfer agent of the Company after incorporation shall be Korea Securities Depository.

Article 4 (Appointment of Initial Director, Representative Director, et al. after Incorporation)

Notwithstanding the provisions of Articles 36 and 39, the initial Director and the initial Representative Director after incorporation shall be appointed at the General Meetings of Shareholders of the Stock Transfer Companies, at which the resolution to approve the stock transfer is adopted.

Article 5 (Term of Office of Initial Director after Incorporation)

Notwithstanding the provisions of Articles 38, the term of office of the initial Director after incorporation shall be determined, to the extent it does not exceed three (3) years, at the General Meetings of Shareholders of the Stock Transfer Companies at which the stock transfer plan is approved.

Article 6 (Appointment of Initial Non-executive Director after Incorporation)

Notwithstanding the provision of Article 36, Paragraph (2), the initial Non-executive Director of the Company after incorporation shall be appointed at the General Meetings of Shareholders of the Stock Transfer Companies, at which the resolution to approve the stock transfer is adopted, without recommendation of the Non-executive Director Candidate Nomination Committee.

Article 7 (Appointment of Initial Members of Audit Committee after Incorporation)

Notwithstanding the provision of Article 50, Paragraph (2), the initial members of Audit Committee shall be appointed at the General Meetings of Shareholders of the Stock Transfer Companies, at which the resolution to approve the stock transfer is adopted, without recommendation of the Audit Committee Member Nominating Committee.

Article 8 (Remuneration of Directors in Initial Fiscal Year after Incorporation)

Notwithstanding the provision of Article 48, the remuneration of Directors in initial fiscal year after incorporation shall be determined at the first meeting of the Board of Directors after incorporation, to the extent not exceeding two (2) billion Won.

Article 9 (Stock Transfer Companies)

In order to incorporate the Company, the following Stock Transfer Companies hereby prepare these Articles of Incorporation and affix their respective names and seals hereon on August 25, 2008.

ADDENDUM (2009.3.27)

Article 1 (Effective Date)

The above amendments to the Articles of Incorporation shall take effect from March 27, 2009.

ADDENDUM (2010.3.26)

Article 1 (Effective Date)

These Articles of Incorporation become effective as of March 26, 2010. However, Article 30, Paragraph (1) becomes effective as of May 29, 2010.

Article 2 (Transitional Measures)

With respect to the non-executive directors appointed after these Articles of Incorporation become effective and the calculation of their terms of office under Article 38, Paragraph (5) hereof, Article 38, Paragraphs (6) and (7) will be applicable to the terms of office served before this Article of Incorporation becomes effective.

ADDENDUM (2012.03.23)

Article 1 (Effective Date)

The amendments to Article 40 of the Articles of Incorporation shall become effective from the date of approval by the General Meeting of Shareholders, March 23, 2012 and the other amendments shall become effective from April 15, 2012. Therefore, the amendments to the Articles of Incorporation shall not apply to any shares and bonds issued before the effective date of the Articles of Incorporation.

ADDENDUM (2015.03.27)

Article 1 (Effective Date)

The Articles of Incorporation shall become effective as of March 27, 2015; provided, that Article 37 shall apply to the Non-Executive Directors only who are appointed, reappointed or serve consecutive terms after the effective date hereof.

Exhibit 12.1(a)

I, Jong Kyoo Yoon, certify that:

1. I have reviewed this annual report on Form 20-F of KB Financial Group Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the company as of, and for, the periods presented in this report;
4. The company's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the company and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the company, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the company's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the company's internal control over financial reporting that occurred during the period covered by the annual report that has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting; and
5. The company's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the company's auditors and the audit committee of the company's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the company's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the company's internal control over financial reporting.
